1977 COUNTY JAIL AND DETENTION FACILITY REPORT**ACQUISITIONS**

This bulletin makes available state-wide information on adult and juvenile confinements to county detention facilities in Wisconsin during calendar year 1977. Included in the category of county detention facilities are: county jails, Brown County Reforestation Camp, Dane County Huber Center, Milwaukee House of Correction, Waukesha County Huber Center, and the three juvenile detention centers located in Dane, Milwaukee, and Racine counties. City and village lockup information is included in this publication as Appendix Table 1.

The Wisconsin Division of Corrections, Department of Health and Social Services, has statutory responsibility for collecting state-wide information on populations held in county and municipal detention facilities. This information currently is aggregated and reported annually by personnel of the various detention facilities who transmit it to the Division of Corrections where it is checked for accuracy and consistency and then assembled for publication.

There has been an increasing demand by planning agencies, local and state government, criminal justice agencies in Wisconsin and other states, and the general public for more meaningful information about persons confined and detained within county detention facilities. To satisfy these demands, the Division of Corrections has been gradually implementing a computerized reporting system designed to collect basic admission, release, and social history data into Wisconsin's county jails and detention facilities. As of January 1, 1978, the Jail Information System was operational in sixty-two county jails and the Milwaukee House of Correction.

A Jail Information Advisory Committee consisting of representatives from local law enforcement, local government, state planning agencies, and the general public has monitored development of the project and made recommendations. The Committee also monitors development of the computerized information system for Wisconsin's municipal jails, which is currently operational in fifty-nine facilities.

SUMMARY OF 1977 COUNTY JAIL AND DETENTION FACILITY DATA

There were over 90,000 reported confinements in county detention facilities during calendar year 1977, including over 74,000 adult and over 15,000 juvenile confinements (Tables 1 and 7). The term "confinements" is used here specifically because the figures do not represent the number of different individuals confined, but rather, the total number of confinements. It is known that many individuals were confined in county detention facilities more than once during the 1977 calendar year. However, there are no data specifying an unduplicated number of people held.

Information on adult confinements presented in Table 1 is categorized into two basic groupings--number held and number sentenced, with the number sentenced under Wisconsin Statute 973.09(4) as a sub group and included with the number sentenced. Number of adults sentenced is but one type of disposition or status reflecting detentions in county detention facilities. An adult arrested and held in a county jail may have many possible court dispositions--being dismissed, fined, given a term of probation, sentenced to a county detention facility, or sentenced to a state correctional facility. During 1977, more than 22 percent of all adult confinements had been reported as also sentenced to county detention facilities.*

As might be expected, the more populous counties generally had the greater number of confinements; e.g., during 1977, Milwaukee County institutions accounted for more than 24 percent of all adult confinements, 30 percent of all adult sentences, and 22 percent of all juvenile detentions. State-wide, females accounted for less than eight percent of total adult confinements, five percent of total adult sentences, and almost 31 percent of total juvenile detentions.

Within the publication Crime and Arrests 1977, Wisconsin's Crime Information Bureau reported that during 1977, there were 62,735 juvenile male arrests and 22,848 juvenile female arrests. Association of those statistics with the detention totals in Table 7 shows that approximately 21 percent of all the juvenile

*The percentage of sentenced cases to the total number of adult confinements can only be approximated because of the lack of uniformity in recordkeeping within the various county jails. In some jails, persons are booked each time they enter the facility. Therefore, a person booked, released on bond, and subsequently sentenced to jail under the original charge might be counted twice in some facilities and only once in others.

female arrests resulted in detention. Of juvenile male arrests, approximately 17 percent resulted in detention. Juvenile females thus had a slightly higher detention rate than did juvenile males.

There was less than a one percent decrease in the number of juvenile confinements during calendar year 1977 as compared with the previous year (Table 7). The number of adult confinements increased less than one percent, and those with actual sentences increased less than two percent.

