

# Florida Department of Offender Rehabilitation

Louie L. Wainwright, Secretary

OFFENDER FLOW THROUGH THE CORRECTIONS SYSTEM

55944

## Annual Report 1976-77

REUBIN O'D ASKEW, Governor  
State of Florida

NCJRS

MAR 28 1979

ACQUISITIONS

J. H. (Jim) Williams, Lt. Governor  
State of Florida

LOUIE L. WAINWRIGHT, SECRETARY

## DEPARTMENT OF OFFENDER REHABILITATION

1311 Winewood Boulevard • Tallahassee, Florida 32301 • Telephone: 904-488-5021

February 15, 1978

Honorable Reubin O'D. Askew, Governor of Florida  
Honorable Members of the Florida Legislature

Dear Governor and Members of the Legislature:

In accordance with Chapter 944.13, Florida Statutes, the Department of Offender Rehabilitation respectfully submits its Annual Report for Fiscal Year 1976-77. In tracking the offender flow through the various components of the criminal justice system, it is hoped that this year's report will provide you, and other interested individuals and agencies with a clear picture of the activities, status, functions, and impact of the Florida Department of Offender Rehabilitation as it executes its statutory responsibility for the custody, care, treatment, and management of adult offenders.

Should you have any questions regarding the material included in our 1976-77 Annual Report, we will be happy to respond.

Sincerely,

LOUIE L. WAINWRIGHT  
Secretary

LLW:js

## SECRETARY'S MESSAGE

*LOUIE L. WAINWRIGHT*  
*SECRETARY*

The sequence of events from arrest through incarceration to release or supervision has long been viewed as complicated and confusing. Coupled with the numerous changes in criminal justice philosophy and organization, the offender flow through the corrections component of the criminal justice system may seem nearly incomprehensible to many. This year's Annual Report for the Florida Department of Offender Rehabilitation intends to clarify any existent confusion or misconception by tracking the progress of offenders from their entry to release from the correctional component of the criminal justice system. This information is presented in addition to budget information, existing and planned facility locations, an overview of field operations, and statistical data.

The process encountered by an offender today is primarily a result of careful study, planning, and changes to the corrections component over the past five years. Beginning in 1972, with the Governor's Adult Corrections Reform Plan, modifications to Florida's correctional system were initiated. A 1973 legislative appropriation provided funds for the development of a Corrections Master Plan for Programs and Facilities, followed shortly thereafter by the Florida Corrections Reform Act of 1974. Significant portions of this legislation required that an adult correctional improvement plan be developed jointly by the former Division of Corrections and the Florida Parole and Probation Commission. Further, this act increased the number of members of the Florida Parole and Probation Commission from five to eight, with one of the new members being the Secretary of the Department of Offender Rehabilitation as a policy member of this body.

In the next year, legislation was enacted which impacted on the organization of the entire corrections component. The Correctional Organization Act of 1975 established the Department of Offender Rehabilitation through the transfer of the Division of Corrections from the Department of Health and Rehabilitative Services and the field staff, and responsibility for field supervision, from the Parole and Probation Commission to the new agency. Further, five regional offices were established with line responsibility for institutions, facilities, and community supervision. Additionally, the Central Office management structure was reorganized into programs, operations, and management and budget areas of responsibility. Also included among the provisions of this act was the requirement to evaluate twenty percent of all major programs of the Department on an annual basis; and the development of a single offender information and records system for the Florida Parole and Probation Commission and the Department.

Paralleling these internal planning and organizational efforts have been the activities related to Standards and Goals for Corrections. In January, 1973, the National Advisory Commission on Criminal Justice Standards and Goals published its report on corrections. This document set forth a number of standards covering all functional and programmatic

aspects of the correctional system. In February, 1974, the Florida Division of Corrections published a response to these standards and goals, and was the first state in the nation to do so. The Florida Task Force on Corrections, of which I am currently chairman, with the assistance of the several staff members from the Department, developed a similar document setting forth Standards and Goals for the criminal justice system in Florida. This document was submitted to Governor Askew on July 1, 1976. Currently, the Task Force is developing implementation strategies designed to meet the standards and goals for the correctional system.

While efforts to modify and reorganize the correctional system have continued, tremendous attention and interest have been focused on this component of the criminal justice system at both the state and national level as a result of the economic impact of crime on corrections. The Governor and legislature should be commended on their continued efforts to appropriate sufficient resources to build and operate a corrections system capable of incarcerating the growing member of inmates. The cost of operating the prison system in Florida has risen from \$52,000,000 in Fiscal Year 1973-74 to a budget appropriation of more than \$115,000,000 for Fiscal Year 1977-78. The projections indicate the inmate population will continue to grow at an increase of approximately 1,000 inmates per year until the 1990's. The increasing inmate population not only increases the Department's operating budget, but also increases the fixed capital or construction budget. The cost of supervising offenders on probation or parole has also increased during the past few years but not at the same rate as incarcerating inmates. The Department's posture in the 1978-79 Budget Request is to ask that the formula for generating field supervision staff be funded in lieu of full funding of all beds necessary to reach design capacity. Hopefully, the increased use of field supervision, as well as other alternatives to incarceration, will afford an overall reduction in the cost of corrections in Florida.

The corrections system has been changing and expanding to such an extent that keeping up with the offender flow through the system has been difficult. However, the 1977-78 Appropriations Act provides that the Department of Offender Rehabilitation develop a descriptive model of inmate processing from reception to departure. In addition, individuals under community supervision will be monitored with regard to classification and average length of stay in each risk category. These models and monitoring efforts should enable us to determine the cost for the corrections system as well as provide information to determine the extent to which the Department is meeting its stated objectives.

Other efforts to be continued in the coming years will provide additional information from which the offender flow may be analyzed. Evaluation will continue, utilizing the concept of operational performance standards as measuring tools. Efforts are underway to develop a single offender information and records system with the Florida Parole and Probation Commission. A consulting firm has been contracted, utilizing LEAA funds, to complete the three year-effort to develop a Management Information System.

In view of the past plans, mandates, standards, and legislative intent, the Department of Offender Rehabilitation recognizes the need to be able to effectively analyze the information regarding the offender flow through the correctional system. The format of this annual report will reflect the emphasis on offender flow and should be helpful to Department staff, members of the Legislature, other agencies, and the general public, in eliminating some of the confusion regarding the process.

## ADMINISTRATIVE STAFF OF THE DEPARTMENT OF OFFENDER REHABILITATION

The Correctional Organization Act of 1975 created the Department of Offender Rehabilitation by combining the former Division of Corrections and the field staff of the Florida Parole and Probation Commission. The Organization Act also divided Florida into five regions through which the Department could distribute its administrative responsibility.

The Secretary of the Department is responsible for administering an agency with 7,400 employees; 76 institutions; 19,269 incarcerated inmates; 38,465 offenders under community supervision and an operating budget of more than \$115,000,000.

The Central Office administrative structure in addition to the Secretary's Office, includes an office of the Assistant Secretary of Programs, Office of the Assistant Secretary of Operations, and the Office of the Assistant Secretary of Management and Budget.

The Assistant Secretary of Programs is responsible for the administration, supervision and direction of all the Department's program areas, as well as all planning, research, statistics, program evaluation, staff training, offender records and inmate relations activities.

The Assistant Secretary of Operations is the only one of the three Assistant Secretaries who has direct line authority over regional operations. This Assistant Secretary is responsible for reviewing regional budget requests, and regional budget transfers in addition to supervising, coordinating and monitoring the regional application of rules, regulations and policies for the Department.

The Assistant Secretary of Management and Budget is responsible for: the development and disbursement of operating and fixed capital funds; grants management and disbursement; internal audit; accounting; information services development and management; purchasing; personnel; and facilities services which includes the design and construction of new facilities and leasing of buildings.

The photo shown below, is typical of a staff meeting of the Secretary and the three Assistant Secretaries.

**EXECUTIVE STAFF MEETING** — (From left) Paul A. Skelton, Jr., Assistant Secretary for Management and Budget; T. P. Jones, Assistant Secretary of Programs; David D. Bachman, Assistant Secretary of Operations; Randy Barker, Assistant to the Secretary; Louie L. Wainwright, Secretary; Dr. James G. Ricketts, Deputy Secretary; Mike Ketchum, Legislative Liaison; Jim Vickers, Administrative Services Director.

## GOALS AND OBJECTIVES OF THE DEPARTMENT OF OFFENDER REHABILITATION

The purpose of the Department of Offender Rehabilitation, as stated in Chapter 20.315, Florida Statutes, is to "integrate the delivery of all offender rehabilitation and incarceration services that are deemed necessary for the rehabilitation of offenders and protection of society." In order to fulfill its purpose as mandated by law, the following goals and objectives for the Department of Offender Rehabilitation have been established:

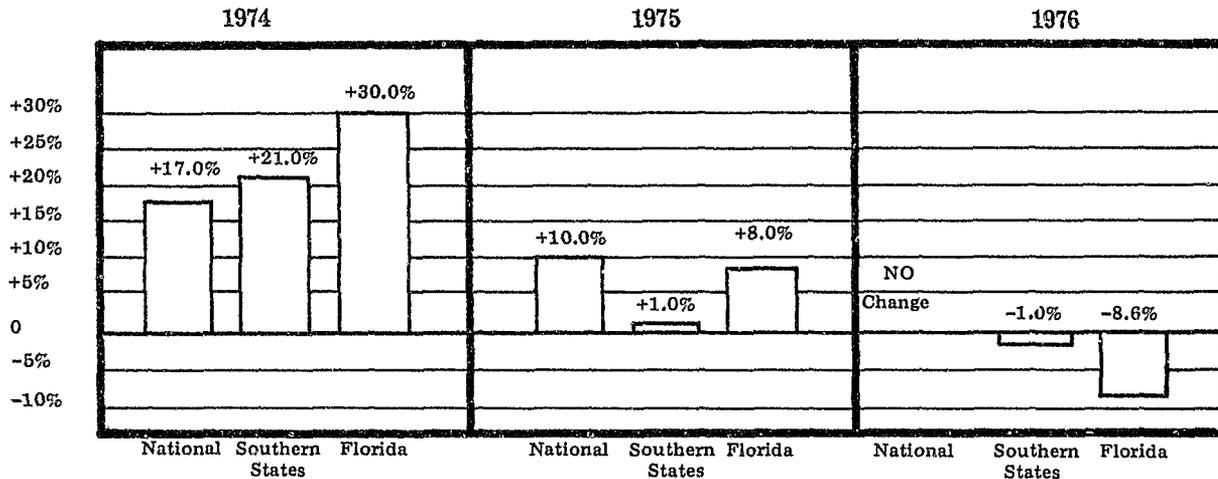

- TO PROTECT SOCIETY FROM CONVICTED OFFENDERS BY:
  - providing incarceration as an appropriate deterrent to the commission of crime;
  - substituting methods of training and treatment, which redirect and rehabilitate offenders, in lieu of retributive punishment.
  
