TABLE OF CONTENTS

i

STATISTICAL CHARTS & GRAPHS

Foreword

The purpose of this publication is to expose the nature and extent of crime in Arizona, to guide the criminal justice system in its efforts to combat crime and to prompt the citizen action that is necessary if we are to control crime in our society. Legislators need statewide information about crime in order to pass laws that will increase the stability of our society.

Arizona citizens are understandably concerned about the possibility of becoming victims of crime.

To provide an effective defense against crime it is vital that every citizen unites with law enforcement authorities. To flourish, crime needs the apathy of the community. If apathy is replaced with hostility to crime, that ability to flourish is greatly reduced.

We hope this publication will help arouse that hostility to crime in the Arizona community.

V. L. Hoy
Director
Acknowledgment

This fourth edition of "Crime in Arizona" is dedicated to the law enforcement agencies and their personnel who participate in the operation of the Arizona Uniform Crime Reporting Program. It is only through their continued cooperation and effort that this publication can be both possible and meaningful.

We would also like to acknowledge the Federal Bureau of Investigation for its advice and support.

v
The Arizona Uniform
Crime Reporting System

1
HISTORY OF UNIFORM CRIME REPORTING

The Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP) was established in 1927 to initiate a national program for collecting crime information. This Committee's responsibility to provide management information to law enforcement agencies was eventually turned over to the Federal Bureau of Investigation (FBI) in 1930, when the FBI received a Congressional mandate to collect and disseminate national crime information. The IACP has continued to serve the Uniform Crime Reporting Program (UCR) in an advisory capacity, and has been joined in this responsibility by the Committee on Crime Records of the National Sheriff's Association (NSA) in 1966.

The Arizona Uniform Crime Reporting (AUCR) Unit first began receiving voluntary crime information from Arizona law enforcement agencies in January 1975. Prior to this date these agencies submitted their crime data directly to the FBI. At the close of calendar year 1978, all 90 eligible law enforcement agencies were contributing crime data to the AUCR unit.

OBJECTIVES OF ARIZONA UCR

Because increasing attention has been focused on the problem of crime in our communities in recent years, many segments of our population need more complete information for a variety of reasons.

Law enforcement professionals, managers and administrators who must focus on crime in their own jurisdictions, also need to know what is occurring in surrounding jurisdictions in order to deploy personnel and equipment most efficiently. Researchers and planners need to know what is actually happening to predict trends and recommend changes.

The goal of *Crime in Arizona* is to identify the nature and extent of criminal activity in this state and present the information needed by each of these groups. This information will not in itself prevent crime, but it may encourage all segments of society, by understanding the problem, to work together with law enforcement agencies to reduce crime through more effective enforcement.

The objectives of *Crime in Arizona* are (1) To identify the nature and extent of crime in our state; (2) To provide the management information needed by the law enforcement community to augment their ability to attack the crime problem; (3) To provide our citizens with the most complete information available; (4) To provide legislators with the information necessary to formulate laws which address the crime problems, and (5) To provide sufficient detailed data for researchers and planners.

CONSIDERATIONS FOR INTERPRETATION

Statistics are a tool used to summarize information so that patterns or trends become clearer. All statistics must be interpreted with an understanding of just what it is that they can say. Too often information of the type in this report is used incorrectly to draw conclusions that the statistics simply do not support. We ask that great care be taken in analysis and interpretation.

The following factors have a major influence on the statistics presented in this report:

1. Crime figures are police statistics as distinguished from the findings of a court, coroner, jury or decision of a prosecutor.

2. Density and size of community population.

3. Variations in composition of the population, particularly age structure.

4. Stability of population with respect to transient factors.

5. Economic conditions, including job availability.

6. Climate.

7. Effective strength of law enforcement agencies; some police jurisdictions overlap.

8. Attitudes of citizenry toward crime.

9. Crime reporting practices of citizenry.

10. Crime rates are based on census-fixed residential populations of police jurisdictions.

11. Crimes committed on Indian reservations are not counted in the AUCR program, although their population is included in the state's population figures.