Table 2 reports confinements by reason for holding: traffic violations, drug violations, alleged mental illness (for adults only), and all other types. More than 40 percent of all adult confinements were for traffic violations; less than six percent of all juvenile confinements were for alcohol violations (Tables 2 and 7). Drug violations accounted for less than five percent of total adult daily confinements and more than three percent of juvenile confinements. There were 917 adult confinements for alleged mental illness, representing an increase of 616 from 1976. More than 53 percent of the remaining adult confinements and more than 91 percent of the remaining juvenile confinements were not defined as to reason for holding.

County personnel were asked to record the highest total adult count and date recorded for adult confinements during calendar year 1977, and make two one-day counts of juveniles confined in their facilities during the first full week of January 1978. Exact counts recorded are shown in Tables 3 and 8 respectively. Total one-day counts of juveniles held on both weekday and weekend increased more than 29 percent from counts taken one year previously.

Tables 4 and 9 indicate the total number of adult and juvenile confinements by detaining facility and sex, according to Regional Criminal Justice Planning Agencies for the past five years. Total adult confinements have gradually increased at a rate of approximately six percent during 1973-76, but increased less than one percent in 1977. The most significant increases were realized in the Southeast and East Central regions, while the Metropolitan Milwaukee region actually decreased almost two percent in 1977. Total juvenile confinements have decreased more than eleven percent since 1973, although the decrease from 1976 to 1977 was less than one percent.

Tables 5 and 10 indicate detention rates of adult and juvenile confinements to county adult and juvenile population. Total adult confinements have increased more rapidly than comparable growth in total adult populations during the period 1973-77, resulting in a detention rate per thousand increase of approximately 16 percent since 1973. Total juvenile confinements, however, have decreased while total juvenile population has increased. The result is a total juvenile detention rate decrease of more than eleven percent and a total juvenile detention center rate decrease of almost 28 percent since 1973.

Information in Table 6 relates to length of detention of juveniles in county detention facilities. Of the total number of juvenile confinements, almost 30 percent were for a duration of under one day, approximately 35 percent additionally for one to two days, and the remaining 36 percent for over two days. Since 1976 the percentage of juvenile confinements for a duration under one day has decreased fifteen percent, while increasing about eleven percent for one or two days. Approximately eight percent of all juvenile detentions lasted over ten days, with the majority (70 percent) occurring in juvenile detention centers. Total state-wide detentions in juvenile detention centers for over ten days (877) were slightly less in 1977 than in 1976 (891). Detentions of short duration most commonly occurred in the county jails. Detention center confinements (Dane, Milwaukee, and Racine Counties) accounted for approximately 33 percent of total juvenile confinements.

There were 74 approved municipal lockups in Wisconsin in 1977, with the City of Milwaukee having seven district lockups. Local lockups differ from county detention facilities in that they can only be used to confine unsentenced persons for short periods of time (usually less than 48 hours) until either bond or initial court appearance is made. Persons held awaiting trial are transferred to county detention facilities.

A total of 57,694 confinements was reported in city and village lockups in 1977, of which 52,694 were adult and 5,444 juvenile (Appendix 1). These figures represent more than a 21 percent increase in total municipal confinements from 1976, and a two percent decrease in juvenile municipal confinements. The district

lockups in the City of Milwaukee accounted for 83 percent of all adult confinements and 75 percent of all juvenile confinements. State-wide, females accounted for approximately ten percent of total adult confinements and 21 percent of total juvenile confinements.

^aAs a condition of probation, the probationer was confined in the county jail between the hours or periods of their employment. This number is included with the number sentenced.

^bThe difference between the number held and the number sentenced is confinements by the court as a condition of bail, or safekeepers.

^cThe difference between the number held and the number sentenced is 35 confinements from another county.

^dAll confinements are transferred to Ashland or Sawyer County.

^eThe jail is only used for temporary confinement. All sentences served in Forest County.

^fFacility approved for adult male only.

^aAll County Juvenile Population Estimates were obtained from the Wisconsin Department of Justice, Crime Information Bureau.

^bThe Grand Total is not the sum of the Detention Facility and the County Jail Total, since Detention Facilities are located and included in counties.
