1977 HIGHLIGHTS

ACQUISITIONS

- * The median age of juvenile males placed under supervision was 15.8, while the median age for juvenile females was 15.7. One juvenile male was less than 12 years of age at the time of placement. Over three-fifths (61.8 percent) of the juveniles were either 15 or 16 years of age at the time of placement. (See Table 3)
- * There was a decrease in the total number of admissions to probation from 1976 (from 278 to 249) with the largest percentage decrease occurring in the Milwaukee Region (decrease of 37 percent from 1976) and the largest percentage increase occurring in the Southern Region (increase of 233 percent, but only 7 cases, over 1976). (See Table 1 and Appendix Table A)
- * The percentage of juvenile "C" probations increased from 78.8 percent of total probations in 1976 to 88.0 percent of total probations in 1977, while the percentage of regular probations in this category decreased from 21.2 percent in 1976 to 12.0 percent in 1977. (See Table 1)
- * In 1976, 10 percent of the juvenile females admitted to probation were under the age of 14; in 1977, there were no juvenile females under 14 admitted to probation. In 1976, the largest age group, 36.6 percent, of the juvenile females admitted to probation was 16 years of age; in 1977, the largest group, 39.5 percent, was 15 years of age. (See Table 3)
- * There has been a shift in the total ages of all juveniles admitted to probation. From 1973 to 1975, the majority of males were aged 16-17, while in the years 1976-1977, the majority of males were aged 15-16. In 1974-1975, the majority of females were aged 16-17, while in the years 1976-1977, the majority of females were aged 15-16. (See Appendix Table C)
- * While the school adjustment reported at admission for juvenile males remained relatively stable, there were significant changes in this category for juvenile females. The percentage of juvenile females adjusting satisfactorily increased from 13.3 percent in 1976 to 36.8 percent in 1977, while those adjusting unsatisfactorily decreased from 76.7 percent in 1976 to 60.5 percent in 1977. In addition, the percentage of juvenile females not in school decreased from 10.0 percent in 1976 to 2.7 percent in 1977. (See Table 6)

- * There has been a slight but steady increase in the percentage male youths of Mexican origin (0.9 percent in 1973 and 3.3 percent in 1977) and non-White male youths admitted to probation (12.4 percent in 1973 and 17.1 percent in 1977). (See Appendix Table D)
- * There has been an increase in the percentage of male youths reported at admission as having satisfactory school adjustment (36.4 percent in 1973 and 46.0 percent in 1977), while there has been a decrease in the percentage of male youths not in school (14.8 percent in 1973 and 10.9 percent in 1977). (See Appendix Table F)
- * The percentage of male and female youths reported at admission as attending school has increased markedly over the five-year period (males: 47.0 percent in 1973 and 66.8 percent in 1977; females: 78.0 percent in 1973 and 81.6 percent in 1977), coupled with a marked decrease in the percentage of youths employed, particularly males (52.1 percent in 1973 and 33.2 percent in 1977). (See Appendix Table G)
- * There has been a marked decrease in the percentage of male youths reported at admission as earning less than \$400/month (43.3 percent in 1973 and 19.0 percent in 1977), while the percentage earning more than \$400/month has remained relatively constant. (See Appendix Table H)
- * The percentage of male youths reported as earning no income has increased substantially (47.0 percent in 1973 and 75.4 percent in 1977), while there has been a slight decrease in the percentage of female youths in this category (84.0 percent in 1973 and 76.3 percent in 1977). There has been a decrease in the percentage of both male and female youths receiving public assistance (males: 7.4 percent in 1973 and 4.7 percent in 1977; females: 12.0 percent in 1973 and 5.3 percent in 1977). (See Appendix Table H)
- * There has been a sharp increase over the five-year period in the percentage of female youths considered to have disruptive drinking problems (14.0 percent in 1973 and 36.8 percent in 1977). (See Appendix Table I)
- * Percentages of youth reported as having had primarily reputable associates have decreased for both males and females over the five-year period (males: 14.8 percent in 1973 and 7.6 percent in 1977; females: 9.5 percent in 1974 and