To obtain accurate information from many different agencies, the national UCR program had to precisely define the methods for collecting such information as the number of offenses, arrests, clearances and value of stolen or recovered property. The methods of collecting and some resulting limitations are explained below.

Classification of Offenses

UCR divides offenses into two major classifications which are designated Part I and Part II offenses. This distinction is important to keep in mind because different information is collected for each.

Part I offenses include:

Violent Crimes

1. Criminal Homicide
2. Forcible Rape
3. Robbery
4. Aggravated Assault

Non-Violent Crimes

5. Burglary
6. Larceny-Theft
7. Motor Vehicle Theft

Note: *These offenses are also referred to as the Index Crimes. These seven offenses are used to calculate the crime index and crime rates.*

Part II offenses include:

8. Other Assaults - simple
9. Arson
10. Forgery and Counterfeiting
11. Fraud
12. Embezzlement
13. Stolen Property: Buying, Receiving, Possessing, Etc.
14. Vandalism
15. Weapons: Carrying, Possessing, Etc.
16. Prostitution
17. Sex Offenses (Except forcible rape and prostitution)
18. Narcotic Drug Laws
19. Gambling
20. Offenses Against Family and Children
21. Driving Under the Influence
22. Liquor Laws
23. Drunkenness (not reported in Arizona)
24. Disorderly Conduct
25. Vagrancy
26. All Other Offenses (except traffic)
27. Suspicion (not reported in Arizona)
28. Curfew and Loitering Law Violations (Juveniles)
29. Runaways (Juveniles)

Note: *Only arrests are counted for Part II offenses.*

All offenses are classified on the basis of law enforcement officer investigation in accordance with UCR offense definitions (which will not necessarily be identical to Criminal Code definitions). Because UCR identifies a police problem, offense classifications are not based on the findings of a court, coroner, jury or decision of a prosecutor.

Counting of Offenses

The number of offenses is counted only for Part I crimes and simple assault. The method of counting varies with the type of crime committed, and it is important to remember that the number of offenders does not determine the number of offenses.

For murder and non-negligent manslaughter, negligent manslaughter, rape, aggravated assault and simple assault, one offense is counted for each victim, regardless of the number of offenders involved.

For robbery and larceny-theft, one offense is counted for each distinct operation which is separate in time and place. The number of victims in any one operation does not determine the number of offenses.

For burglary, one offense is counted for each structure which is illegally entered. However, when the structure is an apartment house, business or office building in which units are leased for a period of time, one offense is counted for each unit burglarized.

For motor vehicle theft, one offense is counted for each vehicle stolen.

Note: *Attempts to commit any of the above are also counted as offenses, except that attempts to kill and assaults to kill are counted as aggravated assaults.*

For multiple offenses that occur in one crime incident, *only the most serious offense is counted.* Part I crimes are ranked according to seriousness and appear in order from most serious to least serious under "Classification of Offenses," above.

Clearances

An offense is considered cleared (solved) when at least one offender is arrested for a crime, even though several may have been involved.

Offenses may also be cleared by exceptional means when the offender: commits suicide; makes a dying declaration; confesses while in custody or serving time for another crime; is prosecuted in another jurisdiction for the same offense; is a juvenile who is handled by notifying the parents; when the victim refuses to prosecute or another jurisdiction refuses to extradite the offender.

Clearances are counted as "adult" and "juvenile." A "juvenile" clearance is counted only when juveniles are *exclusively* involved in the clearance of an offense. If the arrest of both adults and juveniles results in a clearance, it is counted as an "adult" clearance.

Property Stolen and Recovered

The figures for value of property stolen and recovered report the value at each point in time. Although property can increase in value over time, it is more likely that stolen property will be recovered in a damaged condition. Therefore, recovery value does not necessarily represent a "clearance rate" for stolen property, and one cannot use it to determine law enforcement effectiveness in recovering stolen goods. Because stolen and recovered property figures indicate thefts and recoveries in the current year, it is important to note that recovered property may have been stolen in a previous year. In addition, the type and value of stolen or recovered property is reported only for Part I offenses and does not include such Part II offenses as fraud, forgery or embezzlement.

