## Law Enforcement Code of Ethics

*As a Law Enforcement Officer, my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all men to liberty, equality and justice.*

*I will keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn, or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life, I will be exemplary in obeying the laws of the land and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.*

*I will never act officiously or permit personal feelings, prejudices, animosities or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.*

*I recognize the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of the police service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession . . . law enforcement.*

Kentucky Department of Justice  
Bureau of State Police  
Frankfort, Kentucky

John L. Smith  
Secretary

Kenneth E. Brandenburgh  
Commissioner

COMMONWEALTH OF KENTUCKY  
DEPARTMENT OF JUSTICE

FRANKFORT

OFFICE  
OF THE  
SECRETARY

To The Honorable Julian M. Carroll, Governor of the Commonwealth of Kentucky:

The figures contained in this 1977 Uniform Crime Report point up the great strides we have taken to uphold our commitment of making the streets of Kentucky safe for our citizens. The people of Kentucky have the right to feel safe and secure in their homes and on the streets. It is the grave responsibility of the Kentucky Department of Justice to insure that this right is not infringed upon.

While some offenses are related to social, environmental and interpersonal factors, others can be prevented by simple precautionary measures and public education efforts. The crimes of rape, burglary and larceny-theft are among the most horrendous crimes because they strike directly at our persons and homes.

These crimes have been on the decrease since 1975, when we began our statewide crime prevention efforts. Since its inception, the Office of Crime Prevention has enlisted the active involvement of 238 law enforcement agencies across the Commonwealth, representing more than 5,000 police officers, in our crime prevention efforts. These officers have enlisted some 200,000 Kentucky citizens in two basic programs designed to prevent home and business burglaries--Operation Identification and Operation Home Security.

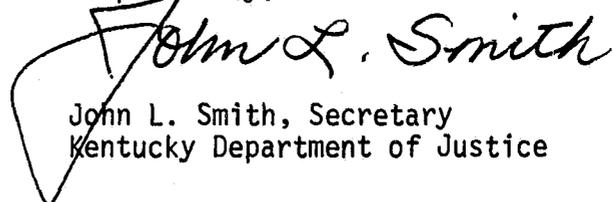

The figures contained in the report show that these efforts have been successful. Through our crime prevention efforts, we have seen annual increases in burglary in years prior to the inception of crime prevention programs turn into annual decreases over the last couple of years.

The safety and security of our citizens is being protected today far better than ever before because of a strong citizen-police partnership in crime prevention--a program which changes the emphasis of the criminal justice system from mere detection and reaction to crime to a more responsive and responsible level of prevention.

But, most importantly, our statewide crime figures indicate that fewer Kentuckians are becoming innocent victims of crime.

The Department of Justice is excited over the great strides made in reducing Kentucky's crime rate. Through increased participation in crime prevention programs, we believe we will realize an even more significant crime reduction in upcoming years.

Respectfully,

  
John L. Smith, Secretary  
Kentucky Department of Justice

COMMONWEALTH OF KENTUCKY  
KENTUCKY STATE POLICE  
FRANKFORT 40601

To The Honorable Governor Julian Carroll, and to the Citizens of Kentucky:

In accordance with the provisions of Chapter 17 of the Kentucky Revised Statutes, the eighth annual report of information gathered under the Kentucky Uniform Crime Reporting Program is hereby respectfully submitted.

To provide a better representation of crime in Kentucky a number of changes have been made in this year's Uniform Crime Report. For the first time since Kentucky's crime reporting program began, an attempt has been made to recognize the state's various regions, and to present crime and arrest statistics within Kentucky on a regional basis. Additionally all Part I offenses have been depicted in this issue for the past five years in order to provide an overview of major crime trends in Kentucky since 1973.

Pursuant to this overview, I am pleased to advise you that during 1977 the total crime rate in Kentucky decreased for the first time in five years. This decrease was especially apparent in the serious crime of Robbery, with reported offenses decreasing 16.8 percent, the lowest incidence of that crime since 1973. Another major reduction appeared in the crime of Larceny, reflecting a 9.4 percent decrease in reported offenses in 1977. Other decreases were reported in the Murder, Aggravated Assault, and Breaking and Entering categories.

A slight increase was recorded in the number of Auto thefts reported to police in 1977, although the per capita rate for that offense reflected a decrease. Forcible Rape was the only Part I offense having a sizable increase in incidents reported in 1977; the 659 cases reported statewide marked an 8.3 percent increase over the same statistic for 1976.

Arrest statistics for 1977 reflect increases in arrests for the Part I crimes of Robbery and Auto Theft, as well as for violations of Narcotic Drug Laws. Among crimes for which a decrease in arrests were recorded were Murder, Rape, Breaking and Entering, Larceny and alcohol-related offenses. Juvenile arrests increased by 3.2 percent during 1977 while adult arrests decreased by 5.2 percent, with total arrests reflecting a 4.4 percent decrease.

I would like to again extend my sincere appreciation to the many police agencies whose contributions have made this report possible. Through their work and efforts, and with the cooperation and assistance of every citizen of the Commonwealth, we look forward to future progress in law enforcement and a continuing reduction of crime in the Commonwealth of Kentucky.

Sincerely,

Kenneth E. Brandenburg  
Commissioner  
Kentucky State Police

# THE KENTUCKY UNIFORM CRIME REPORTING SYSTEM

## DEFINITION

The Kentucky Uniform Crime Reporting System is concerned with the Uniform compilation, classification, and analysis of crime statistics reported by all police agencies in Kentucky pursuant to guidelines and regulations prescribed by law.

The legal authority establishing the Uniform Crime Reporting System in Kentucky is found in Chapter 17 of the Kentucky Revised Statutes as amended by the 1976 General Assembly. This chapter establishes a centralized criminal history record information system under the direction of the commissioner of the Bureau of State Police and vests in the Bureau the authority to require statistical reporting from local agencies concerning crimes committed in their respective jurisdictions.

Kentucky utilizes a reporting system that is compatible with the Federal Uniform Crime Reporting procedures; therefore, state crime data can be readily absorbed into the national system.

## PURPOSE

Effective law enforcement requires a coordination of effort among various law enforcement agencies in regard to specific programs and areas of concentration. Inherent in the success of any coordinated effort is the intelligent application of law enforcement resources to a well defined problem area. Unless the problem area has been defined through valid methods based on accurate information, any concentrated allocation of resources runs a very large chance of being wasteful and unproductive.

Selective and coordinated enforcement becomes effective only when the type and volume of crime can be analyzed on the basis of accurate information systematically developed and comprehensively collated. Therefore, the availability of information revealing the location, frequency, and nature of criminal activity is essential if Kentucky's law enforcement agencies are to effectively combat the crime problem. The purpose of Kentucky's Uniform Crime Reporting System is to provide this information in an accurate, readable form.

## DEVELOPMENT

It became apparent during the planning and pre-operational phases of the program that an educational effort directed at the contributors and focusing on the methods and concepts of crime reporting was necessary.

Further study disclosed that, if adherence to the system and reporting of valid statistics were to be expected, personal liaison had to be established and

maintained between state and local police agencies. To accomplish this liaison objective, a special team of four State Troopers was formed to serve as field representatives for the Uniform Crime Reporting System. This team has since been expanded to eight troopers. These field representatives have furnished invaluable contributions to the program.

The educational phase of the program became operational in March, 1969. Seminars were conducted throughout the state during which the purpose of the program was outlined and the mechanics of the system were explained. The field representatives followed up this initial contact by visiting all police agencies in Kentucky and providing them with more detailed instructions. In addition, the "Uniform Crime Reporting Guide", which described system procedures, was published and distributed to law enforcement agencies in Kentucky.

The personal visits conducted by the field representatives disclosed that the internal reporting systems employed by many local police departments were not adequate to meet Uniform Crime Reporting System requirements. Therefore, field representatives assumed the task of helping contributors to update their internal record keeping and reporting systems. The willingness of these local departments to adopt more efficient reporting systems demonstrates the degree to which law enforcement agencies have accepted the program.

On January 1, 1970 the Kentucky Uniform Crime Reporting Program became operational. The various municipal and county police departments were required to report monthly the number and nature of selected offenses committed in their jurisdictions. A further indication of the acceptance of the program was the fact that from the first operational month, every police agency requested to report voluntarily did so.

The Uniform Crime Reporting Section of the Bureau of State Police, through its field representatives, has continued the educational program for reporting agencies. Program expansion and personnel changes within reporting departments have made this educational process a continuing and vital feature of the System's success.

Official communication between State Police field representatives and local officials in regard to error correction or program instruction leads to informal discussion of other areas of mutual interest, thus providing an additional communications link between municipal, county, and state law enforcement agencies.

## OBJECTIVES

The Uniform Crime Reporting program in Kentucky serves as a parallel system with the National Uniform Crime Reporting System. Therefore, Kentucky's program sets forth objectives that are compatible with those of the federal program. The primary objective of the System is to provide accurate crime statistics for use in police administration, planning, and operations. Furthermore, the program provides the public with documented crime data which reveals general statewide crime conditions.

The following procedures are utilized by the program to attain these objectives:

- (1) A Crime Index, consisting of seven serious offenses that are reported to the police, is used to measure the fluctuation and distribution of serious crime in the state.
- (2) The total volume of police arrests for all types of criminal arrests is compiled.
- (3) Since the above are measures of law enforcement activity as well as criminal activity, related data are collected to demonstrate the effectiveness of enforcement activities, available police strength, and significant factors involved in crime.

## COLLECTION OF CRIME DATA

As required by statute, all law enforcement agencies in the state must submit crime reports to the program as requested. During 1977, information pertaining to offenses, arrests, disposition data, and related supplementary information was received from 335 organized police departments. This includes municipal, county, and State Police organizations.

## METHODS

Each contributing agency must compile its own reports. The Uniform Crime Reporting Guide, which is supplied to all contributors, explains reporting procedures in detail. Field Representatives from the Bureau of State Police provide whatever supplemental instruction is required.

Law enforcement agencies report the number of known offenses according to the following categories which compose the Crime Index offenses:

- (1) Homicide (Murder, Manslaughter, and Accidental Death)
- (2) Forcible Rape
- (3) Robbery
- (4) Assault

- (5) Breaking and Entering
- (6) Larceny-Theft (excluding motor vehicle thefts)
- (7) Auto Theft

These totals are determined from records of all criminal complaints received by the police from victims or other sources or which are discovered by the police during their operations. Complaints which the police investigation determines to be unfounded are not included in the total of index offenses. The number of offenses reported in each category reflects the total number of offenses known to the police; for purposes of utilizing the Crime Index, no regard is given to whether or not a suspect has been arrested, stolen property has been recovered, or any other consideration. However, law enforcement agencies do report the total number of Crime Index offenses for which arrests have been made, in a separate category.

Statistics are submitted to indicate the number of offenses cleared by the arrest of persons under 18 years of age. Additional analytical data pertaining to specific crime categories are also reported.

Reported offenses are tabulated according to the municipality and county in which they occur, rather than according to the agency which may investigate, arrest or otherwise dispose of the case. When a case is cleared by arrest, the clearance is attributed to the jurisdiction in which the offense occurred, even though the arresting agency may not be the department originally reporting the offense.

Examples of data contained in the annual Uniform Crime Reports are the number of persons arrested for all criminal offenses with respect to age, sex and race of the offender, as well as numbers of persons formally charged in connection with the offenses, and dispositions of the cases. Police employee data are also collected annually, including the number of police officers killed and assaulted.

In summary, the presentation of this report, "Crime in Kentucky", reflects the compilation of the seven Crime Index offenses known to the police, arrests of persons both under 18 years of age and 18 years of age and older, and the ultimate disposition of those persons charged. This information is collected by all law enforcement agencies in Kentucky and forwarded to the Bureau of State Police.

## VERIFICATION PROCESSES

Due to the fact that crime statistics are submitted by 328 law enforcement agencies throughout Kentucky, some method must be applied to the data collection process to insure the information received

by the State Police is accurate and uniform. Program aids such as guides and instructions do not necessarily guarantee the accuracy and correctness of the reports submitted by the contributors. Additional controls are necessary.

Each report received by the Uniform Crime Reporting Unit of the Bureau of State Police is examined for mathematical accuracy and for reasonableness as to interpretation of offense classifications. Minor typographical errors are corrected by contacting the contributor by telephone; all other errors are resolved by a personal visit by a Field Representative to the appropriate agency. Field Representatives provide the link between the Program and the reporter.

### CLASSIFICATION OF OFFENSES

Uniformity of reporting depends upon the proper classification of offenses by the police. The basic guidelines for classifying offenses are formulated by the Uniform Crime Reporting Section of the Federal Bureau of Investigation. Kentucky has adapted these guidelines to its Program.

Due to the need for compatibility with the Federal system, offenses under the Kentucky Program are not distinguished by the designation of "felony", "misdemeanor", "violation", or "municipal ordinance". It must be emphasized that the following guidelines are not meant to be legal definitions of offenses; in fact, the guidelines may differ considerably, in some cases, from the legal definitions as they are written in the Kentucky Penal Code. The purpose of these guidelines is to establish a uniform national system for classifying similar offenses even though their legal definitions may vary considerably from state to state. The exact wording of the guidelines is developed by the Bureau of State Police; however, the major categories of offense classification remain the same as those employed nationally.

### OFFENSE CLASSIFICATIONS

#### (1) Homicide

- 1a. Murder and Non-Negligent Manslaughter—The unlawful killing of a human being with malice aforethought.

General Rule—Any death due to a fight, argument, quarrel, assaults or commission of a crime.

- 1b. Manslaughter by Negligence—The unlawful killing of a human being, by another, without malice aforethought.

General Rule—The killing may result from the commission of an unlawful act or from a lawful act performed with gross negligence. Traffic deaths may be classified as such when due to gross negligence of someone rather than the victim.

- 1c. Accidental Death—Non Traffic—The death of a person resulting from his own gross negligence, mishap, or the negligence of another not sufficient in degree to classify the act as manslaughter.

#### (2) Forcible Rape

- 2a. Rape by Force—The carnal knowledge of a female forcibly against her will.

General Rule—Forcible rape of a female, but excluding carnal abuse (Statutory Rape) or other sex offenses.

- 2b. Assault to Rape—Attempts—All assaults and attempts to rape.

- (3) Robbery—The felonious and forcible taking of the property of another, against his will, by violence or by putting him in fear. Includes all attempts.

General Rule—Robbery differs from larceny in that it is aggravated by the element of force or the threat of force.

- 3a. Armed robbery—Any weapon—Any object so employed as to constitute force or the threat of force is to be considered a weapon. This includes firearms, knives, clubs, brass knuckles, black-jacks, broken bottles, acid, explosives, etc. Also cases involving possible pretended weapons or when the weapon is not seen by the victim, but the robber claims to have it with him, constitutes armed robbery due to instilling fear.

- 3b. Strong Armed—No weapon—Includes muggings and similar offenses where no weapon is used, but strong arm tactics are employed to deprive the victim of his property. This is limited to hands, fists, feet, etc. As in armed robbery, all attempts are included.

- (4) Assaults—An assault is an attempt or offer, with unlawful force or violence, to do physical injury to another.

General Rule—All assaults will be classified in

in the following categories, excluding assaults with intent to rob or rape.

- 4a. Gun—All assaults and attempted assaults involving the use of any type of firearms. (Revolvers, automatic pistols, shotguns, zip guns, rifles, pellet guns, etc.)
  - 4b. Knife or cutting instrument—All assaults and attempted assaults, involving the use of cutting or stabbing objects. (Knife, razor, hatchet, axe, cleaver, scissors, glass, broken bottle, dagger, ice pick, etc.)
  - 4c. Other dangerous weapon—All assaults or attempted assaults when any other object or thing is used as a weapon. (Clubs, bricks, pick handles, bottles, explosives, acid, lye, poison, scalding water and cases of attempted drowning, burning, etc.)
  - 4d. Hands, fists, feet, etc.—Aggravated—Assaults which are of an aggravated nature when hands, fists, feet, etc. are used. To be classified as aggravated assault, the attack must result in serious personal injury.
- (5) Breaking and Entering—Unlawful entry or attempted entry of any structure to commit a felony or larceny.

**General Rule**—Any unlawful entry or attempted forcible entry of any dwelling house, attached structure, public building, shop, office, factory, storehouse, apartment, house trailer, warehouse, mill, barn, other building, house boat or railroad car.

**Note:** For Uniform Crime Reporting purposes, breaking, entering and larceny are classified only as breaking and entering, the larceny is excluded. Breaking and entering a motor vehicle is classified as larceny.

- 5a. Forcible entry—All offenses where force of any kind is used to enter unlawfully a locked structure, with intent to steal or commit a felony. This includes entry by use of a master key, celluloid or other device that leaves no outward mark but is used to open a lock. Concealment inside a building, followed by the breaking out of the structure is also included.
- 5b. Unlawful entry—No force—Any unlawful entry without any evidence of forcible entry.

5c. Attempted forcible entry—When determined that forcible entry has been attempted.

- (6) Larceny Theft (Except auto theft)—The unlawful taking of the property of another with intent to deprive him of ownership.

**General Rule**—All larcenies and theft resulting from pocket-picking, purse snatching, shop lifting, larceny from auto, larcenies of auto parts and accessories, theft of bicycles, larcenies from buildings, and from coin operated machines. Any theft that is not a robbery or the result of breaking and entering is included. Embezzlement, larceny by bailee, frauds or bad check cases are excluded.

- (7) Auto Theft—The larceny or attempted larceny of a motor vehicle.

**General Rule**—Thefts and attempted thefts of a motor vehicle. This includes all vehicles which can be registered as a motor vehicle in this state. Excludes where there is a lawful access to the vehicle, such as a family situation or unauthorized use by others with lawful access to the vehicle. (Chauffeur, employees, etc.)

