ii Prisoners in State and Federal Institutions on December 31, 1980

Preface

This report presents data for 1980 on the number and movement of prisoners in all State and Federal correctional institutions. It assesses the sharp growth in prison population during 1980 and surveys developments in the correctional field that could lead to even greater growth. As in past reports, it examines changes in the geographic distribution of prisoners; composition of the inmate population by race. sex, and Hispanic origin; incarceration rates for minorities; and the rates of various types of admissions and releases. Data from the 1980 decennial census have been used to calculate more reliable incarceration rates for minority and Hispanic prisoners than those presented for the late 1970's.

Before 1978, reports in this series focused only on prisoners sentenced to terms of more than 1 year (the "sentenced" population). The reports have been expanded to provide data on the yearend population of inmates with sentences of 1 year or less or with no sentence; however, admission and release data are still restricted to "sentenced" inmates.

Continuing another change made in 1978, this report discusses all prisoners subject to confinement under the jurisdiction of a given correctional system, whether or not they are in its physical custody. Before 1978, reports in this series focused on persons in the physical custody of each system. The impact of this distinction is assessed in Appendix III of *Prisoners in State and Federal Institutions on December 31. 1978.*

The narrative and most charts in this report are based on the tables in Appendix I, which includes a special table showing the number of persons in the custody of State and Federal correctional authorities at yearend 1980. Appendix II includes a statement on the method of data collection and completeness of the response to various sections of the questionnaire, a facsimile of which is also included. Notes explaining the degree of each jurisdiction's conformity with the criteria and definitions of the National Prisoner Statistics (NPS) program are in Appendix III. A special table in Appendix IV shows the number of prisoners in State and Federal institutions at yearend 1925-80.

This annual report is one of a series of reports prepared under the NPS program. Based on voluntary reporting, the program collects and interprets data on inmates in State and Federal correctional institutions. Initiated by the Bureau of the Census in 1926, the program was transferred to the Bureau of Prisons in 1950 and to the Law Enforcement Assistance Administration in 1971. Upon passage of the Justice System Improvement Act in late 1979, the program was placed in the Bureau of Justice Statistics. Since 1972, the data required for the program have been gathered and processed by the U.S. Bureau of the Census.

Introduction

The number of prisoners in the United States grew at an accelerated pace during 1980, reaching a record high of nearly 329,000 on December 31. This was an increase of 5% for the year, more than twice that registered for 1979 and provided evidence of a possible return to the unprecedented growth rates of the mid-1970s (figure 1).

Correctional officials were attempting to cope with the large influx of inmates, but the capacities of many prison systems were often exceeded. At yearend 1980, 28 States and the District of Columbia were under court orders to reduce overcrowding. The number of prisoners held locally because of overcrowding in Ztate institutions declined, but the number of States housing prisoners under this arrangement reached a record high of 17.

The size of the prison population increase in 1980 suggests that the slowing of the growth rate between 1977 and 1979 was a temporary phenomenon linke: to the initial phase of implementation of new sentencing laws enacted during the past few years. Two main types of laws have been enacted; one requires mandatory sentencing for certain crimes; the other, determinate sentencing rather than minimum/maximum terms.

Mandatory sentencing requires that convicted persons be given a term of confinement; determinate sentencing allows for probation, restitution, and other alternatives to incarceration. Both, however, require that sentences to confinement be set for a fixed period, not subject to shortening by parole.

During the past 4 years, mandatory sentencing laws were enacted by 36 States; determinate sentencing laws, by 11 States. These laws are directed mainly at repeat or habitual offenders, persons found guilty of violent crime, those using a weapon in committing a crime, and violators of drug laws.

Experience with fixed sentences so far suggests that they produce longer periods

Figure 1

of confinement than indeterminate sentences, which leave the decision on duration to a paroling authority. The shift from indeterminate to fixed sentencing did not immediately result in prison population growth, but as offenders convicted under the new laws began to remain in prison longer than they would have under indeterminate sentencing, the piling-up effect rapidly increased the number of persons in prison.

Several States cited prison construction or renovation begun in the late 1970's as a major factor in their 1980 increases. In some cases, such new capacity did little more than accommodate current commitments, while not appreciably lessening overcrowding. Higher than average adult resident population increases in sun belt States also were cited as a significant factor in enlarging the prison population.

The prison population at yearend

On December 31, 1980, Federal and State correctional institutions held a record high of 328,695 inmates, an increase of more than 14,000 since yearend 1979.1 This growth continued a general upward trend underway since the beginning of the 1970's, the third of three periods of sustained growth since national figures first became available in 1925 (figure 2). The first coincided with the depression of the 1930's and the second with the post-World War II era up to the early 1960's. Factors underlying the most recent surge, by far the most dramatic, have been the coming of age of the baby-boom generation and rising incarceration rates. In recent years, the application of more rigorous criminal justice sanctions has also been a factor in the rising growth rate.

Growth in the Nation's prison population occurred despite a drop in the number of inmates held under Federal jurisdiction. While 4 of 5 States registered an increase, the most populous States accounted for most of the year's growth, but the highest relative increases were mostly in smaller States.