- TO PROVIDE AN ENVIRONMENT FOR INCARCERATED PERSONS IN WHICH REHABILITATION IS POSSIBLE BY:
  - stressing the work ethic;
  - protecting the offender from victimization within the institution;
  - providing the skills and programs necessary to assist the offender in becoming a responsible citizen after release;
  - providing the necessary level of internal security within institutions.
  
- TO DEVELOP SAFE AND VIABLE COMMUNITY ALTERNATIVES TO TRADITIONAL INCARCERATION BY:
  - providing a quality Presentence Investigation to the courts for use in the sentencing process;
  - providing judges with sufficient information about diversionary programs and alternatives to incarceration;
  - providing effective community supervision for offenders on parole or probation;
  - providing the skills and programs to the offender to assist him in becoming responsible for his own behavior.
  
- TO CONTINUE IMPLEMENTATION AND MONITORING OF THE YOUTH OFFENDER PROGRAM.
  
- TO INCREASE EFFORTS TO RECRUIT STAFF FROM MINORITY GROUPS.
  
- TO CONTINUE COMMUNICATIONS WITH THE LEGISLATURE, JUDGES, STATES ATTORNEYS, PUBLIC DEFENDERS, AND LAW ENFORCEMENT PERSONNEL, FOR THE CONTINUED IMPROVEMENT OF THE TOTAL CRIMINAL JUSTICE SYSTEM.

## CRIMINAL JUSTICE TRENDS AFFECTING CORRECTIONS

The growth in the inmate population of the Department of Offender Rehabilitation during fiscal year 1976-77 continued upward with a net gain of 2,097 inmates. The rise in population is attributed to significant criminal justice trends which directly affect the felony caseload of the Department of Offender Rehabilitation. These trends, over which the Department has no control, have resulted in the increase in population.

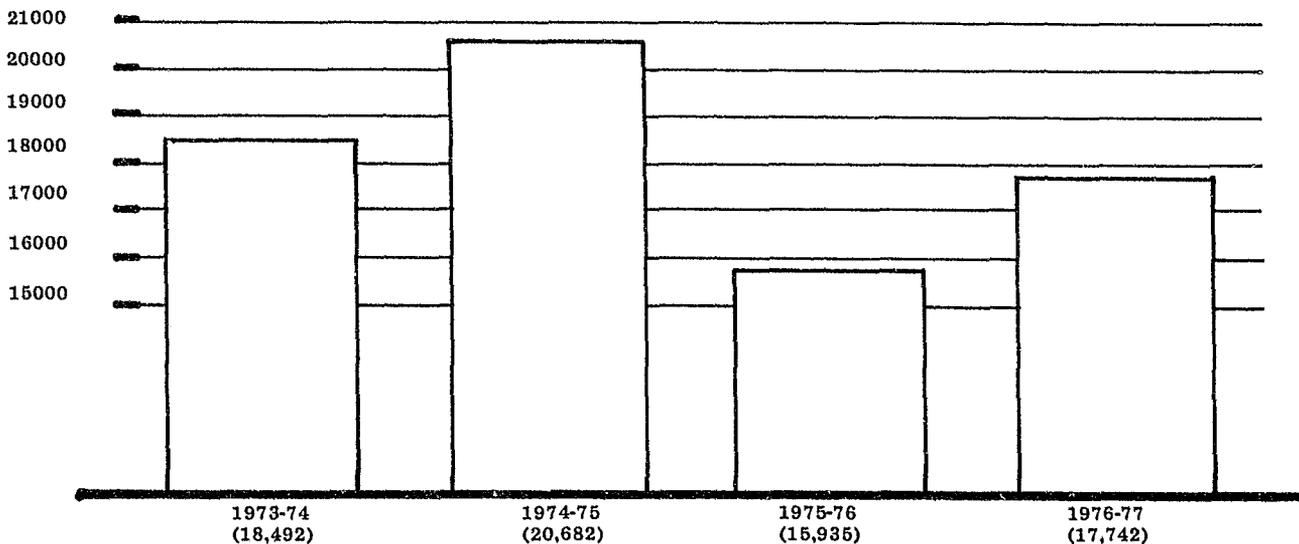

● CRIME IN FLORIDA DECREASED BY 8.6% DURING CALENDAR YEAR 1976.

### CRIME TREND DATA CALENDAR YEARS 1974-76

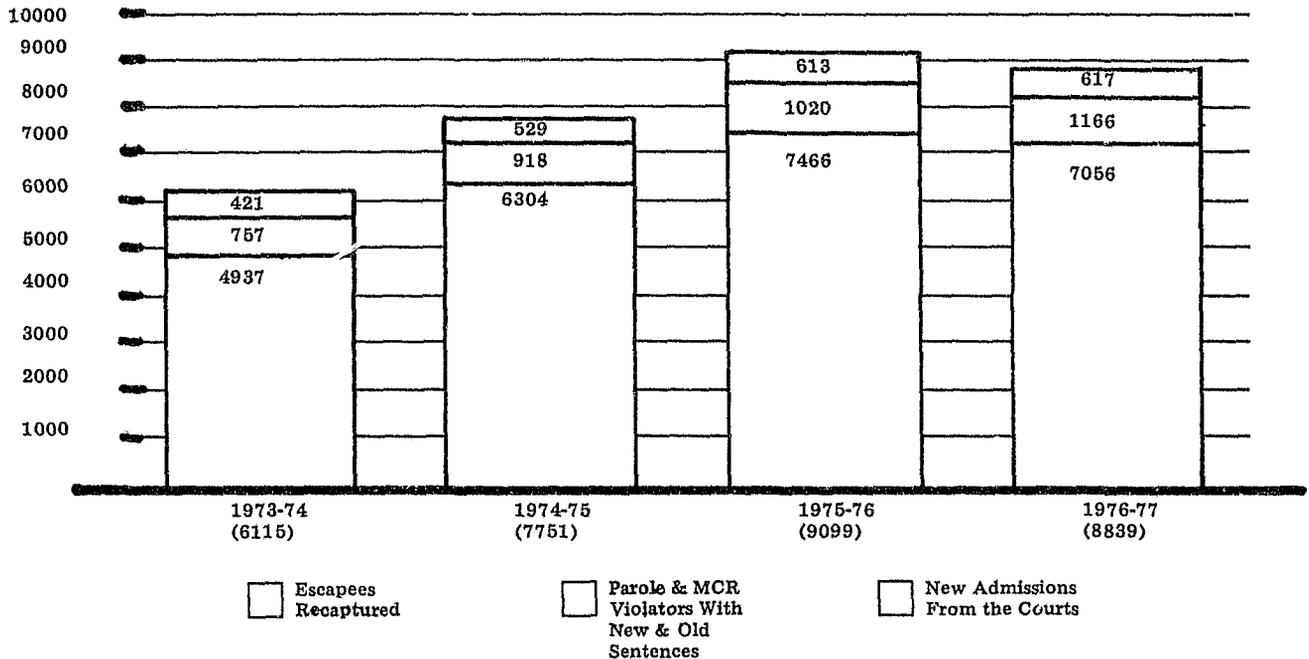

● FELONY PROBATION ADMISSIONS FOR FISCAL YEAR 1976-77 INCREASED 11.3% OVER THE PREVIOUS FISCAL YEAR.

### FELONY PROBATION CASELOAD DURING PAST FOUR FISCAL YEARS

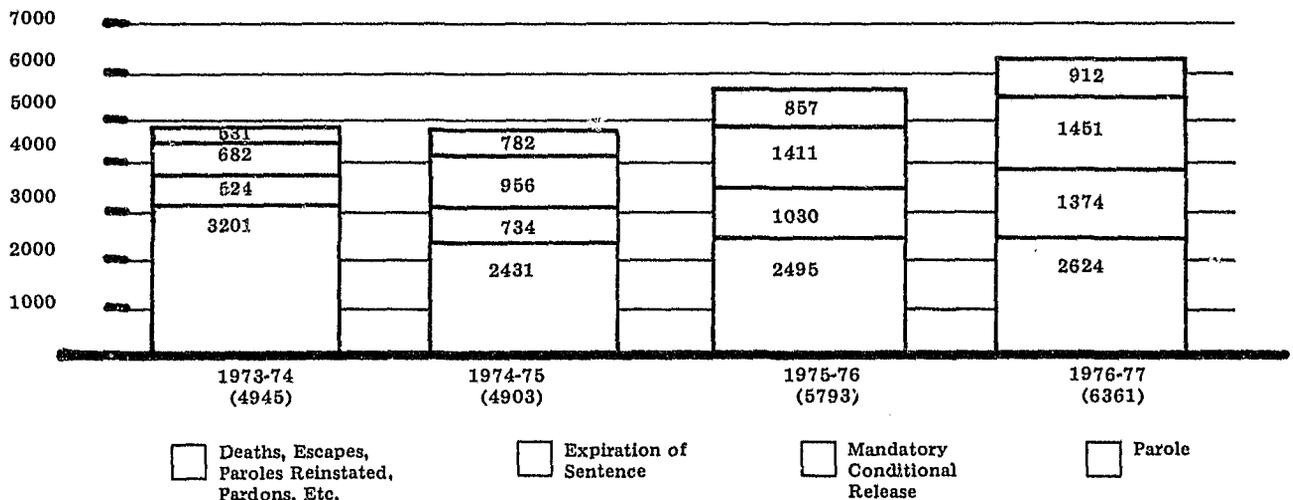

TOTAL COMMITMENTS THIS FISCAL YEAR DECREASED BY 2.9% COMPARED TO FY 1975-76. THE COMMITMENT TABLE BELOW DISPLAYS THE TOTAL COMMITMENTS FOR THE PAST FOUR FISCAL YEARS. ADDITIONALLY, THIS TABLE SEPARATES THE COMMITMENTS FOR EACH FISCAL YEAR INTO NEW ADMISSIONS FROM THE COURTS, PAROLE AND MANDATORY CONDITIONAL RELEASE (MCR) VIOLATORS AND ESCAPEES RETURNED.