- (8) Other Assaults

This class is comprised of all assaults and attempted assaults which are simple or minor in nature. These "Other Assaults" are also scored on Return A under item 4e as an offense known to Police. However, for the purpose of this return arrests for this offense are scored in this class.

- (9) Arson

Includes all arrests for violations of State Laws and Municipal Ordinances relating to arson and attempted arson. Any willful or malicious burning to defraud, a dwelling house, church, college, jail, meeting house, public building or any building, personal property of another, goods or chattels, etc. In the event of a death from arson, the offense would be classified as murder and if personal injury results, the offense would be classified as assault, (4c).

- (10) Forgery and Counterfeiting

In this class are all offenses dealing with the making, altering, uttering or possessing, with intent to defraud, anything false in the sem-

blance of that which is true.

Includes altering or forging public or other records. Making, altering, forging, or counterfeiting bills, notes, drafts, tickets, checks, credit cards, etc. Counterfeiting coins, plates, bank notes, checks, etc. Possessing or uttering forged or counterfeiting instruments. Signing the name of another or fictitious person with intent to defraud. All attempts to commit any of the above.

(11) Fraud

Fraudulent conversion and obtaining money or property by false pretense. Includes bad checks, confidence games, etc., except forgeries and counterfeiting.

(12) Embezzlement

Misappropriation or misapplication of money or property entrusted to one's care, custody or control.

(13) Stolen property: Buying, Receiving, Possessing

All offenses of buying, receiving, possession of stolen property, as well as all attempts to commit any of these offenses.

(14) Vandalism

All willful or malicious destruction, injury, disfigurement or defacement of any public or private property, real or personal, without consent of the owner or person having custody or control by cutting, tearing, breaking, marking, painting, drawing, covering with filth or any other such means as may be specified by law or ordinance. This offense covers a wide range of malicious behavior directed at property.

(15) Weapons: Carrying, Possessing, Etc.

This class deals with violations of weapons laws such as:

Carrying concealed deadly weapons  
Flourishing deadly weapons  
All attempts to commit the above

(16) Prostitution and Commercialized Vice

Included in this class are the sex offenses of a commercialized nature, such as:  
Prostitution  
Keeping bawdy house, disorderly house, or house of ill repute

Pandering, procuring, transporting or detaining women for immoral purposes, etc.  
All attempts to commit any of the above

(17) Sex Offenses

Except forcible rape, prostitution and commercialized vice. Includes offenses against chastity, common decency, morals and the like.

Adultery and fornication

Buggery

Incest

Indecent Exposure

Sodomy

Carnal Abuse (no force)

All attempts to commit any of the above

(18) Narcotic Drug Laws

Narcotic drug law arrests are requested on the basis of the narcotics used. Includes all arrests for violations of State and Local Ordinances, specifically those relating to the unlawful possession, sale, use, growing, manufacturing and making of narcotic drugs. Includes the following subdivisions of narcotic drug law arrests:

Dangerous non-narcotic drug (barbiturates, benzedrine)

Marijuana

Synthetic narcotics, manufactured narcotics which can cause true drug addiction (demerol, methadones)

Opium or cocaine and their derivatives (morphine, heroin, codeine)

(19) Gambling

All charges which relate to promoting, permitting or engaging in gambling. To provide a more refined collection of gambling arrests, the following breakdown is furnished:

All others

Numbers and lottery

Bookmaking (horse and sport books)

(20) Offenses Against the Family and Children

Includes all charges of non-support and neglect or abuse of family and children. Desertion, abandonment, or non-support

Neglect or abuse of child

Non-payment of alimony

(21) Driving Under the Influence

This class is limited to the driving or operating of any vehicle while drunk or under the

influence of liquor or narcotic drugs.

(22) Liquor Laws

With the exception of "Drunkenness" (Class 23) and "Driving Under the Influence" (Class 21), liquor law violations, State or Local, are placed in this class. Does not include Federal Violations. Includes manufacturing, sale, transporting, possessing, etc.

Maintaining unlawful drinking places

Bootlegging, illegal possession

Operating still

Illegal sale of liquor

Illegal transportation of liquor

(23) Drunkenness

Included in this class are all offenses of

drunkenness or intoxication, with the exception of "Driving Under the Influence." (Class 21)

Drunk and Disorderly

Public Intoxication

(24) Disorderly Conduct

In this class are counted all Disorderly Persons arrested except those counted in classes 1 through 23 and class 25.

(25) Vagrancy

Placed in this class are arrests for disorderly persons when the person is arrested for failure to give a good account of himself and has no means of support.

## CRIME RATES

Crime rates relate the incidence of crime to population. A crime rate should be considered as an expression of the risk of victimization for a specific offense.

Crime rates are calculated on the basis of the size of the resident population and the number of offenses reported for that specific population. In

order to utilize a standardized unit of measure, these crime rates are expressed in terms of the number of offenses occurring per 100,000 residents. If a jurisdiction does not have as many as 100,000 residents, the offenses and number of residents are extrapolated to determine what the rate per 100,000 residents should be.

# PROFILE OF THE KENTUCKY DEPARTMENT OF JUSTICE

The physical structure of the Kentucky Department of Justice was labeled "A Model for the Nation" by federal officials, following its formation in 1973. Former splintered efforts were united under one "umbrella" agency at that time, creating an inter-agency coordination of purpose and direction for a united criminal justice front in the Commonwealth.

Under the leadership of Gov. Julian Carroll and Justice Secretary John L. Smith, the department has put an emphasis on implementing innovative programs which are responsive to the needs of all Kentuckians. The new emphasis on crime prevention is one example of how the department is striving to become "A Model for the Nation" in programming as well as in its physical structure.

The creation of the cabinet-level Department of Justice brought the Kentucky State Police, Bureau of Corrections, Office of the Public Defender, Bureau of Training, Kentucky Crime Commission, State Parole Board and several other criminal justice agencies under a common direction and leadership.

The 1976 Kentucky General Assembly, with the strong backing of Gov. Carroll, added the Office of Crime Prevention to the Department of Justice. The creation of this office was designed to provide a responsible and responsive answer to the age-old criminal justice problems of rising crime rates, overcrowded correctional institutions and an increasing amount of money having to be spent on crime detection and detention of offenders.

Justice officials felt that if the citizens of Kentucky were involved in a program of helping to prevent crimes from occurring, the burden would soon be lifted from agencies responsible for detection and detention. Thus, the various agencies contained in the Department of Justice became involved in the citizen's efforts to help curb crime.

Even though the crime prevention program has been in operation for only about a year, with new programs being implemented periodically, justice officials are beginning to see that crime prevention philosophy is working in Kentucky.

It has been found that homes displaying "Operation Identification" stickers have not been broken into as often as homes not displaying the stickers, and that those homes displaying stickers that were broken into lost valuables that were not marked as a part of the program.

("Operation Identification" is one of eight programs contained in the Office of Crime Prevention's initial thrust. It consists of property owners mark-

ing their valuables with an electronic marking device to make the goods easier to identify and harder for the criminal to fence.)

As a further proof of the success of crime prevention programs, the Office of Crime Prevention has found that in cities and counties where their programs have received a high degree of saturation, the burglary rate has dropped dramatically.

For example, the city of Campbellsville has received a high degree of participation in "Operation Identification." Since reaching that level, they reported no burglaries in 1976 and only 2 in 1977. In Owensboro, Covington and some sections of Louisville where participation has ranged from 25 percent to over 50 percent, burglary rates have dropped by approximately 30 percent. And, despite continued major increases in burglary nationwide, Kentucky's burglary rate decreased by 5 percent last year.

These statistics have given justice officials hope for increased success of crime prevention programs throughout Kentucky. The goal is crime control through a citizen-police partnership in crime prevention.

The Department of Justice has taken recent major strides in the other areas of the state criminal justice system, also. Corrections systems across the nation are watching Kentucky to judge the effects of the restructuring of the Bureau of Corrections, carried out during the summer of 1976.

The emphasis in the Bureau of Corrections has become one of the career development and effective rehabilitation, rather than mere detention. The decision to cease license plate production at the Kentucky State Reformatory showed the bureau's philosophy of offering society-based vocational training.

Overcrowded correctional institutions, a predominant problem for corrections systems nationwide is being dealt with in Kentucky by the establishment of new medium and minimum security institutions and the utilization of county jails for paroled inmates awaiting their actual release date.

Since the restructuring of the bureau, three new minimum security institutions have opened their doors to state inmates, including the first minimum security institution for women in Kentucky. Coupled with a comprehensive inmate classification system, these institutions have been able to take some of the load off the other badly overcrowded institutions.

The utilization of county jails for paroled state inmates began the first of 1977, under a gradual

phasing-in process. The philosophy behind the program is to gradually re-orient these ex-offenders back into the community to which they will be returning by allowing them to seek employment, re-develop family and community ties and get used to being back in the community while sleeping at the jail at night until they reach their actual release date.

The formation of the Office of Career Development in the bureau was designed to insure that Kentucky inmates received training in the institutions patterned to meet the demands of the state job market. Instead of merely offering an inmate a certain number of hours of vocational training, the institutions are now setting up their prison industries and vocational training programs to mirror, as best they can, actual assembly line procedures and employment practices.

New programs implemented by the Kentucky State Police include toll-free numbers to state police posts in certain areas to help make state police protection even more accessible to Kentuckians in all sections of the Commonwealth.

Each of Kentucky's 16 state police posts now has a general investigation commander, instead of one at every other post, as has been the case in the past. State police officials believe this will help expedite criminal investigations and allow them to be more

thorough in presenting evidence for prosecution.

The Department of Justice has been able to add more troopers to the state police force and offer them more practical, extensive training than ever before.

The agency responsible for the professional training of local police officers, jailers, and correctional officers is the Bureau of Training.

Housed at Eastern Kentucky University, the bureau has recently expanded their training offerings to include fish and wildlife officers, transportation enforcement officers and Alcoholic Beverage Commission agents.

The training programs offered by the bureau stress "hands-on," practical experience. Real life situations are presented so that officers will have had experience in dealing with them before they encounter them on their jobs.

Kentucky also became a nationwide leader when, in 1972, it became one of the first states in the nation to establish a statewide program for the state-supported defense of indigents charged with crimes. Since its formation, the Office of Protection and Advocacy has offered a proper defense to thousands of penniless defendants who would have been financially unable to obtain legal counsel before.

# PROFILE OF KENTUCKY

Kentucky is a land diversified in socioeconomic and demographic characteristics. Largely agricultural in makeup, over 60% of its 40,000 square miles is devoted to farming. The Bluegrass Region in the center of the state, famous the world over for its horses, is also among the most fertile farm land in Kentucky, leading the state in the production of burley tobacco. Stretching southward and westward from the Bluegrass to the Mississippi River, Kentucky farmers produce a numerous variety of crops including tobacco, corn, hay, wheat, and other grains.

The mountainous region of Eastern Kentucky is presently the fastest growing area in the state. A recent boom in the coal industry there has precipitated an unprecedented influx of people and money into that region. This has produced positive results in the creation of jobs and higher wages, as well as some negative results, including an increased cost of living and a shortage in housing.

The Pennyrile Region of Western Kentucky, wherein lies a great deal of the western coal field, is also experiencing a rapid population growth and is projected to reflect the highest growth rate in the state by the year 2020. Of Kentucky's three major and four minor metropolitan areas, the largest growth is expected to occur in the Hopkinsville-Christian County area, a projected increase of 247.3% between 1970 and 2020.

The three largest metropolitan areas of the state, collectively, Louisville, Lexington, and Northern Kentucky (Covington-Newport) will probably experience a slowdown in growth over the next fifty years, although the six-county Lexington area is expected to continue growing at a faster rate than will the state as a whole.\*

How much or how little impact the various types of environmental conditions, and socioeconomic, and demographic factors will have on crime statistics in Kentucky cannot be positively determined at this time. In the past, however, crimes in Kentucky have been observed as a whole, with little distinction being made between different regions and environmental conditions. For example, Part I crimes in Jefferson County made up one-third of all reported Part I crimes in Kentucky in 1977. When viewing the state as a whole, then, the crimes oc-

curing in Louisville and Jefferson County will have a disproportionate influence on the total crime picture. The same is true of the other major metropolitan areas in the state.

To combat this tendency, in the 1977 Uniform Crime Report, an effort has been made to sectionalize the state of Kentucky and to begin compiling data on various socioeconomic and demographic aspects of the different sections, and to take a closer look at the factors internal to each section. These factors are not meant to be presented as causes of crime, or as determinants of criminal behavior. They are simply some factors which help to describe the various regions of the state. The factors may or may not have any impact on the crime statistics for that region.

Because Kentucky is already divided into 15 Area Development Districts, through which a quantity of socioeconomic data is already collected, these districts will be used to sectionalize the state. In this Profile of Kentucky a brief general discussion of the 15 Area Development Districts with emphasis on some of the data which could have an effect on crime trends is presented. The variables presented for each Area Development District include:

## 1. Population Figures for 1970 and 1976

Although population cannot be considered a cause of crime, it is common knowledge that crime occurs most often in heavily populated areas. Whether this is due to the fact that a large number of people yields a large number of potential criminals, as well as potential victims, whether urbanites report crimes more readily than do rural populations, whether different external factors encouraging population growth also encourage crime growth, or whether some other complex relationship exists between the two variables, heavily populated areas in Kentucky especially major metropolitan regions, are marked by higher incidences of crime, (especially property related crimes) than are sparsely populated regions. For this reason, it is important to consider the location of large population centers and the general population distribution within the state when comparing regional crime statistics.

## 2. The Change in Population 1970-1976

This statistic will indicate those areas of the

\*All population projections and growth predictions for Kentucky are taken from **How Many Kentuckians: Population Forecasts, 1970-2020**, prepared by University of Louisville, Urban Studies Center, Population Research Unit, November, 1977.

state experiencing growth or decline in population. By comparing these rates, a general impression of those areas of Kentucky which are experiencing rapid growth or decline can be obtained. These may provide an indication of possible future expectations of crime patterns within the state.

3. The Juvenile Population

Juvenile population figures and percentages will not only provide demographic data about the residents of a given region, but it could provide a helpful comparison tool in determining those regions, if any, where a problem might exist relating to juvenile involvement in crimes.

4. The Rate of Migration into the Area (1970-76)

Migration relates to the number of persons moving into the region compared to those moving out. Areas displaying high rates of migration will be experiencing a large influx of people from other areas and will most likely be experiencing rapid economic growth. Highly negative migration rates represent an exodus of residents from the area. High rates of migration, either negative or positive, reflect an unstable population base. On the other hand, migration rates nearing zero indicate a stable population base, whose growth or decline is determined primarily through birth rates and death rates.

5. Per Capita Income

Per capita income is a measure of total personal incomes divided by total population. It is presented here solely as an economic indicator for each region.

6. Rate of Unemployment (1977)

The unemployment rate describes the percentage of the total civilian labor force which is without employment at any specific time. 1977 averages are presented in this report as one socioeconomic factor, however, unemployment rates vary a great deal from month to month and more long-range comparisons must be conducted in order to determine if any significant correspondence can be drawn between unemployment and crime in Kentucky.

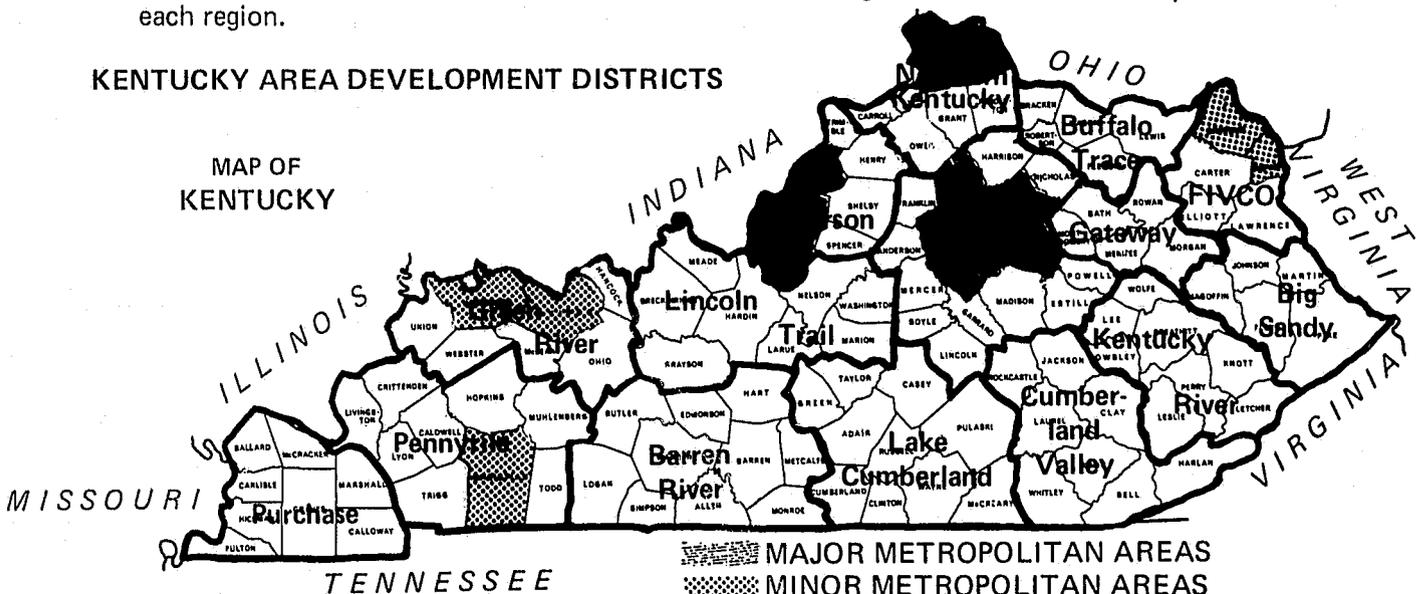

7. Population Density

Population densities offer the most useful information when comparing small land areas, as they can become indicators of overcrowding. Overcrowding is a factor which some psychologists have found to promote aggressive or violent behavior in animals. In this report, however, because the Area Development Districts vary in land area, densities will be most helpful in determining whether a large population simply represents a large area of land, or whether it represents a closely concentrated population, as in an urban center.

