FOREWORD

In 1979, the first joint National Drug and Alcoholism Treatment Utilization Survey (NDATUS) was conducted by the National Institute on Alcohol Abuse and Alcoholism and the National Institute on Drug Abuse in cooperation with the State agencies.

The inclusion of over 9,100 alcoholism and drug abuse service units in this directory is indicative of the success of the survey.

This document should provide an important resource for those seeking treatment and referral services to alcoholism and drug abuse programs. We hope that the publication of this joint directory will stimulate further discussion and cooperation within the alcoholism and drug abuse treatment community.

John R. DeLuca
Director, NIAAA

William Pollin, M.D.
Director, NIDA

PREFACE

The National Directory of Drug Abuse and Alcoholism Treatment Programs is a compilation of approximately 9,100 Federal, State, local and privately funded agencies responsible for the administration or provision of alcoholism or drug abuse services throughout the United States and its territories. The information included in this directory was extracted from the 1979 National Drug and Alcoholism Treatment Utilization Survey. This survey, conducted by the National Institute on Drug Abuse (NIDA), and the National Institute on Alcohol Abuse and Alcoholism (NIAAA), in conjunction with the Food and Drug Administration (FDA) and the States, collected data on treatment capacity, utilization, funding, and staffing. The information was collected as of April 30, 1979.

The directory has been prepared to serve as a resource tool for program managers, treatment personnel, and others interested in the location of alcoholism and drug abuse units. Reflecting the primary focus of the NDATUS survey, most of the units in the directory are treatment units. However, States have the opportunity to include other than treatment units, if they so desire. Thus, while the listing of treatment service units is substantially complete, the inclusion of nontreatment units varies by State. For purposes of this directory, the selection criteria specified that to be considered a treatment unit, the NDATUS form must indicate a treatment capacity. These units are designated by an asterisk located immediately prior to the unit's focus (e.g., *drug and alcohol unit).

The publication consists of three sections: (1) State Authorities, (2) Drug Abuse and Alcoholism Programs, and (3) VA Medical Centers. All sections are organized alphabetically. In states where there are separate alcoholism and drug abuse authorities, the alcoholism authority is listed first. Within each state, the entries are alphabetized by city and then by program name within city. Each entry consists of the unit's name, address, telephone number and focus.

The directory is available through the Clearinghouses of the National Institute on Alcohol Abuse and Alcoholism and the National Institute on Drug Abuse.

If you represent a treatment unit that did not participate in the 1979 NDATUS, complete the information on the last page of this directory and you will be sent a form for the 1980 survey.

NDATUS Project Team
