Annual Statistical Report of Felens and Misdemeanants
Committed to the Virginia State Correctional System
During the Year Ended June 30, 1977
and Felens Confined in the Correctional System
on June 30, 1977
Including Felon Recidivists Committed and Confined

Department of Corrections

Commonwealth of Virginia

PREFACE

The information in the following annual statistical report was compiled by the Department of Corrections, Bureau of Research, Reporting and Evaluation. This year's report includes the felon recidivists information formerly published in the "Report of Recidivists Committed to the Virginia State Penal System Year Ended June 30." All questions, remarks or requests relating to the report should be directed to this agency.

Ø

FELONS COMMITTED TO THE VIRGINIA STATE CORRECTIONAL SYSTEM YEAR ENDED JUNE 30, 1977

Number of Commitments:

A total of 3,385 new felons were committed to the Virginia State Correctional System during the fiscal year which ended June 30, 1977. This reflects an increase of 712 or 26.6 percent over the 2,673 felons committed during fiscal year 1976, and represents the largest number of new commitments to enter the correctional system during the past ten years.

Race and Sex:

The 3,385 commitments were 44.6 percent white and 55.4 percent non-white; only 174 new felons (5.1 percent) were female.

Age:

The average age of the new commitments was 26 years, while the most frequent age was 19 years, with 315 occurrences (9.3 percent of the total). Over one-half of the 3,385 new felons (1,838 or 54.3 percent) were 24 years of age or younger.

Court Committed From:

A study of the 3,385 new commitments shows that 1,962 or 58.0 percent were received from city courts, while 1,423 or 42.0 percent were committed from county courts. As in the past, a large number of felons were committed by the cities of Richmond and Norfolk. Richmond, with 4.3 percent* of the total state population, committed 13.9 percent of the new felons; Norfolk, with 5.5 percent* of Virginia's population, accounted for 10.6 percent of the new commitments. While the total new commitments increased by 26.6 percent over the previous year, Richmond committed 39.9 percent more in fiscal 1977 and Norfolk courts increased their commitments by 59.8 percent. Of the counties, Fairfax had the largest number of new commitments with 192 or 5.7 percent of the total commitments. This represents an increase of 36.2 percent from the previous year's figure of 141 occurrences.

Offenses:

A study of the types of offenses committed by new felons shows that 1,418 or 41.9 percent were sentenced for offenses against property and 1,420 or 41.9 percent had committed offenses against persons. This year showed a decrease in commitments for drug law violations; there were 356 felons or 10.5 percent felons committed for this offense type. During

the previous fiscal year, 14.0 percent had been sentenced for this offense. The level of drug violation commitments had increased from 1.5 percent in fiscal 1965 to a high of 20.7 percent in fiscal 1972, and has since decreased to the current level of 10.5 percent.

Length of Sentence:

A study of the length of sentence received by new commitments shows that 1,956 or 57.8 percent were for five years or less (compared to the 59.5 percent last year); 348 felons, or 10.3 percent, received sentences of twenty years or more (excluding life), a slight increase over last year's figure of 10.0 percent. The number of life sentences given by the courts increased this year to 54 (1.6 percent) from 45 (1.7 percent) in fiscal 1976.

Intelligence:

One-half of the new felons tested (50.1 percent) were in the normal range of intelligence (I. Q. 90-109). The percentage of new commitments tested to be severely or moderately retarded has increased to 4.4 percent in fiscal 1977 from 3.8 percent of those tested in fiscal 1976.

Military Service:

Of the felons committed, 922 were known to have served in the Armed Forces. Of these, 243 or 26.4 percent had received an undesirable, bad conduct, dishonorable discharge or were in the service at the time of the offense and had not yet received a discharge at the time of commitment to the correctional system. Discharges for these persons are usually other than honorable.

Habits:

At time of commitment, there were 2,247 prisoners with a known history of drug usage, representing 66.4 percent of the total. Only 5.3 percent of all new commitments had no known record of alcohol or drug use.

Juvenile Record:

Juvenile record information was available for 3,206 of the new commitments. Of these, 1,789 or 55.8 percent had known juvenile records and 1,417 or 44.2 percent, did not. The only year during the past five fiscal years which did not conform to this trend of even distribution was fiscal 1974, when 34.8 percent had known juvenile records and 65.2 percent did not. There were 704 new commitments (22.0 percent of those whose juvenile history is recorded) who had been previously committed to a state learning center.