8. Land Area

This figure is included simply for informational purposes and because it is used to calculate the population densities. It is probably not very useful for comparing other socioeconomic and demographic data across the state of Kentucky due to the fact that in some areas much of the land is uninhabitable under present conditions. This is particularly true in very mountainous regions of eastern Kentucky.

KENTUCKY AREA DEVELOPMENT DISTRICTS

Definition of major and minor metropolitan areas based solely on 1970 population, major having greater than 100,000 population and minor having less than 100,000 population.

# STATE OFFENSE DATA

## REPORTED CRIMES

Although national victimization studies suggest that only about half of all crimes committed are actually reported to police, the number of reported offenses is nevertheless the best measurement tool available in Kentucky at this time for determining the amount of crime being committed.

During calendar year 1977, there were 104,127 Part I offenses reported to law enforcement agencies in the Commonwealth, 7.6% fewer than in 1976. This represents the only decrease in number of crimes reported since 1973, when the gathering of crime statistics in Kentucky became relatively reliable.

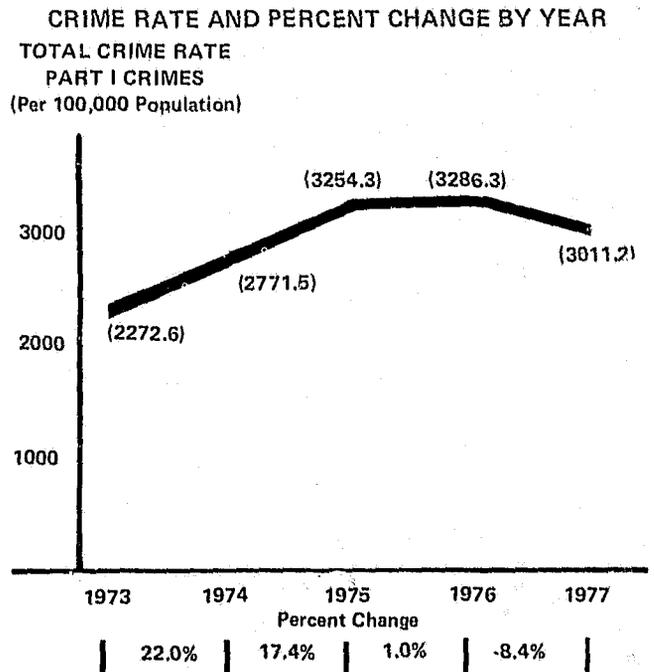

While it cannot be positively determined at this time why the number of reported crimes decreased in 1977 for the first time in five years (whether due to a decrease in individuals reporting crimes, improved crime prevention efforts, more effective law enforcement patrol, or such things as adverse weather conditions) it remains to be seen if the trend will continue in a downward direction, or if 1977 will mark a trough to be followed by an upward surge in reported crime. In any event, by studying offense trends over a series of years and noting fluctuations in other types of variables, analysts will hopefully be better able in the future to isolate those conditions which correlate significantly with crime trends.

## CRIME RATE

Because larger populations will invariably reflect a greater number of crimes being committed, if for no other reason than the presence of a greater number of criminals and potential victims, simply the raw number of crimes does not provide a useful statistic for crime comparison purposes between different jurisdictions or different time frames. By using crime rates in which the number of offenses are proportioned by a universal population figure, the population variable is compromised. Crime rates, therefore, provide a description of the increase or decrease in offenses based on a standard population statistic (of 100,000). It would be possible under these circumstances for the number of offenses reported to increase a great deal with no effect on the crime rate, provided the number of offenses would have risen by the same proportion as the population. Therefore, an increase in the crime rate would reflect a growth in reported offenses that is greater than the growth in population.

Since 1973 the crime rate in Kentucky has grown each year. In 1977 it decreased by 8.4%. This annual change and the figures used to calculate the crime rates are shown in the chart and graph below.

## YEARLY TOTAL CRIME RATE FOR KENTUCKY

Year	Population	Total Crime	Total Crime Rate
1973	3,342,000	75,950	2272.6
1974	3,344,300	92,686	2771.5
1975	3,396,000	110,515	3254.3
1976	3,428,000	112,656	3286.3
1977	3,458,000	104,127	3011.2

## CRIMES AGAINST PERSONS

The four offense categories that comprise the "crimes against persons" or "violent crimes" are murder, rape, robbery, and aggravated assault. These are the most serious types of crimes because they place the victim in fear of his life or person.

Some interesting speculation can be drawn when you compare the percent reported personal crimes vs. reported property crimes in the 15 Area Development Districts. At the time of this writing, 1977 population figures for counties were not available; therefore, the table is limited to reported crimes only and does not include crime rates for each offense category.

When the total number of crimes against persons is compared with all reported crimes, the crimes against persons make up 7.8% of reported Part I crimes in the state. Of these, aggravated assaults alone account for over half. Robberies make up over one-third of the total, with rapes being accountable for 8% and murder and non-negligent manslaughter only making up 4%. As can be noted from the table, however, these rates can vary widely from district to district within the state.

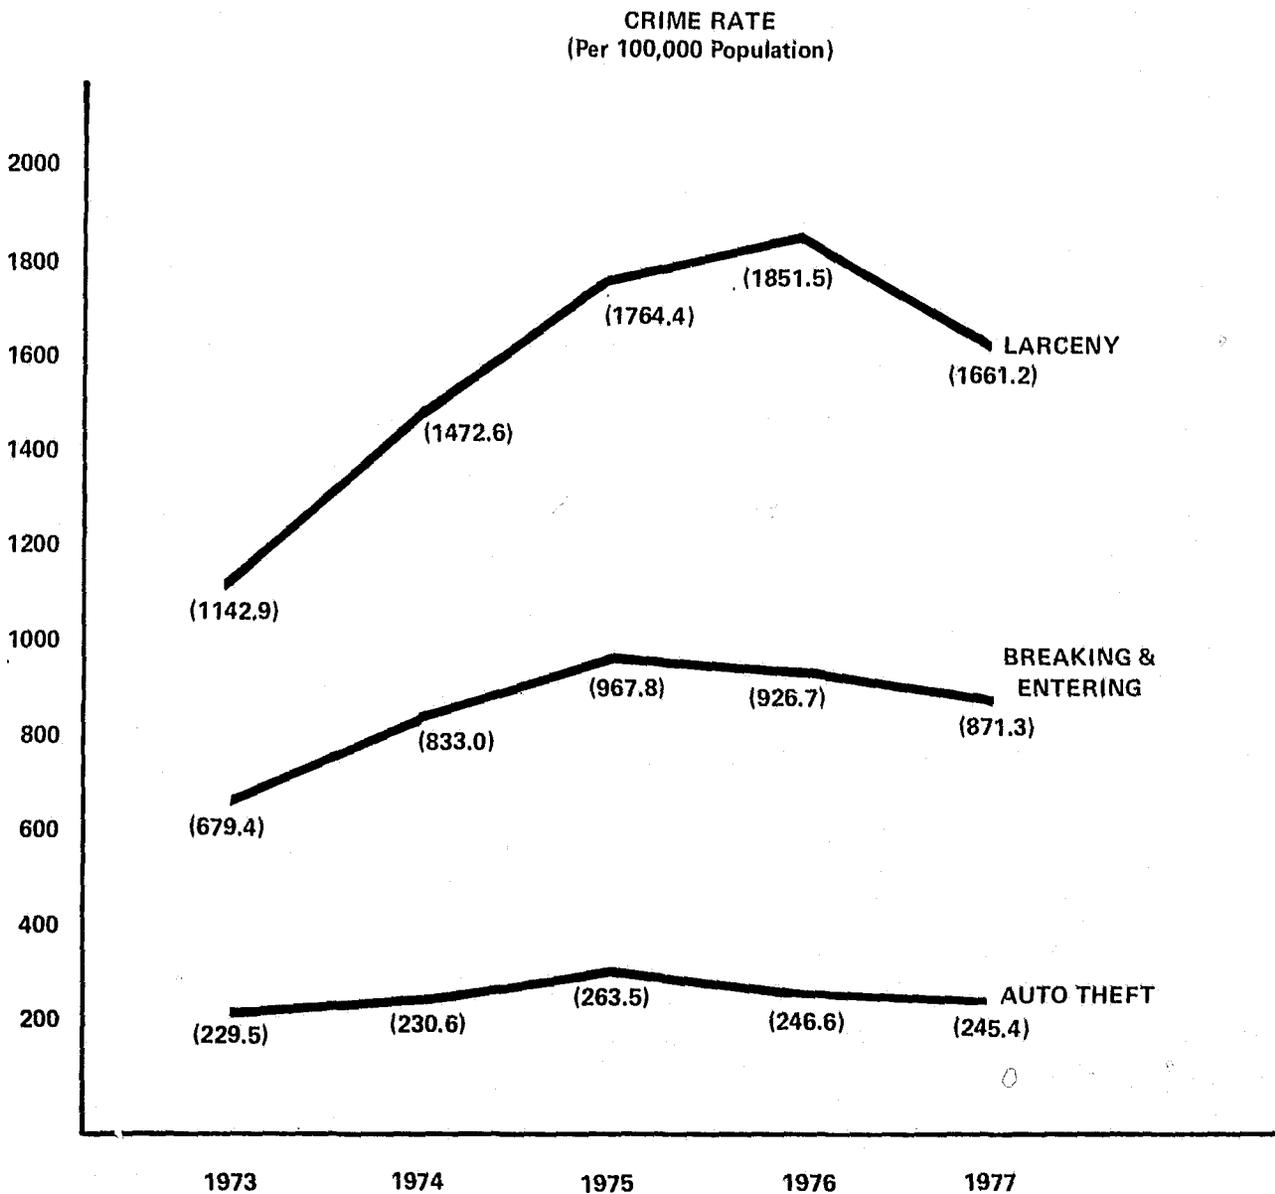

Area Development Districts	Total Part I Crimes		Part I Personal Crimes				
	Number Total	Percent Against Person	Number Personal	Murder	Rape	Robbery	Aggravated Assault
Purchase	3,778	6.9	262	3	7	23	68

(Totals may not equal 100 due to rounding error)

## CRIMES AGAINST PROPERTY

Property crimes include the categories of "Breaking and Entering," Larceny," and Auto Theft." They are crimes committed predominately for the purpose of illegally obtaining property belonging to another person, but they do not place the victim in fear of his life or person. In 1977, 96,062 crimes against property were reported to law enforcement agencies in Kentucky. These account for 92.2% of all Part I crimes reported in that year.

The following chart depicts the trend in property crimes since 1973. As can be evidenced by this chart, the rate of auto theft has remained fairly constant over the past five years. The rate of breaking and entering, on the other hand, took a sizable leap between 1973 and 1975, but has tapered off and declined in the past two years. Prior to 1972 the only reported larcenies which were included in the Part I offenses were those involving money or property worth \$50 or more. During that time, larcenies numbered slightly less than breaking and enterings. Since 1973, with the inclusion of all larcenies, the statistics for this crime have taken a dramatic leap. Larcenies now make up approximately 58% of all property offenses.

## PROPERTY CRIMES AND ROBBERY

For the purposes of gaining an insight into the occurrence of property related crimes in the state of Kentucky it is helpful to view the personal crime of robbery in the same context. The reason for this is that robbery, like the crimes against property, is motivated by a desire to illegally obtain merchandise belonging to another individual. Therefore, when viewing the state as a whole in an effort to determine where property motivated crimes occur, robbery must be included as a property crime, although it is, at the same time, a serious personal offense. The following table depicts the distribution of property motivated crimes in Kentucky. The table does not include all property offenses, but only those which are Part I crimes.

Area Development Districts	Total Part I Crimes		Part I Property Crimes & Robbery				
	Number Total	Percent Against Property	Number Property	Robbery	Percent Of Property Crimes Larceny, Breaking & Entering, Auto Theft

# MURDER IN KENTUCKY

## DEFINITION

Murder is defined as the unlawful killing of a human being with malice aforethought. Any death due to a fight, argument, quarrel, assault, or commission of a crime is included in the count. This index offense is recorded by police on the basis of incidents reported. It should not be construed that those figures reflect arrest, arraignment, or conviction data. Traffic deaths caused by the negligence of someone other than the victim are not included here, but are counted under manslaughter by negligence. Suicides, accidental deaths, and justifiable homicides are also excluded.

## CLEARANCE RATE

Much of the recent literature being generated from the field of criminal investigation outlines a number of characteristics associated with the crime of murder. Researchers have found possible indications that most murders occur between acquaintances spontaneously, usually as the result of a heated argument or other highly emotional situation. Many times one or both of the parties are under the influence of alcohol, reacting violently with little or no regard as to the consequences of their actions. In "smoking gun" cases, where the perpetrator is

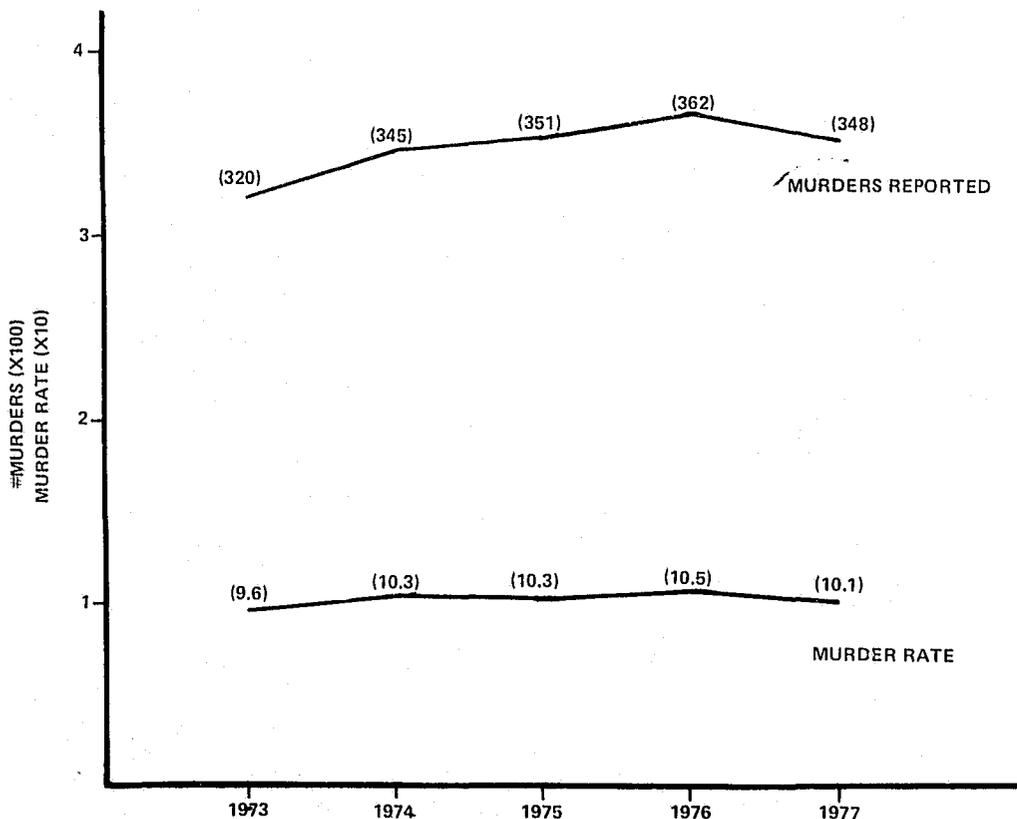

still at the scene of the murder when police arrive, or in cases where there are witnesses present, although the assailant may have fled, it is relatively easy for investigators to determine the identity of the murderer and to effect an arrest. When the identity of the suspect is unknown, the investigator's task becomes more difficult, and usually requires much more effort. Due to the heinous nature of the crime, murders are given high priority in criminal caseloads, with intense continuing investigations usually resulting in the identity and arrest of a suspect. Given the above considerations, however, the clearance rate among murder cases is normally very high compared with other types of crimes.

In 1977, law enforcement agencies in Kentucky cleared 87% of all murders reported. Nineteen of the cases (5%) resulted in juvenile arrests.

## HOW MANY MURDERS WERE COMMITTED?

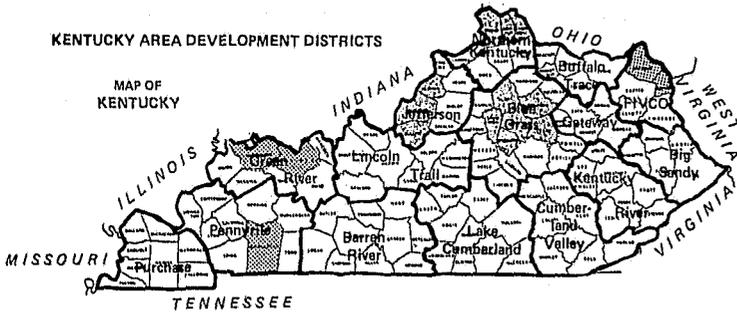

In 1977, 348 cases of murder and non-negligent manslaughter were reported to law enforcement agencies in Kentucky. This figure represents the first decline in cases reported since 1973.

The following chart depicts the number and rate of murders committed in Kentucky over the past five years.

## WHERE DO MURDERS OCCUR IN KENTUCKY?

For the purpose of representing those areas of the state in which murders occurred most frequently in 1977, and juvenile involvement in murder, the following table is presented. The table depicts the number of murders reported in each Area Development District, the percent of the total occurring in each area, and juvenile arrests made in each area.

