#### CHAPTER I

1

#### INTRODUCTION

As part of a Phase I study of TASC projects, information describing actual project operations was collected in structured telephone interviews with TASC project directors and site visits to a sample of projects. Information on the number, location and operational status of projects which could potentially be contacted was supplied by LEAA's Narcotics and Drug Abuse Program coordinator: 22 projects funded or scheduled to be funded by March 1975, were selected. These projects had been receiving clients for at least one month and were still operational as of March 1975.

The projects were contacted so that information concerning actual operations would be available for the selection of representative projects to be visited. Telephone interviews also sought data sufficient for arraying projects in a typology, the range of which was reflected by the sites chosen for the more intensive field investigation work.

Results of the telephone survey are summarized in Chapter II on a project-by-project basis for those projects not visited. Also included in the next chapter is a sample of the telephone questionnaire used. Chapter III contains the instruments used to interview TASC staff members at the projects visited as well as interview guides used in conversations with criminal justice practitioners and treatment program staff.

#### CHAPTER II

#### TELEPHONE INTERVIEWS

#### INTRODUCTION

For the purpose of gathering information about the variety in TASC intervention strategies, client characteristics, available treatment modalities and project size, telephone interviews were conducted with 22 TASC projects.

Interviews were conducted between the middle of April and the middle of May 1975. Generally, project directors supplied most of the information; in some projects the director as well as another staff person may have responded to the questionnaire. The hour-long interview sought information concerning:

- stages in criminal justice processing when the TASC interventions occur;
- . TASC eligibility criteria;
- . client demographic and drug use data;
- . distribution of clients by treatment modality; and
- . project staffing pattern and expenditures.

In some cases, a second phone call was required to gather data which was not accessible at the time of initial contact.

Some of the information requested proved easier to gather than other items requested. Obtaining information on the stage of criminal justice processing when the TASC intervention occurred was tedious both because of the variety in TASC - criminal justice arrangements and because the intervention itself represented different amounts of activity (e.g., screening alone vs. the combination of screening, diagnosis and placement in treatment).

Another area of inquiry which proved difficult over the phone concerned the allocation of staff and funds by component. The difficulty arose because job titles did not always describe TASC functions and because budget or expenditure data often was not available by component. Additional questions to clarify the staff allocation produced the desired information; in the case of expenditure or budget data, personnel budgets by component were substituted. Some data requested in the phone interview were omitted from the project summaries; it was excluded for various reasons. If the data were difficult to present in a way which demonstrated variations from project to project (e.g., eligibility criteria and community relations) it was omitted. In the case of "number of successful completions," any of a number of reasons were sufficient for omitting the data. Most projects had not been operational long enough for treatment completions to occur. The definitions of successful completion varied from project-to-project; the few successful completions reported by projects usually represented the same percentage of the total clients the various projects referred to treatment.

The data obtained for projects not visited are summarized in the second section of this chapter; data for projects visited are included in the project descriptions of Volume I. The interview guide used for the telephone interviews appears in the last section of the chapter.

#### PROJECT SUMMARIES

Statistical summaries of the twelve projects contacted by phone, but not visited, appear on the following pages. The summaries are arranged alphabetically and include:

- . Albuquerque TASC,
- . Austin JASC,
- . Baltimore TASC,
- . Boston TASC Adult,
- . Boston TASC Juvenile,
- . Camden County TASC,
- . Cleveland TASC,
- . Compton TASC,
- . Detroit TASC,
- . Newark TASC,
- . New York TASC, and
- Philadelphia TASC.

D. Distribution of Clients by Treatment Modality

Five youth advocate agencies refer TASC - J clients to programs providing the services needed by clients. For example, referrals are made to Youth Resource Centers and to vocational education, alternative education and recreational programs. The project indicated that some time in April reports to the LEAA Narcotics and Drug Abuse Program Coordinator would indicate the distribution of clients according to the program to which they were referred.