### INMATE COMMITMENTS DURING PAST FOUR FISCAL YEARS

RELEASES INCREASED BY 9.8% THIS FISCAL YEAR COMPARED TO FY 1975-76. THE FOLLOWING TABLE DEPICTS THE TOTAL RELEASES DURING THE PAST FOUR FISCAL YEARS. ADDITIONALLY, THE TABLE DIVIDES THE RELEASES INTO THE CATEGORIES OF PAROLE, MANDATORY CONDITIONAL RELEASE, EXPIRATION OF SENTENCE, AND DEATHS, ESCAPES, PAROLE REINSTATEMENTS, PARDONS, ETC.

### INMATE RELEASES DURING PAST FOUR FISCAL YEARS

MAJOR PROBLEMS OF THE  
DEPARTMENT OF OFFENDER REHABILITATION

● UNMANAGEABLE WORKLOAD OF COMMUNITY SERVICES FIELD STAFF:

The field staff caseloads remain far above national standards and professional recommendations. This is in spite of proposals by the Department on how to reduce caseloads while at the same time increase the efficiency and effectiveness of community services. Without assurances of adequate parole and probation supervision the courts will continue to sentence alarmingly large numbers of offenders to prison terms.

● LIMITED DIVERSIONARY PROGRAMS AND OTHER ALTERNATIVES TO INCARCERATION:

The use of diversionary and release programs has not increased as rapidly as has the number of persons arrested and adjudicated guilty. This has partially accounted for the enormous increase in the inmate population. Although the Florida Legislature has funded five new Probation and Restitution Centers and Pretrial Intervention Programs on a statewide basis, these programs need to be expanded on an even larger scale.

● INMATE POPULATION IN EXCESS OF DESIGN CAPACITY:

Despite efforts by the Governor and Legislature to provide adequate bedspace, the Department's inmate population continues to exceed design capacity. The projected bedspace deficit, based on projected inmate population and institution design capacities for June 30, 1980, will be 3379 beds.

● PUBLIC REJECTION OF NEW INSTITUTION SITES:

Efforts to increase bedspace are continually impeded by public sentiment against locating prisons near the population centers from which the majority of inmates are committed.

● STAFF DEVELOPMENT AND TRAINING; PERSONNEL TURNOVER:

Although recent legislation has mandated minimum training for correctional officers, the ability of the Department to provide this, as well as other types of training, is dependent upon available resources. Frequently, trained employees acquire positions with higher salaries and better working conditions outside the Department. Unless salaries and benefits can be increased for employees in the field, the Department will continue to lose trained staff to other agencies offering better working conditions and higher earnings.

● INADEQUATE RESOURCES TO DESIGN AND IMPLEMENT AN APPROPRIATE AUTOMATED INFORMATION SYSTEM:

Obviously, an information system to maintain data on nearly 60,000 offenders is expensive to design and implement. However, savings in staff time through the efficient use of staff over the life of the system would appear to justify the necessary initial expenditure.

● EVALUATION OF SYSTEM AND PROGRAM EFFECTIVENESS:

Although the Department has designed and implemented a system with which to evaluate correctional programs and practices, reductions of available resources and increased workload have necessitated a more consolidated evaluation effort.

## RECOMMENDATIONS

The Department recommends:

- The adoption of a formula for generating community services field staff, in order to provide quality presentence investigations, and adequate time to perform quality supervision and investigation. The additional staff will provide a more thorough level of supervision which in turn will help prevent criminal acts by those offenders under community supervision. An overview of the Department's workhour formula is detailed on pages 9 - 12.
- The establishment of sentencing seminars, whereby existing and planned diversionary programs may be fully explained to judges, public defenders and state attorneys. The Legislature should be commended for funding five new Probation and Restitution Centers and Pretrial Intervention Programs on a statewide basis. Additional resources are necessary for the Department to expand these, as well as other viable diversionary programs.
- The construction of additional facilities to accommodate the projected population, based on the design capacity of the correctional facilities. The Department's inmate population projection for June 30, 1980 is 22,155, while the design capacity for that same date is expected to be 18,776 or a deficit of 3,379 beds. The Department is requesting only 1,400 of the needed 3,379 beds, with the hope that the workhour formula will be funded. The workhour formula will help reduce caseloads and improve the quality of community supervision, which in turn will increase judges' confidence in a stricter and more closely supervised probationary services.
- The continued seeking of support from Florida citizens, city and county commissions, regional planning authorities, and other groups in locating institutional sites which will be acceptable to the general public and in conformance with Departmental needs.
- The thorough review of all pay classifications and a study of fringe benefits, including geographical pay differentials. Additionally, it is recommended that the Department's preservice and inservice training program be made available to all institutional and field supervision personnel. Further, the Department recommends that a salary adjustment plan, over and above normal pay increases, be developed to compensate correctional personnel for taking and passing prescribed college coursework or obtaining a degree from an accredited college or university.
- The acquisition of sufficient resources with which to complete the design and implement the offender-based management information system. The 1978-79 Budget Request, if approved, includes sufficient funds for the staffing and computing resources necessary to produce such a system. Sources of the requested funds include both General Revenue and an LEAA continuation grant.
- The provision of adequate resources to continue studies relative to offender flow and processes as mandated by the Legislature.

## OVERVIEW - WORKHOUR FORMULA FOR FUNDING COMMUNITY SERVICES FIELD STAFF

### I. DIVERSIONARY PROGRAM PACKAGE PRESENTED TO 1976-77 LEGISLATURE:

- Pretrial Intervention Program was funded statewide
- Five of the nine requested Probation and Restitution Centers were funded
- Workhour formula for funding community services staff and establishing statewide standards was not funded . . . additionally, the Department experienced a five percent increase in caseload, which was predicted in the formula, but the Department received no additional staff for supervision of this additional 1,650 cases.

### II. SELECTED REASONS WHY THE DEPARTMENT PLACES THE WORKHOUR FORMULA AS ITS FIRST BUDGET PRIORITY:

- The workload unit has become of little value in determining budgetary allocations.
  - The 1975 annual Auditor General's Report stated that: "The use of the workload unit values in the preparation of the legislative budget documents and various reports by the commission is of questionable value until adequate supporting documentation for the workload unit values is developed. I recommend that a study be performed to develop a basis for reliable workload unit values."
- A departmental task force recommended that the workload unit concept be abolished, that a workhour formula be developed based upon the workhours needed to perform a task, and that creditable standards be established for tasks performed by probation and parole officers.
  - The Department, through this workhour formula, will enhance the credibility of field services and will provide a system of caseload management which can be monitored by the Department, the Legislature, the Courts, the Parole and Probation Commission, and the general public.
- The number of hours currently allocated to investigations and supervision are simply not sufficient to carry out the legislative mandates in these areas:

Investigations: Statutes 921.23, 948.01, 948.02 and 20.315

- These statutes require the Department to conduct a presentence investigation upon request by the court. The presentence investigation is a comprehensive report which details the offense, prior criminal history, family and personal background, restitution, a recommendation for disposition and a plan.

- The present workload unit allots 7.6 hours to complete a presentence investigation. This time frame is not adequate to perform the tasks which include interviewing the offender, the victim, witnesses, arresting officer, family and friends and employer, to obtain the information, analyze and compile the information, dictate the report, proofread, review with supervisor and present to the court. Because of the time required for the investigations mandated by the courts there is very little time left for supervision.

Supervision: Statutes 948.01, 948.02, 948.06, 945.30, 20.315 and 944.012

- These statutes set forth minimum requirements for preparing reports, keeping informed concerning the conduct, habits, associates, employment, recreation and whereabouts of offenders under supervision. The officer is required to collect the cost of supervision fee each month which the Department Community Services staff has tripled since January 1, 1977. The amount collected totals 2.4 million dollars through November of this year. Additionally, the officer must insure that the parolee or probationer pays restitution, child support, public defender fees, court costs and other obligations.
- Under the present workload unit funding, this Department is granted 1.9 hours per month to supervise a probationer or parolee, but much of this time is used to complete investigations required by the courts. After further deducting travel time and court appearances on behalf of the offender, there is little time left for actual face-to-face contact. The time remaining is totally unrealistic if meaningful supervision is to be provided as mandated by Florida Statutes.
- There has been a decreasing use of felony probation commitments to DOR during recent years;

FY 1973-74	76.5%
FY 1974-75	74.3%
FY 1975-76	65.3%
FY 1976-77	68.3%

- The workhour formula provides adequate staff supervision ratios to allow both the courts and the Florida Parole and Probation Commission to place offenders on probation or parole consistent with the public interest and safety.
- Increased contacts and closer surveillance of the offender will be an effective tool in crime prevention.
- The cost of supervising persons in the community provides significant cost savings to the taxpayers of Florida.

Cost of Incarceration (Average for all facilities FY 1976-77)	\$13.17 Per Day
Cost of Parole and Probation Supervision	<u>1.00 Per Day</u>
Cost Savings	\$12.17 Per Day

DEPARTMENT OF OFFENDER REHABILITATION  
 WORKHOUR Formula for Funding Community Services Field Staff 1978-79

A DOR Task Force was appointed to identify a funding formula to replace the workload unit. Through a comprehensive study of field staff activities, standards were developed for supervision and investigative tasks. These standards were based on hours required to perform a specific task.

**WORK HOUR DEFINITION**  
 The amount of time to perform a specific task.

**AVAILABLE HOURS PER MONTH FOR SUPERVISION AND INVESTIGATIVE DUTIES.**

1. P/P Officer's hours available per year.  
 40 hrs./wk. x 52 + 8 hrs. = 2,088  
 Relief factor - Annual Leave, Sick Leave & Holidays = 232  
 1,856

2. Work time available per month for investigations and supervision = 154

154 WORKHOURS = ONE PROBATION AND PAROLE OFFICER

**DELINEATION OF TWO CATEGORIES OF TASKS**  
 The primary tasks performed by the Probation and Parole Officers are case supervision and investigations. The following tables present hours of work by type of case or investigation as recommended by DOR.