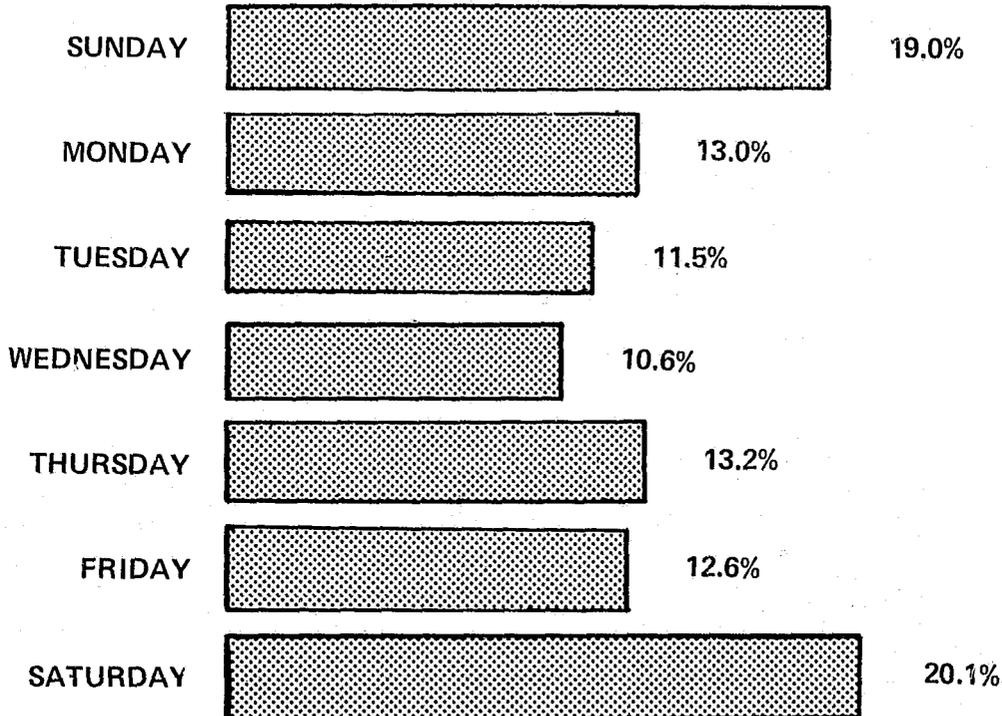

## MURDER AND NON-NEGLIGENT MANSLAUGHTER BY AREA DEVELOPMENT DISTRICT

## WHEN DO MURDERS OCCUR?

### BY DAY OF WEEK - 1977

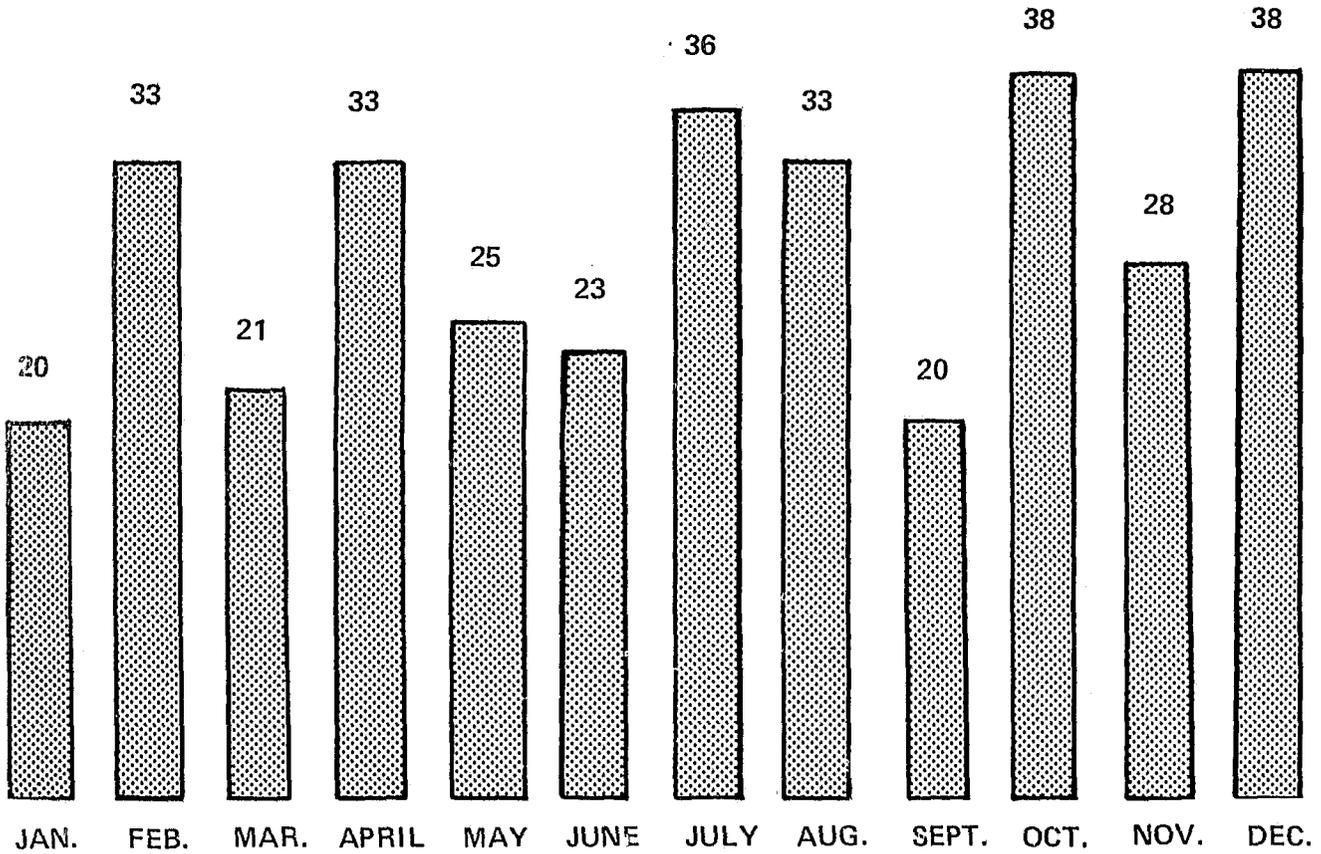

In Kentucky in 1977 more murders occurred on Saturdays and Sundays than at any other times of the week.

October and December marked the highest incidences of murder by month in 1977, with the three-month quarter between them accounting for almost 30% of the total.

Despite an unusually high incidence of murder in February, the quarter between January and March represented the lowest quarter for that offense during the year.

An overview of the occurrence of murder by month for the past five years is depicted in the chart on the next page.

MURDER BY MONTH - 1977

# WHO COMMITS MURDER?

## CIRCUMSTANCES

In Kentucky in 1977 over 80% of the murders reported were committed by a person known to the victim. Nearly one-third of these were committed between family members.

	Spouse killing spouse Parent killing child Other family	Number 40 3 41	% of Total 11.5 0.9 11.8
	Romantic triangle and lover's quarrels	26	7.5
	Other arguments TOTAL	<u>169</u> 279	<u>48.5</u> 80.2

Murders, when perpetrated during the commission of a crime and those classified as gangland slayings, or sex motivated, are identified under the program as "felony murders"; this type of circumstance or motive accounted for 19.8% of the total number of homicides in 1977.

Known Felony Type	48	13.8
Suspected Felony Type	21	<u>6.0</u>
TOTAL	<u>69</u>	19.8
GRAND TOTAL	348	<u>100%</u>

## PERSONS ARRESTED

At the present time, the only statewide data available pertaining to personal characteristics of criminal offenders must be gleaned from arrest data. Arrest statistics, however, result only from the conclusions drawn during a police investigation. They do not take into consideration subsequent judicial proceedings which may find the arrestee completely innocent, or guilty of a lesser offense. Arrest statistics, likewise, will not reflect those offenders who commit crimes, but who are not reported to or arrested by police.

The following table profiles age, sex, and race of persons arrested for murder in 1977 by Area Development District. These figures measure arrests made, not offenses reported.

### PERSONS ARRESTED FOR MURDER

# MURDER VICTIMS 1977

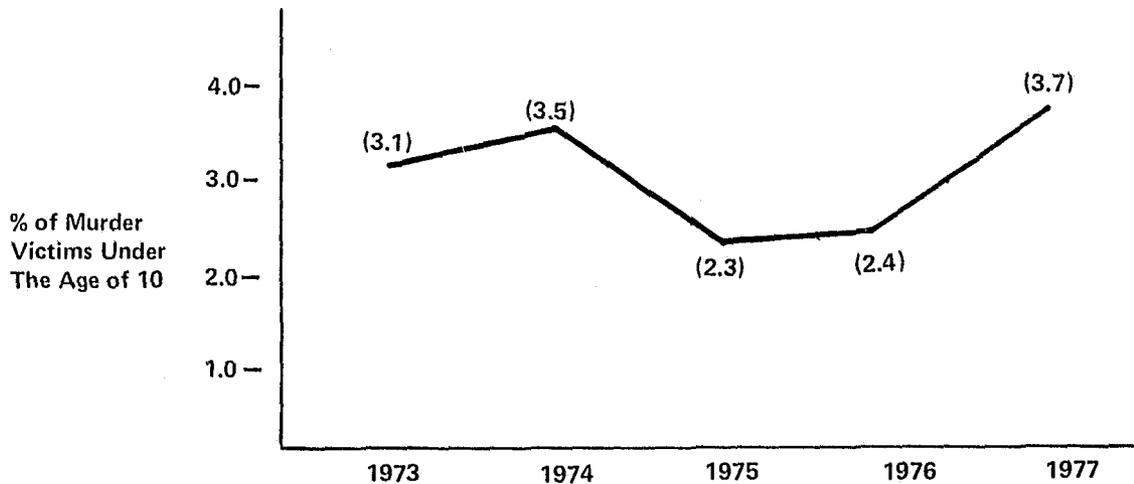

## AGE

In 1977, 43.5% of all persons killed by murder or non-negligent manslaughter were between the ages of 20 and 34. This 15-year span accounts for approximately 26% of the total population (based on 1970 census figures for population between the ages of 13 and 27).

The mean age for victims in 1977 was 35 years. This represents the youngest murder victim population in five years.

Children under the age of 10 amounted to 3.7% of all murder victims in 1977.

## SEX

Approximately four out of every five murder victims in 1977 were males. The mean age for males murdered was 34.5 years, with the greatest number of victims within the 20-24 year age group. Among females, the mean age was slightly higher, 37 years, with the greatest number of victims falling between the ages of 25 and 29.

## RACE

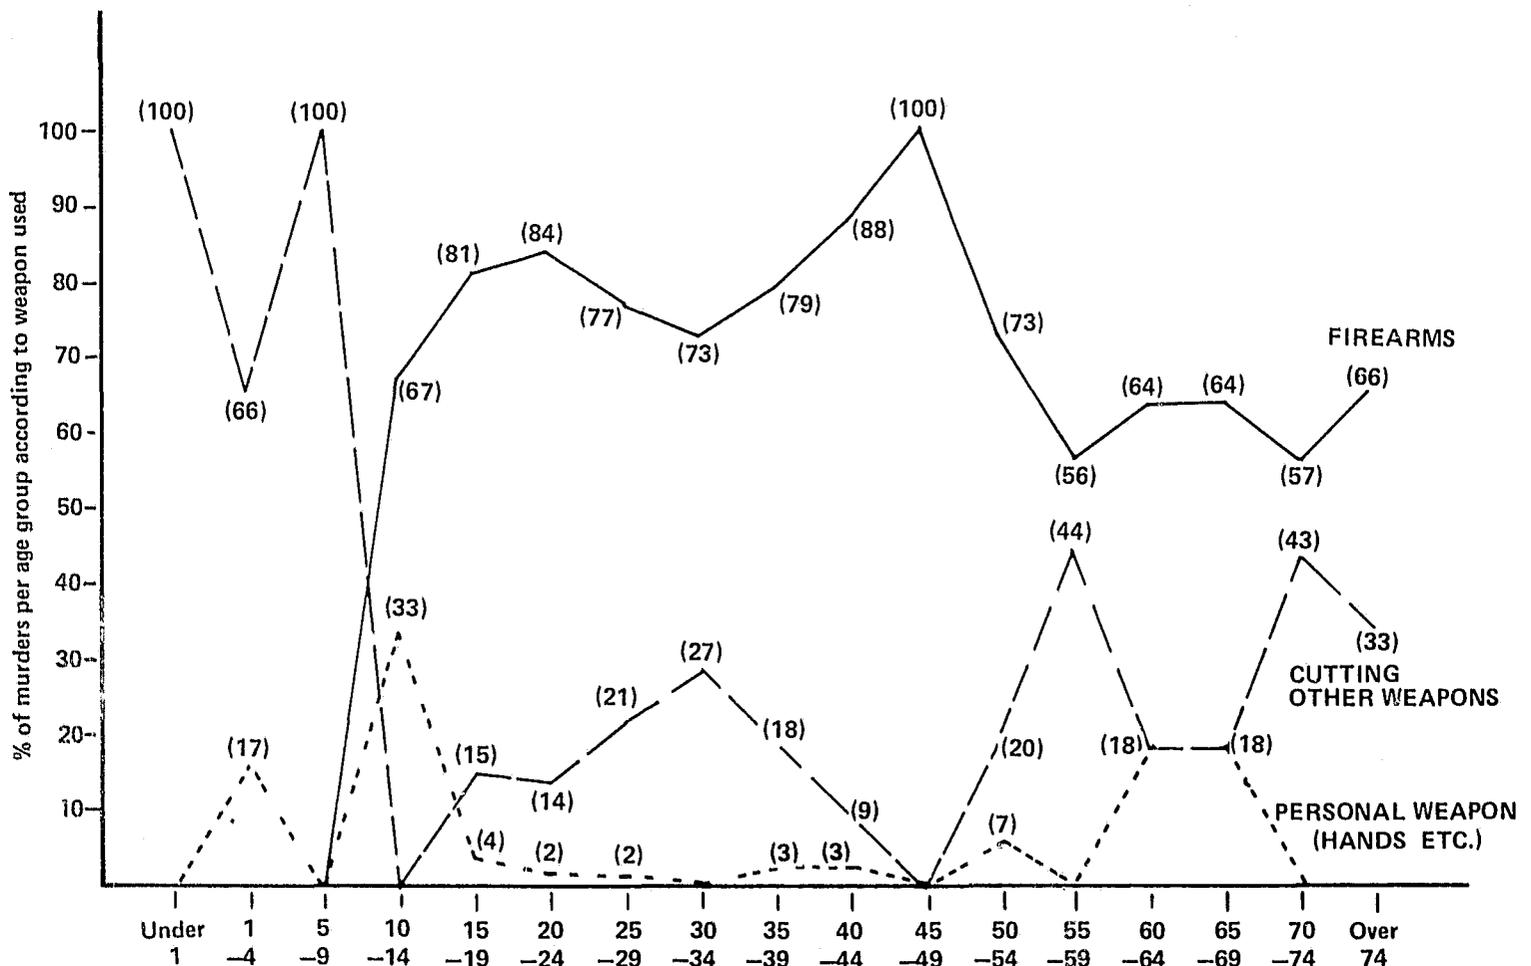

Seventy-seven and six-tenths percent of all murder victims in 1977 were white. The remainder were black. Among white victims, the average age was 35.7 years, with the greatest number between the ages of 30 and 34. Among black victims, the mean

age was 32.8 years, with the greatest number between 25 and 29.

## WEAPONS

Handguns were used in more than half of the murders committed in 1977. Rifles and shotguns were used in 8.9% and 15.2% of the cases, respectively. In summary, firearms were used in 75.8% of the murders, or 3 out of every 4. Cutting instruments and other weapons were used in 20.8% of the cases, and personal weapons (such as hands, feet, etc.) were used in the remaining 3.4%.

The following chart depicts the frequency with which different weapons were used upon victims in various age categories. Firearms were used with extreme frequency (over 70% of the time) in murders where the victim was between the ages of 15 and 54.

# RAPE IN KENTUCKY

## DEFINITION

Forcible rape is defined as the carnal knowledge of a person forcibly and against their will. All assaults to rape and attempts to rape are counted; carnal abuse, statutory rape, and other sex offenses are not included.

## CLEARANCE RATE

Of 659 rapes and rape attempts reported in Kentucky in 1977, 65% were cleared by arrest. Thirty-one of these resulted in juvenile arrests.

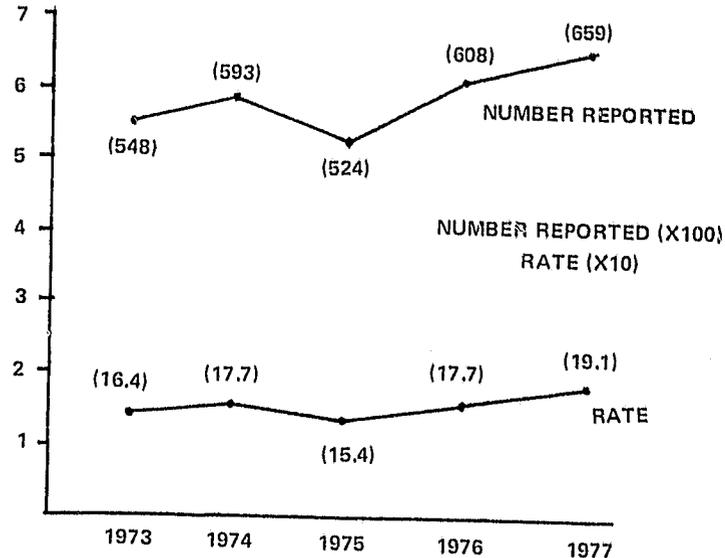

In the past, the major problem in combating rape has not been in the category of clearance of cases, so much as in the accurate reporting of cases. Due to the threat of embarrassment, shame, public criticism, or some other emotional strain, rape victims have been reluctant to report this offense to police and authorities. Through public education campaigns, the growth of counseling centers for rape victims and their families, increased awareness by agencies, and recent legislation, it is hoped that more victims are coming forward to report this crime when it occurs. At this time, however, there is no way of accurately determining whether there is an increase in reporting, or not.

