INTRODUCTION

This directory, compiled for the convenience of people involved in the planning, development or enhancement of corrections information systems throughout the United States, lists contacts for every state department of corrections, appropriate federal agencies and national reporting bodies.

SEARCH, Group, Inc., (SGI) has prepared this listing as a result of requests from many individuals throughout the country who are responsible for information system development and who are interested in learning about what other states are accomplishing. By using the identifying information describing various state systems, implementors with similar hardware configurations and/or software might find it useful to contact one another to learn how others have handled similar implementation or developmental problems.

SGI is pleased to offer this directory to the corrections community in the hope that it will be helpful to states already involved in developing aspects of Corrections Management Information Systems (CMIS) whether it be in the areas of Offender-Based State Corrections Information Systems (OBSCIS) or State Corrections Resource Management Systems (SCRMS). Funding for such projects has been provided through the Systems Development Division of the Law Enforcement Assistance Administration, which also made possible the publication of this pamphlet.