WORKHOUR STANDARDS		
<b>SUPERVISION:</b>		
	Hrs. required for each case/mo.	
Class I (Maximum)	5.50	
Class II (Medium)	2.75	
Class III (Minimum)	1.50	
<b>INVESTIGATIONS:</b>		
	Professional Time required (travel)	% of time for Para-Professional
Presentence Investigation	15.00 (4.00)	25%
Postsentence Investigation	10.00 (2.00)	25%
Preparole	4.50 (1.00)	25%
Mandatory Cond. Release	4.50 (1.00)	0%
Work Release	4.00 (.20)	0%
Other State Investigations	4.00 (1.00)	25%
Security Investigations	2.50 (.33)	50%
Release on Recognizance	4.00 (.50)	50%
Violation Investigations	2.00 (.50)	0%

CASE SUPERVISION TASKS		
Case Supervision Formula - 1978-79 Implementation		
Type	Work Hrs./Mo./Supervision	
Class I - Maximum	4 Hrs.	
Class II - Medium	2 Hrs.	
Class III - Minimum	1 Hrs.	

INVESTIGATIVE TASKS		
Investigative Formula - 1978-79 Implementation		
Type	No. Work Hrs./Investigation	
Presentence	12 Hrs.	
Postsentence	10 Hrs.	
Preparole	4.5 Hrs.	
Mandatory Cond. Release	4.5 Hrs.	
Work Release	4 Hrs.	
Other State	4 Hrs.	
Security	2.5 Hrs.	
Release on Recognizance	4 Hrs.	
Violation	2 Hrs.	

Any combination of 154 work hours equals one officer.

SAMPLE SUPERVISION CASELOAD	
Cases:	
38.5 Class I (Max.) = One PO	or
77 Class II (Med.) = One PO	or
154 Class III (Min.) = One PO	

SAMPLE INVESTIGATION WORKLOAD	
Investigations	12.83 Presentence = One PO
	15.40 Postsentence = One PO
	34.22 Preparole = One PO
	34.22 MCR = One PO
	38.50 Work Release = One PO
	38.50 Other State = One PO
	61.60 Security = One PO
	38.50 ROR = One PO
	77.00 Violation Reports = One PO

GENERIC WORKLOAD FOR ONE OFFICER	
14 Class I =	56 Hrs.
28 Class II =	56 Hrs.
14 Class III =	14 Hrs.
58 Cases =	126 Hrs.
Balance	28 Hrs. for Investigations
<b>TOTAL</b>	<b>154 Hrs.</b>

\*Contemplates phasing our four (4) Parole and Probation Aide positions during 1978-79 (Aides will then be 61)

\*\*Includes lapse of \$6,121 for Parole Probation Aides which will be phased out during 1978-79.

ECONOMIC BENEFITS	
THE SAVINGS PER YEAR IN DIVERTING 938 OFFENDERS TO COMMUNITY SUPERVISION IS MORE THAN ENOUGH TO FINANCE THE COST OF THE FIRST YEAR IMPLEMENTATION OF THE WORKHOUR FORMULA. THIS DOES NOT INCLUDE ADDITIONAL SAVINGS IN CONSTRUCTION COST OF \$17,500 PER BED.	
IMPRISONMENT COSTS: 938 OFFENDERS x \$13.17 x 365 DAYS (Average cost for all facilities FY 1976-77)	= \$4,509,012.90
COMMUNITY SUPERVISION COST: 938 OFFENDERS x \$1.00 x 365 DAYS	= 342,370.00
SAVINGS PER YEAR IN DIVERTING OFFENDERS TO COMMUNITY SUPERVISION	= \$4,166,642.90

## OFFENDER FLOW THROUGH THE CORRECTIONS SYSTEM

From the point of arrest to release from parole, a series of alternatives exist which determine the flow of offenders through the correctional system. Shown above is a graphic presentation of the system and the various points at which decisions are made. Briefly, the passage of an offender through the correctional system proceeds as follows.

After arrest, but prior to adjudication, selected first offenders, based on screening and an intensive background investigation, may have the opportunity to participate in a Pretrial Intervention Program 1 . With the concurrence of the state attorney, these eligible offenders may participate in a short period of intensive supervision. If the offender successfully completes the supervision program, all charges are dropped and the individual is released from the correctional system without a criminal record.

Should the offender not participate in the Pretrial Intervention Program, the case is brought to trial 2 . The offender may be found not guilty, in which case he is released from the system. However, if a determination of guilt is made, the case is scheduled for sentencing. In many cases the judge will order an investigation of the background of the offender and of the facts surrounding the case, known as a Presentence Investigation 3 . Based on this information, the judge sentences 4 the offender by either suspending the sentence, effectively releasing the offender, or fining, whereby the offender leaves the correctional system upon payment of a sum of money; probation 6 , consisting of varying degrees of supervision in the community; or incarceration 7 wherein the offender must serve a period of time in a correctional facility.

The Florida corrections system provides for two primary types of probation; field supervision and residential restitution centers. Probation Field Supervision 8 allows the offender to maintain family ties and employment in the community, under the supervision of a probation officer. The officer not only provides surveillance of the offender through periodic contacts, but plans and assists in executing a program designed to aid the offender in becoming a law abiding citizen. Successful completion of this period of supervision results in the offender's release from the correctional system. However, the officer may recommend early termination which releases the offender prior to the completing the full term of supervision, if agreed to by the court. Conversely, a violation of the conditions of probation, or continued criminal activity, may return the case to court. The judge then decides either to continue the probation or incarcerate the offender.

New to the Florida correctional system is the network of Probation and Restitution Centers 9 . These centers are designed as an alternative to incarceration for those offenders needing more supervision than probation yet less supervision than is found in a major institution. Non-violent offenders, convicted of primarily property-related crimes, live together in the Probation and Restitution Centers while maintaining employment, and making monetary or symbolic restitution to the victims of their criminal acts. Offenders may be either sentenced directly to these centers, or referred by the probation officer. Termination and violation procedures are the same for the centers as with standard field supervision.

When the court system sentences a person to be incarcerated in the state corrections system, the offender is first sent to a reception center or interviewed by an area classification team 10 . In either reception process, physical and psychological data are obtained, offenders are counseled regarding rehabilitative opportunities, and an inmate file is initiated. This file, which is compiled by the classification team, consists of commitment orders from the court, fingerprint file and photographs, FBI rap sheet, social history, and results of dental, medical and psychological tests.

The majority of incarcerated offenders are assigned to major institutions 11 , however, some are assigned directly to a community facility 12 or referred to an outside agency 13 . The number of inmates who actually serve their sentences in mental health or drug facilities (outside agency) operated by an agency other than the Department of Offender Rehabilitation is insignificant.

Major correctional institutions 11 provide for the secure detention of offenders, and offer a wide range of activities. All inmates who are physically capable have a work assignment. In addition, academic and vocational education, counseling, recreational programs, religious activities, and medical and psychological services are available to all inmates.

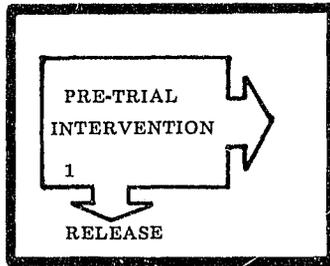

Several types of community facilities exist in Florida including, community correctional centers (CCC), Women's Adjustment Centers (WAC), road prisons, vocational centers and a forestry camp. Inmates assigned to a CCC or WAC must be within 18 months of release or referred by the Florida Parole and Probation Commission. Residents of these centers are generally employed in the community during the day and return to the center evenings and weekends. The centers provide vocational counseling and employment assistance, group and individual counseling and educational opportunities. Road Prisons and the Forestry Camp provide more security than CCC's and WAC's. These centers are associated with the Department of Transportation and the Division of Forestry, and inmates work under supervision of the Department of Offender Rehabilitation on state highways and in state forests. In addition to the work programs of these facilities, recreational, educational and rehabilitative programs are also provided. Vocational Centers offer intensive training in a number of trades. These facilities are similar to Road Prisons in both security and supplementary rehabilitative programs.

An inmate may officially be released from incarceration by parole, mandatory conditional release or expiration of sentence. An inmate may be paroled 14 , with certain statutory exceptions at any point during his incarceration. This decision is made by the Florida Parole and Probation Commission based on a number of factors. Upon parole, the offender returns to the community, secures employment and is supervised by a parole officer in much the same manner as is the offender on probation. Recommendations for early termination of parole or revocation of parole due to violation or involvement in criminal activity are made to the Parole and Probation Commission.

Mandatory Conditional Release 15 allows those inmates who at the time of sentence are eligible to earn 180 or more days of good time to be released to the supervision of a Parole and Probation Officer for the period of time remaining on his sentence. At the end of this period of supervision, the offender is no longer involved in the correctional system.

Finally, an inmate may be released from the correctional system by expiration of sentence 16 . In these instances, no supervision is provided. Other "releases" 17 from the correctional system include escapes, death or sentences commuted or vacated by court.

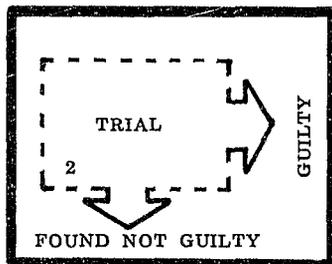

**COMPONENTS OF THE CORRECTIONS SYSTEM  
THROUGH WHICH OFFENDERS FLOW**

**PRETRIAL INTERVENTION**

Pretrial Intervention is a diversionary program which screens eligible first offenders, accused of third degree felonies, from the greater portion of offenders who will enter the criminal justice system. This program was initiated in Florida during Fiscal Year 1972-73. Originally under the auspices of the Florida Parole and Probation Commission, this program was transferred to the Department of Offender Rehabilitation by the Correctional Organization Act of 1975. In Fiscal Year 1976-77, pretrial intervention services were provided to seven judicial circuits including Pensacola (1st), Jacksonville (4th), Clearwater-St. Petersburg (6th), Gainesville (8th), Tampa (13th), West Palm Beach (15th), Ft. Lauderdale (17th). Additionally, locally operated programs exist in Orlando and Miami. Recently, the legislature has funded the Pretrial Program on a state-wide basis. Plans call for the coverage of all judicial circuits by the end of the 1977-78 Fiscal Year.