It is interesting to note that rape is the only one of seven Part I offenses to reflect an increase in crime rate over 1976. Hopefully, the increase is a reflection of a greater tendency for victims to report offenses to the authorities, rather than an increase in crimes committed. However, there is no way of positively determining which one of these possibilities applies.

## HOW MANY RAPES OCCURRED?

There were 659 rapes reported in Kentucky in 1977. This represents an increase of 8.4% over 1976.

The trend in reported rapes, as well as the crime rate for the past five years, is depicted on the graph at the top of the page.

The crime rates depicted in this graph measure offenses reported per 100,000 total population. Because rape victims are almost always females, however, a more accurate picture of victimization would result by using female populations only. In 1977, 37.6 cases were reported per 100,000 female population (1976 female population estimate).

<b>AVG</b>	<b>19.6</b>	<b>27.0</b>	<b>31.5</b>	<b>21.9</b>

These tables depict the incidence of rape in 1977, according to month, and percentage of total rape offenses reported by month since 1973. During the past five years, rape has been reported consistently most often during the warm summer months, particularly July and August. The lowest incidence of rape has been in December, January and February.

## WHO COMMITS RAPE?

In 1971 Menachem Amir published a classic study on rape which attacks some of the commonly-held fallacious beliefs about rapists. According to Amir's study, rapes are not committed by sexually unfulfilled men, unable to control sudden desires as has often been thought. Rather, his data showed that 90% of group rapes and 58% of rapes committed by a single person were planned, not impulsive. Furthermore, 60% of the rapists in the study were married and led normal lives. Their only difference from other persons, was in their tendencies toward violence and their mode for expressing it. Amir also showed that over one-third of all rapes are committed by a man forcing his way into the victim's home, and one-half of all rapes occur in a residence. Other figures indicated that 48% of the rapists he studied were known to the victim, not strangers, that in 93.2% of the cases the rapist and the victim were of the same race (and of those which were not, white men attacked black women more often than black men attacked white women), and that only 4% of all reported rapes involved precipitative behavior on the part of the victim.\*

## PERSONS ARRESTED

In Kentucky, the only data collected pertaining to rapists deals with age, sex, and race of persons arrested for rape. Most of these were young males (although two females were arrested for rape in Louisville) between the ages of 18 and 34. Seventy-six percent of those arrested were white, with non-whites arrested generally in the central and western areas of the state. This data is presented in the following chart, depicting persons arrested for rape in 1977. It should be remembered that arrest statistics do not allow for the innocence of the arrestee, nor for offenders who do not get reported to police, or are not arrested.

\*Swanson, Chamelin, Territo, *Criminal Investigation*, (Santa Monica, California: Goodyear Publishing Co., Inc., 1977) p. 311.

# ROBBERY IN KENTUCKY

## DEFINITION

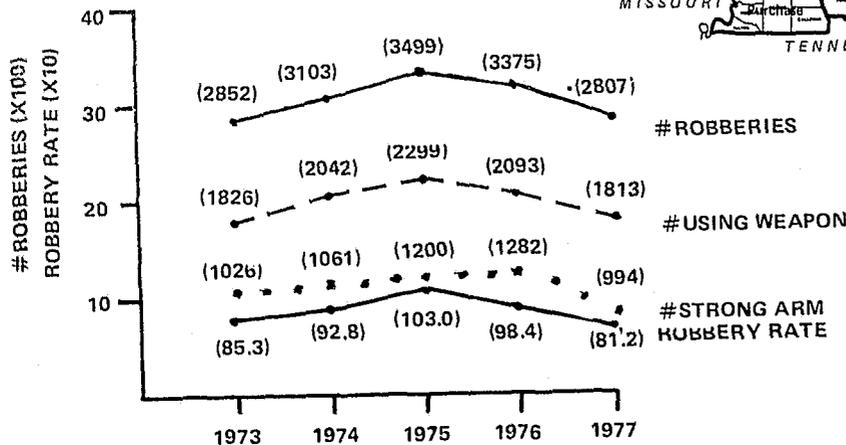

Robbery is defined as the felonious and forcible taking of the property of another against his will by violence or by putting him in fear. The element of personal confrontation is always present in this crime. Under the Program, all assaults or attempts to rob are included. Robberies are reported in two general categories—armed, any weapon (when any object is used as a weapon) and strong arm, which includes muggings and similar offenses where no weapon is used, but strong arm tactics are employed.

## CLEARANCE RATE

Of 2,807 reported robberies in Kentucky during 1977, 40% were cleared by arrest. Of these, 207 (18%) were juvenile arrests. Although robbery is a very serious personal crime, the clearance rate for robbery crimes is the lowest of the four major personal crimes (murder, rape, robbery, aggravated assault). One factor which could impact the clearance rate of this crime might be the likelihood that the victim and robber are strangers. Without the victim's identification of a suspect, the detective's investigation becomes more difficult.

## HOW MANY ROBBERIES OCCURRED?

In 1977, 2,807 robberies were reported to law enforcement agencies in Kentucky. This represents the fewest robberies in the past five years. The trend in robbery rates and the number of robberies since 1973 are depicted on the following chart. As can be determined by the chart, armed robberies account for approximately two-thirds of all robberies reported.

## WHERE DO ROBBERIES OCCUR IN KENTUCKY?

This table depicts the distribution of total robberies and juvenile arrests for robberies in 1977 by Area Development District. Note the extremely high incidence of robbery in major urban areas.

## WHEN DO ROBBERIES OCCUR?

ROBBERY BY MONTH – 1977

In 1977, more robberies occurred in the month of September than in any other month of the year. The next highest month was December, followed by November and October. The lowest incidence of robbery occurred in May, representing the lowest percentage for that month in five years.

Overall, since 1973, robbery has occurred most frequently in the final quarter of the year, and least frequently in the beginning months.

Miscellaneous	326	11.6	\$ 146,235	\$ 449
<b>TOTAL FOR KENTUCKY</b>	<b>2,807</b>		<b>\$1,564,836</b>	<b>\$ 557</b>

Forty-one and eight-tenths percent of all robberies reported in 1977 occurred on the street, 10.1% in residences, and the remainder in other buildings, including banks, stores, gas stations, commercial houses, etc. Commercial houses accounted for 24.1% of all reported robberies, the most frequency of any interior location. Commercial houses includes hotels, motels, lodges and all commercial establishments other than banks, chain stores and gas stations.

Bank robberies accounted for the highest average value of property loss, with commercial houses and chain stores recording the highest total value loss.

## WHO COMMITS ROBBERY?

Of the four major personal crimes (murder, rape, robbery, and aggravated assault) robbery arrests reflect by far the greatest amount of juvenile involvement. Eighteen percent of all cases cleared by arrest were attributable to juveniles. Among adults arrested, 63% were between 18 and 24 years of age. While the number of white offenders arrested continued to outweigh the number of non-white offenders, non-white representation was 38.9% in robbery, the highest percentage in any Part I offense.

The following table depicts the information on persons arrested for robbery in each Area Development District. It must be remembered, however, that these figures represent persons arrested only. They do not consider the guilt or innocence of the arrestee. Also, since only 40% of all robberies reported are cleared by arrest, more than half of the robberies reported in 1977 will not be represented on this table.

# AGGRAVATED ASSAULT

## DEFINITION

Aggravated Assault, as defined under the Kentucky Uniform Crime Reporting System, is an attempt or offer with unlawful force or violence, to do serious physical injury to another. Attempts are included since it is not necessary that any injury result when a gun, knife, or other weapon is used which would result in serious personal injury if the crime were successfully completed.

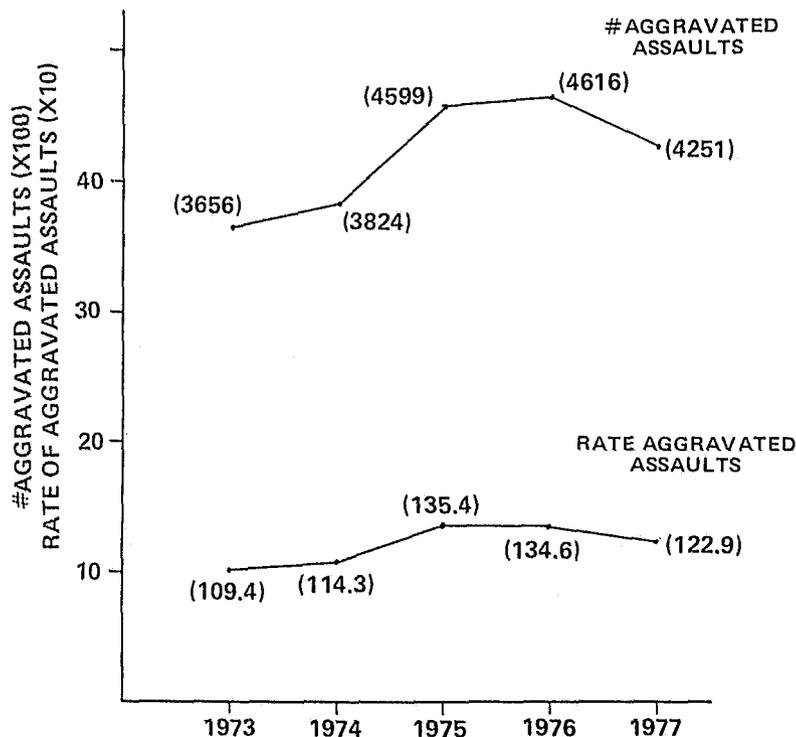

## CLEARANCE RATE

Of 4,251 aggravated assaults reported to police agencies in Kentucky during 1977, 70.7% were cleared by arrest. Of these, 210 (7%) resulted in juvenile arrests. The element of confrontation between victim and offender, present in this case, probably contributes to this relatively high rate of clearance as it does in other crimes against the person.

## HOW MANY AGGRAVATED ASSAULTS OCCURRED?

In 1977, 4,251 aggravated assaults were reported to police. This represents a 7.9% decrease from 1976. While the rate of reported aggravated assaults decreased in 1976, the first numerical decrease in the last five years occurred in 1977.

The five-year trend in aggravated assaults is depicted on the following chart.

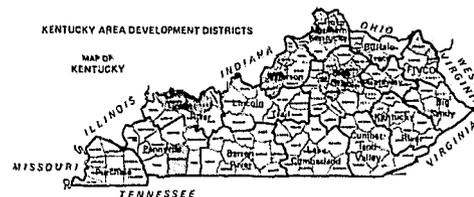

## WHERE IN KENTUCKY DO AGGRAVATED ASSAULTS OCCUR?

## WHEN DO AGGRAVATED ASSAULTS OCCUR?

### AGGRAVATED ASSAULT BY MONTH - 1977

In 1977, more aggravated assaults occurred in July than in any other month of the year. In general over the past five years aggravated assaults have consistently been reported most often during the warm months between June and September. The lowest incidence of this crime occurs particularly in January and February.

## WHO COMMITS ASSAULT?

### PERSONS ARRESTED

The following chart describes the age, sex, and race of 4,174 persons arrested for aggravated assault by area development district. As can be determined by the chart, 7.8% of the arrests made were juveniles and 9.7% were females. Whites accounted for 81.7% of total persons arrested. It must be remembered, however, that arrest data does not reflect guilt or innocence and does not include offenders not arrested by police.

### WEAPONS USED

The use or attempted use of a dangerous weapon in an assault or the serious injury inflicted by hands, fists, or feet separates this Index Offense from those assaults categorized as "simple" and not aggravated in nature. The victim of an actual assault of this type may suffer serious injury or permanent disability and all assaults to kill and attempts to kill are recorded in this area. Most aggravated assaults, like murders, probably occur within the family unit or among neighbors or acquaintances.

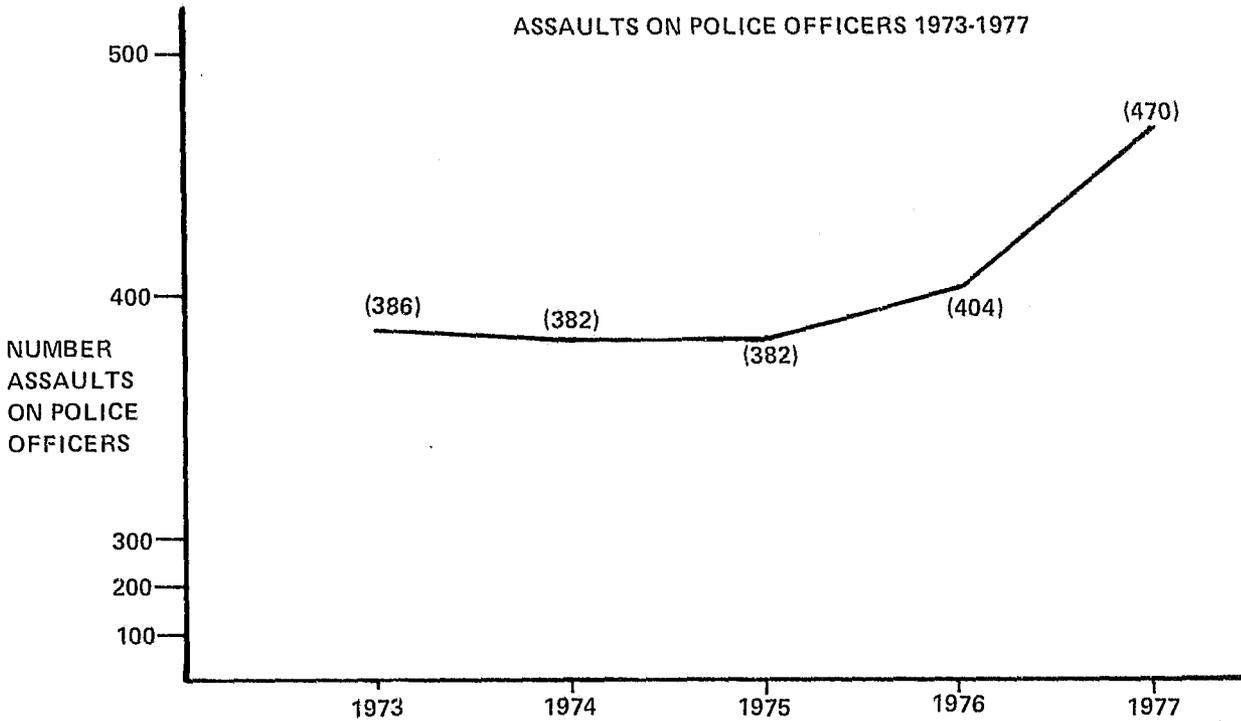

During 1977, 38% of all aggravated assaults reported were committed through the use of a firearm. Knives and cutting instruments contributed 17%, other weapons were used 26% of the time, and the remaining 19% involved the use of personal weapons (hands, feet, fists, etc.).

## POLICE OFFICERS ASSAULTED

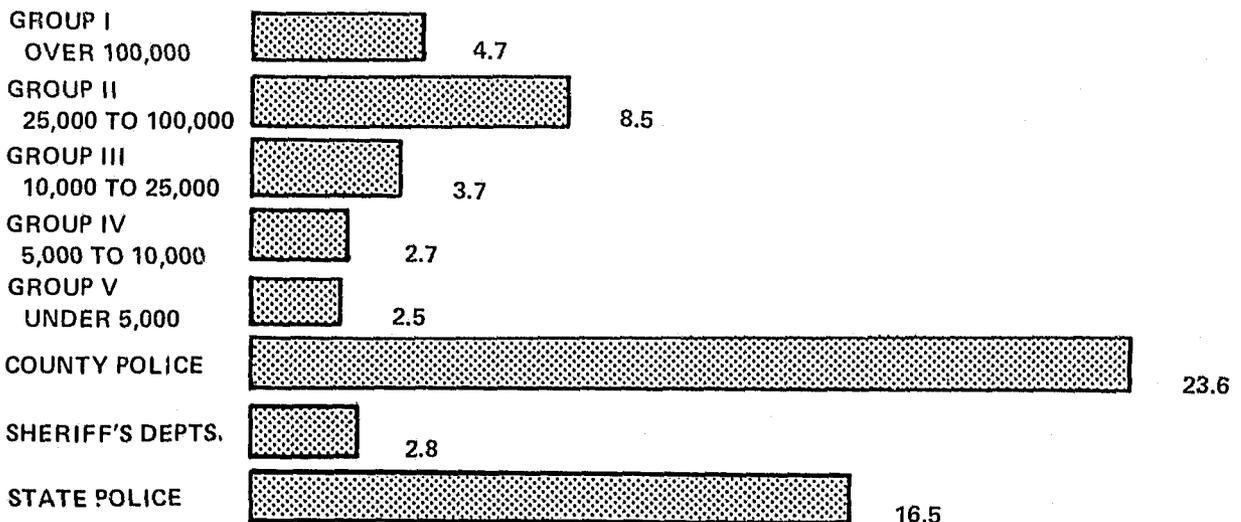

The killing or assault of a police officer has implications which reach far beyond the overt act. Such occurrences are, in effect, an attack upon the law and upon society itself. These attacks constitute an immediate threat to the well-being of the community and the police officers who protect and serve it. This situation must become a subject of serious public concern.

The total number of police officer assaults increased over 16% in 1977 when 470 officers were assaulted. Twenty-four percent of these assaults resulted in injuries.

### NUMBER OF POLICE OFFICERS ASSAULTED PER 100 OFFICERS BY POPULATION GROUP 1977

The highest rate of assaults in 1977 occurred among County Police, where 23.6 assaults per 100 officers were reported. The State Police sustained 16.5 assaults per 100 officers.

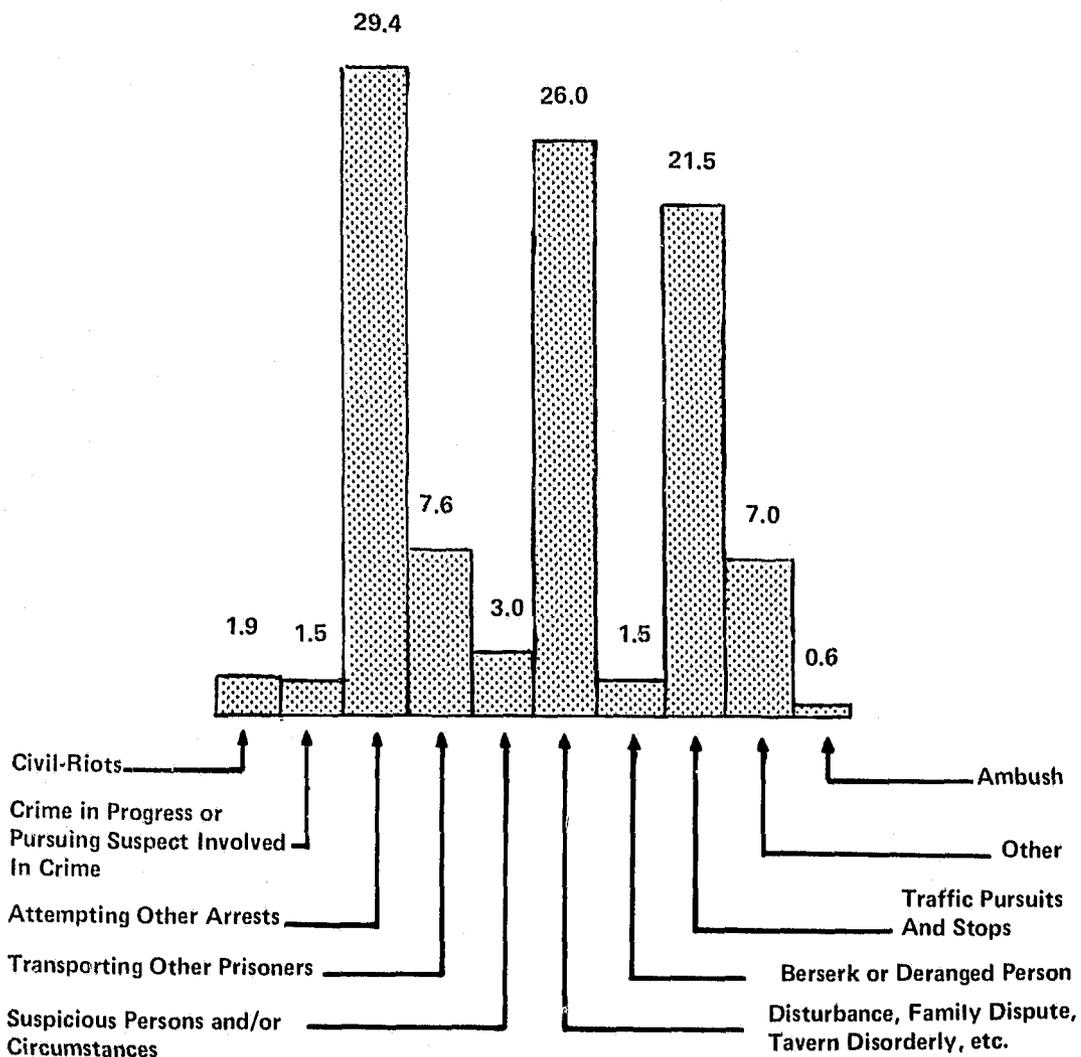

## TYPE OF ACTIVITY 1977 BY POLICE ASSAULTED

A study of the type of service being rendered by the police officer when he was assaulted gives an indication of the degree of jeopardy an officer faces in a given situation.

The three activities reflecting the highest rates of officer assault were:

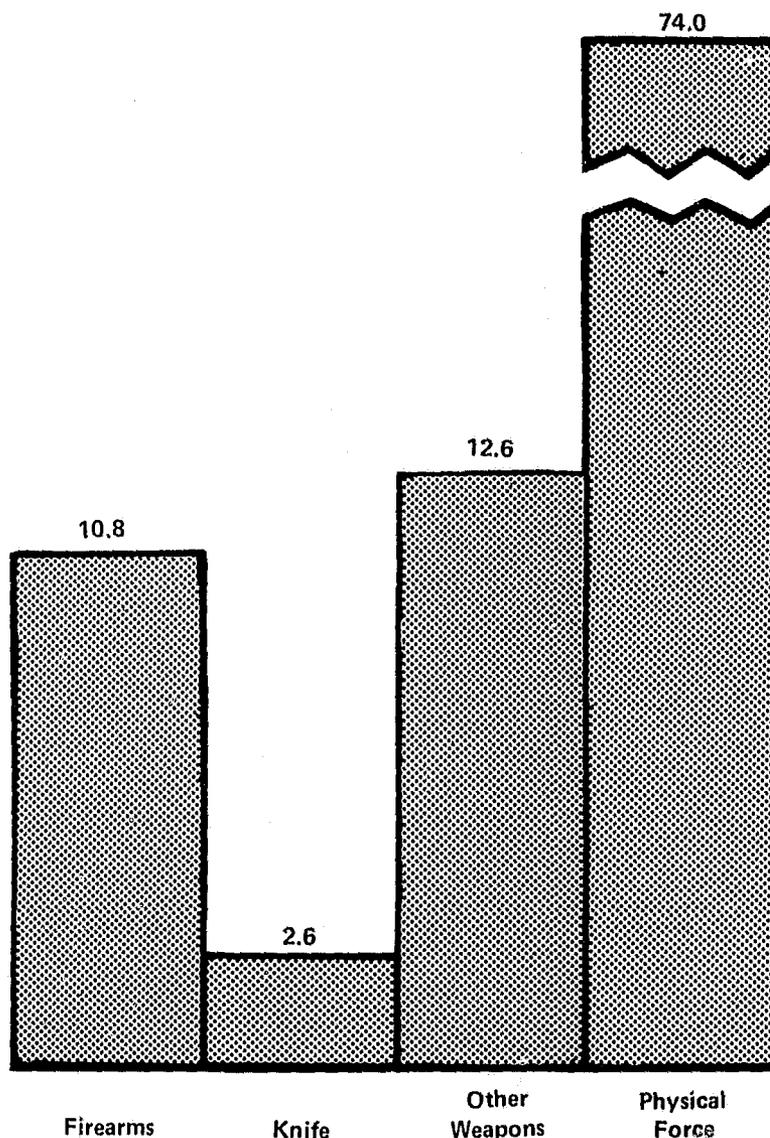

- (1) attempting other arrests (29.4%)
- (2) answering disturbance calls, including family disputes (26.0%)
- (3) making traffic pursuits and stops (21.5%)

The remaining assaults by type of activity are shown in chart form.

## WEAPONS USED IN ASSAULTS ON POLICE OFFICERS 1977

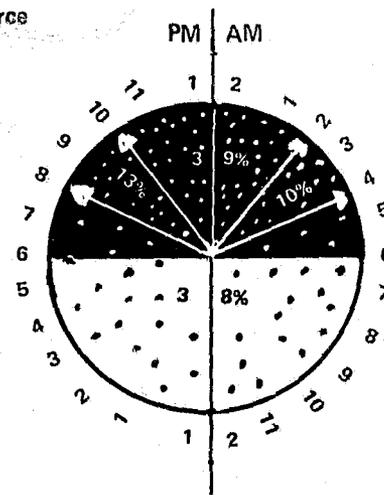

In assaults upon police officers in 1977, personal weapons (hands, feet, etc.) were used in 74 percent of the assaults. Other dangerous weapons (includes everything but firearms and knives) were used in 12.6 percent of all police assaults. Firearms and knives had respective usage rates of 10.8 and 2.6 percent.

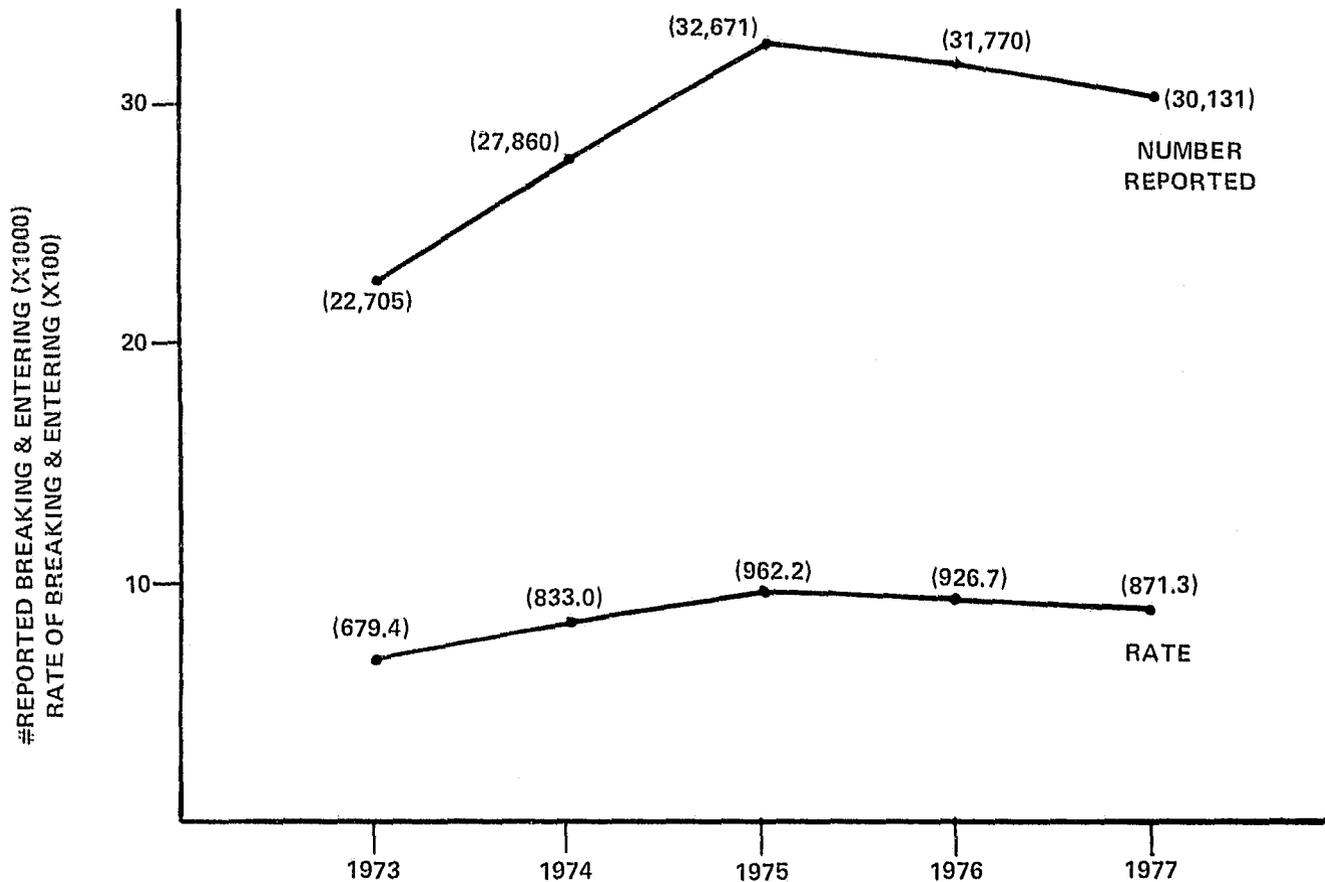

### TIME OF POLICE ASSAULTS

An indication of time periods and related assault rates is presented to indicate the hours of greatest danger to police officers.

The four-hour period 10:00 P.M. to 2:00 A.M. accounted for 39 percent of the assaults on police officers in 1976. The six-hour period 8:00 P.M. to 2:00 A.M. recorded 52 percent of the police assault cases, with the eight-hour period from 8:00 P.M. to 4:00 A.M. accounting for 62 percent of the assaults on police in 1977.

# BREAKING AND ENTERING

## DEFINITION

Under this program, breaking and entering is defined as the unlawful entry of a structure to commit a felony or larceny, even though no force was used to gain entrance. Crimes reported in this category are broken down into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

## CLEARANCE RATE

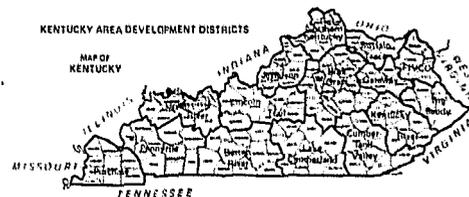

Of 30,131 cases of breaking and entering reported to police agencies in Kentucky during 1977, 18% (5,495) were cleared by arrest. Of those cases, 39% (2,140) resulted in juvenile arrests.

## HOW MANY B&E'S WERE COMMITTED?

The 30,131 reported breaking and enterings during 1977 marked a 5.1% decrease from the previous year. The five-year trend for this offense is depicted on the chart above.

## WHERE DO B&E'S OCCUR IN KENTUCKY?

The following table depicts the incidence of Breaking and Entering by Area Development District, including the number of cases cleared by juvenile arrest in each district.

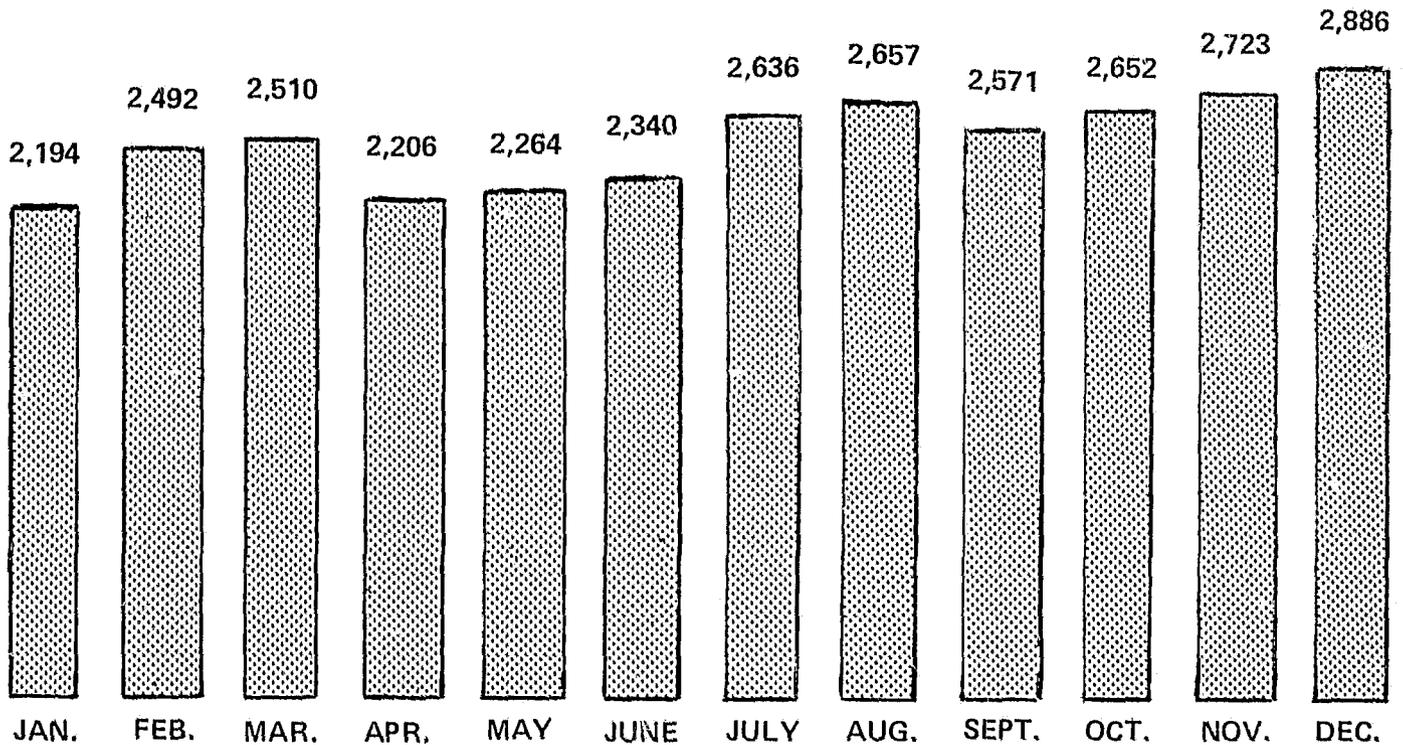

## BREAKING AND ENTERING BY AREA DEVELOPMENT DISTRICT

# WHEN DO BREAKING AND ENTERINGS OCCUR?

## BREAKING AND ENTERING BY MONTH - 1977

December marked the highest incidence of breaking and entering in 1977. Since 1973, this offense has occurred slightly more frequently in the latter half of the year, particularly between October and December, than in the first half. The months between April and June mark the lowest reported incidence of breaking and entering.

### MONTHLY PERCENTAGES 1973-1977

1976	25.9	22.9	26.1	25.1
1977	23.9	22.6	26.1	27.4
<b>AVG</b>	<b>24.1</b>	<b>23.0</b>	<b>26.0</b>	<b>26.9</b>

BY TYPE OF BUILDING AND TIME OF DAY

The following table shows that over 53% of all breaking and enterings that were reported in 1977 were known to occur in the nighttime. Almost 32% were known to occur during the day. The time of the remaining offenses was unknown.

Residences made up 62.5% of all reported breaking and entering cases and represented 64.2% of all property value loss. The incidence of nighttime burglary was only slightly greater than daytime for residences, while among nonresidences over three times as many offenses occurred at night.

WHO COMMITS BREAKING AND ENTERING?

Arrest statistics for breaking and entering show that almost 46% of all arrests for that offense in 1977 were juveniles. Ninety-five and one-fourth percent were males and 81.3% were white. Persons between 11 and 34 years of age accounted for over 93% of all arrests for this offense. Arrest statistics, however, do not consider the arrestee's possible innocence, and only count those persons who police are able to catch. In breaking and entering, the clearance rate by arrest was only 18.2% in 1977.