^{*}Figures for July 1, 1977, from the Virginia Department of Health, Bureau of Vital Statistics estimates.

FELONS CONFINED IN THE VIRGINIA STATE CORRECTIONAL SYSTEM ON JUNE 30, 1977

Race and Sex:

Of the 6,721 felons confined on June 30, 1977, 2,589 or 38.5 percent were white, and 4,132 or 61.5 percent were non-white. Female prisoners constituted 3.7 percent of the population.

Age:

The felon population on June 30, 1977 exhibited an average age of 29 years; however, the most frequent age was 24 years. The median age of the population was 26 years.

Court Committed From:

Courts in Virginia cities committed 61.6 percent (4,137) of the felons confined on June 30, 1977, while county courts accounted for 38.4 percent (2,584). Felons committed by courts in the city of Richmond represented 17.0 percent of those confined, while Norfolk courts committed 10.3 percent. Among the county courts, Fairfax committed the largest number with 286 or 4.3 percent of the total confined population.

Offenses:

In comparing the percentage of new commitments sentenced in each of the offense categories, offenses against persons accounted for 41.9 percent of the commitments and offenses against property also accounted for 41.9 percent of the commitments. A greater portion of the felons confined on June 30, 1977 had committed offenses against persons (56.6 percent) an against property (32.0 percent). The percentage of confined felons in the correctional system for violations of narcotic drug laws (8.4 percent) is below that for felons newly committed for these offenses (10.5 percent). A review of the breakdown of offenses for felons confined at the end of fiscal year 1977 shows that the two most common offenses are Robbery (unspecified), with 1,047 occurrences (15.6 percent), and Burglary (including Statutory), with 989 occurrences (14.7 percent).

Length of Sentence:

Of the felons confined on June 30, 1977, 1,669 of these (26.4 percent) were serving sentences of twenty years or more, excluding life sentences. Those felons serving life sentences

constituted 5.9 percent (400), while no felons had received the death sentence. The median length of sentence for felons confined, excluding those with life sentences, was ten years. This includes additional time received after commitment for recidivism, escape and/or other offenses.

Intelligence:

Half of the new commitments tested (50.1 percent) were of normal intelligence (I. Q. of 90-109). A similar percentage of confined felons who had been tested displayed normal intelligence (50.0 percent). Of the confined felons tested, 320 or 4.9 percent were severely or moderately retarded.

Juvenile Record:

Of the 6,343 confined felons for which juvenile record information was available at time of commitment, 57.9 percent had known records of juvenile delinquency and 42.1 percent did not.

Ó

MISDEMEANANTS OR FELONS RECEIVING MISDEMEANANT SENTENCES COMMITTED TO THE VIRGINIA STATE CORRECTIONAL SYSTEM YEAR ENDED JUNE 30, 1977

Number Committed:

There were 1,236 misdemeanants committed to the Virginia Correctional System during the fiscal year which ended June 30, 1977. This reflects a decrease of 351 or 22.1 percent from the previous fiscal year. The number of misdemeanants committed has declined every year since 1967, when there were 3,817 commitments until fiscal 1976 when there was an insignificant increase.

Location:

The largest portion of the misdemeanants (85.0 percent) were initially received by the Correctional Field Units. This reflects a slight decrease from the previous year when the Field Units received 88.5 percent of the misdemeanant commitments.

Race and Sex:

The commitments were 54.3 percent white and 45.7 percent non-white. A breakdown by sex shows that 88.8 percent of the misdemeanants were male and 11.2 percent were female.

Age:

Of the 1,236 misdemeanants committed, ages were recorded for 1,234; of these, one-half (50.1 percent) were under the age of 24. The average age of these 1,234 misdemeanants was 26.4 years.

Offenses:

Of the 1,236 misdemeanants committed, 59.4 percent (734) were sentenced for offenses against property, 15.3 percent (189) for offenses against persons, and 10.6 percent (131) for offenses against public policy, economy and health, which includes 128 misdemeanants confined for violation of narcotic drug laws. The most frequent offense was Petty or Unspecified Larceny (182 or 14.7 percent), followed by Violation of Narcotic Drug Laws (128 or 10.4 percent).