Arrests

Arrest information is collected for all Part I and Part II offenses according to the age, sex and race of the offender. It is not possible, however, to correlate race with sex or specific ages because the information is collected independently, thus limiting analysis. Furthermore, arrest figures cannot be directly related to the number of crimes cleared because arrest totals count all offenders arrested for each offense, and clearance totals count only the offenses for which an arrest(s) or exceptional clearances have occurred.

Reporting Variations and Procedures

Arizona now receives Uniform Crime Reports from all eligible 90 law enforcement agencies. One must be aware that unintentional variations from UCR guidelines may occur that would affect the validity of the data presented in this report. Offense totals vary from the actual number of offenses that occur because UCR statistics are based on crimes that are reported to law enforcement agencies and many crimes are not reported.

Each contributing law enforcement agency is responsible for compiling its own monthly reports. To aid in this endeavor, the Arizona UCR guide manual and the FBI UCR handbook are supplied to all contributors. These manuals outline reporting procedures in detail and are complete with examples and illustrations. Additionally, our Field Representatives provide instruction and clarification as required. Each agency is supplied with twelve sets of monthly report forms which are used by the agencies to submit their reports.

PORTRAIT AND PROFILE OF ARIZONA

Arizona, with 113,909 square miles, is the sixth largest state in the United States. Much of this area is owned by the Federal Government in the form of Indian reservations, National Parks, and National Forests. Arizona is 69% federally owned; 27% of that federal ownership is in the form of Indian reservations. The state owns 13%, leaving 18% to private ownership.

Arizona has two principal metropolitan areas, Phoenix and Tucson (Maricopa and Pima counties). Phoenix, the capitol city, is the financial, commercial, retail, cultural and employment hub in the state, as well as the largest population center with an estimated 696,763 people. Tucson, the largest business, educational and cultural center in southern Arizona, has an estimated population of 309,200 people. More than 43 percent of the people who live in Arizona live in these two cities.

One of the unique characteristics of Arizona is its temperate climate. This factor, along with the economic opportunities and a desire to live in the West, has contributed to the state's dynamic population and economic growth.

The state's population density is 20 persons per square mile, with a total population of 2,354,000. This figure includes the Indians living on the reservations within the state.

Arizona experienced strong economic growth during 1978 with manufacturing, construction, tourism and travel, and agriculture producing the greatest majority of income for Arizonans.

POPULATION GROUPING

The crime statistics reported by an individual agency indicates what is happening in one particular area. AUCR groups jurisdictions on the basis of population size and reports crime rates among these groups. The cities, towns and counties within the state have been divided into seven groups according to population size. The seventh group (ungrouped) is provided for identification of volume and type of crime to account for total offenses. This population grouping factor has some influence on the volume and type of crime presented in this report. For use in interpreting this report, the UCR grouping is listed below:

Group
No.
1   Over 250,000 population. There are two (2) cities that fall within this group.

2   100,001 to 250,000 population. There are four (4) cities and counties that fall within this group.

3   50,001 to 100,000 population. There are two (2) cities that fall within this group.

4   25,001 to 50,000 population. There are nine (9) cities and counties that fall within this group.

5   10,001 to 25,000 population. There are ten (10) cities, towns, or counties that fall within this group.

6   10,000 or less population. There are fifty-five (55) cities, towns, or counties that fall within this group.

7   Ungrouped. There are eight (8) reporting agencies. These are Educational Institutions and the Department of Public Safety, that by definition do not have measurable population. For purposes of this report, they are combined for the crimes by population distribution.

The following is a listing by population group and Justice Planning Region of law enforcement agencies submitting crime data to the Uniform Crime Reporting Unit.

Uniform Crime Reporting

Summary Data

STATE CRIME SUMMARY

OFFENSES

- There were 178,430 Crime Index Offenses reported. Of these offenses, 19 percent were cleared.

- The crime rate for the state of Arizona was established at 75.6 offenses for every 1,000 inhabitants.

- The value of property stolen amounted to $74,536,997. The value of property recovered was $23,574,422 for a recovery rate of 32 percent.

- In 1978, law enforcement agencies reported 220 murders, an increase of 3 percent over 1977.