Third consecutive Federal decline

The number of inmates under Federal jurisdiction fell by almost 8% during 1980. It was the third year in a row in which a decline occurred in this sector. During the 3 years, the number of Federal prisoners dropped from 32,088 to 24,363, an aggregate decline of 24%. This decline results largely from a decision by Federal authorities to concentrate their resources on white-collar crime, leaving the apprehension, prosecution, and confinement of bank robbers, interstate auto thieves, and certain drug offenders to State and local authorities.

Texas: One-tenth of all State prisoners

At yearend 1980, Texas and California each held more prisoners than the whole Federal system. New York and Florida also held more than 20,000 inmates each (figure 3). Together these four States, which held a third of all State prisoners,

Percent cha in States wil prisoners, 1	h more t		
State	Number ol	risoners	Percent
	1979	1980	change
Texas	26,522	29,892	12.7

Georgia	12,106	12,210	0.9
Illinois	11,935	11,899	-0.3
Figure 3			

accounted for 45% of the entire State increase. Texas alone, with nearly 30,000 inmates, housed 10% of the yearend State total and contributed more than a fifth to the year's growth. Officials of that State attributed its huge 13% increase to rapid growth of its general population, longer average prison terms, mandatory sentencing, stricter parole practices, and increased admissions resulting from a new speedytrial law.

For California, growth in the State's general population and increases in the number of persons incarcerated as a result of a 1977 determinate-sentencing law were cited as major factors in the 9% increase in the number of its prisoners. Other important factors in this increase were the ban on probation for certain offenses, mandatory imprisonment for crimes committed with a handgun, and longer sentences for persons convicted of murder.

New York and Florida, with the third and fourth largest prison populations, each reported 5% increases. As in Texas and California, Florida authorities also specified growth in the general population as a key factor in their 1980 increase. Additionally, parole guidelines adopted in 1979 requiring longer sentences for new admissions were also a factor. New York attributes its 5% increase to a new violentoffender law established late in 1979, which has led to mandatory imprisonment and longer sentences, Moreover, some New York inmates with lesser offenses who had received relatively short sentences were required, by the mandatory provisions under which they were sentenced, to serve out their full term without opportunity for early parole as had been the case in previous years.

Among the five States holding less than 20,000 but more than 10,000 prisoners at yearend 1980, all but one, Illinois, registered an increase. North Carolina, with an 8% increase, cited stricter sentencing, hardened public attitudes, and a slowdown in the economy as underlying factors. Three States (Georgia, Michigan, and Ohio) had growth rates of 1% or less. Illinois showed a 0.3% decline. In most of these States, longer sentences and more stringent parole criteria were expected to bring even larger increases in the near future.

Some figures in this report vary slightly from the preliminary data used in the Bureau of Justice Statistics Bulletin, *Prisoners in 1980* (May 1981).

Most States gain prisoners

During 1980, the number of prisoners climbed in 40 States and the District of Columbia; it fell in 10 others. It rose by 15% or more in six States (Arizona, Hawaii, Indiana, Louisiana, Nevada, and North Dakota), two of these States (Indiana and Louisiana) had increases of more than 1,000 inmates (figure 4). North Dakota, the State with the largest relative increase, attributed its 36% growth to high unemployment, a rapidly expanding population, stricter parole guidelines, fewer probations, and the work of a new drug enforcement unit. Indiana's 18% increase was associated with a rise in the number of new court commitments and longer sentences. Nevada's 17% increase was linked to a new policy that requires inmates to serve a minimum of a third, rather than a fourth, of their maximum sentence before parole could be considered. Louisiana, also with a 17% rise, opened two new confinement facilities, imposed longer average sentences, tightened up on parole grants, and seldom used alternatives to incarceration.

Authorities in other States generally explained prison population growth by longer average sentences, stricter parole policies, and fewer probations.

States that recorded decreases in their prisoner populations generally showed modest declines, with only one, New Mexico, having a decrease of more than 5%. In that State, reduced capacity from the massive riot and pillage at the main prison in February 1980 prompted judges to sentence potential minimum-security prisoners to probation rather than confinement. Nine other States (Arkansas, Idaho, Illinois, Kentucky, Maryland, Minnesota, Mississippi, Oregon, and Utah) also

Percent changes in prison population for States with 1980 increases of more than 15 percent Percent change State Percent change State North Dakota -7.0 36.0 Indiana 15.1 17.9 Nevada 16.0 17.4

Figure 4

reported a decline in their inmate populations. Three of those States had shown gains of 10% or more for 1979---Mississippi (21%), Arkansas (15%), and Oregon (10%); only one, Maryland, had registered a loss in 1979.

Per capita rates highest in South

In 1980, the rate of growth in the number of sentenced inmates in the Nation's prisons continued to outpace that of the resident population, although not as rapidly as in the mid-1970's (figure 5).² Between the end of 1979 and 1980, the number of sentenced prisoners per 100,000 persons in the United States rose from 137 to 139, the fourth straight record high.

Consistent with historical patterns, the South led all regions of the country by a wide margin, incarcerating 188 prisoners per 100,000 population, up from its 1979 figure of 187 (figure 6). Although much lower than that for the South, the rates for the other three regions—North Central (109), West (105), and Northeast (87)—

²Throughout this report "sentenced inmates" denotes those with a maximum sentence of more than 1 year, i.e., excluding those with a lesser or no sentence. Inmate-to-population ratios are based on sentenced inmates in order to facilitate comparison with previous years and to facilitate comparison of the six States with combined jail prison systems to the other 44. The District of Columbia, as a wholly urban area, is excluded from the rankings. also rose somewhat over those recorded for 1979.