Court Committed From:

Courts in Virginia counties sentenced 50.4 percent (623) of the misdemeanants, while the remaining 49.6 percent (613) were committed by city courts. In studying the individual counties, Henrico committed the largest number with 103 (16.5 percent of all county commitments). Among the cities, Richmond committed the largest number of the misdemeanants with 110 (17.9 percent of all city commitments); Norfolk was second with 73 (11.9 percent of all city commitments); Hampton was third with 69 (11.3 percent of all city commitments).

0

FELON RECIDIVISTS (VIRGINIA) COMMITTED TO THE VIRGINIA STATE CORRECTIONAL SYSTEM YEAR ENDED JUNE 30, 1977

Number of Commitments:

Among the 3,385 prisoners committed on felon sentences during the fiscal year which ended June 30, 1977, there were 599 or 17.7 percent, who had served one or more previous felon sentences in the Virginia Correctional System. This recidivist rate of 17.7 percent shows a slight increase from fiscal 1976, when the rate was 17.3 percent. There was a sharp decline from fiscal 1974, when the recidivism rate had risen to 24.1 percent, after remaining fairly constant during the three year period 1971-1973 (17.7 percent, 16.6 percent, and 17.0 percent respectively).

Race and Sex:

The 599 recidivists were 65.3 percent non-white, 34.7 percent white; 96.5 percent of the recidivists were male. This compares to all the new commitments who were 55.4 percent non-white, 44.6 percent white, and 94.9 percent male. Of the 1,509 white new commitments during the year, 208 or 13.8 percent were recidivists; the 1,876 non-white new commitments included 391, or 20.8 percent, who were repeaters.

Prior Commitments:

Of the 599 recidivists, 463 or 77.3 percent had served one prior Virginia felon sentence; 106 or 17.7 percent had served two prior sentences; and 30 or 5.0 percent had served three or more prior sentences. This distribution of frequency of prior felon commitments is changed from last fiscal year when there was a smaller percentage (4.5 percent) of recidivists who had three or more sentences. The percentage of recidivists with two prior sentences was higher in fiscal 1976 (21.2 percent) than recorded this year.

Parole or Pardon Status:

A study of the recidivist data shows that 141 repeaters or 23.5 percent had been paroled from their last sentence, but had been discharged from parole supervision at the time the present offense was committed. Only 60 repeaters or 10.0 percent were on parole from their last sentence at the time they committed the offense for which they were returned. The percentage of recidivists who were on parole when their present offense was committed showed a decrease from fiscal 1976, when this figure was 19.0 percent.

Offenses:

Nearly half of the Virginia repeaters were convicted of offenses against property (48.4 percent), while 34.1 percent had committed offenses against persons, and 17.5 percent were committed for other offenses. In comparison to the breakdown of all new commitments, the study reveals that 41.9 percent were in the system for offenses against property, 41.9 percent for offenses against persons, and 16.2 percent were committed for other offenses. The most frequent offense committed by the 599 repeaters was Burglary (including Statutory), with 132 occurrences, or 22.0 percent. The number of repeaters committed for violation of the narcotics law dropped from 11.4 percent in fiscal 1976 to 10.5 percent in this fiscal year.

Court Committed From:

The percentage of recidivists committed by city courts in Virginia rose from 59.4 percent in fiscal 1976 to 65.3 percent in fiscal 1977. As with the new commitments, Richmond and Norfolk Courts committed the most recidivists, with 21.5 percent and 12.0 percent, respectively. Fairfax led the county courts, with 27 recidivists committed, or 4.5 percent of the total, a 12.5 percent increase from fiscal 1976 when there were 24 recidivists committed from Fairfax.

Age:

The 599 recidivists display an average age of 31 years. This compares to an average age of 26 years for all new commitments. The most frequent age of the recidivists was 24 years (56 occurrences, or 9.3 percent); over half of the repeaters (319, or 53.3 percent) were under 29 years of age.