Briefly stated, Pretrial Intervention is a diversionary program for first-time offenders charged with third degree felonies. Those offenders who meet the criteria for program eligibility are offered a probation-like intensive supervision plan prior to a determination of guilt. The period of supervision usually lasts from six to twelve months. The successful completion of this supervised period results in all charges being dropped and the offender being released without a record.

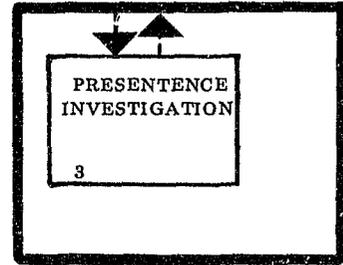

**TRIAL**

Although the adjudication process is not an element of the corrections system, the impact of this criminal justice function is felt throughout the Department of Offender Rehabilitation's scope of operation. Following arrest and the formal filing of charges, an individual, who does not participate in the pretrial intervention program, must enter a plea of guilty, no contest, or not guilty. If either of the first two pleas are entered, the case is adjudicated without a trial. Only a guilty plea brings the case to trial.

As a result of delays between adjudication and sentencing, the Department carefully studies the trial process, and the proportion of sentences leading to either probation or incarceration, for use in projecting the future offender population. The fragmented nature of the criminal justice system requires that activities outside the corrections' system must be analyzed to determine the full impact of these activities on corrections. The trial element is important to the Department's examination of the offender flow through the correctional system, as this factor eliminates a number of persons from even entering the corrections component.

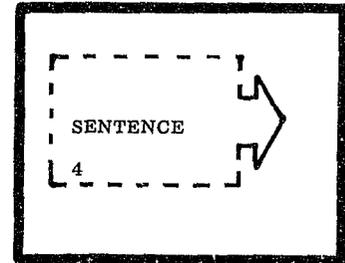

## PRESENTENCE INVESTIGATION

After an offender has made a plea or has been adjudicated guilty, and prior to being sentenced, the Department of Offender Rehabilitation is called upon to aid the court system by providing information upon which sentencing decisions can be made. It is the responsibility of the Department's field staff to make such information available to the courts through the presentence investigation.

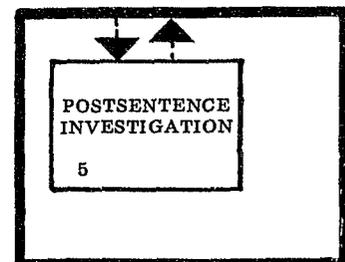

The presentence investigation, required by Florida Statute 921.231 in most felony cases, consists of an intensive study of the circumstances surrounding the offense, the criminal history of the offender, the social history of the offender, information regarding educational background job experience and training, family history, and community relationships. Additionally, the investigation includes the medical and psychological profile of the offender, and a recommendation regarding the disposition of the case. In addition to providing information relative to the sentencing decision, the presentence investigation is utilized during an offender's passage through the correctional system as the basis for classification decision, probation or institutional program plans, release decisions, and parole supervision programs. The presentence investigation is a permanent part of the offender's file and is available as a resource document throughout the period of incarceration and/or supervision.

## SENTENCE

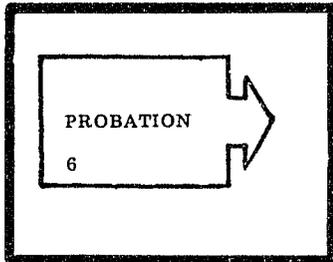

Unless a sentence is suspended or a fine imposed, an offender is remanded to the supervision of the Department of Offender Rehabilitation for a specified period of time for either probation supervision or incarceration. However, an offender may be released from the Department's custody at several points during the duration of his sentence (termination of probation by court or Florida Parole and Probation Commission order, pardon, commutation of sentence). Although sentencing is not among the responsibilities of the Department, this criminal justice element virtually determines the workload placed on the corrections component and sets the direction for the offender's flow through the system. Studies have indicated that sentence length is the most reliable variable used in predicting future populations. For this reason, the Department will continue to observe and study sentencing patterns of the courts to aid in making more accurate projections of offenders in the corrections system.

## POSTSENTENCE INVESTIGATION

The Postsentence Investigation, as indicated by the Department's Policy and Procedure Directive 4.09.02, is conducted in those cases for which a Presentence Investigation has not

been prepared. Often, the Florida Parole and Probation Commission requests a Postsentence Investigation to utilize in rendering parole decisions. Information contained in Postsentence Investigations is similar to that contained in the Presentence Investigation. This information includes the circumstances surrounding the offense, the criminal history of the offender, the social history of the offender, information regarding educational background, job experience and training, family history, community relationships, and a medical and psychological profile. As with the Presentence Investigation, information obtained during the Postsentence Investigation is used as a resource document throughout the offender's flow through the correctional system, and becomes a permanent part of the offender's file. It is the responsibility of the field staff to prepare Postsentence Investigations on all offenders for whom a Presentence Investigation does not exist.

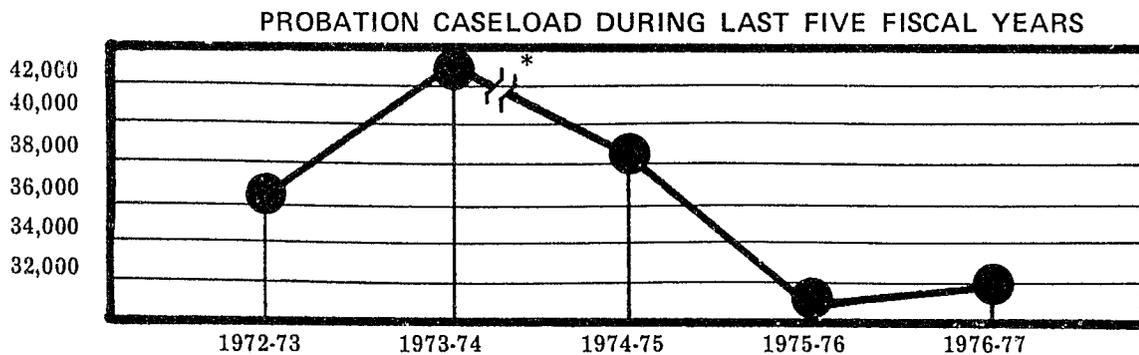

## PROBATION

The Correctional Organization Act of 1975 transferred the responsibility for probation supervision to the Department of Offender Rehabilitation. Currently, probation supervision is available statewide through a network of 48 districts and 11 areas in the Department of Offender Rehabilitation's five regions.

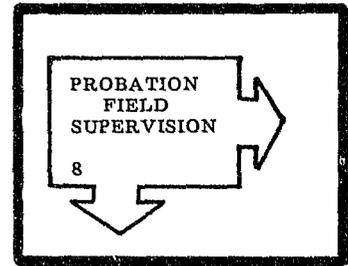

The primary intent of probation is assisting the offender to successfully live, work and obey the law in the free community. As probationers are supervised within their home communities, these offenders can maintain employment and family relationships, support themselves and their dependents, pay taxes, fines, court costs, and restitution to the benefit of all society. Probation is viewed as the single most viable alternative to incarceration for those offenders whose freedom would not constitute a threat to the general public.

The following table graphically illustrates the number of offenders under probation supervision during the past five Fiscal Years. The decline in caseload from FY 1973-74 through FY 1974-75 was primarily the result of the misdemeanor probationers being placed under county jurisdiction rather than state jurisdiction.

\* Decrease in probation caseload resulted primarily from misdemeanor probationers becoming the responsibility of the counties rather than the state.

## PROBATION FIELD SUPERVISION

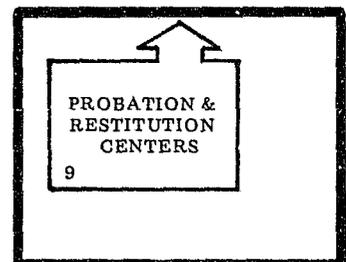

Probation field supervision is an alternative to incarceration used by the courts for a large number of offenders who can be dealt with in the community through supervision. This supervision must provide a reasonable degree of protection to society if it is to be fully utilized. Supervision includes regular contact with the offender at his home, on the job, or in the office; personal contacts with the offender's associates, employer, friends, family members, and others; periodic checks with law enforcement personnel; and reviews of the offender's financial condition, relations with family members, conformance to the conditions of probation, and general behavior and attitude. Such contacts are intended to see that the offender has conducted himself in a law-abiding manner to identify any deviant behavior or changes in life style, and to alert the probation officer to the possibility of the offender becoming involved in future criminal activity.

Based on the presentence investigation, the crime, and factors surrounding the case, a new probationer is classified maximum, medium, or minimum risk. Risk classification determines the required number of contacts with the offender. Shortly after classification, a supervision plan - Structured Treatment Program - is often developed, which spells out goals for the offender to achieve while under probation supervision. Successful completion of this program can lead to recommendations for early termination.

An effective probation supervision program must have the capability to provide a reasonable degree of surveillance, in order to protect the interest of society, establish the credibility of probation as an alternative to imprisonment, and to impress upon the offender that he is responsible for his own actions.