The number of prisoners per 100,000 population exceeded 200 in seven States, including six in the South: North Carolina (244), South Carolina (238), Nevada (230), Georgia (219), Louisiana (211); Texas (210), and Florida (208) (figure 7). The ratio was less than 50 inmates per 100,000 population in three States (North Dakota, New Hampshire, and Minnesota). The greatest increases in prisoners per 100,000 were in North Dakota (47%), Nebraska (17%), Indiana (16%), and South Dakota (14%); the greatest declines were in New Mexico (-10%), Illinois (-7%), Kentucky (-6%), Mississippi (-6%), and Utah (-6%).

South	187	188
West	103	105

More States with jail-housed prisoners

Despite a gradual decline in the number of State prisoners housed in local jails, the number of States using this method of detention has risen steadily, reaching 17 in 1980 (figure 8). In that year, three States (Kentucky, Oklahoma, and New Mexico) for the first time reported backlogging of prisoners in local jails. As in 1978 and 1979, three States (Alabama, Louisiana, and Mississippi) reported that prisoners in local jails made up more than a tenth of the total prison population under the jurisdiction of State correctional authorities.

States reporting prisoners as being held in local jails because of overcrowding, 1976-80 Percent of total Number of Number of State prisoner Year States prisoners population 1976 7,725 10 31 1977 10 7.048 2.6 12 1978 6.774 15 1979

2.4 2.3 6.497 17 6.360 21

1980 Figure 8 During the 5 years for which data on State prisoners in local jails have been collected, the national total of such prisoners gradually declined from about 7,700 in 1976 to 6,400 in 1980. There was a 2% drop between 1979 and 1980. New York, which reported 263 in 1979, had none in 1980 (figure 9). In 5 of the 14 States with jailed prisoners in both 1979 and 1980, the number decreased by at least 25% during the interval: Maine (85%), Virginia (55%), Montana (50%), Washington (37%), and Maryland (29%). Moderate declines were noted in Michigan, Tennessee, Mississippi, and South Carolina.

The most notable increase in the number of jail-housed State prisoners occurred in New Jersey, where the total rose from 31 in 1979 to 200 in 1980. New Jersey officials attributed this increase to longer sentences and more stringent parole criteria stemming from a new penal code enacted in September 1979. Other increases occurred in Massachusetts (62%), Louisiana (45%), Florida (8%), and Alabama (7%).

The Alabama and Mississippi State prison systems were involved in litigation because of overcrowding and substandard conditions. The Louisiana State penitentiary and several parish (county) jails were involved in similar litigation: authorities there attribute the 45% increase in the jail backlog to a 1975 court order limiting the number of persons that could be held in its facilities. New beds added to the Louisiana State prison stock in 1980 were quickly filled without significantly reducing the backlog.

Unsentenced prisoners and prisoners with short sentences increase

Prisoners with no sentence or short sentences (1 year or less) comprised 4% of the inmate population in 1980. In general, Federal prisoners were more likely than State, and female prisoners more likely than male, to be unsentenced or have a short sentence. However, in 1980 following a 3-year decline, the number of inmates in this category in State institutions increased by 16% (figure 10). More than a third of the State inmates in these categories were being held in the seven where a unified confinement system combines the functions of jails and prisons: Alaska, Connecticut, Delaware, the District of Columbia, Hawaii, Rhode Island, and Vermont.

In addition, California, Illinois, and North Carolina, each with more than 1,000 such inmates, accounted for another third. In California, most of the unsentenced

inmates were narcotics users under civil (noncriminal) commitment held in the California Rehabilitation Center, which also houses sentenced offenders. In North Carolina, adult misdemeanants sentenced to a maximum term of 181 days serve their time in State facilities rather than a local jail. In the Federal system, the vast majority of inmates in this category were aliens convicted of immigration offenses and subject to deportation upon completion of their sentences. Also in this group were a large number of Cuban refugeesbeing held in the Federal penitentiary in Atlanta-who had entered the U.S. with criminal records.

Growth for women narrowly focused

The number of women in State and Federal prisons increased by 2% during 1980. The increase centered on a rise in the number of women with a sentence of a year or less or unsentenced. This group increased by 12.5%, after a 15% decline in 1979. The growth rate for those with sentences of more than a year was a third of that for 1979 (1.2% vs. 3.6%), marking the fifth straight year in which it was lower than in the previous year (figure 11). The total number of women, 13,258, remained relatively small, and their 4% share of the inmate population was unchanged from 1979.

Regionally, the rate of increase in female prisoners was highest in the Northeast (8.4%), followed by the South (4.5%), and the West (2.6%). The number of females decreased by 0.3% in the North Central region. Increases of 25% or more in their female populations occurred in seven States: Rhode Island (53%), Vermont (46%), Connecticut (45%), Kansas (38%), Louisiana (28%), Indiana (26%), and Montana (25%). Substantial increases in the number of females occurred in Arizona (24%), Tennessee (19%), and California (7%).

Blacks overrepresented

Whites comprised a bare majority (51%) of the Nation's prison population, whereas blacks were 46% of the total, nearly 4 times greater than their 12% share of the general U.S. population. The remaining 3% was comprised of American Indians, Alaskan natives, Asians, or Pacific Islanders (1%), and persons whose racial identity was not reported (2%).