#### IV. Staff Data

Distribution by Component

The TASC - J staff is an administrative unit supervising the operations of five advocacy agencies and any demonstration projects TASC funds. Police and court liaisons and school officials refer delinquent and pre-delinquent juveniles to TASC. The referred juvenile is assigned to one of five advocacy agencies; the agencies handle referrals of TASC clients to those programs in the community providing the required services. On a monthly basis, the agencies report to the TASC staff on the status of TASC clients.

#### TELEPHONE INTERVIEW GUIDE

A sample of the form used in telephone interviews with TASC projects is reproduced on the following pages. Because one staff member conducted most of the interviews and consequently became very familiar with the type of information sought, format problems discovered in the process of interviewing were not corrected. However, corrections have been made in the following questionnaire, so that it is more manageable for future use.

# TELEPHONE INTERVIEW

Other Contact	
Date	
Interviewer	

#### A. TYPES OF TASC INTERVENTION

Some TASC projects are designed to intervene in criminal justice processing at the pre-trial stage and some at the post-trial stage.

1. At what stages in criminal justice processing are drug abusers referred to your project?

St	tage	Available _yes/no	No. Active <u>Clients</u>
1.	Pre-trial a. pre-trial detention b. pre-trial release* c. pre-trial diversion* d. deferred judgment* e. other	· · · · · · · · · · · · · · · · · · ·	
2.	<pre>Post-trial a. convicted, awaiting sentencing b. convicted, probated with     treatment condition c. convicted, incarcerated     (institutional treatment) d. paroled with treatment condition e. other</pre>	· · · · · · · · · · · · · · · · · · ·	

3. Definitions (indicate terms and definitions if project uses them differently than Lazar)

\* Lazar working definitions: April 23, 1975; Working Paper #1.

pre-trial release: drug-dependent arrestee is released on bail with TASC treatment condition while awaiting scheduled trial

pre-trial diversion: drug-dependent arrestee is released to TASC treatment; client decides to participate knowing successful completion of treatment means charges are dropped and failure in treatment results in return to criminal justice system.

#### deferred judgment: drug-dependent arrestee is released on bail with TASC treatment condition; treatment program requires participation for period longer than time between arraignment and originally scheduled trial date; client's trial is deferred so that progress in treatment can be monitored: decision whether to go forward with prosecution is made later.

#### B. ELIGIBILITY CRITERIA

TASC projects define eligibility in a number of ways but it is usually based on the current charge and arrest and drug use history.

1. In your project, what are the eligibility criteria for each type of intervention? (Probe for type of charges which are acceptable, or excluded; type or number of prior convictions excluded; type of drug or alcohol abusers excluded; residential or age restrictions.)

#### C. CLIENTS

We are interested in the number and type of clients your project has processed and referred to various treatment modalities.

1.	a.	How many clients have been referred to TASC	through month	of	· .
		(since project began)?	<u></u>		

b. How many clients were referred to TASC last month?

during month of

monun oi -

2. How many clients are active currently?

active as of

3. a. In many cities TASC projects refer clients to residential and outpatient treatment programs. How many active clients are in:

	Number of
	Clients
detoxification	
residential drug-free	
outpatient drug-free	
methadone	
other	

"Other" defined as:

- b. How many active clients have not yet been referred to treatment?
  - not yet referred
- c. Do all treatment modalities have an adequate number of slots for TASC clients? If no, which do not?
- 4. How many clients are considered to be "successful completions\*"?

successes

\* "Successful completions" defined as:

5. a. How many TASC clients have been terminated?

Number
•

b. What are the reasons for most of the drops?

Next, I'd like to find out more about the demographic characteristics which describe your clients.

6. What percent of your clients are:

	Percent
white	
black	
other	
male	
female	
under 21	
over 30	
between 22 & 29	
mainly abuse heroin	**

7. a. For your clients, do you know the ages when they first used heroin? (yes/no)

- b. Do you know the ages when they first used other drugs? (yes/no)
- c. Do you know the year of first drug use, by drug? (yes/no)
  - (if yes, can you please send us material containing this information?)

\$

- 8. What is the average number of pre-TASC arrests for your clients?
- \_\_\_\_\_ pre-TASC arrests

D. COSTS

1. a. What is the current Federal funding source?

b. For what amount is the current grant?