5.2 percent in 1977). (See Appendix Table J)

- * There has been an increase over the five-year period in the percentage of male youths reported at admission as not accepting responsibility (7.8 percent in 1973 and 13.3 percent in 1977). The percentage of females in this category has experienced a decrease (16.0 percent in 1973 and 7.9 percent in 1977) (See Appendix Table K)
- * General decreases have been experienced in the percentages of both male and female youths reported at admission as having either few or serious problems with hostility (males: 56.7 percent in 1973 and 39.4 percent in 1977; females: 44.0 percent in 1973 and 34.2 percent in 1977), while there has been a general increase in the percentages of both male and female youths with moderate problems in hostility (males: 37.3 percent in 1973 and 40.3 percent in 1977, with a five-year high of 52.0 percent in 1976; females: 34.0 percent in 1973 and 55.3 percent in 1977). (See Appendix Table L)
- * There has been a substantial decrease in the percentage of male youths who at admission are regarded as having poor ability to make judgments (71.9 percent in 1973 and 58.3 percent in 1977). (See Appendix Table M)
- * There has been a decrease in the percentage of female youths classified at admission as emotionally stable (22.0 percent in 1973 and 13.2 percent in 1977) and an increase in the percentage of female youths classified as very unstable (14.0 percent in 1973 and 21.0 percent in 1977). (See Appendix Table N)
- * For both male and female youths, there has been a marked decrease in the percentages regarded as having some ability to plan for the future (males: 50.3 percent in 1973 and 26.1 percent in 1977; females: 30.0 percent in 1973 and 21.1 percent in 1977) and significant increases in the percentages of youth who are said to live for the immediate present (males: 44.7 percent in 1973 and 49.3 percent in 1977; females: 48.0 percent in 1973 and 65.8 percent in 1977). (See Appendix Table O)

Juvenile Probation Admissions to
Wisconsin Division of Corrections
1977

The primary responsibility for the provision of juvenile probation services in Wisconsin rests with county juvenile courts and county social service departments. The Division of Corrections provides services on the state level if: (a) the legal custody of the juvenile is transferred to the Department of Health and Social Services (Juvenile "C" Probation), or (b) the county court requests such services for youths whose needs cannot be adequately met on the local level (Juvenile Regular Probation). Eighty-eight percent of the 249 cases placed under Division of Corrections supervision in 1977 were juvenile "C" commitments.

Juveniles from 41 of Wisconsin's 72 counties were placed under Division of Corrections juvenile probation supervision during 1977. Milwaukee County (46 cases), Vilas County (20 cases), and Racine County (15 cases) made the greatest use of state supervision. Eighty-five percent of the juveniles placed on state probation supervision were male. Tables 2 through 15 are arranged to enable comparisons between Juvenile "C" and Juvenile Regular Probation admissions in terms of sex, age, race, etc.

Appendix Tables A through O are arranged to enable comparisons and contrasts to be made regarding the years 1973 through 1977.

Period of Probation

A Juvenile "C" Probation term extends from the time a juvenile is placed under supervision until attainment of the age of majority (18 years). Just over two-fifths (43.7 percent) of the juvenile males and slightly more than one-third (36.8 percent) of the juvenile females placed under Juvenile "C" supervision had less than two years remaining before attaining the age of majority.

A juvenile who is placed under Juvenile Regular Probation receives a definite term of supervision determined by the committing court. Juveniles under either type of supervision may be granted early discharges if such discharges are warranted.

Shu-Shun Chiang
Supervisor of Acquisition
NCJRS
Acquisition Department No. 2
Box 6000
Rockville, MD 20850

Dear Mr. Chiang:

In response to your letter, I am enclosing copies of each of the statistical bulletins published annually by the Office of Systems and Evaluation of the Wisconsin Division of Corrections.

Your name is being added to our mailing list so that you will receive copies of these publications as they are issued.

Sincerely,

Bill Curley