Note: Prior to 1978, NPS reports were based on the custody population; beginning in 1978, focus is on the jurisdiction population. Both figures are shown for 1977 to facilitate yearto-year comparisons. *Not applicable.

Figure 11

Proportion of blacks in prison population and U.S. population, 1980

	Prison po	% of U.S.	
Region	Number	Percent	population
United States	141,879	46	12
Northeast	22,768	50	10
North Central	30,128	46	9
South	76,800	53	19
West	12,183	26	5

Consistent with national patterns of racial composition, black inmates were most likely to be held in the South and least likely to be incarcerated in the West (figure 12). However, relative to their share of the general population, blacks in the South were held at a rate that was only 2½ times larger than their proportion of the overall population. Black prisoners in each of the other regions (Northeast, North Central, and West) exceed the proportion of blacks in regional totals by a factor of five.

More than 60% of the inmate population was black in eight jurisdictions: the District of Columbia (97%), Maryland (76%), Louisiana (72%), Mississippi (67%),³ Delaware (63%), New Jersey (63%), Alabama (62%), and Illinois (62%). Blacks comprised more than 20% of the general population in five of these jurisdictions: the District of Columbia (70%), Mississippi (35%), Louisiana (29%), Alabama (26%), and Maryland (23%). In Delaware, Illinois, and New Jersey the proportion of blacks in the general population was 16%, 15%, and 13%, respectively. The proportion of blacks was higher among female than male prisoners in State and Federal institutions, as well as in each of the four regions.

Nationally, the incarceration rate for blacks (567 per 100,000) was more than 6 times that for whites and nearly 21/2 times that for American Indians or

³The 620 inmates whose race was not reported were assumed to be proportionately distributed between blacks and whites.

South	192	547	112	176
West	110	539	94	176

Figure 13

Alaskan natives (figure 13).⁴ The rates for blacks were considerably higher in jurisdictions (such as Minnesota, Wisconsin, and Massachusetts) where blacks resided in small numbers. Within each racial group, the incarceration rate was lower for females than for males; however, the rate for black women was eight times that for whites.

Increased Hispanic coverage

Data on Hispanic origin were available for more than 7 of every 10 inmates nationwide, a proportion slightly higher than in 1979. In all, 40 of the 52 jurisdictions reported information differentiating inmates of Hispanic origin from others during 1980, the third year of data collection.⁵ Of the 40 reporting jurisdictions, six (Colorado, Indiana, North Dakota, Oklahoma, Texas, and Vermont) provided estimates rather than enumerations and five (California, Michigan, New York, Ohio, and the Federal system) submitted data for most, but not all, of their Hispanic prison population.

For the third consecutive year, New Mexico had a higher proportion of Hispanics in its prison population (56%) than any

⁵Not counted among the 40 were two States (Florida and Georgia) which provided Hispanic/non-Hispanic data on only 1% of their inmate populations. other reporting State, followed by Colorado (28%) and Arizona (25%). In each of these three States, the proportion of Hispanics in prison was larger than in the general population: New Mexico (37%), Colorado (12%), and Arizona (16%). Six other States (California, Connecticut, New York, Texas, Utah, and Wyoming) also reported that more than a tenth of their inmate population were Hispanics. As in 1978 and 1979, the proportion of Hispanics among Federal prisoners was more than twice as high (14%), as the proportion of Hispanics in the general population (6%).

Women comprised 3% of the Hispanic inmate population, a proportion slightly less than their 4% representation in the general inmate population. Among reporting States the proportion of female Hispanic inmates was highest (6%) in Arizona and lowest (1%) in Illinois and Michigan,

Among States for which rates could be calculated, the data suggest that Hispanics were more likely than whites and less likely than blacks to be incarcerated.⁶ In the ten States with the largest Hispanic populations, the rates ranged from 253 per 100,000 in New York to 87 per 100,000 in Illinois. As was the case for both blacks and whites, the incarceration rate for females was significantly lower than that for males.

⁴Data on race drawn from preliminary counts in the 1980 decennial census (April 1, 1980) permits the presentation of data on rates of imprisonment with a degree of accuracy not available since the 1970 census. The rates shown in the 1979 issue of this report series were based on general estimates for the population developed using experimental methods by the Population Division of the Bureau of the Census. Comparison of the 1979 figures appearing in that publication with those based on the 1980 Census data indicates that the 1979 rates were reasonably accurate.

[•]Population data from the 1980 decennial census also enabled the calculation of rates of incarceration for Hispanics with a degree of precision unavailable since 1970, but United States and regional incarceration rates for Hispanics could not be calculated, because 12 States, most in the South, were unable to provide a count of Hispanic prisoners. Among these was Florida, which contained the Nation's fourth largest Hispanic population. See Table 10 and Explanatory Notes for additional details on limitations of data pertaining to incarceration rates.

Admissions and releases

During 1980, U.S. correctional institutions reported a total of 182,617 admissions and 169,826 releases, both figures higher than for 1979. At the State level the increase in admissions was nearly 8%, although a number of States greatly exceeded the average. Overall, 39 States and the District of Columbia admitted more prisoners than during 1979; 11 States recorded fewer admissions. Continuing a trend that began in 1978, the number of admissions to Federal institutions declined by 13%.