- Handguns were used in 45 percent of all murder cases reported.

- The number of rapes increased 33 percent from 1977, the largest percentage increase of the seven index crimes.

- Bank robberies increased 73 percent over 1977 and had the largest dollar loss per robbery, $2,440.31.

- Aggravated Assaults accounted for 7,869 Crime Index Offenses. Of these, 31 percent were committed by the use of hands, fists, feet, etc.

- Burglary accounted for a substantial value of property loss amounting to $26,437,953. Residential burglaries accounted for 70 percent of all burglaries reported. Of these, 35 percent were committed during the day.

- Larceny-Theft represented the largest number of our Crime Index Offenses. The 105,594 offenses accounted for 59 percent of the State Crime Index.

- In 1978, 10,917 motor vehicles were stolen with a property value of $27,659,223. There were 8,045 vehicles recovered with a reported value of $18,758,513.

TOTALS	176,345	178,430	+ 1.2%	33,736	33,961	+ 0.7%

ARRESTS

- During 1978, there were 116,339 persons arrested for all Criminal Acts.

- Adults accounted for 79 percent of all Violent Crime arrests.

- Juveniles accounted for 58 percent of all Property Crimes and 30 percent of all arrests made during 1978.

LAW ENFORCEMENT OFFICERS KILLED AND ASSAULTED

- Two Arizona law enforcement officers lost their lives in 1978.

- There were 1,277 Assaults on Police Officers reported and 97 percent were cleared.

Part I Index Crimes
MURDER AND NONNEGLIGENT MANSLAUGHTER

SUMMARY ANALYSIS

Murder in Arizona increased by 3 percent over the number reported in 1977. A total of 220 individuals were murdered in 1978, which represents 2 percent of all reported violent crimes. The largest number of murders reported in one month was 30 in August. The offense of murder represents .1 of one percent of the state crime index.

Because murder is such a serious crime, detailed information is collected concerning victims, offenders, weapons used, and the circumstances in which the offense took place. Handguns were used in the majority of killings, 45 percent of the time. The relationship between the victims and the offenders was undeterminable in 27 percent of the murders. Acquaintance was the next most frequent relationship, 25 percent; and stranger was third, 16 percent. Arguments led to 29 percent of the deaths, and in 28 percent of the cases, police were unable to determine the circumstances. The large number of cases where the circumstances were unknown and the victim/offender relationship was also undeterminable may have contributed to the 14 percent reduction in murder clearances from 1977. Despite this reduction, murder had the highest clearance rate, 70 percent, of the seven Index Crimes.

MURDER COMPARISON BY MONTH

	1975	1976	1977	1978
JAN	17	18	29	11
FEB	17	15	18	13
MAR	15	11	14	17
APR	11	9	20	15

Personal Weapon (Hands, Fist, Feet, etc.)	7	3.2%
All Other Weapons	19	8.6%
RAPE

SUMMARY ANALYSIS

Rapes reported in Arizona increased 33 percent over the number reported in 1977, the largest increase of any of the seven index crimes. A total of 1,039 rapes were reported, which represents 8 percent of all reported violent crimes and .6 of one percent of the state crime index. Forcible rape accounted for 72 percent (751) of all rapes. The largest number of reported forcible rapes for one month was in June with 81, followed by July, 77 and August, 75. The month of August has the largest increase in rapes, 56, from 1977.

Rapes were cleared 44 percent of the time, down 8 percent from 1977. Adults accounted for 40 percent of the clearances and juveniles 4 percent. There were 36 more arrests in 1978 than in 1977. Adults made up 86 percent of the increase and juveniles 14 percent.

ROBBERY

SUMMARY ANALYSIS

During 1978, Arizonans reported 3,835 robberies, an increase of 22 percent (680) over the number of robberies reported during 1977. Robbery represents 30 percent of the violent crimes and 2 percent of the state crime index.