Intelligence:

Of those tested, 51.5 percent of the recidivists were classified as normal (I. Q. 90-109), 16.6 percent as dull normal (I. Q. 80-89), 15.5 percent as bright normal (I. Q. 110-119), and 11.3 percent as borderline, moderately or severely retarded (I. Q. 43-79). After steadily increasing from 37.5 percent in fiscal 1971, the percentage of recidivists displaying normal intelligence seems to have leveled at the current figure of approximately fifty percent.

Length of Sentence:

The most frequent sentence received by the 599 recidivists was five years. The median length of sentence for this fiscal year was also five years. Excluding the ten repeaters who entered the correctional system with life sentences, the average sentence was 9.3 years.

FELON RECIDIVISTS (VIRGINIA AND/OR ELSEWHERE) COMMITTED TO THE VIRGINIA STATE CORRECTIONAL SYSTEM YEAR ENDED JUNE 30, 1977

Number of Commitments:

During fiscal year 1977 there were 842 recidivists committed who had served one or more previous felon sentences in the Virginia Correctional System and/or elsewhere; this number represents 24.9 percent of the 3,385 new commitments during the year. This rate of recidivism shows very little change from fiscal 1976 when the rate was 24.4 percent. However, this rate shows an increase over fiscal 1975 when the rate was 22.9 percent, the lowest rate during the past ten years (fiscal 1972 also exhibited a recidivism rate of 22.9 percent).

Race and Sex:

Non-white recidivists numbered 507 (60.2 percent), and there were 335 (39.8 percent) white recidivists; of the 842 repeaters, 811 (96.3 percent) were male and 31 (3.7 percent) were female. The 1,509 white felons committed during fiscal 1977 displayed an overall recidivist rate of 22.2 percent, while non-white commitments (1,876) manifested a higher rate of 27.0 percent.

Prior Commitments:

Of the 842 recidivists who had served prior felon sentences in Virginia and/or elsewhere, 72.6 percent (611) had served one previous sentence, 18.4 percent (155) had served two prior sentences, and 9.0 percent (76) had served three or more prior felon sentences. Further analysis shows that the percentage of recidivists serving three or more previous sentences had declined during the five years 1970-1974, from 14.6 percent to 9.0 percent. In fiscal 1975 the figure rose to 13.3 percent and in fiscal 1976 it declined to 10.1 percent and this year continued to decline to the present level of 9.0 percent.

Parole or Pardon Status:

Recidivists who had been paroled from their last sentence, but had been released from parole supervision before committing their new offense numbered 141 or 16.7 percent. Another 60 or 7.1 percent committed their present offense while on parole from their previous sentence. This compares to figures of 23.5 percent released from parole supervision and 10.0 percent on parole for recidivists with only prior Virginia felon records.

Offenses:

A study of the distribution of recidivists by types of offenses reveals that 49.3 percent were committed for offenses against property, 34.3 percent were in the correctional system for offenses against persons, and the remaining 16.4 percent for other offenses. The figures for all new felon commitments in fiscal 1977 are 41.9 percent for offenses against property, 41.9 percent against persons, and 16.2 percent for other offenses. Burglary (including Statutory) was the most common offense for which the recidivists were committed.

Court Committed From:

Courts in Virginia cities committed 521 recidivists (61.9 percent), while the remaining 321 recidivists (38.1 percent) were received from county courts. Courts in Richmond (city) and Norfolk led in the commitments of repeaters, with 148 (17.6 percent) and 95 (11.3 percent) respectively. Fairfax County committed more than any other county court, with 62 (7.4 percent) repeaters.

Age:

While the most frequent age was 24 years (occurring 73 times or 8.7 percent), the average age was 31 years. Approximately one-half of the repeaters (51.3 percent) were under the age of 29.

Intelligence:

One-half of those recidivists who had been tested for intelligence level (409 or 51.1 percent) were within the normal range, 147 (18.3 percent) were bright normal, 117 (14.6 percent) were dull normal, and 74 (9.2 percent) were borderline, moderately or severely retarded.

Length of Sentence:

The average sentence for all new committed recidivists, excluding the sixteen who received life sentences, was 9.1 years. A sentence of five years was the most frequent, as well as being the median length of sentence.