Admissions increased by nearly a third or more in five States (Alabama, Louisiana, Nebraska, North Dakota, and Vermont). Reasons for increases cited by these States included new mandatory and determinate sentencing laws, a higher rate of violent crime, fewer probations, and a lack of community alternatives to incarceration. North Dakota's increase was linked also to high unemployment, rapid growth in the general population, and a new drug enforcement unit.

Admissions decreased a fifth or more in two States (Mississippi and New Mexico). Under court order to reduce overcrowding, Mississippi cited greater reliance on the use of probation as one reason for the decrease. Similarly, New Mexico reported that increased use of probation after the February riot accounted for a large part of the decrease in their State.

Releases from prison rose 2% nationwide from 1979 to 1980. In State institutions the increase was 5%. In all, 35 States released more inmates during 1980 than 1979; 16 released fewer. As with admissions, the number of releases from Federal institutions declined by nearly a fifth. Federal authorities cited longer stays in prison as a major factor in the decrease.

Rise in admission/release ratio

The ratio of admissions to releases for 1980, at 10.8 to 10.0, was higher than in 1979, ending a downward trend that began in 1976, when the rate of admissions to releases was 11.5 to 10.0 (figure 14). Reflecting the Federal focus on the prosecution of white-collar crime, the ratio for Federal prisons was 8.7 admissions to 10.0 releases. In contrast, State institutions overall admitted 11 inmates for every 10 released. Most States admitted more inmates than they released, with a resultant net increase in population, but 10 States (Arkansas, Connecticut, Delaware, Illinois, Kentucky, Maryland, Minnesota, Mississippi, New Mexico, and Utah) recorded fewer admissions than releases. The admission to release ratio ranged from a low of 8.9 to 10 in New Mexico to a high of 16.7 to 10 in Louisiana.

Escapees/AWOLs account for 1 in 10

Escapees, AWOLs, and returns from these unauthorized absences accounted for approximately 5% of admissions and of departures in both State and Federal institutions during 1980. Criteria for classifying these movements, however, varied so widely among States that differences in data tend to reflect variations in administrative procedures rather than to measure actual breaches of security within a given system. In some States almost any unaccounted for absence warrants one or the other designation; in other States each designation is predicated on the lapse of a specified time. Furthermore, two-thirds of the States and the Federal prison system could not definitively distinguish between the two types.

The following jurisdictions reported departing or returning escapees and AWOLs as making up at least a tenth of both their admissions and releases: Colorado, Iowa, Maryland, Michigan, Oregon, Tennessee, Utah, Vermont, and Washington. In addition, the District of Columbia, Hawaii and Massachusetts indicated that at least 10% of all departures were either escapees or AWOLs, but that fewer than a tenth of admissions involved returns of escaped or AWOL inmates.

Figure 14

New court commitments predominant

New court commitments, that is, persons incarcerated for the first time for a given conviction, accounted for nearly 4 of every 5 inmates admitted to State and Federal institutions during 1980, a proportion slightly higher than that for 1979. The proportion reached 9 out of 10 in five States (Alabama, Indiana, Louisiana, New Hampshire, and Oklahoma) where the admission of new court commitments traditionally is very high.

New court commitments increased by at least a third in six States: Nebraska (56%), Vermont (56%), Alabama (51%), Illinois (42%), Louisiana (40%), and North Dakota (33%). The largest increases in numbers were in Illinois (1,900), California (1,473), Alabama (1,267), Texas (1,202), Ohio (852), Florida (847), Georgia (834), and Louisiana (828). In general, increases in new court commitments were common in States that had enacted mandatory and determinate sentencing statutes, where there were large increases in the general population, and where there was infrequent use of alternatives to incarceration.

In nine States, the number of new court commitments was lower in 1980 than in 1979, but only in Minnesota and New Mexico was it more than 20% lower. In Minnesota, new sentencing guidelines designed to keep persons convicted of property offenses within the community were cited as a factor in the decrease. In New Mexico, the number of new court commitments may be understated due to a backlog in the recording of inmate data following its prison riot.

Returned violators up in Federal sector

Recommitment of parole or other conditional release violators accounted for 16% of admissions to State correctional institutions during 1980—about the same as in 1979. In the Federal sector, there was a slight increase from 9% to 12%. Recommitments of this kind amounted to a fourth or more of all admissions in six States: Minnesota (34%), New Jersey (30%), Washington (28%), Arkansas (27%), Kansas (27%), and New Mexico (25%). Four of these (Arkansas, Minnesota, New Jersey, and Washington) also had reached or exceeded the 25% level in 1979. At the other extreme, the 1980 level

Prisoners in State and Federal Institutions on December 31, 1980 7

was 5% or less in Alabama, Delaware, Louisiana, Oklahoma, and Wyoming, the same States as in 1979 (along with Arizona).

Texas, California, and New York, which together held 25% of all State prisoners, accounted for 29% of the inmates returned for violation of conditional releases. Five other States (Florida, Illinois, Ohio, Michigan, and New Jersey) also had more than 1,000 entrants of this type, accounting for another fourth of all returned State violators. States in which there were large increases (more than 200) in the number of returned violators between vearend 1979 and 1980 included Texas (713), New York (472), California (437), Florida (338), Ohio (302), South Carolina (233), and Virginia (213). Large decreases were noted in Illinois (-454), Michigan (-122), and North Carolina (-111).

