ACQUISITIONS

PLEASE NOTE

Figures used in this report are submitted voluntarily by law enforcement agencies throughout North Carolina. Individuals using these tabulations are cautioned against drawing conclusions by making direct comparisons between cities due to the existence of numerous factors which affect the amount and type of crime from place to place. Some of these factors are listed in this report. More valid use can be made of these figures by determining deviations from state averages and through comparisons with averages for cities in similar population groups. It is important to remember that crime is a social problem and, therefore, a concern of the entire community. The efforts of law enforcement are limited to factors within its control.

ANNUAL REPORT — JANUARY-DECEMBER 1979

RUFUS L. EDMISTEN
*Attorney General
of North Carolina*

PREFACE

All of us in law enforcement have been increasingly concerned about the incidence of crime in North Carolina. This report documents the disturbing fact that after several years of relative stability, the crime rate has begun to rise. The most alarming statistic I find as Attorney General is that only 25% of the crimes that were reported in 1979 were cleared by arrest, creating a further drop in the number of crimes that are solved in the state each year. This, to me, clearly demonstrates that the law enforcement community is sorely strained, both in terms of manpower and budget, in meeting this new crime wave.

I cannot conceive of a higher governmental priority than the protection of the lives, liberty and property of the citizenry. In the past year I have redoubled my efforts to increase the manpower and budgetary resources for law enforcement. I have begged, pleaded and cajoled the General Assembly and everyone who would listen for greater resources for law enforcement. I have done this because I believe that the current increase in the crime rate is the single most important issue facing North Carolina today.

This annual report, prepared by the Police Information Network, serves to remind all of us of our duty to the people of North Carolina. Hopefully, the dissemination and use of these statistics will help in our daily struggle with the problem of crime. The bonds of cooperation among law enforcement agencies have served to make this annual report the most accurate and informative one yet published on crime in North Carolina.

I pledge to you that in the coming year I will be in the forefront of the fighting to get the manpower and budgetary resources that we in law enforcement need to combat the recent surge in the rate of crime.

Attorney General

Law Enforcement Code of Ethics

As a Law Enforcement Officer, my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all men to liberty, equality and justice.

I will keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn, or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life, I will be exemplary in obeying the laws of the land and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept secret unless revelation is necessary in the performance of my duty.

I will never act officiously or permit personal feelings, prejudices, animosities or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.

I recognize the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of the police service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession . . . law enforcement.

WILLIAM C. CORLEY
Director
Police Information Network

FOREWORD

Since 1973 law enforcement agencies throughout North Carolina have voluntarily submitted information on crimes committed in their areas of responsibility to the Police Information Network (PIN). The information and statistics presented in this report are an assessment of the statewide crime problem and were compiled from the monthly Uniform Crime Reports (UCR) submitted to PIN by North Carolina law enforcement agencies for the year 1979. In turn, PIN has furnished this data to the Federal Bureau of Investigation for tabulation of the national crime figures and inclusion in their annual publication, CRIME IN THE UNITED STATES.

The staff of the Police Information Network has verified the data in this publication for accuracy and completeness to the best of their ability. It is our hope that this report will assist law enforcement administrators in adjusting, if necessary, their efforts in the fight against crime. This report should provide valuable information for other interested agencies, both public and private, which have similar goals. I sincerely hope that this publication will prove useful in attempting to curtail the serious problem of crime in our State.

We are constantly seeking ways and means of improving our publications and methods of collecting the data. In early 1980, PIN will begin implementing a new and improved method of collecting criminal statistics called Incident Base Reporting. It is our plan to have this program implemented to the point that offense data will be available for publication in 1982. Your continued support and suggestions for improving methods of collections and publication of crime data will be appreciated.

I would like to extend my thanks to all law enforcement officials without whose concerted and consistent participation in UCR would not have made this publication possible.

NORTH CAROLINA POLICE INFORMATION NETWORK **UNIFORM CRIME REPORTING**

STATEMENT OF POLICY **FOR THE RELEASE OF UCR STATISTICAL INFORMATION**

The following regulations will be observed by this agency concerning the release of Uniform Crime Reporting statistical information. Employees of this agency will observe these procedures and will not deviate from this policy without the express consent of the Director of the Police Information Network. All information to be released will originate from the Police Information Network Criminal Justice Statistics Division and will be approved prior to being released by the Director of the Police Information Network.

REGULATIONS

FOR PUBLISHED DATA:

1. This agency will publish an annual report reflecting crime in North Carolina. This report will be distributed to the Governor, to members of the Legislature, to the Attorney General, to law enforcement agencies or to any agency or committee dedicated to law enforcement or criminal justice work.
2. All UCR data intended for publication will be released to the contributing agencies prior to its being released to individuals or agencies extraneous to the criminal justice community.

FOR UNPUBLISHED DATA:

1. All requests for unpublished information from agencies or individuals should be directed by letter to the Director of the Police Information Network. These special requests will be honored only upon the Director's authorization.
2. Any statistical information not contained in the published annual report may be released via phone, letter, etc., to any interested party only with the written consent of the agency whose statistics are requested.
3. Law enforcement agencies may receive interim, unpublished, specialized reports identifying their agency provided the request is not unreasonable. Law enforcement agencies may also receive their respective county totals as well as any available district or statewide information.

SECTION ONE

NORTH CAROLINA CRIME REPORTING PROGRAM

HISTORICAL BACKGROUND*

The North Carolina Uniform Crime Reporting Program is part of a voluntary national program of collecting crime counts initiated in 1930 by the Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP). During that same year, the Federal Bureau of Investigation (FBI) was authorized by the Congress of the United States to serve as the national clearinghouse for crime-related agencies throughout the Nation based upon uniform classification and procedures of reporting.

In an effort to provide as complete a picture of crime in the United States as possible, the Committee on Uniform Crime Records of the IACP chose to obtain data on offenses that became known to police, since greater numbers of these data were available than in any other category of reportable crime information. A meaningful overview of crime was available through examination of seven offenses which were selected because of their seriousness, frequency of occurrence, and likelihood of being reported to police. These offenses, known as the Crime Index offense, are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson. To provide nationwide uniformity in the reporting of data, standardized definitions were adopted for all offenses. This standardization was necessary to overcome the variation in definitions of criminal offenses throughout the country.

Reporting agencies are required to submit their data in accordance with the UCR definition of offenses as set forth in Section II of this publication. Because of the variance in punishment for the same offenses in different state codes, there is no possibility in a program such as this to distinguish between felony or misdemeanor crimes.

Contributing agencies to the UCR Program are responsible for compiling and submitting their crime data in one of two means, either directly to the FBI or through state Programs such as that established in North Carolina. Presently, 43 states have operational UCR Programs and others are in various stages of developing such data collection efforts. These state UCR Programs provide the advantages of increased coverage of law enforcement agencies; the provision of more direct and frequent service to law enforcement agencies in assuring completeness and quality of information provided by them; and through coordination by the state data collection agency, more readily available information for use at the state level. Also, the collection and reporting machinery for the national Program is substantially streamlined.

With the development of a state UCR Program, the FBI ceases collection of data directly from individual law enforcement agencies within the state. Instead, completed information from these agencies is forwarded to the national Program through the state data collection agency (Police Information Network in N.C.).

*Crime in the U.S., 1977: FBI, Washington, D.C.

THE POLICE INFORMATION NETWORK

The growing need for a central, computerized network of criminal justice information for the State prompted an extensive survey by the Governor's Law and Order Committee in 1968. This Committee's report recommended to the General Assembly that an information network be created. The General Assembly enacted legislation in 1969 (G. S. 114, art. 3.) which created the division of criminal statistics and the Police Information Network (PIN) as a part of the Department of Justice.

PIN was authorized by law to collect and correlate information regarding the administration of the criminal laws, to maintain and control the access to such information that is required for the performance of criminal justice duties, and, to make scientific studies, analyses and comparisons of this data in cooperation with local, state and national criminal justice agencies.

Today, the Police Information Network maintains a vast computerized network that links local, state and national criminal justice agencies with up to the minute information on crimes and criminals. The network operates twenty-four hours a day, seven days a week collecting, organizing and supplying information. Subscribers to the network have the ability to send messages to any one terminal or group of terminals connected to the service, including terminals in other states through the National Law Enforcement Telecommunications Systems in Arizona.

The information needs of the law enforcement community have been given the highest priority in the development of the PIN system. PIN also serves many other agencies in the state's criminal justice system, such as the courts, the Department of Corrections, and the probation parole, and pardon agencies.