# LARCENY IN KENTUCKY

## DEFINITION

Larceny-Theft is the unlawful taking or stealing of property or articles of value without the use of force, violence, or fraud. It includes crimes such as shoplifting, pocket-picking, purse snatching, thefts from autos, thefts of auto parts and accessories, bicycle thefts, etc. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, "congams", forgery, and worthless checks. Auto theft is excluded from this category for crime reporting purposes in as much as it is a separate Crime Index Offense.

The Crime Index Offense of larceny formerly included only those thefts where the value of the goods stolen is \$50 or more. It might be noted that this classification was changed in 1973 and the total

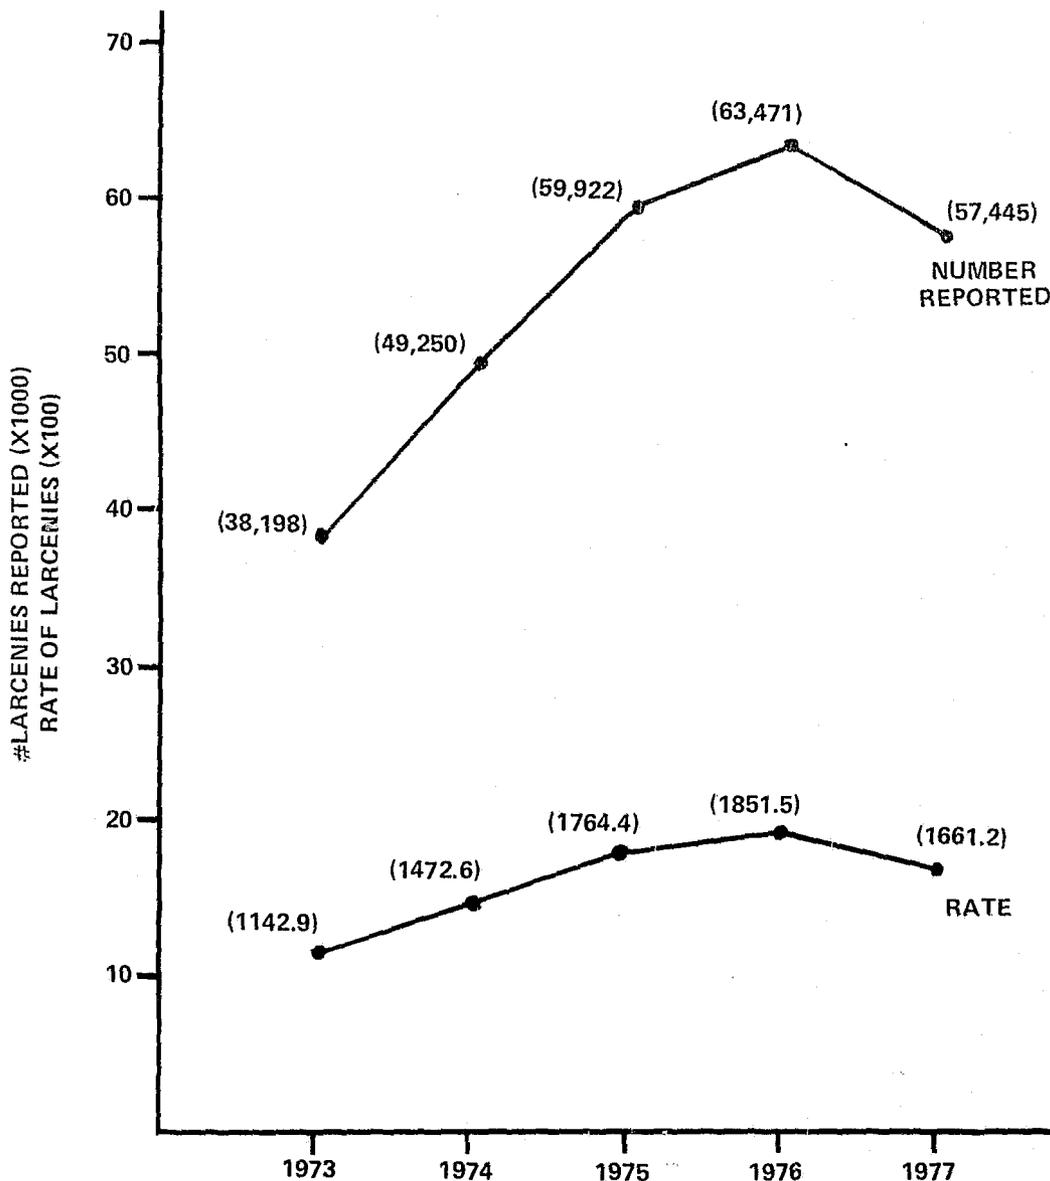

larceny cases are now being used in the compilation of the Crime Index.

## CLEARANCE RATE

Of 57,445 cases of larceny reported to police agencies in Kentucky during 1977, 18% (10,129) were cleared by arrest. Of those cases, 33% (3,320) resulted in juvenile arrests.

## HOW MANY LARCENIES WERE COMMITTED?

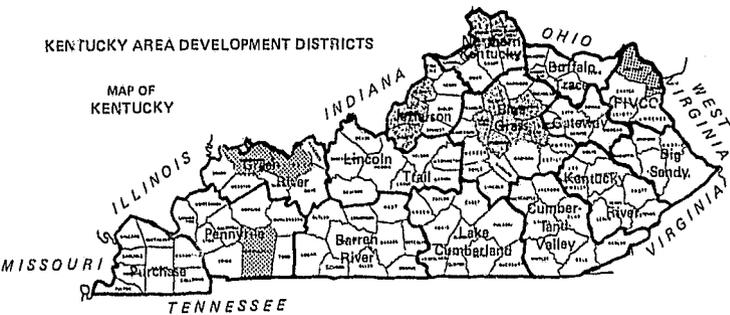

The 57,445 reported larcenies during 1977 marked a 9.4% decrease from the previous year. The five-year trend for this offense is depicted on the following chart.

**WHERE DO LARCENIES OCCUR  
IN KENTUCKY?**

## CLASSIFICATION

One out of every four larcenies which occurred in 1977 resulted in the taking of something from an automobile. This offense was closely followed in frequency by the unlawful taking of auto parts and accessories. Together, these two classifications accounted for over 56% of all reported larcenies, and resulted in 39% of all total property value loss for larceny.

The distribution of offenses and the property value associated with each classification are depicted on the following table.

CLASSIFICATION	NUMBER OF OFFENSES	PERCENT OF DISTRIBUTION	TOTAL VALUE	AVERAGE VALUE
Pocket-Picking	128	0.2	\$ 21,127	\$ 165
Purse Snatching	604	1.1	\$ 52,918	\$ 88

## WHO COMMITS LARCENY?

Arrest statistics for larceny show that almost 34% of all arrests for that offense in 1977 were juveniles. Seventy-one and one-fourth percent were males and 76.1 were white. Arrest statistics, however, do not consider the arrestee's possible innocence, and only count those persons who police are able to catch. In larceny, the clearance rate by arrest was only 17.6% in 1977.

# AUTO THEFT IN KENTUCKY

## DEFINITION

In Uniform Crime Reporting, auto theft includes all thefts and attempted thefts of a motor vehicle. This includes any vehicle which can be registered as a motor vehicle in this state. This definition excludes taking a motor vehicle for temporary use, such as a family situation or unauthorized use by others having lawful access to the vehicle, such as chauffeurs, etc.

## CLEARANCE RATE

Of 8,486 cases of auto theft reported to police agencies in Kentucky during 1977, 22% (1,900) were cleared by arrest. Of those cases, 35% (659) resulted in juvenile arrests.

## HOW MANY AUTO THEFTS WERE COMMITTED?

The 8,486 reported auto thefts during 1977 marked a 0.3% increase from the previous year, although the rate for this offense dropped 0.5%. The five-year trend for this offense is depicted on the chart below.

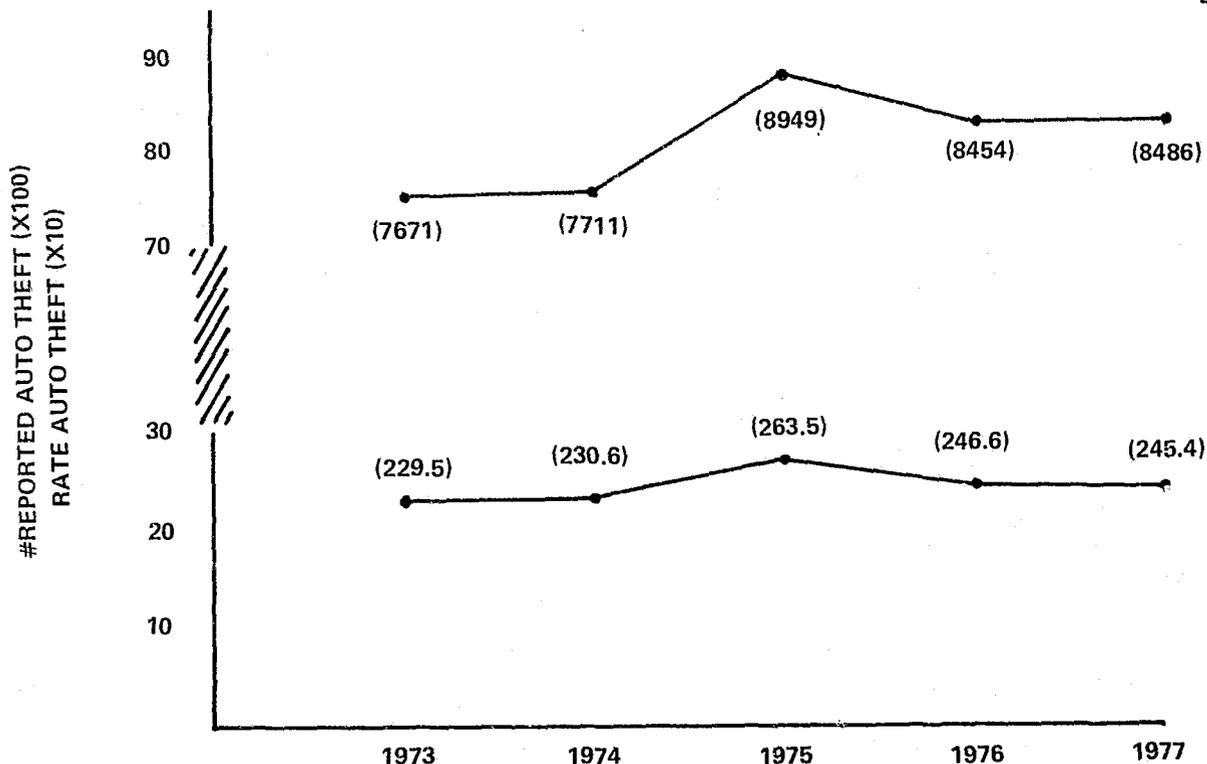

## WHERE DO AUTO THEFTS OCCUR IN KENTUCKY?

The following table depicts the incidence of auto theft by Area Development District, including the number of cases cleared by juvenile arrest in each district.

U A P P U D A A

## A. STATE ARREST DATA

For the purpose of this report, an individual arrested for committing two or more offenses during a single crime incident will be charged only for the most serious offense. On the other hand, perpetrators of two or more crimes that did not occur in a given time period, or cannot be classified as a single incident, will be charged, upon arrest, for each separate offense.

In 1977, there were 228,154 arrests in the Commonwealth of Kentucky — 26,496 for Part I and 20,658 for Part II offenses. There was a 7.6 percent decrease in reported Part I crimes while the arrest percentage decreased 3.2 percent. The chart on Page 71 depicts the reported crimes and number of arrests for the past 5 years and shows the percent change from the preceding year. With the exception of calendar year 1976, the percent of arrests exceeded the percent increase in reported crime — in 1977 the decrease in arrests was not as great as for the reported crimes.

The 26,496 arrests for Part I offenses constitutes 11.7 percent of the arrests for all crimes, in 1977. During 1977, 96 arrests for Manslaughter occurred which added to the 26,496 arrests for Part I offenses, equals the total of 228,154 as shown in the Table on Page 72. Table 72 also provides the number of arrests for the Part II offenses and the percent of distribution for the groupings of offenses.

Arrests increased substantially for two Part I offenses during 1977, Auto Theft and Robbery. Auto Theft increased 10.8 percent and Robbery 7.3 percent from the 1976 figures. On the contrary, there was a significant decrease in the arrest rates for Murder and Larceny — 8.8 percent and 7.6 percent respectively. The overall percent decrease in arrests from 1976 to 1977 was 3.1 percent. Page 73 presents this data along with the 1976-1977 comparison data for arrests for Part II offenses.

### AGE OF ARRESTED PERSONS

The number of persons arrested in 1977 in 22 age categories is presented in a table on Pages 74-75. Thirty-one point eight percent of the persons arrested were juvenile offenders (under 18 years of age). Between the ages of 18 and 34 years of age, 14,424 persons were arrested—this figure is more than half (54.4 percent) of the total arrested persons. These two general

age groupings constitute 86.2 percent of the arrests in Kentucky during 1977. Compared to the average for the past 5 years, the percent increase of Part I arrests in the 0-34 age bracket has increased very slightly, by less than 1 percent (.9 percent). The table on Page 76 shows the data for the past 5 years in four general age groupings — 0-17, 18-34, 35-59, and 60+.

Page 77 compares the arrest data of 1976/1977 by the arrests of persons under and over 18 years of age and provides the percent change for each of the Part I and II offenses. In the "under 18 years of age" column there are five crimes having between a 16 percent and 25 percent increase over 1976, and one, rape, that has a 48 percent decrease in juvenile arrests. The only major changes in the arrests of persons over 18 years of age, between 1976 and 1977, are in the murder category (-11 percent) and manslaughter category (+23 percent).

### ARRESTS BY SEX

The percent deviation of male/female arrests in 1977 is very slight compared to last year and the previous 5 year average. This year the arrests for Part I crimes was 83.0 percent male and 17.0 percent female. The male percent increased .5 percent while the female percent decreased by the same margin (Page 78). The 1977 male/female arrests compared to the 5 year average ('73-'77) shows that the female arrests was .2 percent higher than the 5 year average while the male difference was .2 percent lower.

The table on Page 79 presents the male/female arrest data for all Part I and Part II groupings of offenses. As evident in recent years the female involvement in Larceny, Forgery and Counterfeiting, Fraud, Embezzlement, Prostitution/Vice, curfew and loitering and runaways has been at least 20 percent (curfew) and as high as 86.8 percent (Prostitution/Vice in 1976). For Index Offenses females comprised 11 percent of the persons arrested in 1977 — a 6.5 percent decrease from 1976 and 4.6 percent below the 5 year average.

### ARRESTS BY RACE

In 1977, 89% of the total arrests in Kentucky were White, 10.9% were Negro, and the remaining .1% were Indian, Chinese, Japanese or all others. The percent involvement by race in 1977 varies slightly from the average per-

cent for the past 5 years — White's up .1% and Negro's down .1% (no change in the other classifications). The table on Page 80 shows the number of arrests by race for each of the Part I and II offenses.

The percentage of arrests changes when looking at the Part I offenses only. The involvement of Whites in 1977 was 78.1% and 21.8% for Negroes, and the other 4 groupings are below .1%. The 1977 percentages were .5% higher for Whites and .5% lower for Negroes, in comparison to the 1973-1977 average arrest by race figures. (See Page 81)

### GAMBLING ARRESTS

The average percent of gambling arrests for the year 1973 thru 1977 is 2.7% Lottery, 13.5% Bookmaking, and 83.8% all others. The percents for 1977 are 3.9 for Lottery, 22.7 for Bookmaking, and 73.4 for all others (Page 82).

As one can see, the 1977 figures are very different from the 5 year average. As seen in the table below, the percents have varied widely in all three categories during the last 5 years — it

	<u>% Lottery</u>	<u>% Bookmaking</u>	<u>% All Others</u>
1973	.7	4.1	95.2
1974	5.5	5.2	89.3
1975	2.9	21.0	76.1
1976	.3	14.5	85.1
1977	3.9	22.7	73.4
5 Yr. Avg.	2.7	13.5	83.8

is difficult to explain the difference in the 1977 figures to the average as well as attempting to explain the wide variations between all five of the years.

### NARCOTIC ARRESTS

There were 10,612 total narcotic related arrests in 1977. Of this total 499 (4.7%) were related to opium or cocaine, 7,619 (71.8%) mari-

juana related, 435 (4.1%) synthetic narcotics related, and 2,059 (19.4%) for other dangerous non-narcotic drugs (Page 82). Compared to the 5 year average on Page 83, the opium/cocaine arrests are down 1.3%, marijuana related are up 4.4%, synthetic narcotics no change, and other dangerous drugs down 3.1%.