Sentencing laws enacted in many jurisdictions during the past 4 years may alter the proportions of the types of admissions to correctional institutions. Mandatory and determinate sentencing both preclude parole, but several States now include some type of supervised release as part of an inmate's sentence. During the same 4 years, 18 States enacted laws that establish minimum parole eligibility dates, which have the effect of lengthening the time an inmate must serve prior to eligibility for parole. In 1980, parole was abolished completely by four States (Illinois, Indiana, Maine, and New Mexico). Transition to these new laws did not affect admissions at the national level in 1980-the full impact will not be evident for several years.

State/Federal means of departure differed

As in previous years, States were more likely than Federal authorities to release inmates conditionally and less inclined to grant unconditional discharges (figure 15).

Releases from State and Federal institutions, by type, 1980								
Type of release	State	Federal						
Conditional	74%	52%						
Unconditional	14	23						
Escapes/AWOLs	5	4						
Other	4	18						
Transfers	2	2						
Deaths	0.4	0.3						

Nearly 75% of State departures were conditional releases, compared with only 50% in the Federal system. Nearly 25% of all Federal releases were unconditional, compared to an average of 14% among States. For State institutions, however, the type of conditional release continued to shift away from parole and toward supervised mandatory release, that is, release required by statute at some point prior to expiration of sentence but subject to supervision while sentence is in force. Among other forms of departure, from both State and Federal institutions, escapes and AWOLs comprised nearly 5%, transfers to other jurisdictions, 2%, and deaths, less than 1%.

Fewer paroles granted

Paroles, traditionally the most common form of release from State institutions, declined from 53% to 51% of all State releases during 1980 (figure 16). Within the Federal prison system, paroles remained at about a third of all releases. Among the States, 30 of the 51 jurisdictions reported that paroles comprised a smaller proportion of releases than they had in 1979.

Despite the gradual decline in usage of parole among the States as a whole, it was still predominant (75% or more of all releases) in 10 States (Arkansas, Minnesota, New Hampshire, New Jersey, North Carolina, North Dakota, Ohio, Oregon, Utah, and Washington). Increases in the number of paroles granted in these States ranged from 45% in Utah down to 5% in North Carolina. Only two in this group (North Dakota and Washington), granted fewer paroles during 1980 than 1979. Among the 20 States where paroles accounted for less than half of all releases, 7 reported that the proportion of inmates

Releases from State institut by type of release, 1979-80		
	Perc	ent
Type of release	1979	1980
Parole Supervised mandatory release Probation Other conditional releases	53 15 3 2	51 17 3 3
Expiration of sentence Commutation Other unconditional releases	14 0.3 1	13 0.4 1
Other releases	12	. 11
Figure 16		

released on parole declined by at least 10%: Alaska, Illinois, Iowa, Mississippi, Nebraska, Vermont, and Wisconsin. None of these except Iowa had recorded a decrease of that magnitude for 1979. In contrast, Hawaii and Missouri, also with relatively low parole usage, reported increases of 10% and 9%, respectively, in the number of paroles granted.

Mandatory releases continue to rise

The proportion of inmates released from State prisons by means of supervised mandatory releases increased 2% in 1980, from 15% to 17%. In the Federal system they accounted for 19% each year. The number of States employing this form of release increased from 16 to 20, with Montana, Nebraska, South Dakota, and Wyoming making use of it for the first time. Increases in this form of release generally occurred in States where parole usage was declining. Among the eight States discharging more than a fifth of their inmates by means of supervised mandatory release, six reported increases of at least 10%: California (24%), Alaska (18%), Virginia (12%), Wisconsin (12%), Texas (11%), and Delaware (10%). California and Virginia used this mechanism for the first time in 1979, as did Texas in 1978. In Illinois this form of release accounted for 57% of all releases, up from 48% in 1979, and in New York it comprised 27% of all departures in both 1979 and 1980.

Probation was used as a form of release in 24 States during 1980, but it accounted for a fifth or more of all releases in only five States (Hawaii, Idaho, Iowa, Kansas, and Vermont). In Hawaii and Vermont, both of which have integrated jail/prison systems, the relatively high rate largely reflected the movement of jail inmates placed on probation without ever being sentenced to confinement.

8 Prisoners in State and Federal Institutions on December 31, 1980

Unconditional releases stable

Sentence expirations, the most common form of unconditional release, accounted for 14% of all discharges from prisons in the United States. The proportion was higher among Federal than State institutions, 22% and 13%, respectively. At the State level, more than a third of all prisoners in Connecticut, Louisiana, Maine, Missouri, Nebraska, Oklahoma, and South Dakota were not released until their sentences had expired. At the other extreme, the proportion was 1% or less in Alaska, Kansas, Kentucky, Ohio, and Washington. Sentence expirations were generally high in States where the use of parole was low.

Inmates who received a commutation, that is, a form of unconditional release reducing the sentence to the amount of time already served, comprised more than 1% of all discharges in only 3 States (Maryland, Massachusetts, and Oklahoma). The granting of 272 commutations in Maryland in December 1980 was explained by State officials as a response to a court order to reduce overcrowding in their prisons.