2. Are there any other funding sources? If so, for what amount?

Source	Amount	
	<b>、</b>	.

3. What are the beginning and end dates of the current grant(s)?

Source	Begin	End

4. Were there any previous grants? If yes, what was the funding source and for what amounts?

Source	Ámount
	•

5. When did the project become operational?

.

Operational:\_\_\_\_\_, 19\_\_\_

6. a. What are the cumulative expenditures under the current grant?

.

;

- b. How much of that represents LEAA funds?
- \_\_\_\_\_, month of \_\_\_\_\_, 19\_\_\_

9

LEAA: \$ \_\_\_\_\_

'c. How much, the other sources?

Other:	\$ 	-	

- 7. a. What was the total spent last month?
  - b. How much of that represents LEAA funds?
  - c. How much, the other sources?

\$		_, month of
		, 
LEAA:	\$	
Other:	\$_	

#### E. PROGRAM COMPONENTS

We are also interested in the services purchased by various TASC projects.

- a. As I read a list of TASC program components, please tell me whether your project includes the operational units mentioned.
  - b. How many people currently staff each component?
  - c. How much was budgeted for each unit?

COMPONENT	STAFF SIZE	BUDGET	
Screening			
Urinalysis			
Intake			:
Tracking			
Compliance			
Evaluation/research			
Escort			
Vocational/Rehabi- litation			
Detoxification		-	
Treatment			
Other:			

d. Are there any staff vacancies? If so, in which component?

No. of Vacancies

- e. Are you actively seeking to fill these vacancies? (yes/no) If no, for which components are you not trying to fill vacancies?
- 2. a. How many physical facilities does your project occupy?
  - b. What are they?

Total Facilities:	

3. Are there any services which your project funds which have not been mentioned yet? (yes/no)

If yes, what are they and what is the level of expenditure for each service?

Service	Expenditure

#### F. COMMUNITY RELATIONS

TASC projects have developed working relationships of varying quality with other parts of the community.

1. As I list some of the important groups in the community please tell me whether your relationship with them is excellent, good, fair, poor or whether you have had no contact.

	Excellent	Good	Fair	Poor	No contact	
Criminal Justice System in general District attorneys Public defenders Judges Bail interviewers Police detention Corrections staff Probation department Parole officers Political leaders e.g., Treatment programs Media Other e.g.,						

Note comments elaborating on relationships:

2. What are your main community contacts?

G. ADDITIONAL DESCRIPTIVE MATERIAL

I have some specific questions about several of the components you identified earlier.

- 1. a. Have you performed any evaluations of program operations? (If yes, please send us copies.)
  - b. (1) What measures have you used to judge client or program success?
    - (2) What were your findings?
  - c. Do you have materials you can send us which describe project organization, client flows through the program or program guidelines?

Time permitting:

2. a. Is urinalysis a routine part of screening? (yes/no)

b. How is drug use determined?

urinalysis \_\_\_\_\_\_self-admission interviewer assessment

3. a. How long is intake? \_\_\_\_\_ days

b. Is detoxification part of intake? (yes/no)

c. How do clients reach intake?

4. a. How frequent is TASC's tracking of client progress? \_\_\_\_\_\_ times per \_\_\_\_\_\_b. How is tracking done?

c. Are clients who have been unsuccessful in one treatment program referred again to another? (yes/no)

#### Final questions:

Is there anything else you would like to tell me about your project? Do you have any further questions you would like to ask me?

#### CHAPTER III

#### SITE VISIT INTERVIEW GUIDES

#### INTRODUCTION

Ten TASC projects were selected for field investigation. The information gathered from the project director concerned program operations, including:

- . the points at which TASC interfaces with the criminal justice system;
- . the activities occurring at these points and the interrelationship of all activities of the project;
- . the origins of the local TASC project; and
- possible measurement points for evaluating TASC.

Other staff members supplied explanations of the functions of the program components. Judges, district attorneys, probation officers, public defenders, directors of treatment programs and criminal justice and drug abuse planners discussed TASC's impact on the criminal justice system, treatment programs and the community, and sources of information which might substantiate that impact.