FELON RECIDIVISTS (VIRGINIA) CONFINED IN THE VIRGINIA STATE CORRECTIONAL SYSTEM ON JUNE 30, 1977

Number Confined:

On June 30, 1977, 1,683 felons confined in the Virginia Correctional System had served one or more felon sentences in Virginia. This represented 25.0 percent of the total 6,721 felons confined on that date. A comparison of this recidivism rate with fiscal 1976 reveals that the rate has dropped this year from 25.8 percent.

Race and Sex:

The 1,683 recidivists with prior Virginia felon records had a racial composition of 31.7 percent white and 68.3 percent non-white, while the total felon population on June 30, 1977 was 38.5 percent white and 61.5 percent non-white. Among the 2,589 white and 4,132 non-white felons confined at the end of the fiscal year, there were 534 white and 1,149 non-white repeaters with previous Virginia felon sentences. This breakdown produces recidivist rates of 20.6 percent for whites and 27.8 percent for non-whites. There were 1,649 male (98.0 percent) and 34 female (2.0 percent) recidivists.

Prior Commitments:

Of the 1,683 recidivists, 69.8 percent had served one prior felon sentence in Virginia, 30.2 percent had served two or more prior felon sentences in Virginia.

Parole or Pardon Status:

Oc. 100

There were 336 recidivists confined (20.0 percent) who had committed their present offense while on parole from their previous Virginia felon sentence; 313 repeaters (18.6 percent) had been paroled from their last Virginia sentence, but had successfully completed their parole before committing their present offense. In comparison, 10.0 percent of the new recidivists committed in fiscal 1977, were on parole when committed and 23.5 percent had been discharged from parole supervision.

Offenses:

One-half of the recidivists (50.7 percent) were confined for offenses against persons, while 38.3 percent had committed offenses against property. This contrasts to the data on the

22

recidivist new commitments for fiscal 1977, which indicates that 34.1 percent had committed offenses against persons, and 48.4 percent had committed offenses against property. The confined recidivists, however, had committed offenses against persons less often and offenses against property more than the total felon population confined on June 30, 1977. Statutory Burglary, with 321 occurrences (19.1 percent) and Robbery (unspecified), with 214 occurrences (12.7 percent) were the most frequent offenses.

Court Committed From:

Virginia city courts sentenced 1,133 or 67.3 percent of the confined Virginia recidivists, while having committed 61.5 percent of the total felon population. County courts were responsible for the remaining 32.7 percent of the recidivists, compared to 38.4 percent of all confined felons. Richmond (city) and Norfolk led in the commitments of repeaters with 370 (22.0 percent) and 188 (11.2 percent) respectively. Fairfax led the counties with 58 or 3.4 percent of the repeaters.

Age:

While 51.6 percent of the recidivists were under 32 years of age, the average age of this group was 34 years. The most frequent was 30 years of age with 100 occurrences.

Intelligence:

A review of the data on tested level of intelligence reveals that 50.3 percent of the recidivists tested were classified in the normal range of intelligence, 19.9 percent were dull normal and 13.9 percent were borderline, moderately or severely retarded.

Length of Sentence:

Recidivists with prior Virginia sentences were most commonly serving a sentence of six years. The median sentence length was thirteen years and the average was seventeen years (excluding the 94 recidivists confined with life sentences).

FELON RECIDIVISTS (VIRGINIA AND/OR ELSEWHERE) CONFINED IN THE VIRGINIA STATE CORRECTIONAL SYSTEM ON JUNE 30, 1977

Number Confined:

A total of 2,203 recidivists having served one or more prior felon sentences in Virginia and/or elsewhere were confined on June 30, 1977 or 32.8 percent of the total felon population in the Virginia Correctional System. This percentage reflects a slight decrease from fiscal 1976, when the overall recidivist rate was 33.0 percent.

Race and Sex:

The racial composition of the confined recidivists was 36.0 percent white and 64.0 percent non-white. Male recidivists constituted 97.8 percent of the group, while the 48 female repeaters represented 2.2 percent of the total. The 794 white recidivists represented 30.7 percent of the total white felon population, and the 1,409 non-white recidivists comprised 34.1 percent of the total non-white felon population confined on June 30, 1977.