Robberies occurring on highways, that is streets, alleys and sidewalks, were the most frequent type of robbery reported, 1,448 or 38 percent of all robberies, whereas, commercial houses had the highest dollar loss, $541,959. As in 1977, banks had the lowest number of reported robberies, but the largest loss per robbery, $2,440. Bank robberies increased 73 percent over the 37 reported in 1977, the highest increase reported of the different type of robbery locations. The reported value of $1.6 million taken in robberies was up from $1.1 million in 1977.

Strong-arm (hands, fists, feet, etc.) was used in 43 percent of the robberies and firearm was the weapon used 39 percent of the time.

Robberies were cleared in 30 percent of the cases, a decrease from 1977, when the clearance rate was 33 percent. Adult arrests accounted for 24 percent of the clearances and juveniles 6 percent. However, there were 160 more robbery arrests in 1978 than in 1977.

AGGRAVATED ASSAULT

SUMMARY ANALYSIS

Law enforcement agencies reported 19,584 assaults, 11 percent more than in 1977. Of the total assaults, 7,869 (40%) were aggravated and 11,715 (60%) were simple. Simple assault is primarily differentiated from aggravated assault by the seriousness of the injury and the weapon used. Aggravated assault increased 11 percent from 1977 and simple assault increased 10 percent. Aggravated assault represents 61 percent of violent crimes and 4 percent of the state crime index.

The largest number of aggravated assaults for one month occurred during October, which also had the highest number of hands, fists, feet, etc., assaults for the year, 11 percent.

The clearance rate increased 6 percent over 1977. Adults accounted for 5 percent of the clearances and juveniles 1 percent. There were 150 more arrests for assaults during 1978 over 1977.

BURGLARY

SUMMARY ANALYSIS

During 1978, there were 48,956 burglaries reported in Arizona, a decrease of 9 percent from 1977. Part of this decrease is attributable to a change in reporting procedure, at the beginning of the year, whereas, thefts from "appurtenance to a dwelling" (carports, patios, etc.) were no longer classified as burglaries. Thefts of this type are now classified in the larceny-theft category. Burglary represented 30 percent of the property crime and 27 percent of the state crime index.

The largest number of burglaries occurred during January, 4,547. The month of December had the largest number of burglaries in 1977, 4, 710. Forcible entry was used in 69 percent of the burglaries. Residential burglaries accounted for 70 percent of all burglaries. Of those residential burglaries, 35 percent occurred at night. Fifty-five percent of non-residential burglaries occurred at night. A reported value of $26.4 million was lost to all burglaries during 1978, up from $25.8 million in 1977. The majority (69%) of the dollar loss occurred during residential burglaries, $18.3 million.

Burglaries were cleared in 12.4 percent of the cases, up slightly from the 12.3 percent clearance rate in 1977. Adults accounted for 7.3 percent of the clearances and juveniles 5.1 percent. There were 433 fewer persons arrested in 1978 than in 1977 for burglary and again in 1978, more juveniles than adults were arrested. The burglary clearance rate remains the lowest of the seven index crimes.

LARCENY-THEFT

SUMMARY ANALYSIS

Larceny-theft, as in years past, is the largest component of the seven index crimes. Arizona law enforcement agencies reported 105,594 larcenies, an increase of 4 percent over 1977. Larceny-theft accounted for 64 percent of the property crimes and 59 percent of the state crime index.

As in 1977, the greatest number of larcenies occurred during March, 9,512. All months showed an increase over the corresponding month in 1977 with February showing the smallest gain, 13.

Despite the small increase, 4 percent, in the number of larcenies between 1977 vs 1978, the reported value loss increased 18 percent, $3 million.

The value range of dollar loss with the largest number of larcenies, was under $50, as in 1977. The value range of $200 and over had the largest reported dollar loss, $15 million, 78 percent of all larceny loss.

In 1978 as in 1977, theft from motor vehicles and theft of motor vehicle parts and accessories accounted for over one-third, (35%) of all larcenies. Pocket-picking and purse snatching were the least reported type of larcenies.

Larceny-theft clearances dropped slightly from 18.8 percent to 18.4 percent in 1978. Adults accounted for 11.5% of the larceny clearances and juveniles 6.9%. There were 247 more larceny arrests in 1978 than in 1977.