In the following sections of this chapter the interview guides used on site are presented. In most cases, the questions and spaces to record responses have been condensed: the result is a listing of questions useful as a guide in collecting the information required for preparation of narrative descriptions and flow diagrams of program operations.

#### PROJECT DIRECTOR INTERVIEW

We are interested in the mechanisms your project uses to intervene in the criminal justice processing of drug dependent arrestees.

- a. At which of the following points do TASC operations interface with the criminal justice system?
- 1) \_\_\_\_\_ following arrest and booking
- 2) \_\_\_\_\_ during police lock-up
- 3) \_\_\_\_\_ while awaiting arraignment, arrestee on bail
- 4) \_\_\_\_\_\_at arraignment hearing
- 5) \_\_\_\_\_ following arraignment,
- arrestee on bail
- 6) \_\_\_\_\_ following arraignment,
- 7) \_\_\_\_\_arrestee detained 7) \_\_\_\_\_at trial (adjudication)
- 8) \_\_\_\_\_ at hearing for suspension
- of prosecution
- 9) \_\_\_\_\_ at hearing for dismissal of charges
- 10) \_\_\_\_\_ following trial, innocent defendant
- 11) \_\_\_\_\_ following trial, guilty
  person on bail, awaiting
  sentencing.
- 12) \_\_\_\_\_ following trial, guilty person detained, awaiting sentencing
- 13) \_\_\_\_\_ at sentencing hearing
- 14) \_\_\_\_\_ sentence of probation 15) during probation
- 15) \_\_\_\_\_ during probation
  16) \_\_\_\_\_ sentence of incarcer
- 16) \_\_\_\_\_\_ sentence of incarceration 17) \_\_\_\_\_\_ during incarceration
- 18) as condition of parole
- 19) \_\_\_\_\_ other (e.g., bond reduction
  - hearing)

If not yet covered:

2. List and briefly describe the formal mechanisms by which the criminal justice system refers clients to TASC prior to trial (e.g., pre-trial diversion, deferred prosecution).

b. What TASC activity(ies) (e.g., screening, diagnostic recommendations, tracking) occur(s) at this stage?

- 3. Are there any informal ways by which drug-dependent arrestees are referred to TASC prior to trial?
- 4. List and briefly describe the formal mechanisms by which the criminal justice system refers clients to TASC following a finding of guilt?
- 5. At what stage of criminal justice or TASC processing is a drug abuser considered to be a TASC client?
- 6. Can you tell us briefly why the local project was set up and how it was done?
- 7. What are the objectives of your TASC program?

to reduce drug-related crime
 to reduce burdens on the criminal justice system
 to refer drug abusers to treatment
 other.

- 8. How can the effectiveness of TASC be measured? (Probe for measures of process activities, outcomes, impact on problem)
- 9. What measures are used to judge client success? Are these the measures which should be used?
- 10. To what extent is an evaluation of TASC effectiveness hampered by factors which are not controlled by TASC? What are these factors?

We have several sets of data forms we would like to have completed with the staff's help.

- . Financial. The first set of forms covers funding sources and the allocation of monies by component.
- . Clients. The second set concerns your clients: a client profile, treatment modalities to which they are referred, client records, client flows, retention by modality and by CJS referral source.
  - Staff. The third set deals with staffing patterns.

Who can help us fill out these forms?

STAFF INTERVIEWS

Screening: 1. What are your specific interview procedures? (i.e., who is interviewed, when and where? Are interviewees asked to sign waivers of rights?)

- 2. What information do you collect in the interview?
- 3. How is this information used?
- 4. Is urinalysis a routine part of screening?
- 5. What information do you give interviewees?
- 6. Is there cooperation between TASC screeners and bail interviewers? and police detention staff?
- 7. Of the total number of persons arrested a day, what percentage are interviewed by TASC?
- 8. How do you measure your effectiveness in reaching potential TASC clients?
- 9. Are there any obstacles limiting the effectiveness of screening TASC-eligible arrestees?