With the increasing mobility of the criminal element, it is important that law enforcement keeps pace. With PIN, the communication of vital information between different law enforcement jurisdictions can be accomplished in seconds. Before the advent of PIN, the common means of communication between agencies was by telephone, telegraph or the highway patrol radio network. Incomplete or erroneous information was sometimes given. Today, PIN's computerized network is noted for its accuracy and speed.

Through linkage with the National Crime Information Center, PIN has access to up-to-date information on stolen vehicles, stolen license plates, stolen property, stolen securities, stolen boats and stolen or recovered firearms. PIN also has access to current information on wanted persons or fugitives from every jurisdiction in the country. In cooperation with the North Carolina Department of Motor Vehicles, PIN provides information concerning automobile registration and driver history in North Carolina.

In cooperation with the Motorboat Registration Division of the North Carolina Department of Wildlife, PIN maintains motorboat registration information.

PIN also maintains the SBI's case index file, criminal history information, consumer complaint records, PIN terminal user certification records, the Criminal Justice Standards Division's program information, the SBI's crime laboratory evidence analysis records, the Uniform Crime Reports statistical data, as well as state and national fire investigation data and statistics.

The Police Information Network is administratively organized into four divisions: Administration, Operations, Systems, and Statistics and Field Support.

The Administrative Division is led by PIN Director, William C. Corley, and is responsible for the overall operation of the Network. The Director's office is directly concerned with PIN's budget, administrative procedures, the technical documentation on all computer programs, systems and hardware, operational procedures for terminal users, the collection of PIN terminal subscribers' dues and contractual support for the PIN system.

The Operations Division of PIN is handled by Deputy Director, Graham Stallings, and is primarily responsible for monitoring the central, main frame operations computer. The division also services PIN user terminals and works with the telephone companies to correct telephone communications problems.

Because of the critical and important nature of the services provided by PIN, high speed system reliability was the prime objective in the selection and design of the system. PIN consists of two identical computer processors. During normal operations, one processor services all the user terminals and the other works on administrative tasks such as developing new programs, compiling statistics or studying the volume of traffic. Should the computer servicing the user terminals break down, the second computer cuts in to insure uninterruptable service to all terminals users.

To further insure the reliability of the system, it has an uninterruptable power supply. This consists of a battery powered backup from brief power shortages and a complete motor generator system for extended outages. This system allows the network to maintain normal services to users during unforeseen commercial power failures.

The standard user terminal of the Police Information Network is the Univac Uniscope 100 Video-Data Terminal attached to a communication output printer. The Video-Data Terminal was chosen because of its high transmission speed and ease of operation. User terminals are connected to the main computer by standard telephone lines.

Agencies which utilize the PIN system include: Sheriff's offices, Police Departments, the SBI, the FBI, the Highway Patrol, U. S. Military Agencies, the Division of Motor Vehicles, the Department of Correction, the Wildlife Enforcement Division, the Emergency Operations Center, District Attorney's Offices, the Drug Enforcement Administration, the U. S. Customs Agency, the Blue Ridge Parkway Rangers and Campus Police at state universities.

There are high speed communication links designed for fast data transfer between PIN and the Division of Motor Vehicles; the FBI's National Crime Information Center (NCIC) in Washington; the National Law Enforcement Telecommunication Center (NLETS) in Phoenix, Arizona; and the Police Departments of all major cities in North Carolina. These special linkages ensure the fast and accurate transmission of the latest data on criminal activity.

The Systems Division is headed by Deputy Director, Kenneth Walker, and is responsible for the design, development and implementation of the Network's sophisticated computer programs. This includes highly complex computer programs that allow message switching between different terminals as well as a program that allows any terminal to direct access the National Law Enforcement Telecommunications Center in Phoenix and the National Crime Information Center in Washington.

PIN's many complex computer programs require highly skilled technical and professional experts to design, develop, implement and maintain them. Plans are always being developed to improve and refine the level of service available to terminal subscribers.

The Statistics and Field Support Division is headed by Deputy Director, Doug Kappler, and is primarily responsible for collecting and analyzing crime statistics and field training of PIN programs. PIN publishes a quarterly crime trend report using statistics from the five major North Carolina cities and a yearly report entitled *Crime in North Carolina* which analyzes crime by index offense in every county and municipality in North Carolina.

This division also certifies and trains all PIN terminal operators. From the inception of this training program in 1969, PIN has trained and certified more than 5,000 terminal operators all over the State.

This division certifies and validates for accuracy all crime data submitted by law enforcement agencies. It is also responsible for handling requests for advisory and technical assistance and supplying forms for record-keeping to enable various law enforcement agencies to better collect and maintain internal records of criminal statistics.

A relatively new service provided by this division is statistics on incendiary and suspicious fires compiled from data submitted by fire departments all over North Carolina. PIN now publishes a yearly report called *Fire in North Carolina* and plans in the near future to issue quarterly reports.

This division also has a staff of field representatives who travel the state to help local law enforcement agencies who request assistance with compiling their criminal statistics, PIN certification training, and other PIN related functions.

The Police Information Network has an *Advisory Policy Board* which is composed of thirteen members. The members are drawn from all agencies in the state's law enforcement community serviced by PIN and includes the director of PIN. The Board makes recommendations and decisions regarding the existing operational capacities and proposed expansions of services of the Network.

The Police Information Network takes stringent precautions to ensure that only those persons with rightful access to the information in PIN have access to that information and use it only for legitimate law enforcement purposes. Only the SBI can enter or modify criminal history data in the Network.

All employees of PIN have had thorough background investigations, similar to those made on prospective SBI agents, which are done before and during their employment with the agency. All information drawn from the network is recorded and the individual requesting it can be identified easily. Programming checks are made of information requested on a regular basis, and the checks are audited to ensure that security and confidentiality is maintained.

Citizens who wish to review information on them which may be contained in the system must do so under the auspices of the State Bureau of Investigation. Citizens may review only files which concern themselves. All visitors to the Police Information Network Headquarters must sign in and out, must offer positive identification, and must be accompanied at all times. The Network does this to insure confidentiality and insure every individual's right to privacy.

The Police Information Network is dedicated to improving law enforcement's capability to solve crimes by providing fast and accurate information on crimes and criminals. Through the cooperation of all law enforcement and criminal justice agencies, PIN has developed an outstanding system for getting vital criminal information where it is needed very quickly.

FIELD REPRESENTATION

For Uniform Crime Reporting purposes the Police Information Network divides the State into eight (8) districts. Eight PIN Field Representatives are assigned to assist local agencies in many areas including record practices and crime reporting procedures. The difficult and important task of maintaining close liaison is obvious when it is realized that services now are extended by PIN, through its Field Representatives, to 470 law enforcement agencies of the State. Education of contributors to the program must be a constant operational requirement, if continued system adherence and valid statistics are to be expected.

As an adjunct to the program the Police Information Network offers internal records keeping system assistance to those agencies who request it. Assistance is rendered by the Field Representative who provides the necessary guidance and instruction. The personal contact of the Field Representative and the contributor not only serves as a rapid means to resolve areas of report error, but also provides the Field Representative the opportunity to work in other areas with which the Police Information Network is concerned.

REPORTING PROCEDURE

In the statewide Uniform Crime Reporting Program contributing law enforcement agencies are wholly responsible for compiling their own crime reports and submitting them to the Police Information Network. The Police Information Network in an effort to maintain quality and uniformity in the data received furnishes full-time field representatives who provide training in Uniform Crime Reporting procedures. All contributors also are furnished with the Uniform Crime Reporting Handbook which outlines in detail procedures for scoring and classifying offenses. The Handbook illustrates and discusses the monthly and annual reporting forms as well as the numerous tally sheets made available to facilitate the periodic tabulation of desired data.

A centralized record system is necessary to the sound operation of any law enforcement agency. The record system is an essential basis for crime reporting by the agency. Upon request the Police Information Network makes internal records forms and technical assistance available at no cost to any law enforcement agency. This provides for the establishment or modification of a basic non-automated police records system.

On a monthly basis, law enforcement agencies (police, sheriffs, Highway Patrol, and State Bureau of Investigation, Wildlife) report the number of offenses that became known to them during the month in the following crime categories: murder and non-negligent manslaughter, manslaughter by negligence, forcible rape, robbery, assault, burglary, larceny, motor vehicle theft and arson. This count is taken from a record of all complaints of crime received by the law enforcement agency from victims, other sources, and/or discovered by officers. Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from the actual count. The number of "actual offenses known" in these crime categories is reported to PIN without regard to 1) whether anyone is arrested for the crime; 2) stolen property recovered; 3) the local prosecutive policy; or 4) any other restrictive consideration. Law enforcement agencies on a monthly basis report the total number of these reported crimes which they clear either by arrest or exceptional means. A separate count of crimes cleared which involve only persons under the age of 18 is shown. The number of law enforcement officers killed and assaulted and the value of property stolen and recovered during the month are reported. Arrests are reported for all criminal acts, except traffic violations, by crime category including the age, sex, and race of each person arrested. Supplementary information concerning pertinent data surrounding homicides and rapes is reported. Law enforcement employee data specifically encompasses the number of sworn and other personnel and is collected annually.

VERIFICATION PROCEDURES

An obvious concern in the collection of crime statistics is the validity and uniformity of the data received. With the receipt of monthly reports covering approximately 400 jurisdictions, prepared on a voluntary basis, the problems of attaining uniformity are readily apparent. Issuance of instructions does not complete the role of the Police Information Network. On the contrary, it is standard operating procedure to examine each incoming report not only for arithmetical accuracy but also, and possibly of even more importance, for reasonableness as a possible indication of errors.

Numerous checks and cross checks are used to insure the accuracy of the reports. Errors of a minor nature are corrected by the UCR report verifiers without contacting the contributor. Necessary arithmetical adjustments or unusual variations are noted by the UCR verifiers and brought to the attention of the submitting agency by direct contact through a PIN field representative. Upon resubmission to PIN of a corrected return from a field representative, the forms are re-verified. Upon completion of all individual form verification processes summary statistics in various forms are derived.

A great deal of the success of North Carolina's UCR Program to this point has largely been due to the full time field staff assigned to assist local agencies in record practices and crime reporting procedures. Personal contact is invaluable to the accuracy and uniformity of UCR data received.

INCIDENT BASE REPORTING

The Police Information Network is currently undertaking the task of developing a statewide Incident Base Reporting System similar to those already in operation in several other states. Incident Base Reporting is the first major change PIN has proposed in the interest of improving the methodology by which crime data are collected in this state. This method of collecting crime counts will supplant, not replace, the Summary Form method used for reporting until now in that Incident Base will not change the rules and procedures for classifying crimes as outlined in this report.

With Incident Base Reporting PIN will, in most part, overcome many of the limitations on crime analysis imposed by the national UCR Program simply by changing the method in which the data is collected and compiled. This conversion to Incident Base will involve the submission to PIN of copies of all investigation, supplementary investigation, and arrest reports, completed by each contributing agency. From these reports, in which the names of all victims, suspects, etc. will have been deleted, PIN will extract the data needed to centrally classify and score all offenses and arrests.

Incident Base Reporting will accomplish the following for North Carolina state crime analysis:

1. Improve the uniformity and quality of data available.
2. Increase the amount of information on the number and kind of actual offenses committed.
3. Provide detailed victimization and offender data heretofore non-existent.
4. Substantially streamline the internal records keeping machinery of all participating agencies.
5. Afford an expanded data base for any future crime analytical needs.

Statewide conversion to this new system has already begun, and a current timetable calls for PIN to complete this conversion by January, 1982.

CONTRIBUTING AGENCIES AND POPULATION COVERAGE

✓ There are currently an average of 398 law enforcement agencies throughout the State contributing monthly directly to the North Carolina Uniform Crime Reporting Program. Each month approximately 97 out of 100 county Sheriff's Departments and 291 out of 372 Police Departments participate.

✓ In addition, State law enforcement agencies (North Carolina State Bureau of Investigation (SBI), North Carolina State Highway Patrol (SHP), North Carolina State Government Security Force (SGSF), Wildlife Protection Division and several Campus Police Departments submit data to the program. Uniform Crime reports received from these agencies represent statistical data covering approximately 98.80 percent of the estimated North Carolina population.

JANUARY 1, 1979 - December 31, 1979

	Total	Police	Sheriff	SHP	SGSF	SBI	Wildlife	Campus PD's	Pop. Cov.
January	403	298	97	1	1	1	1	4	98.69%
February	401	296	97	1	1	1	1	4	98.65%
March	400	294	98	1	1	1	1	4	99.18%
April	398	292	98	1	1	1	1	4	99.08%
May	397	291	98	1	1	1	1	4	99.11%
June	397	290	98	1	1	1	1	5	99.05%
July	397	289	98	1	1	1	1	6	99.16%
August	399	292	97	1	1	1	1	6	98.68%
September	398	290	98	1	1	1	1	6	98.99%
October	394	286	98	1	1	1	1	6	98.89%
November	392	287	96	1	1	1	1	5	98.13%
December	394	288	96	1	1	1	1	6	97.93%
Average	398	291	97	1	1	1	1	5	98.80%

The above table sets forth the number of agencies by type that have participated in the North Carolina Uniform Crime Reporting Program through December 1979. The State Highway Patrol, Wildlife and State Bureau of Investigation are each counted as one agency even though: A) a monthly report is received from the State Highway Patrol and Wildlife reflecting activity in each county and B) a monthly report is received from each Special Agent of the State Bureau of Investigation.

UCR SYSTEM FLOW

The North Carolina Police Information Network is pleased with the progress of the Uniform Crime Reporting Program to this point notwithstanding the fact that there are many challenges yet to be met. The UCR staff is working vigorously toward achieving a program of excellence in terms of the quality of data submitted, the jurisdiction coverage represented, and the value of meaningful statistical feedback and interpretation. To this end the UCR program is committed.

SECTION TWO

CONSIDERATIONS FOR INTERPRETATION

UCR LIMITATIONS

N.C. UCR PROGRAM. Information currently collected by the North Carolina Program is generally the same as that gathered by the national system, and the methods of classifying and scoring (counting) offenses and arrests are the same. This readily enables comparisons with other states and the Nation (see National Crime Rate Tables in Section VI), but the information gaps present in the national program are also inherent in North Carolina's system.

PRIMARY PURPOSE. The Uniform Crime Reporting Program has been subject to much criticism during its history and, while many of these commentaries have been valid, at least some of the shortcomings are understandable when it is remembered that the program has been developed to furnish management information for use primarily by law enforcement agencies. The Uniform Crime Reports are not a court or corrections statistical program. They are not designed to furnish an overview of the workings of our entire criminal justice system, nor are they able to give the complete picture of law enforcement activity. The main goal of the UCR Program is to furnish police administrators with a measure of their activities and operational problems as indicated by the number of reported offenses, arrests, clearances, and the like.

Therefore, much of the criticism of the UCR Program itself is weakened when its stated purpose is kept in mind. Uniform Crime Reports data are the best crime information currently available since they reflect the key events (criminal offenses) that set in motion the various phases of our criminal justice process. The number of arrests, prosecutions, or convictions, while capable of more precise measurement, nevertheless is less indicative of the amount and nature of crime because such data is further removed from the original event. But, because the Uniform Crime Reporting Program is the only recurring crime and arrest reporting program operating on a national level, of necessity it serves as the base for assessing the many significant information gaps at the input end of the criminal justice system.

TYPE DATA COLLECTED. A first step in the control of crime is to ascertain the true dimensions of the problem. However, present statistics as gathered by the UCR Program measure neither the real incidence of crime nor the full amount of economic loss to victims. Information regarding number of offenses and clearances is collected only for the eight Part 1 crimes. (The collection of the number of reported offenses of arson was added to the UCR Program in 1979.) Value and type property stolen and recovered data is requested only for property stolen in Part 1 offenses. For the Part 2 offenses (except non-aggravated assault), the only information submitted is the number of arrests for these crimes according to the age, sex, and race of the subject. Consequently, there is no record of the actual number of these offenses occurring, nor is there a calculation made for property loss except in the arson offense classification.

Moreover, the broad categorization of this data does not allow an examination of the number of offenses reported nor the arrests made for such offenses as spouse abuse, the writing of worthless checks, and kidnapping. The number of these particular offenses or arrests, as well as others, are included in such general categories as Assault, Fraud, and All Other Offenses.

Although some victimization data is collected in the offense categories of Homicide and Rape, there is no record of the victims of robbery, assault, burglary, and the rest of the UCR Part 1 and 2 offenses.

DEGREE OF SERIOUSNESS. The Crime Index does not explicitly take into account the varying degrees of seriousness of its eight components. Each crime receives the same weight as it is added to the Index. Consequently, an auto theft is counted the same as a murder, and an aggravated assault is weighted equally with an attempted burglary. Any review of crime must consider the volume rate, and trend of each offense that comprises the Index and the relationship between these eight crimes.

UCR CLASSIFICATION AND SCORING PROCEDURES. The North Carolina and national Uniform Crime Reporting Programs are designed to measure offenses committed and persons arrested, and difficulty can arise if this distinction is not kept firmly in mind. Crimes relate to events, but arrests relate to persons. The classifying and scoring of one robbery, for instance, could involve several offenders, several victims, and even the commission of other offenses which would go unreported for UCR purposes (See Scoring of Offenses in this Section).

Even more of the total crime picture is lost when arrests are scored. UCR counts only the number of people arrested and not the number of charges per person. Clearly, one arrest could involve any number of different or similar charges against one offender.

VALUE OF PROPERTY STOLEN AND RECOVERED. Undoubtedly, the data received on the value of property stolen and recovered must be viewed with a certain amount of skepticism. The UCR methods of valuing stolen property involve the acceptance of the victim's evaluation in most instances, and exaggeration of these figures is quite possible. Furthermore, UCR uses the market value at the time of recovery and oftentimes this is less than at the time the property was stolen. The percentage of property recovered should be viewed with these facts in mind. What effect the recent soaring rates of inflation may be having on this data along with other factors is impossible to calculate making this data an estimate at best.

JUVENILE CRIME DATA. Juvenile crime and arrest statistics are also open to question. Many juvenile offenders are handled informally and, as a consequence, inaccurate or incomplete recording of the event or action may result. Procedures for handling juveniles vary between departments much more so than in the case of adult offenders. Furthermore, the degree of juvenile involvement in solved offenses is probably seriously misunderstood because juvenile participation in clearances is recorded only when juveniles are exclusively involved. When both adults and juveniles are subjects in a clearance, the juvenile participation is not reported.

REPORTING VARIATIONS. North Carolina now receives Uniform Crime Reports from over 400 law enforcement agencies monthly. Because the number of reporting agencies is so large, one must be aware that unintentional variations from UCR guidelines may occur that would affect the validity of the data presented here. Municipal ordinances, local criminal justice administrative policies, efficiency and thoroughness of record keeping, and Uniform Crime Reporting proficiency and practices all affect the amount of crime and arrests reported. Furthermore, socio-economic conditions and the characteristics and attitudes of the local population influence the magnitude and nature of criminal behavior in a community.

CONCLUSION. The preceding comments should not be viewed as an indictment of the Uniform Crime Reporting Program which, admittedly, is designed for the operational requirements of law enforcement agencies. While current methods of gathering and reporting crime and arrest data provide a less than complete picture of criminality in our society, there is at present no other information system in general use that will more adequately perform this task. Many of the same criticisms may be equally applied to existing court and penal statistical information systems. For, in actuality, consistent data is not available with which to accurately assess the operation and problems of our criminal justice system. Deficiencies in information are apparent: the passage of time cannot be accounted for, and hence the degree of economy and swift justice cannot be measured; the true degree of recidivism, or recurring criminal behavior, cannot be measured. Lacking data concerning dispositions at various levels of the criminal justice system or the number of subjects passed through succeeding legal statutes, the efficiency of the process cannot be realistically evaluated. However, these information gaps will never be surmounted if we continue to view our "police", "judicial", and "correctional" statistical information systems as independent from each other. What is required is a "criminal justice" information system, with the offender passing through the criminal justice process being the unit about which all data is gathered.

CLASSIFICATION OF OFFENSES

UCR divides offenses into two major classifications which are designated Part 1 and Part 2 offenses. This distinction is important to keep in mind because different information is collected for each. Part 1 offenses include 1) Violent Crimes: murder and non-negligent manslaughter, negligent manslaughter, forcible rape, robbery and aggravated assault; and 2) Non-Violent (Property) Crimes: burglary, larceny-theft, motor vehicle theft and arson. All other offenses are classified as Part 2 (see Offense Definitions in this section).

The Part 1 offenses, excluding negligent manslaughter and temporarily arson, are used to calculate the Crime Index and Crime Rate (see The Index of Crime in the next section and Crime Rates in this one).

All offenses are classified on the basis of law enforcement officer investigation in accordance with UCR offense definitions (which will not necessarily coincide with N.C. statute definitions). Because UCR identifies a police problem, offense classifications are not based on the findings of a court, coroner, jury or decision of a prosecutor.

SCORING OF OFFENSES

Only the number of those offenses for Part 1 crimes and simple assault are scored (counted) for UCR. The method of scoring varies with the type of crime committed and it is important to remember that the number of offenders does not determine the number of offenses.

For murder and non-negligent manslaughter, negligent manslaughter, rape, and aggravated and simple assault, one offense is scored for each victim, regardless of the number of offenders involved. For example, three offenders could be involved in the murder of one victim, and in this case one murder would be scored.

For robbery and larceny, one offense is counted for each distinct operation which is separate in time and place. The number of victims in any one operation does not determine the number of offenses. For example, if 10 people are robbed in a bar at the same time, only one offense is counted. However, if that robber then leaves the bar and holds up a passerby, a second offense has occurred and would be scored.

For burglary, one offense is counted for each "structure" which is illegally entered. For UCR purposes, a "structure" is generally defined as an enclosed, permanently occupied area. The illegal entries for the purpose of committing a felony or theft of such structures as dwelling houses, garages, offices, barns, and the like are considered burglaries, and one burglary is scored for each separate unit entered. The illegal entry of those structures used to house transients such as hotel rooms is scored as one burglary regardless of the number of these rooms that have been entered.

For motor vehicle theft, one offense is counted for each vehicle stolen. For UCR purposes, a motor vehicle is defined as any self-propelled vehicle that runs on the surface and not on rails or a body of water. Thefts of farm and construction equipment are excluded from this definition and are scored as larcenies.

For arson, one offense is counted for each occurrence even if a more serious offense such as murder occurred as a result of the act.

Additionally any attempts to commit any of the above are also counted with the exception of attempts or assaults to kill which are classified and scored under aggravated assaults.

For multiple offenses that occur in one crime incident (at the same "time and place"), only the most serious offense is counted with the exceptions of arson (always counted) and a combination of larceny and motor vehicle theft (only the motor vehicle theft will be counted). Part 1 crimes are ranked according to seriousness and appear in order from most serious to least serious (See order of crimes in Offense Definitions in this section). For example a robber may seize a man's wallet and then beat him causing serious injury. Both a robbery and an aggravated assault have occurred, but because robbery is considered by UCR to be more serious, only the robbery is scored. From one perspective, this method of counting seriously understates the crime problem, but from another, it prevents undue inflation of crime statistics. A Part 2 offense that occurs in combination with Part 1 offenses or by itself is not counted.

CLEARANCES

An offense is considered cleared (solved) when at least one offender is arrested for a crime, even though several may have been involved. Offenses may also be cleared by exceptional means when the offender: commits suicide; makes a dying declaration; confesses while in custody or serving time for another crime; is prosecuted in another jurisdiction for the same offense; is a juvenile who is handled by notifying the parents; or when the victim refuses to prosecute or another jurisdiction refuses to extradite.

Clearances are counted as either "adult" or "juvenile". A "juvenile" clearance is counted only when juveniles are involved exclusively in the commission and clearance of an offense. If the arrest of both adults and juveniles results in a clearance, it is counted as an "adult" clearance.

When examining clearance data keep in mind that not all crimes are cleared within the calendar year in which the offense occurs. Also note that the recovery of property stolen with regard to a specific offense does not by itself constitute a clearance for UCR purposes.

PROPERTY STOLEN AND RECOVERED

The figures for value of property stolen and recovered report the value at each point in time. Although property can increase in value over time, it is more likely that stolen property will be recovered in a damaged condition. Therefore recovery value does not necessarily represent a "clearance rate" for stolen property, and one cannot use it to determine law enforcement effectiveness in recovering stolen goods. Because stolen and recovered property figures indicate thefts and recoveries in the current year, it is important to note that recovered property may have been stolen in a previous year. In addition, the type and value of stolen or recovered property is reported only for Part 1 offenses and does not include property losses suffered as a result of the commission of any Part 2 offenses such as fraud or embezzlement.

As was stated in the part on UCR LIMITATIONS, these values are affected by many variables and must be considered estimates at best. It is sometimes difficult to trace the recovery of some stolen property back to the offense or even the departmental jurisdiction in which the theft occurred. This coupled with the fact that the market value at the time of recovery is used instead of at the time of the theft should prompt cautious analysis of this data.

ARRESTS

Arrest information is collected for all Part 1 and Part 2 offenses according to the age, sex and race of the offender. It is not possible, however, to correlate race with sex or specific ages because the information is collected independently, thus limiting analysis. Furthermore, arrest figures cannot be directly related to the number of crimes cleared because arrest totals count all the offenders who have been arrested even if several were involved in the commission of a singular offense. Therefore, arrest and clearance totals will be equal only by coincidence.

It should be kept in mind that arrest totals are not indicative of the number of different people involved in the commission of crime. A total of three arrests may represent the arrest of three different people or the arrest of the same person on three different occasions. Moreover, arrest totals also do not indicate the number of charges placed against an individual at the time of arrest.

*CRIME RATES

The Crime Rate is based on the Crime Index, but adjusts the Index for variances in population by indicating the number of Index offenses for each 100,000 persons. This means that comparisons may be made among several areas with different populations, or within one area with different populations over a period of time, without the information being biased by population differences. For most general comparisons, the Crime Rate is probably the most accurate figure to use.**

Obviously, one of the most important variables involved in calculating a crime rate is the total population figure. Assessing the population coverage of any law enforcement jurisdiction nine years past a general statewide census is no easy task. It is further complicated when city/county estimates are received that include areas not within a particular jurisdiction. For instance, a population estimate received from the N.C. Department of Administration for the city of Chapel Hill would include those residents who live on the campus of the University of North Carolina located in that city. Since, in this case, the Chapel Hill Police Department does not include in their crime reporting any offenses that occur on this campus, the entire campus resident population has been subtracted from the population estimate received from the Department of Administration. Similarly, population adjustments for other non-jurisdictional areas such as military bases have been made statewide when necessary.

The amount and rate of crime for a particular community can sometimes be quite deceiving unless several factors are taken into consideration. Set forth next are some of the conditions which will, by type and volume, affect the crime that occurs from place to place:

*The actual method used to calculate the Crime Rate along with other pertinent information can be found in Section 3.

**Crime in Ohio, 1977; Ohio BCI

1. Density and size of the community population and metropolitan areas of which it is a part.
2. Composition of the population with reference particularly to age, sex, and race.
3. Economic status and mores of the population.
4. Relative stability of population including commuters, seasonal, and other transient types.
5. Climate, including seasonal weather conditions.
6. Educational, recreational, and religious characteristics.
7. EFFECTIVE STRENGTH OF THE POLICE FORCE.
8. STANDARDS GOVERNING APPOINTMENT TO THE POLICE FORCE.
9. POLICIES OF THE PROSECUTING OFFICIALS AND THE COURTS.
10. ATTITUDE OF THE PUBLIC TOWARDS LAW AND ENFORCEMENT PROBLEMS.
11. THE ADMINISTRATIVE AND INVESTIGATIVE EFFICIENCY OF THE LOCAL LAW ENFORCEMENT AGENCY INCLUDING THE DEGREE OF ADHERENCE TO CRIME STANDARDS.

In several instances the Police Information Network has refrained from calculating a crime rate for a particular area. Where the crime rate should appear an "N.A." (Not Applicable) may have been placed instead. Crime rates have not been calculated for any jurisdiction in which the presiding law enforcement agency submitted less than 12 months' reports to PIN. Seasonal variations in crime occur to the extent that estimates or projections for a full year would in some cases cause for unfair or invalid comparisons. In some instances, 12 months' reports have been received, but the reporting procedures followed by that particular agency have been established as in such variance with standard UCR classification and scoring procedures as to render their data invalid for crime rate calculation purposes. For these reasons, the crime rates for several communities and even counties in some instances have been omitted from various maps and tables throughout this publication.

OFFENSE DEFINITIONS

PART 1 OFFENSES

CRIMINAL HOMICIDE:

a. Murder and Non-negligent Manslaughter:

The willful, non-negligent killing of one person by another. Excludes attempts or assaults to kill (classified as aggravated assault), suicide, and accidental deaths. The killing of a felon by a private citizen or the killing of a felon by a police officer in the line of duty are considered justifiable homicides by UCR and are excluded from this count.

b. Negligent Manslaughter:

The killing of another person through gross negligence. Traffic fatalities are not counted.

RAPE:

The carnal knowledge of a female through the use of force or the threat of force. Assaults to commit forcible rape are also included; however, statutory rape (without force) is not counted in this category.

ROBBERY:

The taking or attempting to take anything of value from the care, custody, or control of a person by force or threat of force and/or by putting the victim in fear.

AGGRAVATED ASSAULT:

The unlawful attack by one person upon another for the purpose of inflicting severe bodily injury usually accompanied by the use of a weapon or other means likely to produce death or serious bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed. Attacks using personal weapons (part of the attacker's body) must result in serious personal injury to be classified as aggravated assault. Simple assaults are excluded from this count.

BURGLARY:

The unlawful entry of a "structure" to commit a felony or theft. The use of force to gain entry is not required to classify the crime as burglary. Burglary is broken down into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

A "structure" is considered to include the following, but not limited to: dwelling houses, apartments, out buildings, public buildings, offices, factories, barns, cabins, etc.

LARCENY:

The unlawful taking or stealing of property or articles without the use of force, violence, or fraud. This includes crimes such as shoplifting, purse snatching, pocket picking, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc. This crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is excluded from this category inasmuch as it is separate Part 1 offense.

MOTOR VEHICLE THEFT:

The unlawful taking or stealing of a motor vehicle, including attempts. This definition excludes taking for temporary use by those persons having lawful access to the vehicle.

UCR defines a motor vehicle as a self-propelled vehicle that runs on the ground and not on rails. Examples include automobiles, trucks, buses, motorcycles, mopeds, snowmobiles, etc. Thefts of farm and/or construction equipment, boats, and airplanes are not included in this category but are counted as larcenies.

ARSON:

The willful or malicious burning of property with or without the intent to defraud. Includes attempts.

PART 2 OFFENSES

OTHER (SIMPLE) ASSAULTS:

An unlawful attack or attempted attack upon another which does not result in serious injury to the victim and which does not involve the use of a dangerous weapon.

FORGERY AND COUNTERFEITING:

The making, altering, using or possession, with intent to defraud, of anything false which is made to appear true. Includes attempts.

FRAUD:

Fraudulent conversion and obtaining money or property by false pretenses. Includes bad checks, confidence games, illegal conversion of services, etc., except forgeries and counterfeiting.

EMBEZZLEMENT:

Misappropriation or misapplication of money or property entrusted to one's care, custody, or control. Includes larceny from employer.

STOLEN PROPERTY:

The buying, receiving, and possessing of stolen property, or the attempt to do so.

VANDALISM:

The willful or malicious destruction, injury, disfigurement or defacement of real or personal property without the consent of the owner or person having custody or control. Includes attempts.

WEAPONS:

All violations or regulations or statutes that control carrying, using, possessing, furnishing, and manufacturing deadly weapons or silencers. Includes attempts.

PROSTITUTION AND COMMERCIALIZED VICE:

Sex offenses and attempted sex offenses of a commercialized nature. Includes prostitution, keeping houses of ill fame, pandering, detaining women for immoral purposes, etc.

ALL OTHER SEX OFFENSES:

All other offenses against common decency and morals. Includes statutory rape (without force) and all other sex offenses not previously defined.

DRUG LAWS:

The unlawful possession, sale, use, growth or manufacture of controlled substances. For UCR purposes these offenses are broken down into four subcategories: a. Opium or cocaine and their derivatives (morphine, heroin, codeine), b. Marijuana. c. Synthetic narcotics — manufactured narcotics which can cause true drug addition, d. Dangerous non-narcotic drugs.

GAMBLING:

Promoting, permitting or engaging in illegal gambling. Includes bookmaking, numbers and lottery, etc.

OFFENSES AGAINST THE FAMILY OR CHILDREN:

All charges of nonsupport and neglect or abuse of family or children. Note: Most child abuse, especially that resulting in injury, has been classified as either simple or aggravated assault.

DRIVING UNDER THE INFLUENCE:

Operating any motor vehicle or common carrier while under the influence of liquor or drugs.

LIQUOR LAWS:

Violation of state or local regulatory laws. Includes sale to minors and drinking on a public conveyance. This category excludes Driving Under the Influence and Drunk and Disorderly violations.

DISORDERLY CONDUCT:

Breaching the peace or attempting to do so. Includes violations of disturbing the peace, unlawful assembly, and drunk and disorderly.

VAGRANCY:

Violation of state or local statutes pertaining to being a "suspicious character or person", vagrancy, etc.

ALL OTHER OFFENSES:

All violations of state or local regulatory laws except traffic offenses and offenses defined above or below. Includes kidnapping, extortion, trespass, etc.

CURFEW AND LOITERING LAWS:

Juvenile violations of local curfew and loitering ordinances.

RUNAWAY-(JUVENILES):

The unlawful truancy from a legal place of residence by a juvenile.

SECTION THREE

N.C. CRIME INDEX DATA

STATEWIDE CRIME SUMMARY 1979

- **INDEX OFFENSES.** A total of 240,970 index crimes were reported to law enforcement in North Carolina during 1979, a 12.42% increase over 1978.
- **CRIME RATE.** There were 4,410 victims for every 100,000 permanent inhabitants of the state, an increase of nearly 10.5% over 1978.
- **VIOLENT CRIMES.** A total of 24,608 violent crimes were reported statewide, an increase of 8.14% over 1978.
- **NON-VIOLENT (PROPERTY) CRIMES.** A total of 216,362 non-violent crimes were reported, an increase of 12.93% over 1978.
- **MURDER.** A total of 587 murders were reported reflecting a 1.18% decrease from 1978.
- **RAPE.** A total of 1,122 rapes were reported, an increase of 11.53% over 1978.
- **ROBBERY.** A total of 4,277 robberies were reported for an increase of 17.31% in 1979, the largest single percentage increase for any index offense.
- **AGGRAVATED ASSAULT.** A total of 18,622 aggravated assaults were reported, an increase of 6.35% over 1978.
- **BURGLARY.** A total of 71,562 burglaries were reported, an increase of 9.95% over 1978.
- **LARCENY.** A total of 132,448 larcenies were reported, an increase of 14.78% over 1978. Over 50% of the total number of index offenses were in this category.
- **MOTOR VEHICLE THEFT.** A total of 12,352 motor vehicle thefts were reported, an increase of 11.20% over 1978.
- **ARSON.** A total of 1,426 arsons were reported during an average statewide reporting period of ten months for this crime during 1979.
- **CLEARANCE RATE.** A total of 61,799 index offenses (25.65% of all reported index crimes) were cleared by arrest or exceptional means in 1979.

THE INDEX OF CRIME

The crime index offense table can be used to indicate the probable extent, fluctuation, and distribution of crime for the State of North Carolina as a whole, geographic divisions, individual counties, individual cities and towns, and standard metropolitan statistical areas. The measure used is a Crime Index consisting of seven important offenses which are counted as they become known to the law enforcement agencies. Crime classifications used in the Index are: Murder and non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary—breaking and entering, larceny and motor vehicle theft. (The offense of arson will be added in the future.)

The total number of criminal acts that occur is unknown, but those that are reported to Law Enforcement provide the first means of a count. Not all crimes come readily to the attention of Law Enforcement; not all crimes are of sufficient importance to be significant in an index; and not all important crimes occur with enough regularity to be meaningful in an index. The bullseye below sets forth hypothetical percentages of crime information that are derived from various sources, and, in so doing, highlights the importance of the statistics contained in this volume.

A map of North Carolina showing its 100 counties. The counties are labeled with their names. Shaded counties include Madison, Surry, Robeson, and others.

— A majority of the county population was not covered for the entire year.

NORTH CAROLINA CRIME CLOCK

NORTH CAROLINA CRIME CLOCKS

NORTH CAROLINA CRIME CLOCKS

MURDER

DEFINITION

Murder is defined as the willful (nonnegligent) killing of another. The classification of this offense, as in all of the other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Deaths caused by negligence, suicide, accident, or justifiable homicide are not included in the count for this offense classification. Attempts to murder or assaults to murder are scored as aggravated assaults and not as murder.

FORCIBLE RAPE

DEFINITION

Forcible rape, as defined in the Uniform Crime Reporting Program, is the carnal knowledge of a female through the use of force or the threat of force. Assaults to commit forcible rape are also included; however, statutory rape (without force) is not counted in this category.

In any instance of rape, one offense is counted for each person raped or upon whom an assault to rape or attempt to rape has been made.

FORCIBLE RAPE

Rape By Month: 1978 vs. 1979

FORCIBLE RAPE

During 1979 the Police Information Network collected supplementary information about the offense of rape. During this period there were 818 actual rapes reported as well as an additional 304 attempted rapes. The following statistics have been compiled in an effort to provide criminal justice agencies with more insight into the offense of rape.

ROBBERY

DEFINITION

Robbery is defined as the taking or attempting to take anything of value from the care, custody, or control of a person by force or threat of force and/or by putting the victim in fear. The crime of robbery is a vicious type of theft which takes place in the presence of the victim.

In any instance of robbery, one offense is counted for each distinct operation without regard to the number of persons robbed or the number of persons committing the crime.

TREND

* Present UCR classification and scoring procedures prevent a precise measurement of these classifications and their corresponding values (see Scoring of Offenses in Section 2). Further, the total value stolen often cannot be determined at the time of police investigation. This is especially true with regard to bank robbery (compare the bank robbery statistics in this table with those provided by the FBI on the next page).

PERCENT DISTRIBUTION

BANK CRIME STATISTICS

During 1979 North Carolina was the victim of one hundred and fifteen (115) bank robberies, an increase of nearly 140 percent over 1978. Over 1.5 million dollars was stolen as a result of these robberies of which only 21 percent (\$319,411.32) was initially recovered.

AGGRAVATED ASSAULT

DEFINITION

Aggravated assault is defined as the unlawful attack by one person upon another for the purpose of inflicting severe bodily injury usually accompanied by the use of a weapon or other means likely to produce death or serious bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

BURGLARY

DEFINITION

Burglary is defined as the unlawful entry of a "structure" to commit a felony or theft. The use of force to gain entry is not required to classify the crime as burglary in the Uniform Crime Reporting Program. The offense of burglary is broken down into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

A "structure" is considered to include the following, but not limited to: dwelling house, apartment, out buildings, public buildings, offices, factories, etc.

LARCENY

DEFINITION

Larceny-theft is defined as the unlawful taking or stealing of property or articles without the use of force, violence, or fraud. It includes crime such as shoplifting, purse-snatching, pocket-picking; thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc. This crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft, of course, is excluded from this category inasmuch as it is a separate Crime Index offense.

MOTOR VEHICLE THEFT

DEFINITION

Motor vehicle theft is defined as the unlawful taking or stealing of a motor vehicle, including attempts. This definition excludes taking for temporary use by those persons having lawful access to the vehicle.

The Uniform Crime Reporting Program defines a motor vehicle as a self-propelled vehicle that runs on the ground and not on rails. Examples include automobiles, trucks, buses, motor-cycles, mopeds, snowmobiles, etc. Thefts of farm and/or construction equipment, boats, and air-planes are not included in this category but are counted as larceny-thefts.

ARSON

INTRODUCTION

The U.S. Congress passed legislation in October of 1978 requiring the F.B.I. to collect data concerning the offense of arson as a Part 1 Crime Index Offense in the Uniform Crime Reporting Program. Since that date extensive research was conducted by members of the F.B.I.'s UCR Program staff regarding the offense of arson, and liaison was effected with members of the law enforcement, fire services, and insurance communities in an effort to design a method of collection which would result in the most meaningful data.

Since the collection of arson data was not actually begun in this state until April of 1979, not all contributing agencies were able to submit this information for the entire year. The arson statistics published in this report are incomplete representing only a statewide average reporting period of ten (10) months. Until this data has been successfully collected for two consecutive years, it will not be included as part of the total statewide crime index nor as a factor in any crime rate calculations by N.C. PIN.

DEFINITION

Arson is defined by the UCR Program to include any willful or malicious burning or attempts to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

TREND

Year	No. of offenses	Rate per 100,000	% Cleared

NORTH CAROLINA CONTRIBUTING AGENCY PROFILE

NORTH CAROLINA CONTRIBUTING AGENCY PROFILE

The following tables contain statistical data contributed by N.C. law enforcement agencies for the years 1978 and 1979. Each county and the agencies within the county are listed alphabetically (Sheriff or Rural P.D. listed first). All data is final as of March 15, 1980. Please note that some 1978 data has been updated since the last annual release reflecting the addition of reports received after the 1978 publication deadline. Those statistics which have changed are so marked by a plus (+) or minus (-) sign to the upper right hand of the figure designating whether it has increased or decreased from that previously published.

CRIME INDEX

The CRIME INDEX TOTAL column reflects the addition of the seven index offenses which appear under the VIOLENT and NONVIOLENT (PROPERTY) CRIME headings. The number of reported arsons will remain excluded from this count until PIN has received at least two consecutive years of complete reporting on this offense for comparative purposes. The county arson totals published (*) are incomplete generally indicating only the number of offenses reported since March 1, 1979. Additionally, each county index total includes any offenses reported by the Highway Patrol, SBI, and Wildlife. The total number of offenses reported by these three agencies is listed separately at the end of the tables.

CRIME RATE

The crime rates per 100,000 population have been determined by dividing 100,000 by the estimated population and multiplying this factor by the total number of offenses reported in each instance. For example:

	Year	Total Index	Estimated Population
Agency A	1979	2,000	30,000

$$100,000 \div 30,000 = 3.3333$$

$$3.333 \times 2,000 = 6,666.6$$

Rounded to the nearest whole number the rate per 100,000 for the total index would equal 6,667.

PERCENT CHANGE

Space did not allow for the calculation of percent changes from year to year, but this change may be obtained simply by subtracting the smaller number from the larger number and dividing the difference by the 1978 figure. Multiply by 100 to change to % and determine the sign (plus or minus) by whether the number increased or decreased in 1979. For example:

	Year	Total Index
Agency A	1978	1,500
	1979	2,000

$$2,000 - 1,500 = 500$$

$$500 \div 1,500 = .333 \text{ (x 100) } = 33.3\%$$

Since the number of reported offenses increased in 1979 the % change would equal +33 (rounded to the nearest whole number).

MOS. ON FILE

The Mos. on File column indicates the number of months reported for each year on file at PIN. (Please note that this number does not necessarily indicate the total number of months PIN received arson data in each instance. Arson data was collected separate from the main body of UCR in 1979.) The History of Contributor Participation section in this publication charts the exact months by agency for which PIN is missing UCR data.

DEMOGRAPHIC DATA

All population estimates have been provided by the N.C. Department of Administration and represent the yearly average permanent resident population including areas annexed through July of that year. The population of non-jurisdictional areas such as military installations and some universities have been subtracted from these estimates when necessary. The fact that these estimates do not take into account seasonal population fluctuations affects the crime rates of most resort localities and should prompt cautious analysis of the data in these particular areas.

The crime statistics reported by an individual agency indicate what is happening in one particular area, but to make valid comparisons among a number of jurisdictions, communities need to be grouped together. It may be important to know how a city compares with cities of similar size, or how patterns of crime differ in various types of communities. For these reasons PIN has assigned a character designation to each jurisdiction according to those factors which go into defining an area as either urban or rural. A somewhat simplified concept of the Standard Metropolitan Statistical Area (SMSA) has been used for these differentiations and is outlined as follows:

COMMUNITY TYPE (CHARACTER)

- Core City: Any city with a population of 50,000 or more that is within a SMSA.
- Suburban City: Any city that is within a SMSA exclusive of the core cities.
- Suburban County: Any county that is within a SMSA.
- Rural Center: Any city with a population of 10,000 or more that is not within a SMSA.
- Rural City: Any city under 10,000 population and not within a SMSA.
- Rural County: Any county that is not within a SMSA.
- Campus: Any state university campus notwithstanding suburban or rural designation.

Obviously, these categories could be broken down further into even more specific community types employing a wide variety of other data such as population density, projected growth, etc., but the designations outlined above will satisfactorily serve the purposes for which the statistical data have been intended.

EMPLOYEE DATA

The Police Employee data provided lists the number of those full-time sworn and civilian people employed at each agency as of Oct. 31 of the year indicated. The number of part-time employees is not listed but is available upon request.

DESIGNATIONS

Variations in agency reporting have caused for special designations to be used in place of statistical data in some instances. The following legend translates these designations:

NA—Crime rates for agencies which submitted less than 12 months' reports and county total rates in which less than 50% of the population was covered for the entire year were not calculated.

C—Indicates this area was covered by another agency for UCR purposes for all or a majority of the year.

DNP—Did not participate in the UCR Program.

(Pop.)—The population estimate for this jurisdiction was not included in the county total because of non-UCR participation.

NOTE: All UCR data provided is actual. Estimates to 100% statewide and/or county population coverage for an entire year have not been used.

SECTION FOUR

N.C. PROPERTY CRIME DATA

STATE OF NORTH CAROLINA
1979, VALUE OF PROPERTY STOLEN AND RECOVERED
BY MONTH

The table below indicates by month the value of property reported stolen and recovered during 1979. The total value of property reported stolen in North Carolina in 1979 was \$99,638,947.

Although law enforcement agencies recovered approximately 35 percent of the property stolen, the net loss was still in excess of \$34 million dollars.

The reader should note that these values relate only to index crime. Property lost or damaged as a result of crimes such as fraud, embezzlement, vandalism, etc. are not included in these totals.

VALUE OF PROPERTY STOLEN AND RECOVERED

Month	Stolen	Recovered	Percent
January	\$ 7,872,360	\$ 2,290,231	29.09
February	\$ 6,934,381	\$ 2,499,370	36.04
March	\$ 7,573,246	\$ 2,557,605	33.77
April	\$ 7,070,380	\$ 2,670,523	37.77
May	\$ 8,161,597	\$ 2,641,481	32.36
June	\$ 7,319,032	\$ 2,764,763	37.77
July	\$ 8,859,001	\$ 2,789,697	31.49
August	\$ 9,528,014	\$ 4,042,215	42.42
September	\$ 8,860,738	\$ 3,263,854	36.84
October	\$ 9,265,600	\$ 3,161,951	34.13
November	\$ 9,282,464	\$ 2,948,303	31.76
December	\$ 8,912,134	\$ 2,917,316	32.73
Monthly Average	\$ 8,303,246	\$ 2,878,942	

For classifying and scoring purposes the seven Crime Index Offenses are grouped into two categories—crimes against persons and crimes against property. Crimes against persons include murder, rape, and aggravated assault. Crimes against property include robbery, burglary, larceny and motor vehicle theft. Supplemental data relating to these property crimes is collected and analyzed on a monthly basis. The resulting figures provide information concerning the value of property stolen and recovered, the various types of property stolen and the value of property stolen by offense category.

NORTH CAROLINA ARREST DATA

The following pages reflect the number of arrests made by county for 1978 and 1979. Note that State Highway Patrol arrest data was not available on a countywide basis during 1978, and therefore the 49,668 arrests they made that year (most of which were in the DUI category) could not be included in the 1978 county totals that follow this page.

Statewide

Offense Category	1978 Total Arrest	1979 Total Arrest	Percent Change

DRUG ARREST

IN

NORTH CAROLINA

NARCOTICS PRICE INDEX

The table below reflects the current market value of some of North Carolina's most used controlled substances. These prices may vary from area to area due largely to the basic law of "Supply and Demand". The table below was furnished by the North Carolina State Bureau of Investigation.

Drug Name	Price Per Unit
Marijuana	\$20.00 per oz., \$320.00 per lb.
Hash	\$ 7.00 per gram, \$100.00 per oz.
Heroin	\$20.00 per bag (100 mg), \$150.00 per gram
Cocaine	\$90.00 per gram
Morphine	\$15.00 per d.u.*
LSD	\$ 3.00 per d.u.*
Preludin	\$15.00 per d.u.*
Dilaudid	\$35.00 per d.u.*
PCP	\$ 5.00 per d.u.* (100 mg), \$1800.00 per oz.
Valium	\$ 1.25 per d.u.*
MDA	\$10.00 per d.u.* (100 mg), \$35.00 per gram
Prescribed Amphetamines	\$ 2.00 per d.u.*
Clandestine Amphetamines	\$50.00 per gram, \$1300.00 per oz.
Barbituates	\$ 1.50 per d.u.*

*d.u.—dosage unit: this measurement is the common measure of the particular drug such as one capsule, or one tablet.

NARCOTICS ARREST*

Category	Male	Female	Total
Opium Cocaine etc.—Sales	396	58	454
Marijuana—Sales	1,790	309	2,099
Synthetic Narcotic—Sales	234	41	275
Other Dangerous Drugs—Sales	140	15	155
SALES—TOTAL	2,560	423	2,983
Opium Cocaine—Possession	401	83	484
Marijuana—Possession	9,143	1,158	10,301
Synthetic Narcotic—Possession	367	70	437

POSSESSION—TOTAL	10,432	1,400	11,832
GRAND TOTAL	12,992	1,823	14,815

* Although this arrest breakdown is correct insofar as it reflects the statewide narcotics data as it was received by PIN, please note that the internal records keeping practices of several N.C. law enforcement agencies prevent the reporting of drug arrests strictly under the category of "sales." In these instances the departments have reported all their arrests (manufacture, sale, etc.) in the subcategory of "possession" thereby slightly inflating this sub-categorization total statewide.

CRIME INDEX OFFENSES AND RATES PER 100,000 POPULATION 1978 vs. 1979

The information below reflects the number of index offenses reported, percent change, and rate per 100,000 for 1978 and 1979.