MOTOR VEHICLE THEFT

SUMMARY ANALYSIS

Arizona law enforcement agencies reported 10,917 motor vehicle thefts, a 9 percent increase over 1977. Motor vehicle theft accounted for 7 percent of property crime and 6 percent of the state crime index.

July had the largest total of reported vehicle thefts. April had the lowest number of thefts. Of the motor vehicles stolen, 74 percent (8,045) were recovered. This is a 4 percent decrease from the 78 percent recovery rate in 1977.

Motor vehicle thefts accounted for a reported dollar loss of $27,659,223. Of that amount, $18,758,513 was recovered. The recovered amount reflects the value of the vehicle when recovered and may be lower than the value when stolen because of parts missing or damaged.

Motor vehicle theft clearances decreased 1 percent in 1978 from 1977. Of the 19 percent clearance rate, adults accounted for 12 percent and juveniles 7 percent. There were 40 fewer persons arrested for motor vehicle theft in 1978 than in 1977. Again in 1978, the number of juveniles arrested exceeded the adults.

Arrest Data

PERSONS ARRESTED

SUMMARY ANALYSIS

The number of arrests are primarily a measure of police activity. The number of arrests also provides a useful indicator of criminal involvement of perpetrators by age, sex and race, particularly for those crimes which have a high-solution rate. The reporting procedures used in the UCR program require that an arrest be counted on each separate occasion a person is taken into custody, summoned or cited, except for traffic violators other than DWI.

Arizona law enforcement officers arrested a total of 116,339 persons in 1978. This is 880 less or .8 of one percent from 1977. There were 29,111 persons arrested for Part I offenses. This is an increase of .4 of one percent over the 28,988 persons arrested in 1977.

Adults accounted for 70 percent of the total arrests and Juveniles 30 percent. Male arrests accounted for 97,809 or 84 percent and females 18,530 or 16 percent.

Of the 35,137 Juveniles arrested in 1978, 19,450 or 55 percent were 15 years or younger, this is a 1 percent decrease over 1977.

As to race, Whites accounted for 84 percent of the total arrests, Indians 9 percent and Negros 7 percent.

IN MEMORIAM

TO THOSE OFFICERS WHO LOST THEIR LIVES IN THE PERFORMANCE OF THEIR DUTY

James L. Epp   Maricopa County Sheriff's Department   March 1, 1978

Noah M. Merrill   Department of Public Safety   December 11, 1978

---

POLICE OFFICERS ASSAULTED

SUMMARY ANALYSIS

There were 1,277 reported assaults on Arizona law enforcement officers in 1978. This represents a 10% increase over the 1,164 assaults in 1977.

The weapon most often used in the commission of the assault was hands, fists, feet, etc. This represents 80%

of all law enforcement officers assaulted. The most dangerous activity was responding to disturbance calls (family quarrels, man with gun, etc.), with 400 or 31%. The highest incidents of assaults occurred between 2201 and 2400 hours with 273 or 21%.

Glossary of Terms

CRIME ANALYSIS - Statements relating to type and nature of crimes and rates of occurrence and distribution in Arizona, but not comparisons of agencies or causes.

CRIME RATE - A figure which represents the number of crimes committed known to the police for each 1,000 population. A crime rate should be considered a victim risk rate in that it demonstrates the risk of becoming a victim of crime.

CRIME INDEX - The sum total of seven major offenses used to measure the extent, fluctuation and distribution of crime in a given geographical area. Crime classifications used in the index are: (1) murder, (2) forcible rape, (3) robbery, (4) aggravated assault, (5) burglary, (6) larceny-theft and (7) motor vehicle theft. Each of these offenses is referred to as an "Index Offense."

CLEARED BY ARREST OR EXCEPTIONAL MEANS - For Uniform Crime Reporting purposes, an offense is cleared by arrest or solved when at least one person is (1) arrested, (2) charged with the commission of an offense and (3) turned over to court for prosecution. In certain situations police are not able to follow these three steps. In many instances police have exhausted all leads and have done everything else possible to clear a case. If the following four conditions can be met, the offense can be cleared exceptionally: (1) the investigation has definitely established the identity of the offender, (2) there is enough information to support an arrest, charge, and turning over to the court for prosecution, (3) the exact location of the offender is known so that he could be taken into custody and (4) there is some reason outside the police control that prevents the arresting, charging, and prosecuting of the offender.