## PROBATION AND RESTITUTION CENTERS

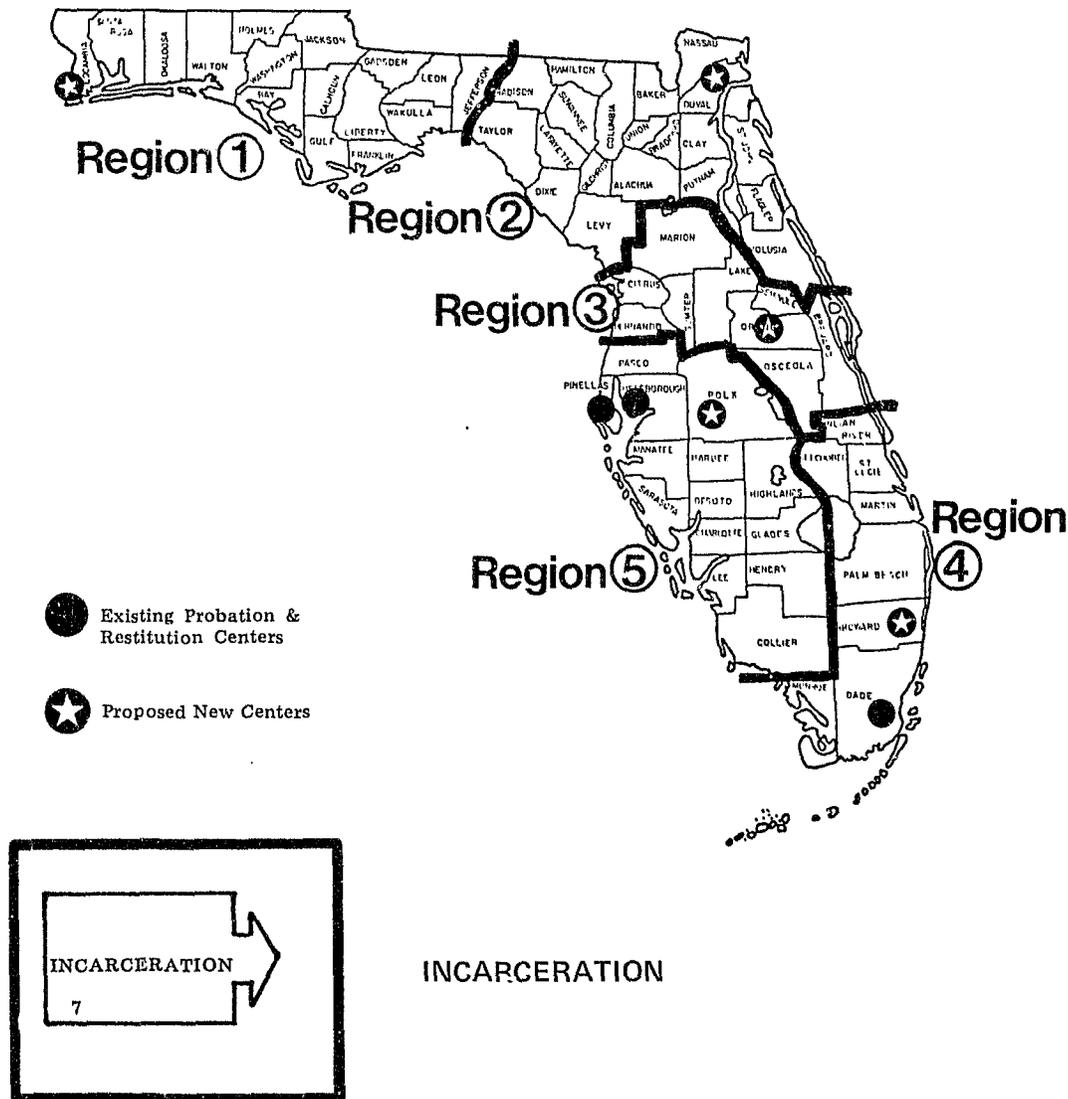

The probation restitution center concept was conceived to provide concentrated supervision and control for higher risk probationers, as well as to provide the courts with an additional alternative to incarceration.

Targeted towards select non-violent felons convicted of property crimes, the main thrust of the centers will be towards payment of restitution to victims of crimes by offenders. Restitution can be either monetary or symbolic depending on the gravity of the crime. Symbolic restitution or the provision of services, in lieu of money, may be necessary when the financial situation dictates.

Although restitution will form the core of this program, probationers will also be participating in a structured, residential program designed to improve the offender's life skills and develop individual responsibility. The residents will be housed in a center where both the development of interpersonal relationships and the ability to cope with society's pressures in a law-abiding manner will be emphasized.

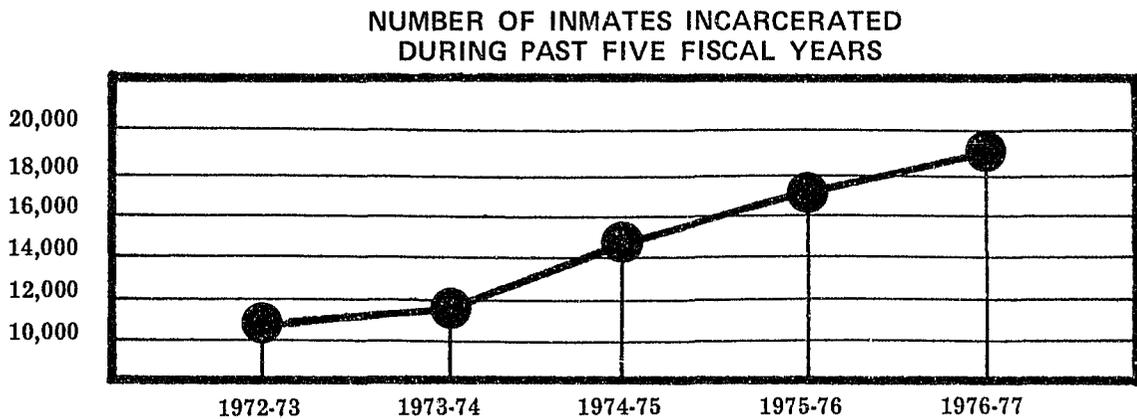

By the end of Fiscal Year 1977-78, it is anticipated that eight probation and restitution centers will be operational. Plans call for the conversion of the three existing Multiphasic Diagnostic and Treatment Centers, located in Tampa, St. Petersburg, and Miami to Probation and Restitution Centers. Additionally, new centers will be established in Jacksonville, Ft. Lauderdale, Pensacola, Lakeland and Orlando.

The following map locates the initial three Restitution Centers that were converted from Multiphasic Centers and the cities in which the five new centers are proposed to be constructed.

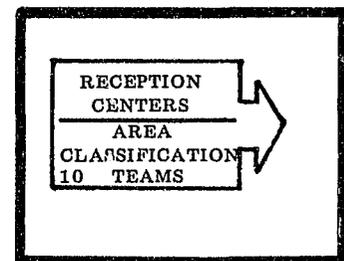

The Department of Offender Rehabilitation is responsible for the custody, care, treatment, and rehabilitation of those offenders incarcerated in state correctional facilities, including road prisons, community correctional centers, women's adjustment centers and vocational training centers, as well as major institutions. The purpose of incarceration is to protect the public from further criminal acts by offenders sentenced to a term of imprisonment, as well as to insure the health and well-being of those committed to departmental facilities. The Department of Offender Rehabilitation, beyond its custodial functions, strives to create an environment within correctional facilities where rehabilitation is possible. The correctional and rehabilitative programs in all facilities are designed to advance the offender's skill training and academic education, as well as his mental, spiritual, and physical health. Additionally, offenders are instilled with the work ethic in conjunction with their skill training and academic education.

The following table portrays the continual increase of the inmate population during the past five Fiscal Years:

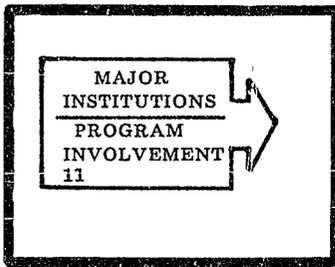

**RECEPTION CENTERS/AREA  
CLASSIFICATION TEAMS**

Initial classification of most newly-committed male felons takes place at the Reception and Medical Center in Lake Butler. The majority of female offenders are received and classified at the Florida Correctional Institution in Lowell. Reception and classification activities normally last four to six weeks, during which time the new inmates are segregated from the general population. Included among the reception/classification activities conducted at the Reception and Medical Center are: photographs, fingerprinting and custodial orientation; regular physical checkups, dental examination, and further medical services as necessary; psychological, intelligence, and academic and vocational education testing; and interviews with professional staff in the areas of psychology, religion, classification, and counseling. Based upon this information a treatment program is designed and a recommendation for institutional assignment made.

In Fiscal Year 1974-75, five Area Classification Teams were established to provide reception capabilities statewide and to relieve the backlog of convicted felons detained in county jails. These teams provide or contract for the same reception/classification activities as are conducted in the institutions. The teams are based in Jacksonville, Tampa, Orlando, Lantana and Miami and are responsible, in most cases, for a multi-county area.

## MAJOR INSTITUTIONS

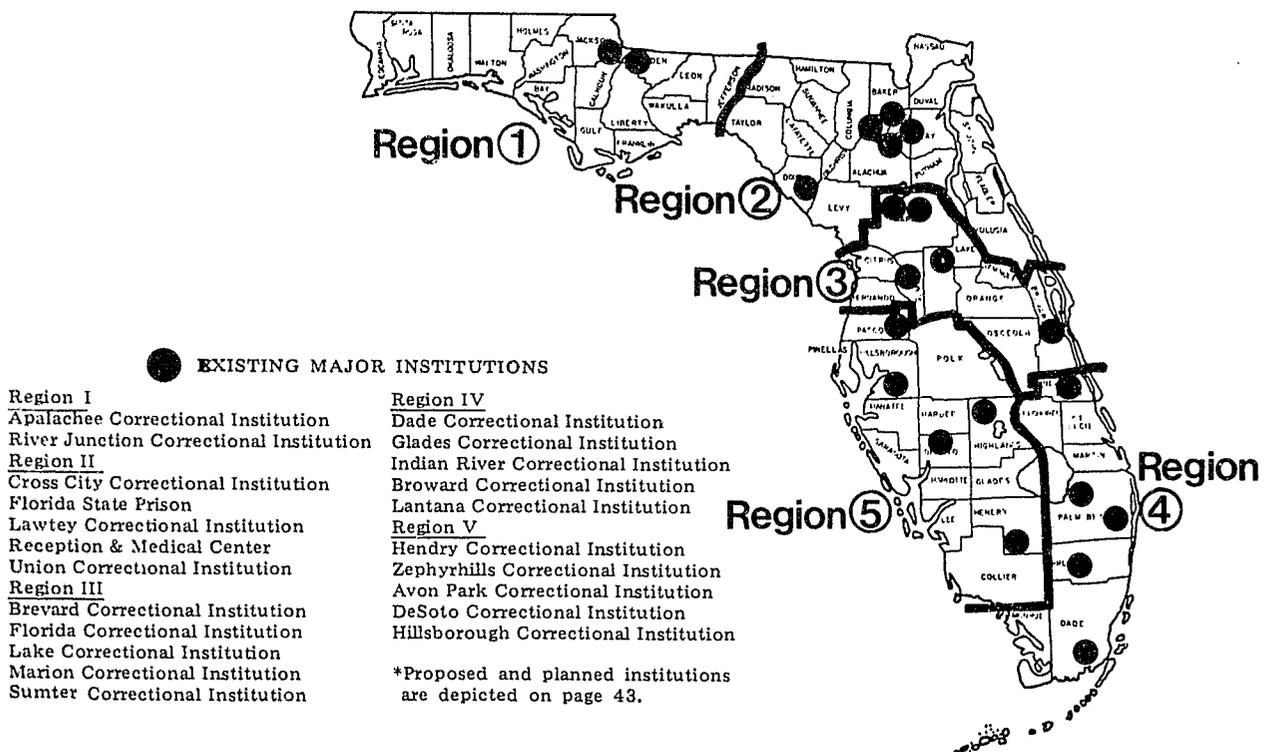

Perhaps the most visible of the process through which an offender passes in his flow through the correctional system is his incarceration in a major correctional institution. The inmate population in Florida's prisons has nearly doubled since 1973, with the June 30, 1977 major institution population being nearly 16,000 offenders. The Department of Offender Rehabilitation now operates 22 institutions, and current plans are to open eight additional institutions by 1979.

