SELECT BIBLIOGRAPHY OF POLICE AND
CRIME IN RELATION TO THE FUTURE

The field of futures research and speculation has grown tremendously during the 'seventies. This fact is reflected in the large literature that attaches to it.

However, in the fields of police and crime, relatively little work has been done and this fact too is reflected in the literature - which is quite small.

Presented here is a select bibliography of material relating to the future of police and crime. All items are ordered alphabetically in strict sequence.

This bibliography will be updated from time to time. Persons wishing to suggest additional items are requested to contact the Institute's librarian, as under:
