Foreward

In 1975, the Uniform Crime Reporting Section of the Department of Public Safety began an effort that culminated in the first statewide report of criminal activity in the state. Prior to 1975, no detailed statewide crime statistics were available regarding the reported incidents of crime in Arizona. With the issuance of Crime in Arizona 1980, a six year crime base has been established as a measure of the extent of crime.

Crime in Arizona 1980 represents an effort by the law enforcement community throughout the state of Arizona to compile comprehensive reports covering incidence of crime in this state.

Our deepest gratitude and thanks are extended to the sheriff's offices and police departments who, through their participation, made this report possible.

Ralph T. Milstead

**The Arizona Uniform
Crime Reporting System**

HISTORY OF UNIFORM CRIME REPORTING

The Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP) was established in 1927 to initiate a national program for collecting crime information. This Committee's responsibility to provide management information to law enforcement agencies was eventually turned over to the Federal Bureau of Investigation (FBI) in 1930, when the FBI received a Congressional mandate to collect and disseminate national crime information. The IACP has continued to serve the Uniform Crime Reporting Program (UCR) in an advisory capacity, and has been joined in this responsibility by the Committee on Crime Records of the National Sheriff's Association (NSA) in 1966.

The Arizona uniform Crime Reporting (AUCR) Section first began receiving voluntary crime information from Arizona law enforcement agencies in January 1975. Prior to this date these agencies submitted their crime data directly to the FBI. At the close of calendar year 1980, all 92 eligible law enforcement agencies were contributing crime data to the AUCR unit.

OBJECTIVES OF ARIZONA UCR

Because increasing attention has been focused on the problem of crime in our communities in recent years, many segments of our population need more complete information for a variety of reasons.

Law enforcement professionals, managers and administrators who must focus on crime in their own jurisdictions, also need to know what is occurring in surrounding jurisdictions in order to deploy personnel and equipment most efficiently. Researchers and planners need to know what is actually happening to predict trends and recommend changes.

The goal of *Crime in Arizona* is to identify the nature and extent of criminal activity in this state and present the information needed by each of these groups. This the information will not in itself prevent crime, but it may encourage all segments of society, by understanding the problem, to work together with law enforcement agencies to reduce crime through more effective enforcement.

The objectives of *Crime in Arizona* are (1) To identify the nature and extent of crime in our state; (2) To provide the management information needed by the law enforcement community to augment their ability to attack the crime problem; (3) To provide our citizens with the most complete information available; (4) To provide legislators with the information necessary to formulate laws which address the crime problems, and (5) To provide sufficient detailed data for researchers and planners.

CONSIDERATIONS FOR INTERPRETATION

Statistics are a tool used to summarize information so that patterns or trends become clearer. All statistics must be interpreted with an understanding of just what it is that they can say. Too often information of the type in this report is used incorrectly to draw conclusions that the statistics simply do not support. We ask that great care be taken in analysis and interpretation.

The following factors have a major influence on the statistics presented in this report:

1. Crime figures are police statistics as distinguished from the findings of a court, coroner, jury or decision of a prosecutor.
2. Density and size of community population.
3. Variations in composition of the population, particularly age structure.
4. Stability of population with respect to transient factors.
5. Economic conditions, including job availability.
6. Climate.
7. Effective strength of law enforcement agencies; some police jurisdictions overlap.
8. Attitudes of citizenry toward crime.
9. Crime reporting practices of citizenry.
10. Crime rates are based on census-fixed residential populations of police jurisdictions.
11. Crimes committed on Indian reservations are not counted in the AUCR program, although their population is included in the state's population figures.

To obtain accurate information from many different agencies, the national UCR program had to precisely define the methods for collecting such information as the number of offenses, arrests, clearances and value of stolen or recovered property. The methods of collecting and some resulting limitations are explained below.

Classification of Offenses

UCR divides offenses into two major classifications which are designated Part I and Part II offenses. This distinction is important to keep in mind because different information is collected for each.

Part I offenses include:

Violent Crimes

1. Criminal Homicide
2. Forcible Rape
3. Robbery
4. Aggravated Assault

Property Crimes

5. Burglary
6. Larceny-Theft
7. Motor Vehicle Theft
8. Arson

Note: The first seven offenses are used to calculate the Crime Index. Arson is too new to incorporate at this time. Arson will be included when there is a historical data base compiled.

Part II offenses include:

9. Other Assaults-simple
10. Forgery and Counterfeiting
11. Fraud
12. Embezzlement
13. Stolen Property: Buying, Receiving, Possessing, Etc.
14. Vandalism
15. Weapons: Carrying, Possessing, Etc.
16. Prostitution
17. Sex Offenses (Except forcible rape and prostitution)
18. Narcotic Drug Laws
19. Gambling
20. Offenses Against Family and Children
21. Driving Under the Influence
22. Liquor Laws
23. Drunkenness (not reported in Arizona)
24. Disorderly Conduct
25. Vagrancy
26. All Other Offenses (except traffic)
27. Suspicion (not reported in Arizona)
28. Curfew and Loitering Law Violations (Juveniles)
29. Runaways (Juveniles)

Note: Only arrests are counted for Part II offenses.

All offenses are classified on the basis of law enforcement officer investigation in accordance with UCR offense definitions (which will not necessarily be identical to Criminal Code definitions). Because UCR identifies a police problem, offense classifications are not based on the findings of a court, coroner, jury or decision of a prosecutor.

Counting of Offenses

The number of offenses is counted only for Part I crimes and simple assault. The method of counting varies with the type of crime committed, and it is important to remember that the number of offenders does not determine the number of offenses.

For murder and nonnegligent manslaughter, negligent manslaughter, rape, aggravated assault and simple assault, one offense is counted for each victim, regardless of the number of offenders involved.

For robbery and larceny-theft, one offense is counted for each distinct operation which is separate in time and place. The number of victims in any one operation does not determine the number of offenses.

For burglary, one offense is counted for each structure which is illegally entered. However, when the structure is an apartment house, business or office building in which units are leased for a period of time, one offense is counted for each unit burglarized.

For motor vehicle theft, one offense is counted for each vehicle stolen.

Note: Attempts to commit any of the above are also counted as offenses, except that attempts to kill and assaults to kill are counted as aggravated assaults.

For multiple offenses that occur in one crime incident, only the most serious offense is counted. In cases when an arson occurs in conjunction with other Part I crimes, both are reported. Part I offenses are ranked according to seriousness and appear in order from most serious to least serious under "Classification of Offenses", above.

Clearances

An offense is considered cleared (solved) when at least one offender is arrested for a crime, even though several may have been involved.

Offenses may also be cleared by exceptional means when the offender: commits suicide; makes a dying declaration; confesses while in custody or serving time for another crime; is prosecuted in another jurisdiction for the same offense; is a juvenile who is handled by notifying the parents; when the victim refuses to prosecute or another jurisdiction refuses to extradite the offender.

Clearances are counted as "adult" and "juvenile." A "juvenile" clearance is counted only when juveniles are exclusively involved in the clearance of an offense. If the arrest of both adults and juveniles results in a clearance, it is counted as an "adult" clearance.

Property Stolen and Recovered

The figures for value of property stolen and recovered report the value at each point in time. Although property can increase in value over time, it is more likely that stolen property will be recovered in a damaged condition. Therefore, recovery value does not necessarily represent a "clearance rate" for stolen property, and one cannot use it to determine law enforcement effectiveness in recovering stolen goods. Because stolen and recovered property figures indicate thefts and recoveries in the current year, it is important to note that

recovered property may have been stolen in a previous year. In addition, the type and value of stolen or recovered property is reported only for Part I offenses and does not include such Part II offenses as fraud, forgery or embezzlement.

Arrests

Arrest information is collected for all Part I and Part II offenses according to the age, sex and race of the offender. It is not possible, however, to correlate race with sex or specific ages because the information is collected independently, thus limiting analysis. Furthermore, arrest figures cannot be directly related to the number of crimes cleared because arrest totals count all offenders arrested for each offense, and clearance totals count only the offenses for which an arrest(s) or exceptional clearances have occurred.

Reporting Variations and Procedures

Arizona now receives Uniform Crime Reports from all eligible 92 law enforcement agencies. One must be aware that unintentional variations from UCR guidelines may occur that would affect the validity of the data presented in this report. Offense totals vary from the actual number of offenses that occur because UCR statistics are based on crimes that are reported to law enforcement agencies and many crimes are not reported.

Each contributing law enforcement agency is responsible for compiling its own monthly reports. To aid in this endeavor, the Arizona UCR guide manual and the FBI UCR handbook are supplied to all contributors. These manuals outline reporting procedures in detail and are complete with examples and illustrations. Additionally, our Field Representatives provide instruction and clarification as required. Each agency is supplied with twelve sets of monthly report forms which are used by the agencies to submit their reports.

PORTRAIT AND PROFILE OF ARIZONA

Arizona, with 113,909 square miles, is the sixth largest state in the United States. Much of this area is owned by the Federal Government in the form of Indian reservations, National Parks, and National Forests. Arizona is 69% federally owned; 27% of that federal ownership is in the form of Indian reservations. The state owns 13%, leaving 18% to private ownership.

Arizona has two principal metropolitan areas, Phoenix and Tucson (Maricopa and Pima counties). Phoenix, the capitol city, is the financial, commercial, retail, cultural and employment hub in the state, as well as the largest population center with an estimated 764,911 people. Tucson, the largest business, educational and cultural

center in southern Arizona, has an estimated population of 330,537 people. More than 40 percent of the people who live in Arizona live in these two cities.

One of the unique characteristics of Arizona is its temperate climate. This factor, along with the economic opportunities and a desire to live in the West, has contributed to the state's dynamic population and economic growth.

The state's population density is 24 persons per square mile, with a total population of 2,717,866. This figure includes the Indians living on the reservations within the state.

Arizona experienced strong economic growth during 1980 with manufacturing, mining, tourism and travel, and agriculture producing the greatest majority of income for Arizonans.

POPULATION GROUPING

The crime statistics reported by an individual agency indicates what is happening in one particular area. AUCR groups jurisdictions on the basis of population size and reports crime rates among these groups. The cities, towns and counties within the state have been divided into seven groups according to population size. The seventh group (ungrouped) is provided for identification of volume and type of crime to account for total offenses. This population grouping factor has some influence on the volume and type of crime presented in this report. For use in interpreting this report, the UCR grouping is listed below:

- Group No.
- 1

Over 250,000 population. There are two (2) cities that fall within this group.
- 2

100,001 to 250,000 population. There are four (4) cities and counties that fall within this group.
- 3

50,001 to 100,000 population. There are two (2) cities that fall within this group.
- 4

25,001 to 50,000 population. There are twelve (12) cities and counties that fall within this group.
- 5

10,001 to 25,000 population. There are nine (9) cities, towns, or counties that fall within this group.
- 6

10,000 or less population. There are fifty-four (54) cities, towns, or counties that fall within this group.
- 7

Ungrouped. There are nine (9) reporting agencies. These are Educational Institutions and the Department of Public Safety, that by definition do not have measurable population. For purposes of this report, they are combined for the crimes by population distribution.

The following is a listing by population group of law enforcement agencies submitting crime data to the Uniform Crime Reporting Section.

AGENCY	POPULATION GROUP NO.