### B. CLEARANCE RATES

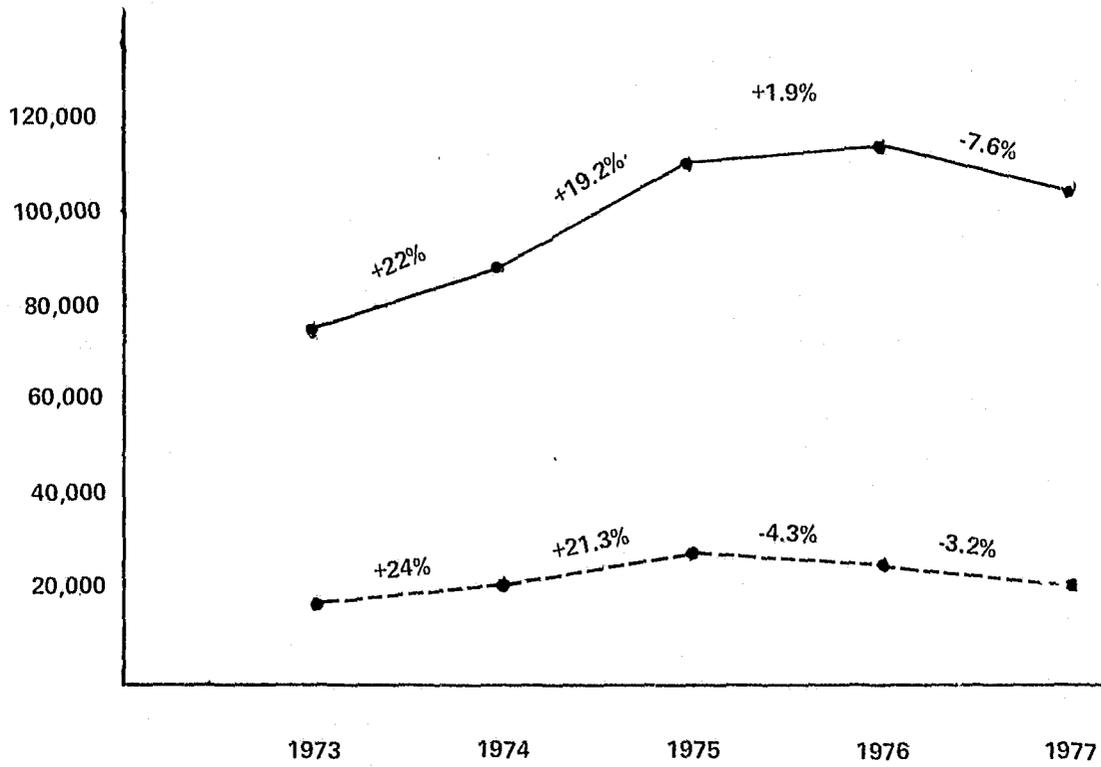

For Uniform Crime Reporting programs, a crime can be cleared through two procedures: clearance by arrest or clearance by exceptional means. A clearance by exceptional means occurs when some element beyond police control such as the victim's refusal to prosecute, suicide of the offender, the killing of two persons in a double murder, the reporting of an offense through a death bed confession, and similar circumstances which preclude prosecution. The arrest of one person can clear several crimes or several persons may be arrested in the process of clearing one crime.

During 1977, 21.5 percent of all reported Part I crimes were cleared by arrest or exceptional means — .5% higher than in 1976. The clearance rates for crimes against persons were: Murder 86.8%, Rape 65.2%, Robbery 40.0%, and Aggravated Assault 70.7%. The clearance rates for crimes against property were: Breaking and Entering 18.2%, Larceny 17.6%, and Auto Theft 22.4%.

The table on Page 98 presents the annual clearance rates for each Part I offense for the years of 1973 thru 1977 and the average annual clearance rates for the 5 year period. One will note that the 1977 clearance rates for all seven crimes are higher than the 5 year average except for the crimes of Aggravated Assault and Breaking and Entering.

The total reported crime by Area Development District, the number of cases reported, the percent cleared and the percent involvement of adults and juveniles in the cleared cases is presented on Page 98. The percent involvement of adults and juveniles in the offenses cleared by each Part I crime is depicted on Page 99.

FIVE YEAR TREND FOR PART I REPORTED CRIMES AND ARRESTS FOR KENTUCKY

# AVERAGE NUMBER OF MUNICIPAL OFFICERS AND POLICE EMPLOYEES PER 1,000 POPULATION BY POPULATION GROUPS 1977

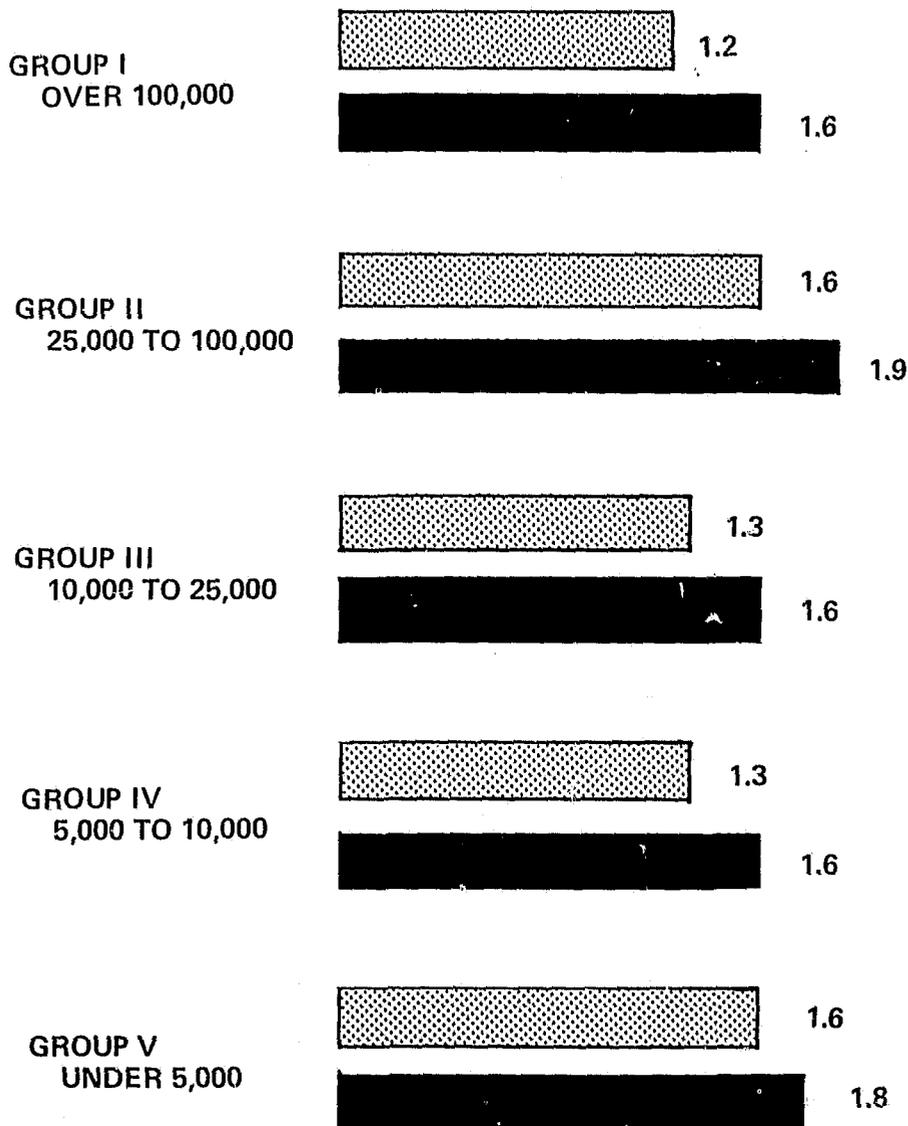

CHART 13

POLICE OFFICERS

TOTAL POLICE EMPLOYEES

**This report prepared by the Kentucky State Police and paid by State funds – KRS57.375**

Sources for statistics used in this book were:

Kentucky Department for Human Resources, Bureau for Social Services.

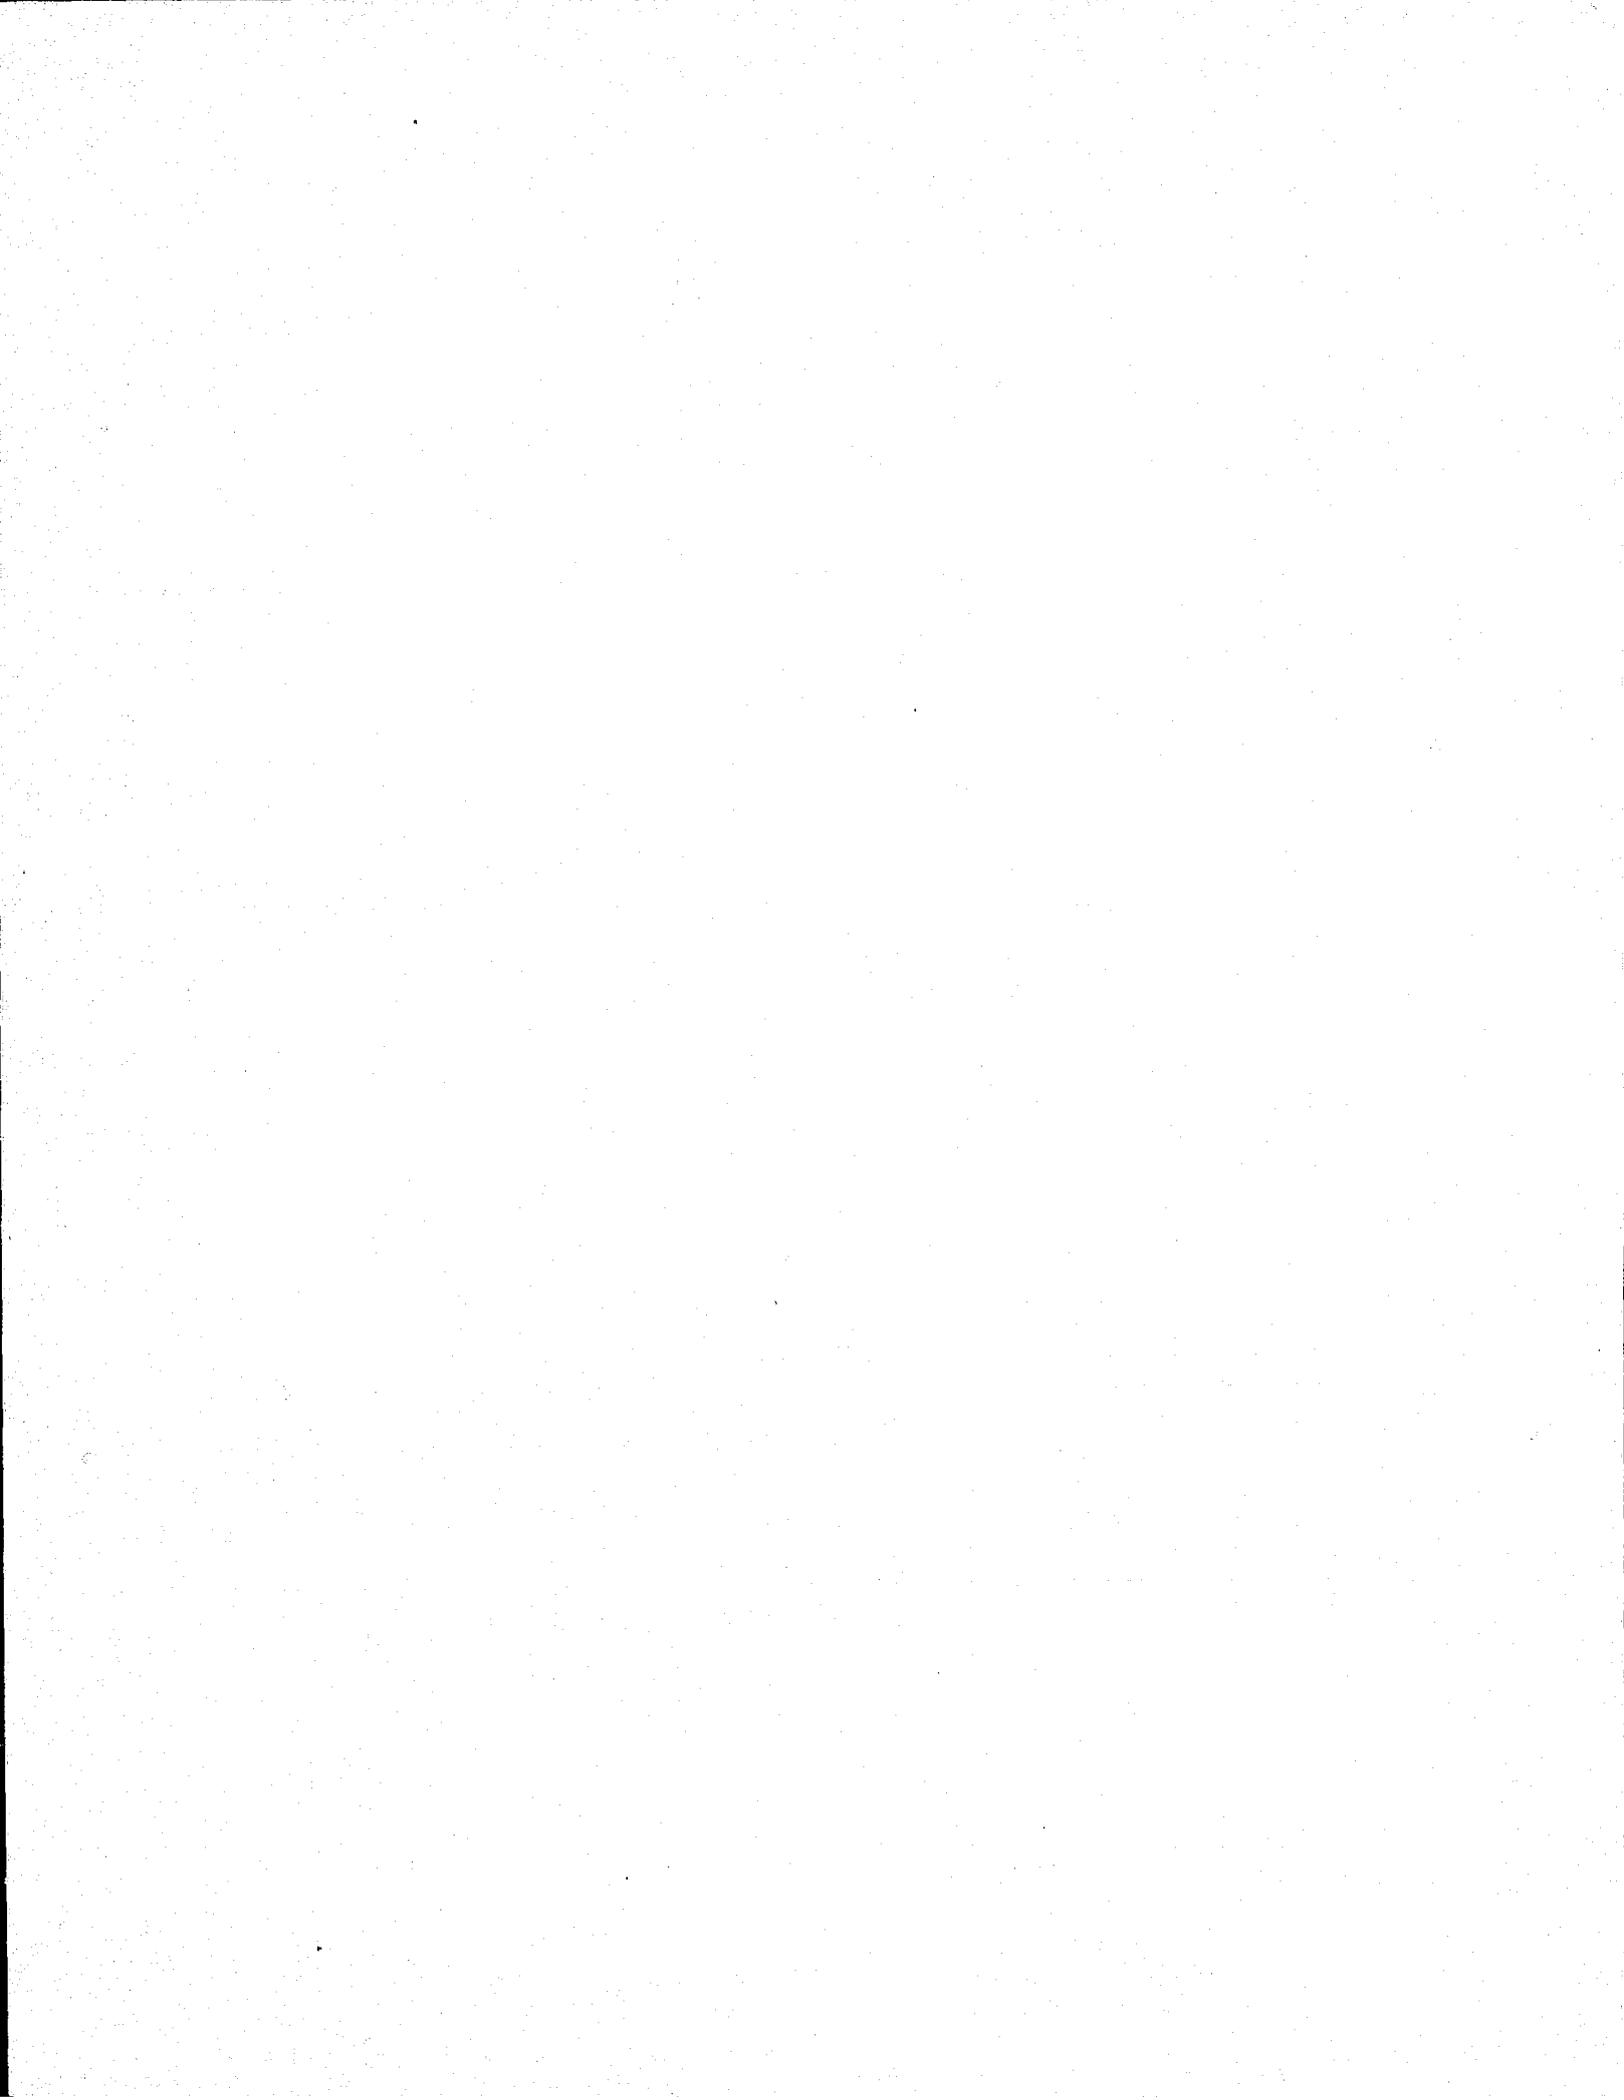

Kentucky Department of Labor, Research and Statistics Unit.

Kentucky Department of Commerce: **Kentucky Deskbook of Economic Statistics, 1977.**

University of Kentucky, Center for Public Affairs: **Kentucky Personal Income Study, 1976.**

University of Louisville, Urban Studies Center: **How Many Kentuckians: Population Forecasts, 1970-2020, 1977.**

(Rounded totals in this book may not equal 100 due to rounding errors.)

**END**