PART I OFFENSES - The first of two main categories of crime classes composing a universal crime classification system established for crime reporting purposes. Part I Offenses are by their nature more serious and/or occur most frequently. The monthly tabulation of Part I Offenses provides a count of "actual offenses."

PART II OFFENSES - The second of two main categories of crime classes composing a universal crime classification system established for crime reporting purposes. Part II Offenses are generally less serious in nature and/or occur less frequently.

JUVENILE - A person under the age of 18 years.

**ADULT** - A person 18 years of age or older.

APPENDIX C

Arizona Revised Statutes
(41-1750 Criminal Identification Section; duties)

A. There shall be a criminal identification section within the Department of Public Safety.

*B. The criminal identification section shall:

1. Procure and maintain records of photographs, descriptions, fingerprints, dispositions and such other information as may be pertinent to all persons who have been arrested for or convicted of a public offense within the state.

*2. Collect information concerning the number and nature of offenses known to have been committed in the state, of the legal steps taken in connection therewith, and such other information as shall be useful in the study of crime in the administration of justice.

3. Cooperate with the criminal identification bureaus in other states and with the appropriate agency of the federal government in the exchange of information pertinent to violators of the law. In addition, the criminal identification section shall provide for the rapid exchange of information concerning the commission of crime and the detection of violators of the law, between the law enforcement agencies of this state and its political subdivisions and the law enforcement agencies of other states and of the federal government.

4. Furnish assistance to peace officers throughout the state in crime scene investigations for the detection of latent fingerprints, and in the comparison thereof.

5. Provide information from its records to law enforcement agencies of the state or its political subdivisions upon request by the chief officer of such agency or his authorized representative. Such information shall be used only for purposes of law enforcement.

6. Provide information from its records to courts, prosecutors or correctional agencies of the state or its political subdivisions upon request by the chief officer of such agency or his authorized representative. Such information shall be used only for purposes of the criminal justice system.

7. Provide information from its records relating to convictions for public offenses to non-law enforcement agencies of the state or its political subdivisions upon request by the chief officer of such agency or his authorized representative, for the purpose of evaluating the fitness of prospective employees of such agency. Such information shall be used only for the purpose of such evaluation.

8. Provide information from its records relating to convictions for public offenses to licensing and regulatory agencies of the state or its political subdivisions upon request by the chief officer of such agency or his authorized representative, for the purpose of evaluating the fitness of prospective licensees. Such information shall be used only for the purpose of such evaluation.

9. Provide information from its records relating to arrests or convictions for public offenses to the subject of such information, or to his attorney at the request of the subject, and when accompanied by proper identification.

*C. The chief officers of law enforcement agencies of the state or its political subdivisions shall provide to the criminal identification section such information concerning crimes and persons arrested for or convicted of public offenses within the state as the chief of the criminal identification section, with the approval of the director, shall deem useful for the study or prevention of crime and for the administration of justice.

D. Any person who releases or procures the release of information held by the criminal identification section other than as provided by this section, or who uses such information for a purpose other than as provided by this section, is guilty of a misdemeanor.

E. The chief of the criminal identification section may, with the written approval of the director and in the manner prescribed by law, remove and destroy such records as he determines are no longer of value in the detection or prevention of crime.

*F. The chief of the criminal identification section, subject to the approval of the director, shall make and issue rules and regulations relating to the procurement and dissemination of information, in the manner prescribed by law.

G. All non-law enforcement agencies of the state or its political subdivisions may establish by rule, regulation or ordinance the need for fingerprint or background investigations for purposes of employment or licensing and may, thereafter, utilize the criminal identification section of the Department of Public Safety in accordance with subsection F. Added Laws 1968, Ch. 209, § 1, effective July 1, 1969, as amended Laws 1972, Ch. 39, § 1.

*Sections B.2., C., and F. apply directly to UCR.