**Uniform Crime Reporting
Summary Data**

Preceding page blank

STATE CRIME SUMMARY

OFFENSES

- There were 221,329 Crime Index Offenses reported. Of these offenses, 18 percent were cleared.
- The crime rate for the state of Arizona was established at 81.4 offenses for every 1,000 inhabitants.
- A total of 17,640 violent crimes were reported to law enforcement agencies, an increase of 22% over 1979.
- A total of 203,689 property crimes, exclusive of arson, were reported statewide, an increase of 15% over 1979.
- The value of property stolen amounted to \$136,047,306. The value of property recovered was \$33,995,523 for a recovery rate of 25 percent, a decrease of 7 percent over 1979.
- In 1980, law enforcement agencies reported 276 murders, an increase of 27 percent over 1979, the largest percentage increase of the eight index crimes. Handguns were used in 46 percent of all murders.
- Bank robberies increased 32 percent over 1979 and had the largest dollar loss per robbery, \$4,318.
- Aggravated Assaults accounted for 10,884 Crime Index Offenses. Of these 30 percent were committed by the use of hands, fists, feet, etc. The number of aggravated assaults increased 23 percent over 1979.
- Burglary accounted for a substantial value of property loss amounting to \$53,898,119. Residential burglaries accounted for 71 percent of all burglaries reported. Of these, 34 percent were committed during the day.
- Larceny-Theft represented the largest number of our Crime Index Offenses. The 132,407 offenses accounted for 60 percent of the State Crime Index.
- In 1980, 12,825 motor vehicles were stolen with a property value of \$45,325,702. There were 8,857 vehicles recovered with a reported value of \$28,412,276.

INDEX CRIME COMPARISON

INDEX CRIMES	OFFENSES			CLEARANCES		
	1979	1980	Change	1979	1980	Change
Murder	218	276	+ 26.6%	157	192	+ 22.3%

Motor Vehicle Theft	12,073	12,825	+ 6.2%	2,084	2,006	- 3.7%
TOTALS	192,023	221,329	+ 15.3%	36,172	40,843	+ 12.9%
Arson	2,523	2,314	- 8.3%	356	411	+ 15.4%
TOTALS	194,546	223,643	+ 15.0%	36,528	41,254	+ 12.9%