New Mexico riot raises death rate

A 7% increase in the number of deaths in State and Federal institutions during 1980 was attributable largely to 33 killings that occurred during a major uprising in New Mexico. Of the total 727 deaths that occurred, 573 were classified as to cause. Among these, 60% were attributed to illness or natural causes; slightly more than 20% were caused by another person; 14% were suicides (79 males and 1 female); and 5% resulted from accidental selfinjury. Nearly a third of all deaths reported as caused by another person occurred in New Mexico, most during the riot. Of the 47 jurisdictions reporting deaths, eight (Alabama, Louisiana, Maine, New York, Oregon, Texas, Virginia, and Wisconsin) were unable to specify the cause of all or most of them. Only four reported no prison deaths-Connecticut, Delaware, Rhode Island, and South Dakota.

Largely as a result of the killings in New Mexico's inmate riot, the number of deaths in the Nation's prisons rose from 217 to 221 per 100,000 inmates (figure 17). For the State systems as a whole, the rate

increased from 214 to 226; for the Federal system it dropped from 250 to 164. By deleting New Mexico figures from the State counts for both 1979 and 1980, the overall national figure declined from 217 to 211 per 100,000; for the States, the figure increased only marginally (from 214 to 215).

NOTE: See Appendix II, Questionnaire, for category definitions and Appendix III, Explanatory notes, for State-by-State variations from definitions. ¹Prisoners in local jails are not considered by the State to be under its jurisdiction. For the purposes of this table, however, they are included in the total State prisoner count used to calculate the percentage of State prisoners held in local jails.

NOTE: See Appendix II, Questionnaire, for category definitions and Appendix III, Explanatory notes, for State-by-State variations from definitions. In addition to the 12 jurisdictions which could not provide data on Hispanic origin, 6 reported estimated figure. (Colorado, Indiana, North Dakota, Oklahoma, Texas, and Vermont) and 5 reported Hispanic origin for only a portion of the prison population (California--Mexicans only, Michigan--Mexicans only, New York--Puerto Ricans only, Ohio--custody only, and the Federal system--sentenced inmates only). NA Data not available.

Table 11 (Yearend 1980) Number of Hispanic prisoners under State and Federal jurisdiction per 100,000 Hispanic population, by sex

NOTE: See Appendix II, Questionnaire, for category definitions and Appendix III, Explanatory notes, for State-by-State variations from definitions, *Not definable.

Appendix II Data collection method and questionnaire

Data presented in this report are based on yearend 1979 and 1980 inmate counts and on enumerations of prisoner transactions during 1980. Historical data are taken from earlier studies in the series. Data on race were provided by all jurisdictions and mortality figures by the vast majority (47 of 52). Data on Hispanic origin were submitted by about three-fourths of the respondents, yielding useful, if incomplete, findings. Data differentiating AWOLs from escapees, and parole violators with new sentences from those without new sentences, were slightly improved over last year, but still insufficient to develop analytical findings.

As in past years, data on prisoners were collected with a standard questionnaire transmitted to the appropriate State authorities and the Federal Bureau of Prisons. A facsimile of the questionnaire (NPS-1, Summary of Sentenced Population Movement—1980) follows in this Appendix. The final date for the receipt of information was March 16, 1981. In each jurisdiction, the questionnaire was completed by a central agency reporting for institutions within the correctional system. This procedure also was used by the Bureau of Prisons in supplying data on Federal institutions. Because the information was derived from a complete enumeration rather than a survey, the statistical data are not affected by sampling error.

Response errors were held to a minimum by means of a systematic telephone followup and, where necessary, other control procedures. Thus, the yearend counts generally are considered reliable. Because of the absence of standardized administrative and recordkeeping practices from State to State, detailed in Appendix III, the data for admissions and departures are not always entirely comparable across jurisdictions. Standard NPS definitions are included in the questionnaire, and differences from these definitions observed in individual State responses are noted in Appendix III.

RETURN COMPLETED FORM TO BUREAU OF THE CENSUS Attn: Demographic Surveys Div. Washington, D.C. 20233	(Ple	ase	corre	ecta	ny er	ror ir	nam	e and	d add	Iress	inclu	ıding	ZIP	code	, , ,)*	
		··· .					·									

FROM THE DIRECTOR BUREAU OF THE CENSUS

The Bureau of the Census has been requested by the Bureau of Justice Statistics (BJS), formerly LEAA, to collect data annually on inmates of State prisons. The program, authorized by title 42, United States Code, section 3763, is designed to collect summary data on movements into and out of each system's jurisdiction by adults or youthful offenders whose maximum sentences are greater than 1 year.

The report period covers January 1, 1980, through December 31, 1980. Please complete and return the report by March 16, 1981, to expedite timely publication of the data.

Historically, a major drawback of all national correctional studies has been their inability to provide researchers with comparable data for States due to differing definitions and reporting procedures. Your efforts in using our definitions when completing this form will greatly help in overcoming this deficiency. Where this is not possible, please let us know the specific differences so that we can inform data users.

The figures posted in "1979" columns were transcribed from the NPS-1 report submitted last year.

Should you have any questions regarding the completion of this voluntary report, please call collect for assistance on (301) 763–5082.