Prior Commitments:

One previous felon sentence in Virginia and/or elsewhere had been served by 64.8 percent of the recidivists; another 21.9 percent had served two prior sentences, and 13.3 percent had served three or more previous sentences.

Parole or Pardon Status:

Analysis of the confined recidivists data shows that 336 recidivists (15.2 percent) committed their present offense while on parole from their previous felon sentence, and 313 (14.2 percent) had been paroled from their last sentence but had been released from parole supervision before the new offense was committed.

Offenses:

Offenses against persons had been committed by 1,138 confined recidivists, or 51.7 percent, and 37.7 percent were confined for offenses against property. Recidivists in the correctional system for violation of narcotic drug laws numbered 173 or 7.8 percent of the total, while 8.4 percent of all felons were confined for the same offense. The most frequent crime for which the recidivists were confined was Burglary, including statutory, occurring 395 times (17.9 percent).

Court Committed From:

Among Virginia cities, which committed 64.6 percent of the confined recidivists, Richmond and Norfolk sentenced 432 and 246 recidivists respectively. Together, these two cities sentenced 30.8 percent of all recidivists and 47.6 percent of all city-committed repeaters. County courts were responsible for committing 35.4 percent of the confined recidivists; of these, Fairfax County had committed the greatest number, 105 (4.8 percent) to the Virginia Correctional System.

Age:

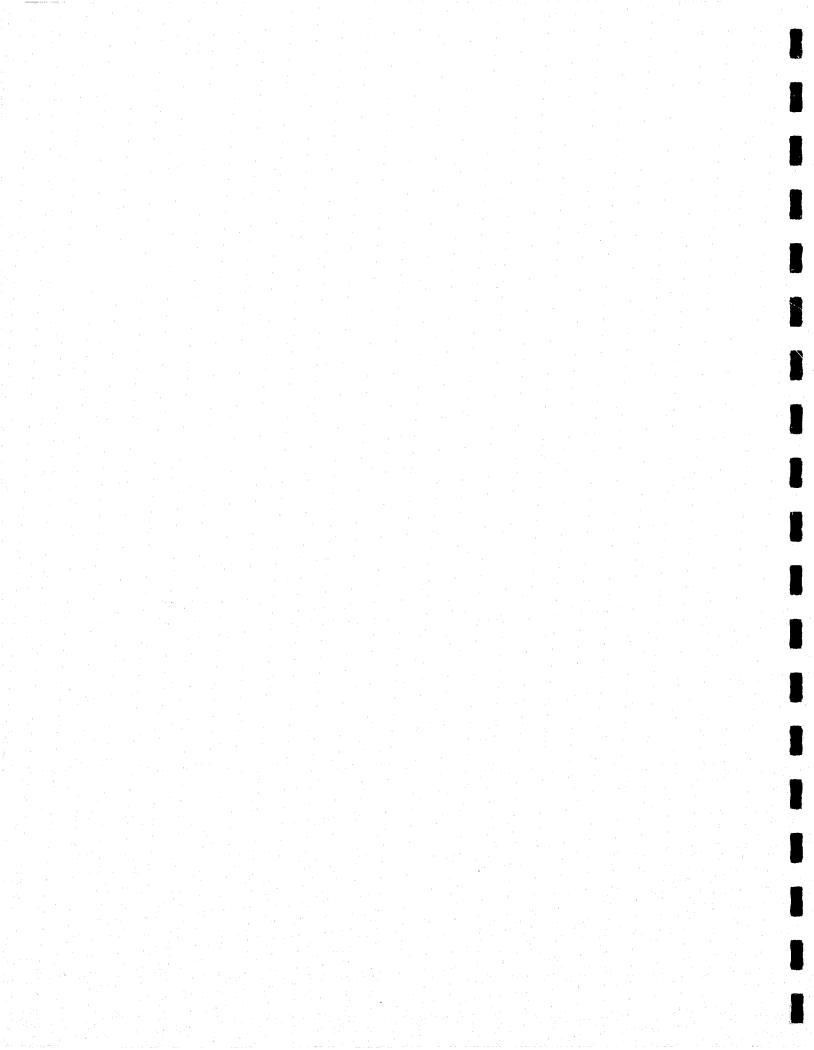

On the average, the 2,203 recidivists were five years olde: than the confined felon population, displaying a mean age of 33 years (the average age for all felons was 29 years). The median age of the recidivists was 31, while the most frequent age was 27 years. This compares with fiscal 1976, where the mean age was 34, median age was 31, and the most frequent age was also 27 years.