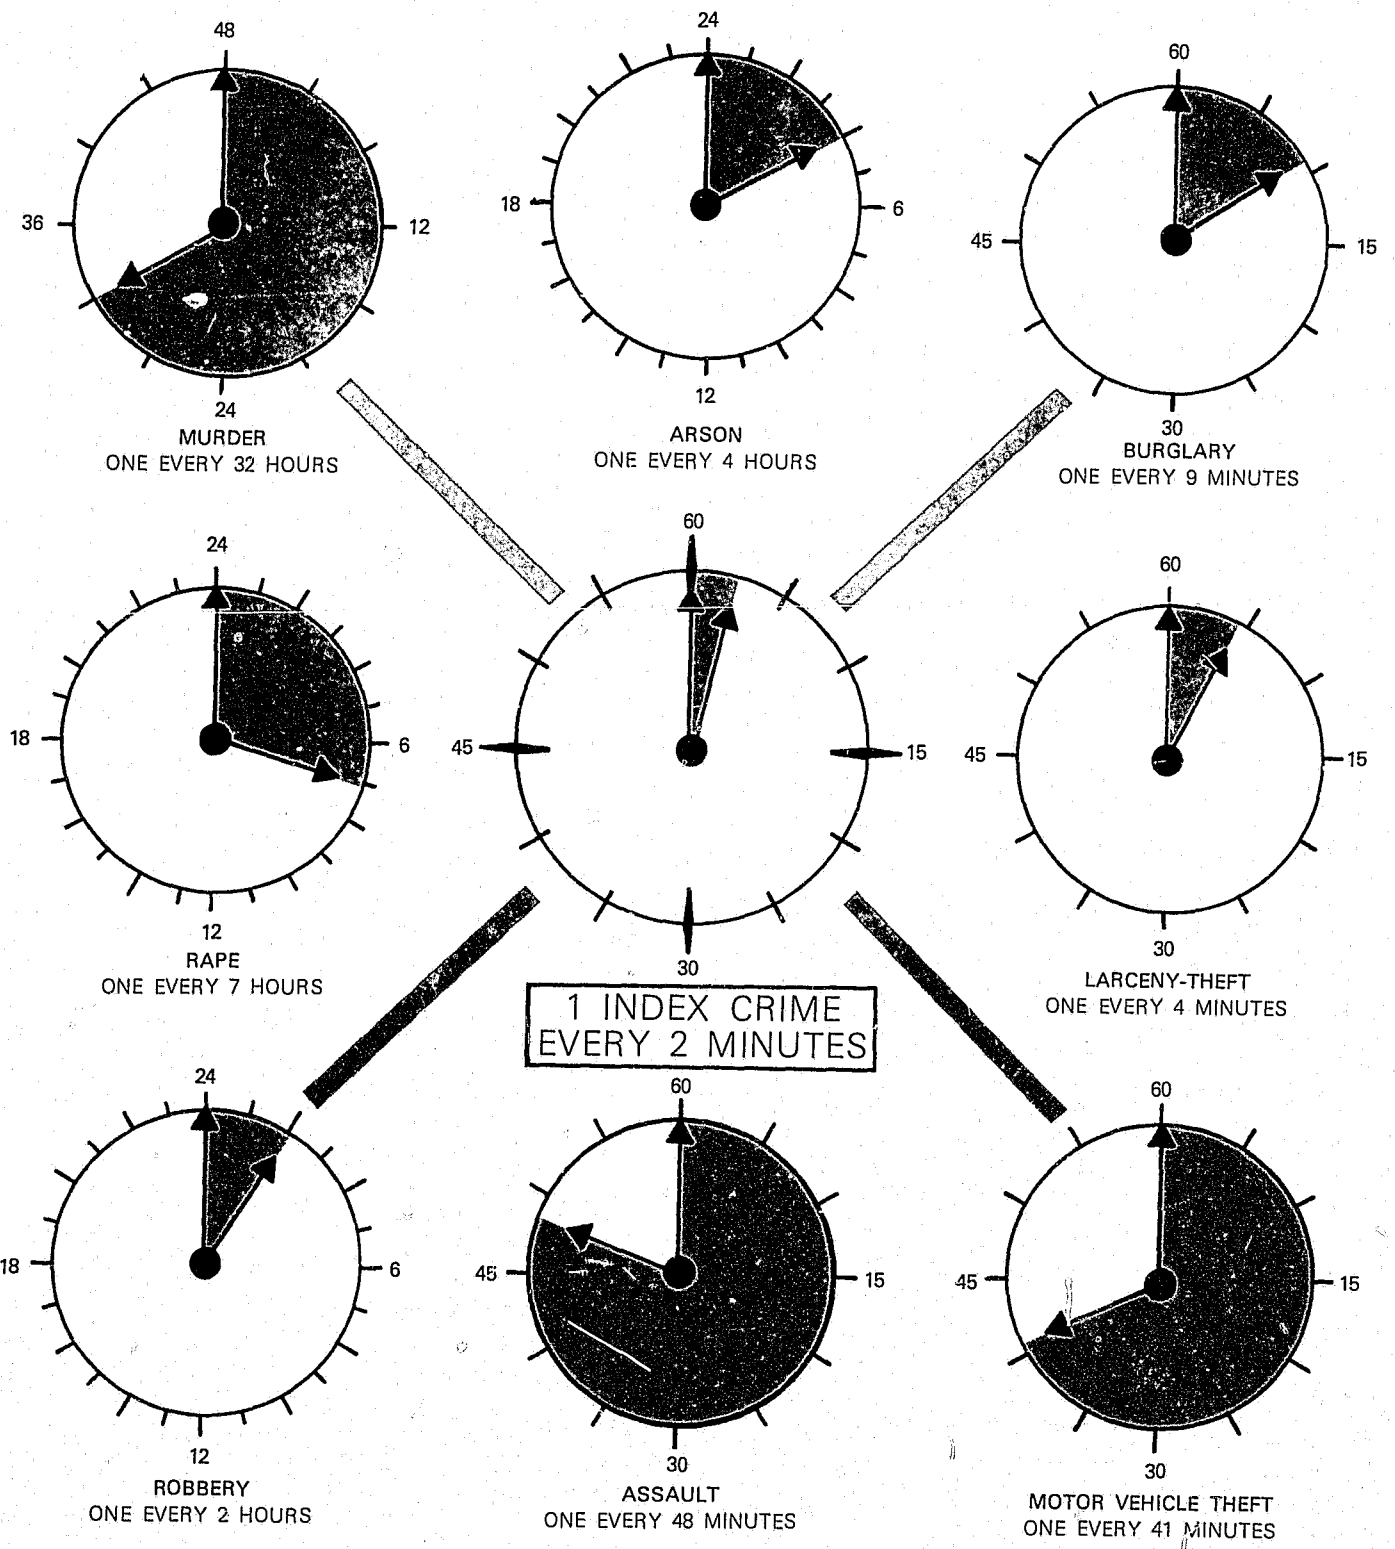

ARRESTS

- During 1980, there were 136,847 persons arrested for all Criminal Acts.
- Adults accounted for 79 percent of all Violent Crime arrests.
- Juveniles accounted for 50 percent of all Property Crimes and 25 percent of all arrests made during 1980.

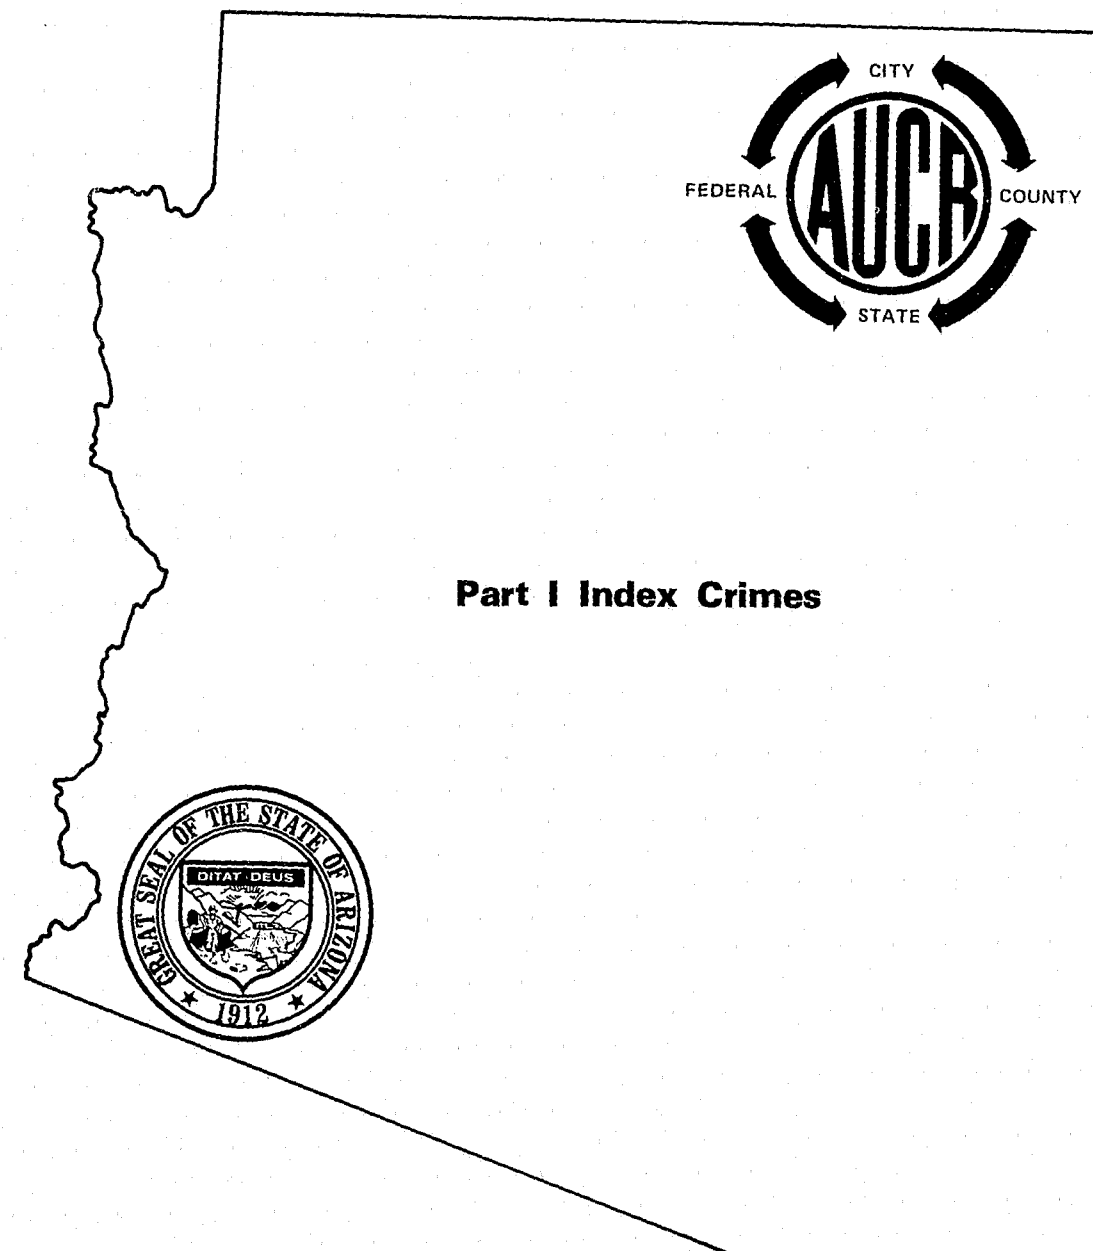

LAW ENFORCEMENT OFFICERS KILLED AND ASSAULTED

- Two Arizona law enforcement officers lost their life in 1980.
- There were 1,465 Assaults on Police Officers reported of which 97 percent were cleared.

TIME CLOCK OF INDEX CRIMES
1980

The clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. The mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather it represents the annual ratio of crime to fixed time intervals.

Part I Index Crimes

MURDER AND NONNEGLIGENT MANSLAUGHTER

DEFINITION & ANALYSIS

The willful nonnegligent killing of one person by another. Excludes attempts or assault to kill (classified as aggravated assault), suicide and accidental deaths.

Murder in Arizona increased by 27 percent over the number reported in 1979. A total of 276 individuals were murdered in 1980, which represents 2 percent of all reported violent crimes. The largest number of murders reported in one month was 33 in January. The offense of murder represents .1 of one percent of the state crime index.

Because murder is such a serious crime, detailed information is collected concerning victims, offenders, weapons used, and the circumstances in which the offense took place. Handguns were used in the majority of killings, 46 percent of the time. Acquaintance was the most frequent relationship between the victims and offenders, with 86 or 31 percent. The relationship was undeterminable in 78 murders or 28 percent. Arguments led to 29 percent of the deaths and felony murders 12 percent. The day of the week that homicides occurred most frequently was Sunday, with 60 or 22 percent, and the most frequent time was between 6:01 p.m. and 2:00 a.m., with 115 or 42 percent. Murder had the highest clearance rate, 70 percent, of the eight index crimes.

The age groups 15 to 19 and 20 to 24 each accounted for 42, or 19 percent of the known offenders. Males ac-

counted for 197 or 91 percent. As to race, Whites accounted for 180 or 83 percent and Blacks 31 or 14 percent. Hispanics were offenders 28 percent of the time and Not Hispanics 72 percent.

MURDER BY TYPE OF WEAPON USED

RAPE

DEFINITION & ANALYSIS

The carnal knowledge of a female through the use of force or threat of force. Assaults to commit forcible rape are also included; however statutory rape (without force) is not counted in this category.

Rapes reported in Arizona increased 9 percent over the number reported in 1979. A total of 1,223 rapes were reported, which represents 7 percent of all reported violent crimes and .6 of one percent of the state crime index. Of the total rapes, forcible accounted for 74 percent (906) and attempted 26 percent (317). The largest

number of forcible rapes, 92, was reported in May and September, followed by June, 89, and July, 84.

Rapes had a clearance rate of 43 percent, down 2 percent from 1979. Of the 529 clearances, 496 or 93 percent were adults and 37 or 7 percent were juveniles.

RAPES PER 1000 POPULATION

ROBBERY

DEFINITION & ANALYSIS

The taking or attempting to take anything of value from the care, custody, or control of a person by force or threat of force and/or by putting the victim in fear.

During 1980, Arizonans reported 5,257 robberies, an increase of 22 percent (955) over the number of robberies reported during 1979. Robbery represents 30 percent of the violent crimes and 2 percent of the state crime index, the same as in 1979.

Robberies occurring on highways, that is streets, alleys and sidewalks, were the most frequent type of robbery reported, 1,841 or 35 percent of all robberies. Robberies of residences had the highest total dollar loss, \$1.5 million, up \$1.2 million from 1979. Of the seven types of robbery locations collected, Service Stations had the highest increase, 62 percent over 1979.

Bank robberies had the lowest number of reported robberies, but the largest loss per robbery, \$4,318. The reported value of \$5.8 million taken in robberies was up from the \$1.9 million in 1979. Firearm was the weapon used in 45 percent of the robberies and strong-arm (hands, fists, feet, etc.) was used 37 percent of the time.

Robberies had a clearance rate of 25 percent, down 3 percent from 1979. Of the 1,326 clearances, 1,124 or 85 percent were adults and 202 or 15 percent were juveniles.

ROBBERIES PER 1000 POPULATION

AGGRAVATED ASSAULT

DEFINITION & ANALYSIS

The unlawful attack by one person upon another for the purpose of inflicting severe bodily injury usually accompanied by the use of a weapon or other means likely to produce death or serious bodily harm.

Law enforcement agencies reported a total of 26,145 assaults, 15 percent more than in 1979. Of this, 10,884 (42%) were aggravated and 15,261 (58%) were simple. Simple assault is primarily differentiated from aggravated assault by the seriousness of the injury and the weapon used. Simple assault is not a Crime Index offense but is reported here for the purpose of showing the total assault violence. Aggravated assault increased 23 percent from 1979 and simple assault increased 10 percent. Aggravated assault represents 62 percent of violent crimes and 5 percent of the state crime index.

The largest number of aggravated assaults for one month occurred during August, 1,081, with the next highest month being September, 1,060.

Assaults were cleared 60 percent of the time, up 2 percent from 1979. Of the 10,884 assaults, adults accounted for 88 percent of the clearances and juveniles 12 percent.

ASSAULTS PER 1000 POPULATION

ASSAULT TREND BY MONTH

DEFINITION & ANALYSIS

The unlawful entry of a "structure" to commit a felony or theft. The use of force to gain entry is not required to classify the crime as burglary. A structure is considered to include the following, but not limited to: dwelling houses, apartments, public buildings, offices, barns, cabins, etc.

During 1980, there were 58,457 burglaries reported in Arizona, an increase of 20 percent from 1979. Burglary represents 29 percent of the property crimes and 26 percent of the state crime index.

The largest number of burglaries occurred during December, 5,792, with the next highest month being July, 5,211. Forcible entry was used in 70 percent of the burglaries. Residential burglaries accounted for 71 percent of all burglaries. Of those residential burglaries, 34 percent occurred during the day. Forty-nine percent of non-residential burglaries occurred at night.

A reported value of \$53.8 million was lost to all burglaries during 1980, up from the \$31.4 million reported in 1979. The majority (75%) of the dollar loss occurred during residential burglaries, \$40.6 million.

Burglaries had a clearance rate of 11.6 percent, down slightly from the 12 percent in 1979. Of the 6,799 clearances, 4,541 or 67 percent were adults and 2,258 or 33 percent were juveniles. There were 564 more persons arrested in 1980 than in 1979 for burglary, and again in 1980, more juveniles than adults were arrested. The burglary clearance rate remains the lowest of the eight index crimes.

BURGLARIES PER 1000 POPULATION

LARCENY-THEFT

DEFINITION & ANALYSIS

The unlawful taking or stealing of property or articles without the use of force, violence, or fraud. This crime category does not include embezzlement, fraud, and worthless checks.

Larceny-theft, as in years past, is the largest component of the eight index crimes. Arizona law enforcement agencies reported 132,407 larcenies, an increase of 14 percent over 1979. Larceny-theft accounted for 65 percent of the property crimes and 60 percent of the state crime index.

The greatest number of larcenies occurred during August, 11,828. All months showed an increase over the corresponding month in 1979 with July showing the largest gain, 1,959.

The increase of 15,822 in the number of larcenies between 1979 vs 1980, resulted in a reported value loss increase of 27 percent, \$6.7 million.

The value range of dollar loss with the largest number of larcenies, was under \$50, as in 1979. The value range of \$200 and over had the largest reported dollar loss, \$26.4 million, 83 percent of all larceny loss.

In 1980 as in 1979, theft from motor vehicles and theft of motor vehicle parts and accessories accounted for over one-third, (35%) of all larcenies. Pocket-picking and purse snatching were the least reported type of larcenies.

Larceny-theft clearances dropped slightly from 18.2 percent to 17.7 percent in 1980. Adults accounted for 69 percent of the larceny clearances and juveniles 31 percent. There were 2,414 more larceny arrests in 1980 than in 1979.

MOTOR VEHICLE THEFT

DEFINITION & ANALYSIS

The unlawful taking or stealing of a motor vehicle including attempts. This definition excludes taking for temporary use by those persons having lawful access to the vehicle.

Arizona law enforcement agencies reported 12,825 motor vehicle thefts, a 6 percent increase over 1979. Motor vehicle theft accounted for 6 percent of the property crime and 6 percent of the state crime index.

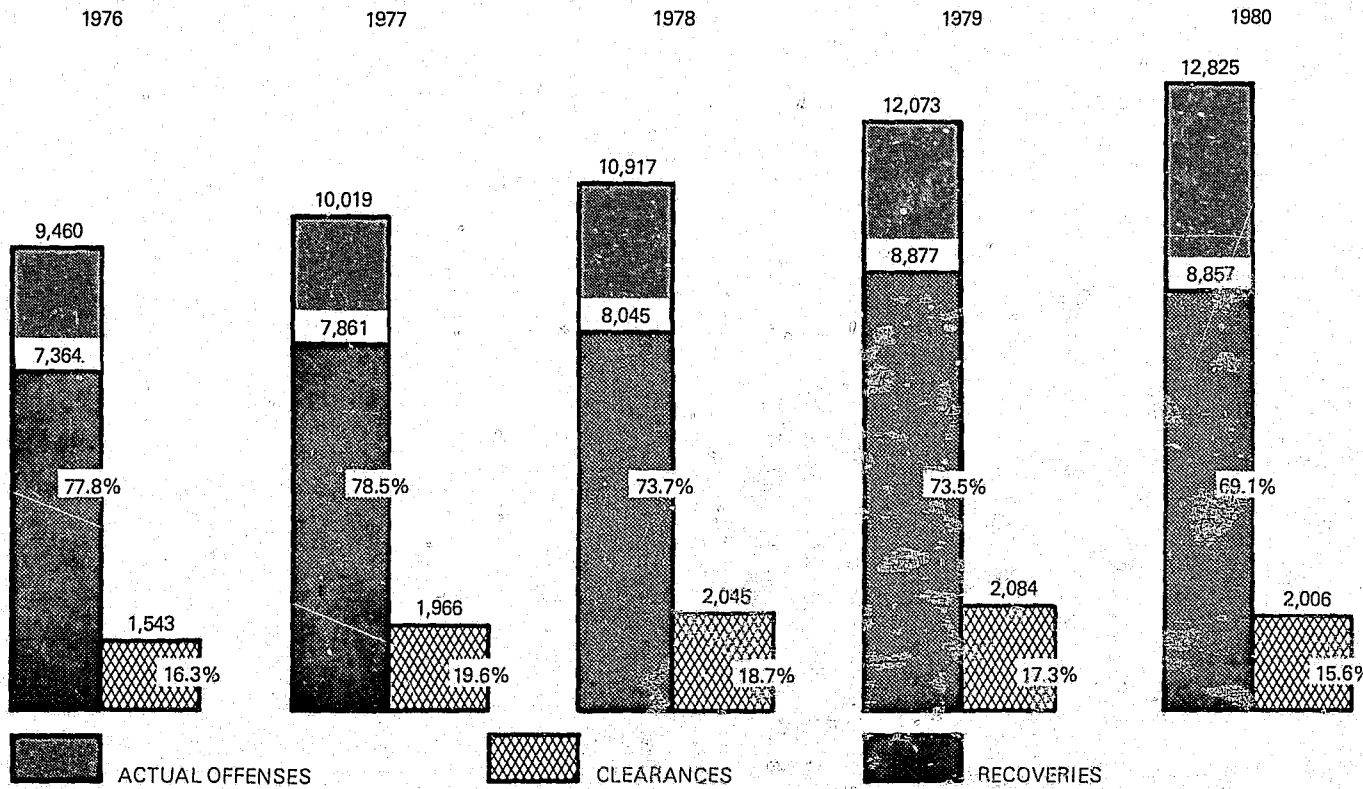

As in 1979, March had the largest total of reported vehicle thefts, 1,251 and November had the lowest, 903. Of the motor vehicles stolen 69 percent (8,857) were recovered. This is a decrease of 4 percent over 1979.

Motor vehicle thefts accounted for a reported dollar loss of \$45,325,702. Of that amount, \$24,412,276 was recovered. The recovered amount reflects the value of the vehicle when recovered and may be lower than the value when stolen because of parts missing or damaged.

Motor vehicle theft clearances decreased 2 percent in 1980 from 1979. Of the 2,006 clearances, adults accounted for 69 percent and juveniles 31 percent. There were 19 more persons arrested for motor vehicle theft in 1980 than in 1979. Again in 1980, the number of juveniles arrested (855) exceeded the adults (761).

ARSON

DEFINITION & ANALYSIS

Arson is defined by the national Uniform Crime Reporting Program to include any willful or malicious burning or attempts to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

There were 2,314 arson offenses reported to law enforcement agencies in 1980, a decrease of 209 offenses or 8 percent from 1979. Arson of Structures accounted for 1,174 offenses or 51 percent of all reported arsons; Mobile units 701 offenses or 30 percent and All Other 439 offenses or 19 percent.

Motor vehicles remains the largest category of reported arsons, 645, while Industrial/Manufacturing remains the lowest with 13 offenses, over 1979.

Although arsons decreased over 1979, the Estimated

Value of Property Damage increased \$5.5 million. Other Commercial (stores, restaurants, offices, etc.), had the largest reported dollar loss, \$6,703,929, 40 percent of all Structural loss, up 5 percent over 1979 and 36 percent of all arson losses, an increase of 6 percent over 1979.

Arsons were cleared 18 percent of the time, up 4 percent over 1979. There were 52 more persons arrested in 1980 than in 1979, an increase of 17 percent. Of the arrests, juveniles accounted for 62 percent and adults 38 percent.

PART I CRIMES CLEARED

VALUE OF PROPERTY LOSS BY INDEX CRIME OFFENSE - STATE TOTALS

The table below reflects the amount of property stolen by offense category. Burglary accounted for the highest property loss, \$53,898,119, or 39 percent of the total. The next highest category was motor vehicle theft with \$44,256,458, or 32 percent of the total.

OFFENSE	Number of Offenses	Dist.	Value of Property Stolen	Dist.	Average Value
Murder	276	0.1%	\$ 77,440	0.1%	\$ 281.00
Rape	1,223	0.6%	62,740	0.1%	51.00
Robbery	5,257	2.4%	5,772,047	4.2%	1,098.00
Aggravated Assault	10,884	4.9%			
Burglary	58,457	26.4%	53,898,119	39.6%	922.00
Larceny-Theft	132,407	59.8%	31,980,502	23.5%	242.00
Motor Vehicle Theft*	12,825	5.8%	44,256,458	32.5%	3,451.00
TOTALS	221,329	100%	\$136,047,306	100%	\$ 615.00

TYPE AND VALUE OF PROPERTY STOLEN AND RECOVERED - STATE TOTALS

The table below reflects the amount of property stolen and recovered by type of property. Locally stolen motor vehicles accounted for the highest property loss as a single category, \$45,325,702. Locally stolen motor vehicles was also the most easily recovered property, \$28,412,276, with a recovery rate of over 83 percent.