Along with secure detention, inmates in major institutions are provided with shelter, food, clothing, medical attention, and self-improvement opportunities. Major institutions are classified according to security as well as the type of inmate housed therein. Of the 22 facilities, seven are designated for youthful offenders and two are female institutions. Custody ranges from close to minimum.

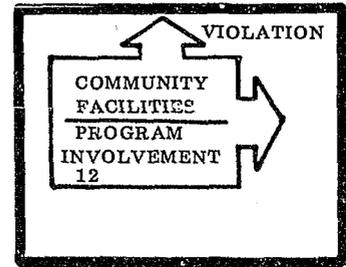

While security is the thrust behind all major institutions, rehabilitative programs are not lacking. Primary among these is the Correctional Work Program, which includes industrial operations. In order to instill the work ethic and a sense of self-responsibility, each inmate who is physically capable is given a work assignment upon arrival at the institution. In addition to being assigned to a work program, all inmates are given the opportunity to pursue academic education or vocational training. Additionally, a variety of counseling programs, religious activities, psychological services, and recreational programs are available at each location.

The following map locates the Department's existing major institutions:

### EXISTING MAJOR INSTITUTIONS \*

## COMMUNITY FACILITIES

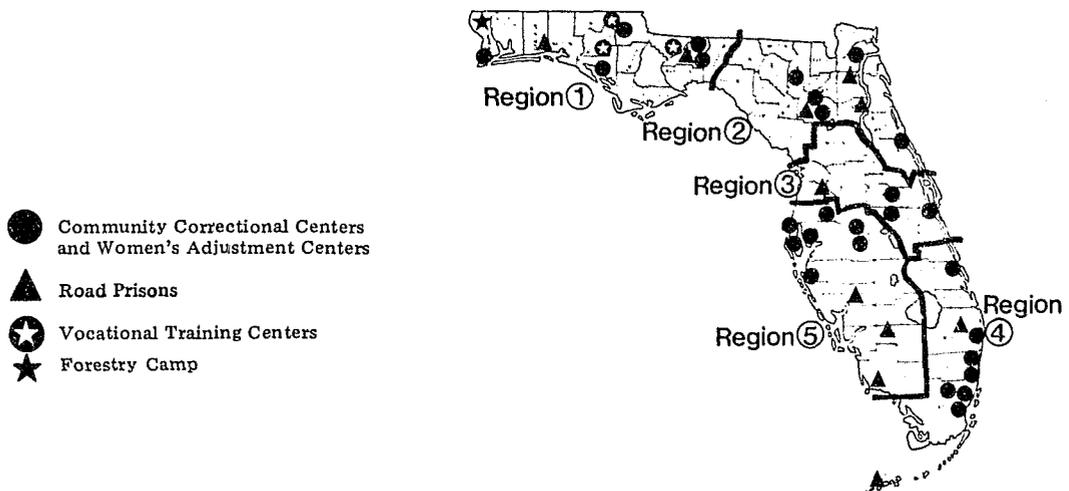

The Florida Department of Offender Rehabilitation operates three types of community facilities, each with a specific purpose. Among these are Community Correctional Centers (CCC) and Women's Adjustment Centers (WAC), numbering 30 statewide; Road Prisons and specialized work camps in 12 locations; and Vocational Training Centers at three sites.

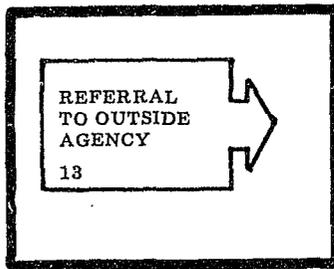

The COMMUNITY CORRECTIONAL CENTERS AND WOMEN'S ADJUSTMENT CENTERS are an important step in the offender's flow through the correctional system. While still maintaining custody, these centers allow selected inmates who are within the last 18 months of the end of their sentence, to work in the community and gradually adjust to life on the "outside". Residents of CCC's and WAC's pay room, board, and transportation; support their families; make restitution payments; pay taxes; and begin saving for their release. Since the program's inception in 1968, residents of CCC'S and WAC's have: earned nearly \$30,000,000; paid \$4,289,792 in taxes; paid \$120,473 in restitution; repaid \$724,433 in existing debts; saved \$8,344,329; and paid \$8,233,329 back to the state for subsistence and transportation costs. Vocational counseling and employment assistance is available through all centers, as are various counseling, educational, religious and recreational opportunities. Ranging in size from 12 to 100 residents, these centers can provide a headstart on release through an atmosphere conducive to self-improvement.

ROAD PRISONS and special work camps provide a more secure facility than do the CCC's, while maintaining a similar atmosphere. Averaging 60 inmates per facility, Road Prisons and Work Camps provide constructive work experience to inmates through their association with the Department of Transportation and Division of Forestry. All inmates of these facilities who have not earned a high school diploma are given the opportunity to attend classes in the evening and work toward their G.E.D. In addition, a number of other recreational and rehabilitative programs are offered.

VOCATIONAL TRAINING CENTERS are also small facilities, averaging 60 inmates, which provide intensive vocational training in a particular area. Inmates transferred to these programs have met certain eligibility criteria which would indicate success in the particular trade. Both practical and classroom experience is provided. Additionally, academic education is offered to those without high school diplomas. Other programs are similar to those available in the Road Prisons.

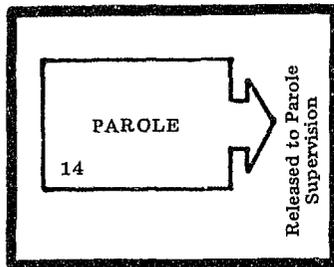

### EXISTING COMMUNITY FACILITIES

## OUTSIDE AGENCIES

Many offenders committed to the Department of Offender Rehabilitation require special treatment services beyond that which the Department can provide. In these instances offenders may be referred to another agency. Agencies to which DOR inmates are sometimes referred include the Department of Health and Rehabilitative Services Mental Health and Retardation Facilities, and locally operated drug treatment centers. These do not constitute a significant portion of the inmate population, but many offenders need to be transferred for other services, especially services related to mental health problems.

## PAROLE

Official release from incarceration may occur in any of three ways; parole, mandatory conditional release or expiration of sentence. Parole is a system of release from incarceration, whereby an independent, quasi-judicial body -- the Florida Parole and Probation Commission -- may release an offender to community supervision at any point during his period of incarceration, unless otherwise stipulated by law. The statutes mandate that offenders be regularly considered for parole release with those offenders having sentences of five years or less being interviewed within six months of the sentencing date and annually thereafter. Additionally, offenders with sentences in excess of five years must be considered within one year of sentencing and annually thereafter.

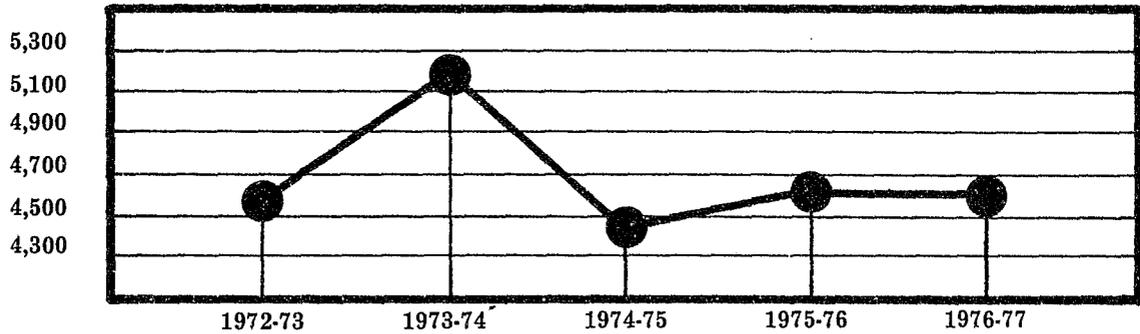

Parole Examiners, employees of the Commission, conduct face to face interviews with the incarcerated offenders. Upon completion of the interview and after a careful case file review, a summary of the offender's progress and a recommendation for parole, work release, or continued imprisonment is forwarded to the Commission. Factors considered in recommending and approving parole release include: the crime and surrounding circumstances; prior criminal record; attitude toward law and authority; personality, maturity, stability, and self responsibility; institutional conduct and involvement in self improvement programs; ability and readiness to assume obligations and undertake responsibilities; family status and community associations; employment history, stability, and occupational skills; any previous parole or probation experience; attitudes toward parole; observations of court officials, law enforcement personnel, and interested persons in the community; use of narcotics and/or alcohol; and the adequacy of the parole plan including residence and employment. Based on these factors, at least four of the seven voting Parole Commissioners must agree to parole before the inmate can be released.

Notifications of parole releases are sent to the appropriate Community Services Office and assigned to a Parole and Probation Officer who investigates the proposed parole plan, verifying residence and employment.

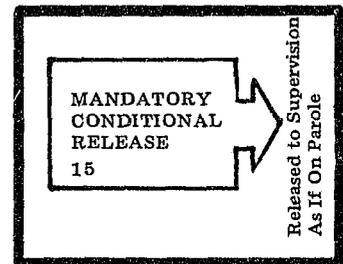

Parole supervision, like probation supervision, is a combination of programming and surveillance to assist the offender in re-entering society while monitoring his actions to assure that no further crimes are committed.