#### Diagnostic

Intake:

- I. What are your specific intake procedures? (i.e., medical examination, detoxification)
  - 2. Do you diagnose only TASC clients?
  - 3. Can you determine what percentage of TASC clients referred tp intake actually arrive at intake?
  - 4. How long does the intake process take?
  - 5. On what is the diagnostic referral to a treatment program based?
  - 6. Who decides on the program to which a client is sent?
  - 7. For each treatment program to which TASC clients are sent, what percentage of the program's client load are TASC clients?
  - 8. Do you receive feedback on the quality of referrals you make?
  - 9. How can the quality of a referral to a treatment program be measured?

Tracking:

- 1, What is the purpose of tracking?
- 2. When does tracking of a person begin and end?
- 3. What are your specific tracking procedures? (i.e., frequency and method of contact with treatment programs, clients, CJS)
- 4. Do treatment programs cooperate by giving you the information you need?
- 5. Is it possible to follow a former TASC client after the person leaves TASC? If so, how could this be done?

# CRIMINAL JUSTICE-TREATMENT PROGRAM INTERVIEWS

Criminal Justice System:	1.	Did you play any part in the establishment of the local project?
	2.	What is the local project trying to accomplish?
	3.	Has it been successful? If so, how can success be measured (i.e., in reducing drug related crime or burdens on the criminal justice system)?
	4.	(With district attorney only) Are there any other pre-trial intervention programs operating in the city?
	5.	(With probation officer only) Please describe the nature of your contacts with the TASC project. (i.e., frequency and method of contact, information exchanged.)
	6.	(With probation officer only) How does TASC tracking differ from probation supervision?
	7.	(With probation officer only) Please describe the procedures used before the TASC project began. Were drug abusers identified? Referred to treat- ment as a condition of probation?
	8,	(With probation officer only) What data are available through the probation department which might be used in assessing TASC's impact? (i.e., records on drug abusing probationers in treatment but not TASC, or in neither treatment nor TASC)
	9.	(With probation officer only) Do TASC clients have special probation officers? Are TASC clients handled differently from other probationers?
	10,	Is there anything else we should know in order ' to understand your relationship with TASC?
		· · · · ·

- 1. Please describe the nature of your contact with the TASC program (i.e., frequency and method)
- 2.a. What information is exchanged:
  - between treatment program and TASC staff?
     between treatment program and criminal justice system (e.g., probation and parole officers, courts, etc.)?
  - b. Have any problems arisen with confidentiality of data?
- 3. How many TASC clients are in your program now (by modality, if appropriate)? How many total clients are in your program?
- 4. What is the total number of TASC clients who have ever been in your program (by modality, if needed)?
- 5. Do you have other clients who are under criminal justice system pressure but who are not in TASC? How many? How do they compare with TASC clients? How do both groups compare with other voluntary clients?
- 6. How do TASC clients enter your program--i.e., how do you first find out about TASC clients?
- 7. What type of treatment is provided for TASC clients in your program? (Probe for specific treatment details--e.g., intake procedures; frequency of counseling or urine testing; counselor-client ratio; types of ancillary services; etc.)
- 8. Do TASC clients have different counselors from other clients?
- 9. Are there different reporting requirements for TASC clients than other clients? Please explain.
- 10. Are there any other differences in the treatment or processing of TASC clients as compared with other clients?
- 11. What are your days and hours of operation?
- 12. Do the TASC clients have transportation problems getting to your facility? Is any assistance provided to them?

- 13. What information is given to TASC clients about their legal status and any special TASC requirements placed on them? Who transmits this information to the TASC clients?
- 14. How were court-based referrals made before the TASC program was initiated?
- 15. How do you think TASC's effectiveness should be measured? What do you consider important measures of success, both for the TASC program and for individual TASC clients? Should the progress of TASC clients be compared with that of other client groups? How could data be collected for any proposed success measures?
- 16. What is your overall assessment of the present TASC mechanism? What do you see as its major strengths and weaknesses?
- 17. Is there anything else we should know in order to understand your relationship with the TASC program and your views about it?

# F N D