Index of Offenses	1978	1979	% Change	1978 Rate*	1979 Rate*
Murder	594	587	- 1.18	11.06	10.74
Rape	1,006	1,122	+11.53	18.73	20.53
Robbery	3,646	4,277	+17.31	67.89	78.27
Aggravated Assault	17,510	18,622	+ 6.35	326.03	340.78
Burglary	65,088	71,562	+ 9.95	1,211.94	1,309.58
Larceny	115,397	132,448	+14.78	2,148.69	2,423.80
MV Theft	11,108	12,352	+11.20	206.83	226.04
Violent	22,756	24,608	+ 8.14	423.26	450.33
Property	191,593	216,362	+12.93	3,563.63	3,959.42
Total	214,349	240,970	+12.42	3,986.89	4,409.75

*The populations used for the crime rate calculations were 5,369,427 (1978) and 5,462,084 (1979), estimates provided by the N.C. Dept. of Administration. These estimates reflect the population coverage of the participating agencies rather than of the entire state for each year.

VALUE OF PROPERTY STOLEN AND RECOVERED — 1978 vs. 1979

The information below reflects the amount of property stolen and recovered during 1978 and 1979 as well as the value stolen for each offense category.

	1978	1979
Value of Property Stolen	\$77,191,332	\$99,638,947
Value of Property Recovered	\$27,067,295	\$34,547,309
Net Loss	\$50,124,037	\$65,091,638
Percent Recovered	\$ 35.07	\$ 34.67
Average Stolen Monthly	\$ 6,432,611	\$ 8,303,246
Average Recovered Monthly	\$ 2,255,608	\$ 2,878,942
Value Stolen by Offense		
Murder	\$ 7,020	\$ 5,468
Rape	\$ 7,724	\$ 14,128
Robbery	\$ 1,426,886	\$ 2,912,404
Aggravated Assault	\$ *	\$ *
Burglary	\$25,326,554	\$33,071,647
Larceny	\$22,811,061	\$29,507,101
Motor Vehicle Theft	\$27,612,155	\$34,128,189

*Not Applicable

Total dollar amounts will not equal due to rounding.

1979 Distribution and Clearance Rates For Index Offenses

The percentage of crimes cleared by arrest is obtainable by dividing the number of offenses cleared by the number of offenses known and multiplying the resultant by 100 as:

$$\frac{50 \text{ (robberies cleared)}}{153 \text{ (robberies known)}} \times 100 = 32.67 \text{ percent cleared.}$$

153 (robberies known)

The table below sets forth the percentage of each index crime cleared by arrest or exceptional means in 1979.

OFFENSE	NO. OF OFFENSES	PERCENT DISTRIBUTION	NUMBER CLEARED	PERCENT CLEARED
Murder	587	.24	526	89.61
Rape	1,122	.47	723	64.44
Robbery	4,277	1.77	1,632	38.16
Agg. Assault	18,622	7.73	14,264	76.60
Burglary	71,562	29.70	14,238	19.90
Larceny	132,448	54.96	26,349	19.89

PERCENT OF INDEX OFFENSES CLEARED

CLEARANCE ANALYSIS BY AGE CATEGORY

The graphs below indicate the percent of those offenses that were cleared by arrest or exceptional means by age category. Juvenile clearances are designated by "Under 18" and include only the percentage of all offenses cleared which involved strictly juvenile offenders.

PROPERTY CRIME

CRIME INDEX PROJECTIONS

The Crime Index projections shown in this section are estimates computed by a Least-Squares Linear Regression Method. The algebraic formula for linear regression ($Y = a + bX$), quite simply put, permits one to determine "Y" (the incidence of crime) from the relative slope of a line "b".

The actual number of reported offenses for each year since 1975 have been used for points on these graphs rather than estimates for 100% population coverage (the difference is negligible). One should assume a range of tolerance around any projected figure, and a rough approximation of this range for the 1980 projection appears in the shaded areas. This approximated range represents the upper and lower crime index limits within which the actual number of reported offenses in 1980 can be expected to fall. Volumes occurring outside the range represent a significant change, and further research is recommended to pinpoint possible influencing crime factors responsible for the directional change.

**NORTH CAROLINA
LAW ENFORCEMENT
OFFICERS
ASSAULTED**

NORTH CAROLINA LAW ENFORCEMENT OFFICERS ASSAULTED

During 1979, 1,943 assaults on sworn officers were reported to the Uniform Crime Reporting Program. This reflected an increase of approximately 13 percent over the 1,718 assaults reported in 1978.

Activity at the Time of the Assault			
OFFICERS KILLED			
Number of Law Enforcement Officers killed in the line of duty			
By Felonious Act		By Accident or Negligence	
1978	1979	1978	1979
1	5	2	2

Activity	Number	% Distribution
1. Responding to "Disturbance" calls (family quarrels, man with gun, etc.)	509	26.20
2. Burglaries in progress or pursuing burglary suspects	37	1.90
3. Robberies in progress or pursuing robbery suspects	19	.98
4. Attempting other arrests	676	34.79
5. Civil disorder (riot, mass disobedience)	26	1.34
6. Handling, transporting, custody of prisoners	201	10.34
7. Investigating suspicious persons or circumstances	106	5.46
8. Ambush—no warning	14	.72
9. Mentally deranged	29	1.49
10. Traffic pursuits and stops	166	8.54
11. All other	160	8.23
12. TOTAL (1-11)	1,943	100.00

Percent distribution may not equal 100% due to rounding.

NORTH CAROLINA LAW ENFORCEMENT OFFICERS ASSAULTED BY MONTH

1978 vs. 1979

TYPE OF ASSIGNMENT

During 1979 68 percent of all assaults on officers occurred while the officer was assigned to a one man vehicle.

Type of Assignment	Number	% Distribution
Two-Man Vehicle	318	16.37
One-Man Vehicle		
Alone	654	33.66
Assisted	675	34.74
Detective		
Alone	28	1.44
Assisted	50	2.57
Other		
Alone	87	4.48
Assisted	131	6.74

OFFICER ASSAULTS BY TIME OF DAY

TIME OF ASSAULT

Approximately one-half of the assaults on officers occurred during the hours from 8 p.m. and 2 a.m. The period with greatest incidence was from 10 p.m. to 12 p.m. (18.37%).

Time Period	Number	% Distribution
12 a.m.- 2 a.m.	316	16.26
2 a.m.- 4 a.m.	166	8.54
4 a.m.- 6 a.m.	49	2.52
6 a.m.- 8 a.m.	42	2.16
8 a.m.-10 a.m.	53	2.73
10 a.m.-12 p.m.	61	3.14
12 p.m.- 2 p.m.	97	4.99
2 p.m.- 4 p.m.	140	7.21
4 p.m.- 6 p.m.	181	9.32
6 p.m.- 8 p.m.	228	11.73
8 p.m.-10 p.m.	253	13.02
10 p.m.-12 p.m.	357	18.37

OFFICER ASSAULTS BY WEAPON

WEAPONS USED

Statewide, personal weapons such as hands, fist, feet, etc., were used in 78.18 percent of the assaults on officers.

WEAPON	NUMBER	% DISTRIBUTION
Firearm	162	8.33
Knife, Cutting Instrument	67	3.45
Other Dangerous Weapon	195	10.04
Hands, Fist, Feet, Etc.	1,519	78.18

INJURIES TO LAW ENFORCEMENT OFFICERS

In 1979 assaults on law enforcement officers resulted in serious injury in 24 incidents out of every 100.

Injury Status	Number	% Distribution
Injuries	474	24.40
No Injuries	1,469	75.60

CLEARANCE IN ASSAULTS ON LAW ENFORCEMENT OFFICERS

Statewide, 96.45 percent of the assaults on officers were cleared by arrest. This reflects a slight increase over the 96.33 percent cleared in 1978.

Number Assaulted	Number Cleared	Percent Cleared
1,943	1,874	96.45%

DEDICATION

This book is dedicated to all law enforcement officers and in particular to those law enforcement officers who were feloniously killed while endeavoring to uphold the laws and serving the citizens of North Carolina in the interest of all mankind. The following men gave their lives to this cause in 1979 on the date specified.

Officer Terry L. Lanier
Jacksonville, P.D.
Jacksonville, N.C.
May 11, 1979

Sgt. Owen Messersmith
Rutherford Co. S.O.
Rutherfordton, N.C.
May 31, 1979

Trooper Robert L. Petersen
N.C. State Highway Patrol
Rutherfordton, N.C.
May 31, 1979

Cpt. Roy Huskey
Rutherford Co. S.O.
Rutherfordton, N.C.
May 31, 1979

Deputy Calvin D. Cherry
Bertie Co. S.O.
Lewiston, N.C.
August 2, 1979