Unlike probationers, whose cases are returned to court, parole violators have their cases remanded to the Florida Parole and Probation Commission for a revocation hearing. If guilt is determined, the Commission may require that the offender be returned to prison to serve out his sentence.

PAROLE CASELOAD DURING LAST FIVE FISCAL YEARS

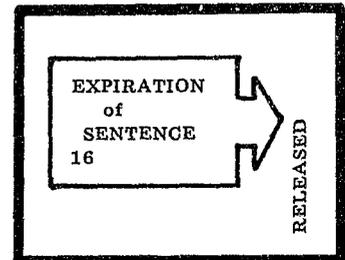

MANDATORY CONDITIONAL RELEASE

A second form of official release from prison is mandatory conditional release (MCR). Established by Chapter 944.291 of the Florida Statutes, this method of release provides that an inmate, who at the time of sentence is eligible to earn 180 or more days gain time, be released to community supervision at the completion of his sentence less allowable statutory gain time and good time. The period of supervision is similar in content to parole supervision and is in effect until the expiration of the maximum term or terms for which the offender was sentenced.

The Department of Offender Rehabilitation's field staff is charged, not only with the supervision of these offenders, but with the investigation and/or development of a release plan, including residence and employment. Mandatory Conditional Release provides those inmates who did not qualify for parole with assistance in making the adjustment to life in a free society, as well as affording the public with a period of supervision for these higher risk offenders.

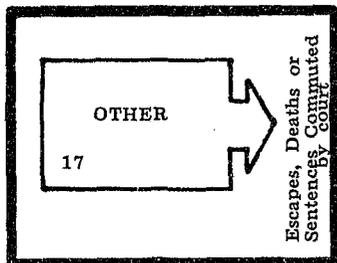

EXPIRATION OF SENTENCE

Thirdly, those incarcerated offenders who have not been released from prison by either parole or mandatory conditional release exit the correctional system through expiration of sentence. The Department provides offenders with release money and transportation to their destination. Many institutions conduct pre-release sessions which try to prepare the

offenders for their release back to society. These programs include pre-release and financial counseling, employment assistance and counseling, and sometimes shopping trips to purchase clothing and other items which will be needed upon release.

Unfortunately, these offenders released by expiration of sentence are usually the ones who require the most supervision upon re-entry to society, yet no provisions exist to provide such. As these offenders have not qualified for parole nor earned mandatory conditional release, they enter society without the benefit of any supervision or assistance in helping them cope with a world from which they have been isolated for a period of years.

OTHER

Although not official, offenders may release themselves from the correctional system by absconding from parole or probation supervision or escaping from incarceration. Other exits from Florida's correctional system include death or interstate transfer of parolees, probationers, and inmates through Interstate Corrections Compacts.

---

## MUTUAL PARTICIPATION PROGRAM

The Mutual Participation Program is a two-year pilot program being jointly implemented by the Florida Parole and Probation Commission and the Department of Offender Rehabilitation under provisions of the Mutual Participation Program Act of 1976.

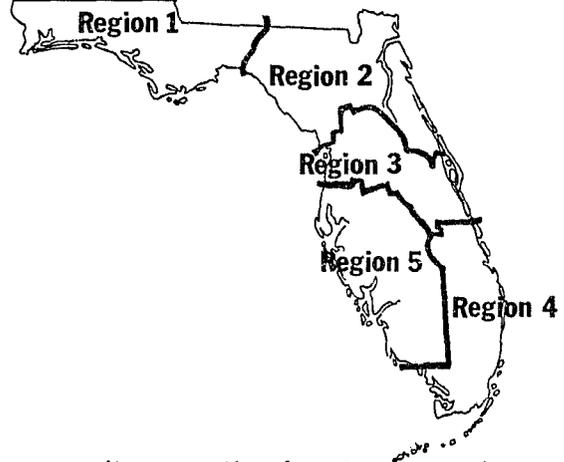

Under provisions of the Act, the terms of institutional confinement, a guaranteed parole date, the terms of parole supervision, and release from parole may be negotiated and established by contract, binding among mutually consenting parties including the Department, the Florida Parole and Probation Commission and the offender. In return for these guaranteed commitments, by the Department and the Commission, the offender agrees to meet certain objectives set forth in the contract including: work requirements, participation in institutional programs, cooperation with staff, and establishment of measurable self-improvement objectives.

The effective date of the Act was July 1, 1976, and the program became operational in six major institutions in October of the same year. The months between July and October were spent in implementation efforts required to organize an effective program including selection of institutions in which to test the pilot program, development of physical facilities required by program staff, and promulgation of rules and regulations required under provisions of the Act.

By June 30, 1977, approximately 2,000 proposals had been submitted by inmates and over 900 negotiating sessions had been held. From these sessions, 682 contracts had been successfully negotiated at the institutional level and forwarded to the Florida Parole and Probation Commission for review. Through June 30, 1977, 359 contracts were approved and placed in effect.

## REGIONAL OFFICES AND FACILITIES

The Department of Offender Rehabilitation's regional structure was mandated by the Correctional Organization Act of 1975. The reorganization of the state's corrections system combined the former Division of Corrections and the field staff of the Florida Parole and Probation Commission. The regional structure reduces the administrative span of control and enables the management of the Department to be more on the local level. The Regional Facilities and Offices section of this report is separated into five regions. The map of Florida on the right illustrates the boundaries of each region.

Each regional section will list, as of June 30, 1977, the location of the regional office, number of personnel, number of incarcerated inmates and, number of offenders under community supervision in the region. Additionally, each section will list the names and locations of each major institution, community correctional center, women's adjustment center, road prison, vocational training center, and intake and community services office. Included in each section will be a map of the region with all the facilities and intake offices located.

DEPARTMENTAL MANAGEMENT  
AND BUDGET FUNCTIONS

As a result of the Corrections Reorganization Act of 1975, Regional Offices of Management and Budget were established and became functional during this report period. The Regional Management and Budget Offices were organized into three major sections. These are, 1) Personnel; 2) Budgeting; and 3) Fiscal. The initial effort of the Regional OMB staff was to assume the personnel, budgets and fiscal support functions for all Community Facilities, leaving the support of major institutions with the Central Office. An administrative plan for regional support and control of major institutions OMB functions was later developed and finally approved in June, 1977. This document shifted the responsibility for approval of many operational activities such as payroll changes, vehicle purchases, leases, property disposal and other administrative functions to the Regional Office.

The Central Office of Management and Budget continued its responsibility of statewide management and support in areas of management services, financial services and management analysis. One area that received particular attention during this period was the Cost of Supervision program. Through the efforts of both the Central Office and Field Staff, the documents governing this program were rewritten, the basis for collection was revised and the Field Staff of Community Services was asked to become actively involved in the collections process. As a result of this effort by the Department staff, the amount of fees collected from offenders on parole more than doubled, returning \$1,983,521 to the State.

Another major effort of the Central Office of Management and Budget centered on development of a Management Information System for the Community Services function. Significant progress was made in designing a system which included offender profile, offender tracking and offender fee payment into one system, eventually to replace two other computer operated programs.

The Central Office of Management and Budget supervised the implementation of a food procurement and redistribution program which supported the needs of the Community Facilities. This program, using the bulk purchasing capabilities of selected major institutions, saved an estimated \$150,000 during this first partial year of operation.

The Bureau of Facilities Services managed Fixed Capital Projects totaling \$53,000,000 in this reporting period. \$29,000,000 of this amount was under the direct supervision of the Bureau. Of the 38 projects approved within this dollar amount, most were bid and under construction during the year.

# STATISTICS

## SPECIAL INSTRUCTIONS:

1. The white portions of the graphs appearing in the Statistics Section have been used to provide an instant inmate profile.
2. The continued refinement of our computerized data system has permitted inclusion of demographic information for incarcerated inmates and offenders under community supervision for two time periods:
  - Inmates admitted to the custody of the Department during FY 1976-77.
  - Inmates in custody of the Department as of June 30, 1977.
3. Definition of terms:
  - AVERAGE: The arithmetic mean, derived by adding all values and dividing by the number of such values.
  - MEDIAN: The middle member in an array of values, with roughly 50% of the values above and 50% of the values below the median.
  - MODE: The member in an array of values with the highest frequency of occurrence.
4. Due to limitations of space in an annual report, less data is included in the report. Data from reports which previously appeared in the Biennial Report Series is available upon specific request from the Research and Statistics Section of the Bureau of Planning, Research and Statistics.

POPULATION UNDER CRIMINAL SENTENCE

INCARCERATED POPULATION

	<u>1975-76</u>	<u>1976-77</u>

## PROFILE OF INCARCERATED OFFENDERS

### ADMISSIONS DURING FY 1976-77

The typical offender profile of the 8,224 inmates admitted to the system during Fiscal Year 1976-77.

- Is White (52%)
- Is Male (94%)
- Is 24 Years of Age or Younger (50%)
- Is single (Never Married) (55%)
- Has no Previous Military Experience (77%)
- Has a Religious Preference of Baptist (43%)
- Is a Resident of Florida (94%)
- Comes From a Broken Home (49%)
- Has an I.Q. of 99
- Is One of 4 Children in Family
- Claims at Least Occasional use of Alcohol or Drugs (64%)
- Claims a 10th Grade Education
- Has an average Tested Grade of 6.2
- Is Occupationally Unskilled (33%)
- Has no Prior Felony Commitments (69%)
- Was Convicted of: 1) B & E (20%)  
2) Robbery (16%)
- Is Serving 4 Years of Less (50%)

## PROFILE OF PAROLEE/PROBATIONER

### ADMISSIONS DURING FY 1976-77

The typical parolee/probationer profile of the 23,460 clients admitted to Community Supervision during Fiscal Year 1976-77.

- Is White (63%)
- Is Male (87%)
- Is 25 Years of Age or Younger (50%)
- Prior Convictions (Felony and Misdemeanor):
  - None (47.1%)
  - One (17.2%)
  - Two (10.5%)
  - Three (6.6%)
  - Four or More (18.6%)
- Risk Classification:
  - Maximum (57.4%)
  - Medium (38.2%)
  - Minimum (4.4%)
- Claims at least Occasional use of alcohol or narcotics
- Claims a 10th Grade Education
- Is Occupationally Unskilled (45%)
- Most Frequent Offense:
  - 1) Drug Law Violator (22%)
  - 2) Burglary (19%)
- Is Under Supervision 2 Years or Less (54%)
