TRENDS IN CHILD ABUSE/NEGLECT REPORTING:
----- A SUMMARY -----

Taking into account the 1975 law change which increased the category "Mandated Reporters" and the form and expungement changes of 1978, child abuse reporting has risen in 1978 to 20 times what it was in FY 1970. Reports in FY 1978 were up 46.5% over FY 1977, reflecting greater media coverage of child abuse concerns and more effective reporting. For the first time Cook County accounted for less than 50% of all reports to the Central Registry. The Rockford Region and Marion Region saw the largest increases in reports in FY 1978. A conservative estimate of 20,300 reports for FY 1979 will be a 51% increase over FY 1978.

Age distributions of children reported abused or neglected have remained fairly stable. Twenty to twenty-five percent (25%) under age 3, 15%-20% were 3-5 years of age, 15%-20% were 6-9 years of age, and 25%-30% were over 10 years of age.

FY 1978 showed a 63% increase in reports of White children, as compared to a 36% increase for Blacks and a 24% increase for all other races (and unknown). The percent age of Males and Females reported has remained 50-50 for the last three years.

Reports of poisoning and multiple injuries rose sharply compared to other types of abuse. A higher proportion of reports were neglect in FY 1978 than in FY 1976 and FY 1977.

Parents remain the alleged perpetrators of abuse/neglect in 75% of the cases. The mother's paramour was cited more frequently for alleged abuse in FY 1978, as were relatives, neighbors and foster parents. Stepmothers were the only category of alleged perpetrators to decrease in number.

FY 1977 and FY 1978 reports included only 0.5% deaths compared with 0.7% in FY 1976. Of the 75 deaths in FY 1978, 59 were DOA (Dead on Arrival) and 16 expired later. These figures exactly parallel FY 1977. Ninety-three percent (93%) of the deaths were first reports with the remaining 7% second reports. 70% of the deaths occurred in Cook County, 8% were in Rockford, 7% in Champaign and 7% in East St. Louis Regions.

Less than 2% of all abuse/neglect reports in FY 1978 were third or more reports. Since subsequent reports are based on all accumulated reports made to the Central Registry since 1965, this is a very small percentage. (A third report in FY 1978 does not mean the child was reported three times in FY 1978. It means that since 1965 there have been three reports on a child and the third was received in FY 1978.)

Among mandated reporters "Hospital Physicians" and "Nurses - Not Hospital or School" were the only categories to decrease. "Public Aid" rose 198% in reporting, followed by "Non-DCFS Social Workers", with a 99% increase and "School" with a 66% increase. Although 75 deaths were reported, only 6 reports were received from coroners.

Non-mandated reporters showed the greatest increases in the categories "Family/Child Friend" and "Relative".

The percentage of abuse to neglect reports varies greatly from one Region to another. East St. Louis had the lowest percent of abuse to neglect, with 41% abuse to 59% neglect. Springfield Region had the highest percent of abuse to neglect with 85% abuse reported to 15% neglect. Cook County had 57% abuse - 43% neglect reports compared to all other counties totaled with 47% abuse - 53% neglect. This made the State totals 51% abuse - 49% neglect reports.

A slightly higher percent of abuse is reported for children under 3 and over 14 years of age, with neglect being reported more frequently in the 3 - 13 year old range. A higher percentage of Black children are reported abused than neglected and the reverse is true for White children. The alleged perpetrator is Parents in 92% of all neglect reports compared to 65% of all abuse reports. Stepparents, paramours and relatives are the alleged perpetrators in another 17% of all abuse reports.

Neglect reports were made 50% of the time by mandated reporters compared to 70% of the time for abuse reports. The major reporters of abuse are medical personnel, schools and law enforcement. The major reporters of neglect are law enforcement, schools, neighbors and anonymous reports.

FY 1978 is the first year that any comparisons of data have been made across several types of abuse. Compared were reports of beatings, sexual abuse, multiple injuries, neglect and abuse resulting in death. Looking at the ages of children, some very distinct differences are apparent.

Under Age 3:	6%	Sexual Abuses
	20%	Beatings
	25%	Neglect
	33%	Multiple Injuries
	77%	Deaths
3-13 Years	19%	Deaths

14-18 Years:	0%	Deaths
	9%	Neglect
	9%	Multiple Injuries
	17%	Beatings
	27%	Sexual Abuses

White children made up 46%-58% of all types of reports except deaths. Only 25% of the deaths reported were White children. Black children made up 26%-38% of all types of reports except deaths but were 52% of the deaths reported.

Obvious differences in alleged perpetrators are:

Mother:	3.3%	Sexual Abuses
	35.6%	Beatings
	42.7%	Deaths
	51.1%	Multiple Injuries
	63.9%	Neglect
Father:	6.8%	Neglect