TYPE OF PROPERTY	Value Stolen	Dist.	Value Recovered	Percent Recovered
Currency and Notes	\$ 310,807	5.59%	\$ 433,144	1.27%
Jewelry and Precious Metals	28,331,365	20.82%	801,672	2.36%
Clothing and Furs	1,767,818	1.30%	198,703	0.58%
Locally Stolen Motor Vehicles	45,325,702	33.32%	28,412,276	83.58%
Office Equipment	1,371,897	1.01%	101,413	0.30%
TVs, Radios, Cameras, etc.	11,861,408	8.72%	521,035	1.53%
Firearms	2,518,360	1.85%	163,195	0.48%
Household Goods	4,173,465	3.07%	150,868	0.44%
Consumable Goods	974,118	0.72%	121,063	0.36%
Livestock	696,084	0.51%	79,937	0.24%
Miscellaneous	31,416,282	23.09%	3,012,217	8.86%
TOTALS	\$136,047,306	100%	\$33,995,523	24.99%

*Motor vehicles that were stolen in conjunction with a more "serious" index offense such as robbery or burglary are not included in this count. This count represents only those instances in which motor vehicle theft was the only or most "serious" offense committed. The total value shown here reflects the value of all property stolen during the commission of the offense (i.e., not just the value of each vehicle).

**Part I And Part II
Arrest Data**

Preceding page blank

PERSONS ARRESTED

The number of arrests are primarily a measure of police activity. The number of arrests also provides a useful indicator of criminal involvement of perpetrators by age, sex and race, particularly for those crimes which have a high solution rate. The reporting procedures used in the UCR program require that an arrest be counted on each separate occasion a person is taken into custody, summoned or cited, except for traffic violators other than DWI. It should be kept in mind that the volume of arrests may vary from time to time due to differences in local arrest procedures and policies. A juvenile is counted as "arrested" when the circumstances are such that if he or she were an adult, an arrest would be counted or when law enforcement or other official action beyond a mere interview, warning or admonishment is taken.

Beginning with the 1980 UCR submissions, ethnic information (hispanic/not hispanic) is being reported for all persons arrested and for the victims and offenders in murder offenses. The reporting of ethnicity was required by a directive issued by the Office of Management and Budget which established standard classifications for recordkeeping.

ANALYSIS

Arizona law enforcement officers arrested a total of 136,847 persons in 1980. This is 14,920 or 12 percent more than in 1979. There were 34,907 persons arrested for Part I offenses. This is an increase of 12 percent over the 31,291 persons arrested in 1979.

Adults accounted for 75 percent of the total arrests and Juveniles 25 percent. Male arrests accounted for 116,159 or 85 percent and females 20,688 or 15 percent.

Of the 34,398 Juveniles arrested in 1980, 17,526 or 51 percent were 15 years or younger. This represents a decrease of less than one percent from 1979.

As to race, Whites accounted for 84 percent of the total arrests, Indians 9 percent and Blacks 7 percent. Of the 136,847 persons arrested, Hispanics accounted for 26,594, or 19 percent and Not Hispanics, 110,253 or 81 percent.

Tucson Police Department
Department of Public Safety

October 28, 1980
November 19, 1980

POLICE OFFICERS ASSAULTED

The assault of a law enforcement officer is an increasingly serious problem faced by the law enforcement administrator and should be of the gravest concern to the public at large. Such acts directly affect the functioning of proper law enforcement operations and thus reduce the ability of our law enforcement agencies to combat crime and maintain law and order. The attitude of disrespect for law enforcement officials and the failure of citizens to come to the aid of the officers being attacked as they perform their lawful duties is one of the serious problems facing law enforcement today. It is a deplorable situation when those persons who have chosen a career in law enforcement must assume the risk of being killed or assaulted by a member of the society they have sworn to protect.

ANALYSIS

A total of 1,465 assaults were reported on Arizona law enforcement officers during 1980. This represents a 4 percent decrease over the 1,534 assaults in 1979.

The weapon most often used in the commission of the assault was hands, fists, feet, etc. This represents 80 percent of all law enforcement officers assaulted. The most dangerous activity was responding to disturbance

calls (family quarrels, man with gun, etc.) with 491 or 34 percent. The highest incidents of assaults occurred between 0001 and 0200 hours with 309 or 21 percent.

While every assault does not result in personal injury to the officer involved, 499 or 34 percent of these assaults resulted in personal injury to some extent. This is a decrease from the 37 percent reported in 1979.

Arizona Counties

ARIZONA

APPENDIX A

Glossary of Terms

CRIME ANALYSIS — Statements relating to type and nature of crimes and rates of occurrence and distribution in Arizona, but not comparisons of agencies or causes.

CRIME RATE — A figure which represents the number of crimes committed known to the police for each 1,000 population. A crime rate should be considered a victim risk rate in that it demonstrates the risk of becoming a victim of crime.

CRIME INDEX — The sum total of seven major offenses used to measure the extent, fluctuation and distribution of crime in a given geographical area. Crime classifications used in the index are: (1) murder, (2) forcible rape, (3) robbery, (4) aggravated assault, (5) burglary, (6) larceny-theft and (7) motor vehicle theft. Each of these offenses is referred to as an "Index Offense."

CLEARED BY ARREST OR EXCEPTIONAL MEANS — For Uniform Crime Reporting purposes, an offense is cleared by arrest or solved when at least one person is (1) arrested, (2) charged with the commission of an offense and (3) turned over to court for prosecution. In certain situations police are not able to follow these three steps. In many instances police have exhausted all leads and have done everything else possible to clear a case. If the following four conditions can be met, the offense can be cleared exceptionally: (1) the investigation has definitely established the identity of the offender, (2) there is enough information to support an arrest, charge, and turning over to the court for prosecution, (3) the exact location of the offender is known so that he could be taken into custody and (4) there is some reason outside the police control that prevents the arresting, charging, and prosecuting of the offender.

PART I OFFENSES — The first of two main categories of crime classes composing a universal crime classification system established for crime reporting purposes. Part I Offenses are by their nature more serious and/or occur most frequently. The monthly tabulation of Part I Offenses provides a count of "actual offenses."

PART II OFFENSES — The second of two main categories of crime classes composing a universal crime classification system established for crime reporting purposes. Part II Offenses are generally less serious in nature and/or occur less frequently.