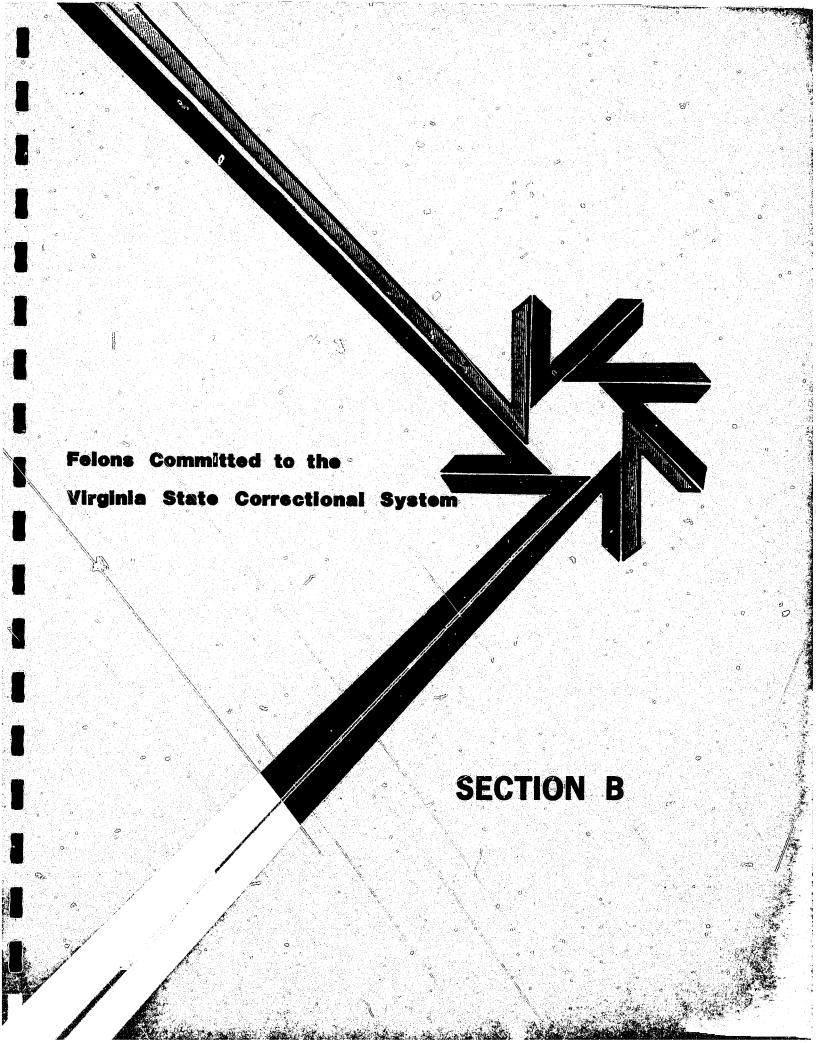

Intelligence:

Slightly more than one-half of the confined recidivists who had been tested for intelligence level (50.6 percent) were within the normal range (I. Q. of 90-109). Moderately or severely retarded recidivists numbered 85 (4.0 percent of those tested).

Length of Sentence:

A sentence length of five years occurred most often among the confined recidivists (162 or 7.3 percent), while sentences of six years (134 or 6.1 percent) were the second most frequent. The average length of sentence, excluding life sentences, for the confined recidivists was seventeen years.

**APPENDIX** SECTIONAL

### APPENDIX I

### **EXPLANATION OF DATA SOURCE**

### Felons:

The data used to produce the felon tables were extracted from felon inmate files located in the Division of Adult Services, under the File Maintenance Section of Classification and Treatment Services. The Bureau of Electronic Data Processing provided the computer processing.

### Misdemeanants:

The data on misdemeanants were provided by the admitting institution or correctional field unit, and submitted to the Bureau of Research, Reporting and Evaluation for editing. The Bureau of Electronic Data Processing provided the computer processing.