Sincerely,

Incentre andle

VINCENT P. BARABBA

INSTRUCTIONS

COVERAGE

In this report, you are asked to report populations and movements of all inmates sentenced to a maximum of at least one year and one day and admitted to or released from the jurisdiction of the State prison system, even though they may be housed in another State or in a Federal institution or in a county facility. For example, you should report the admission or release of prisoners sentenced for offenses in your State but who were housed in another State for safekeeping or the admission or release of women sentenced for offenses in your State but housed in another State because your State does not operate a female facility. You should not report the admission or release of inmates your State was merely housing for other States.

SPECIAL NOTE – Include the populations, admissions, and releases of State inmates held in local jails as a direct result of overcrowding in State facilities only if your State considers these inmates under State jurisdiction while they serve in local jails.

ADMISSIONS

- a. New court commitments Include all inmates who were admitted with all new sentences, that is, these inmates were not readmitted for any sentences. This category includes probation violators entering prison for the first time on the probated offenses. Do not include parole violators with new sentences as new court commitments.
- **b.** Parole violators with new sentences Include all parolees returned with new sentences.
- c. Other conditional release violators with new sentences — Include all conditional releases (other than parole) returned with new sentences, for example, returns from shock probations, from supervised mandatory release, etc.
- d. Parole violators only, no new sentences Include all parolees returned only for formal revocations of parole which were not accompanied by new sentences. If the parole was not formally revoked, that is, the parolee was held only temporarily pending a hearing, no admission occured for NPS purposes.
- e. Other conditional release violators only, no new sentences — As for 2d, substituting conditional release violator for parole violator.
- f. Transfers from other jurisdictions Include all inmates transferred to this State's jurisdiction to continue sentences already in force. Do not report the admission if your State does not acquire jurisdiction. Do not report movements from prison to prison within your State.

ADMISSIONS – Continued

- g. AWOL returns, with or without sentences Include all returns from AWOL, that is, failures to return from authorized temporary absences such as work furlough, study release, mercy furlough, or other authorized temporary absence.
- h. Escapee returns, with or without new sentences Include all returns from escape, that is, unlawful departures from a State correctional facility or from the custody of State correctional personnel.
- i. Returns from appeal/bond Include all inmates reinstated to correctional jurisdiction from long-term jurisdictional absences on appeal or bond. Do not report returns from short-term movements (that is, less than 30 days) to court (that is, where the State retains jurisdiction).
- j. Other admissions Include all other admissions not covered by the above categories. Please specify the nature of these admissions in the "Notes" section on page 4.

RELEASES

Unconditional — An unconditional release occurs only if the released inmate cannot be reimprisoned for any sentence for which he was in prison.

- Expirations of sentence Include all inmates whose maximum court sentences minus credits have been served.
- b. Commutations Include all inmates whose maximum sentences have been changed (lowered) to time served to allow immediate unconditional release.
- c. Other unconditional releases Include all other unconditional releases not covered by the above categories. Please specify the nature of these releases in the "Notes" section on page 4.

Conditional — A conditional release occurs if the released inmate, upon violating the conditions of his release, can be imprisoned again for any of the sentences for which he was in prison.

- d. Probations Include all inmates who have been placed under probation supervision and conditionally released. Include all shock probation releases.
- e. Supervised mandatory releases Include all inmates who must, by law, be conditionally released. This type of release may also be called mandatory conditional release.
- f. Paroles Include all inmates conditionally released to parole. Enter only releases officially entitled "parole."
- g. Other conditional releases Include all other conditional releases not covered by the above categories. Please specify the nature of these releases in the "Notes" section on page 4.

FORM NPS-1 (6-30-80)

Page 5

RELEASES – Continued

Death

- h. Executions Self-explanatory
- i. Ilinesses/natural causes Self-explanatory
- j. Suicides Self-explanatory
- Accidental injury to self Include all inmates who accidentally caused their own deaths (for example, a fall from a ladder, mishandling electrical equipment).
- Death caused by another person Include all inmates whose deaths were caused accidentally or intentionally by another inmate or prison personnel.
- m. Other deaths Include all other deaths not covered by the above categories. Please specify the nature of these deaths in the "Notes" section on page 4.

Other Releases

- AWOLS Include all failures to return from an authorized temporary absence such as work furlough, study release, mercy furlough, or other authorized temporary absence.
- Escapes from confinement Include all unlawful departures from a State correctional facility or from the custody of State correctional personnel.
- p. Transfers to other jurisdictions Include all inmates who were transferred from this State's jurisdiction to another to continue sentences already in force. Do not report the release if your State does not relinquish jurisdiction. Do not report movements from prison to prison within your State.
- q. Releases to appeal/bond Include all inmates released from correctional jurisdiction to long-term jurisdictional absences on appeal or bond. Do not report short-term movements (that is, less than 30 days) to court (that is, where the State correctional system retains jurisdiction).
- r. Other releases Include all other releases not covered by the above categories. Please specify the nature of these releases in the "Notes" section on page 4.

JURISDICTION POPULATION DECEMBER 31

Include all inmates under State jurisdiction on December 31, regardless of location. Do not include other jurisdictions' inmates (for example, inmates from other States, pre-trial detainees) merely housed in your prisons. These inmates, however, are enumerated below in item 6, "Custody Population."

CUSTODY POPULATION DECEMBER 31

Include all inmates in the State's custody, that is, housed in State correctional facilities on December 31. Do not include State inmates housed outside State prison facilities (these are reported under "Jurisdiction Population," item 5, above). Include other jurisdictions' inmates (for example, inmates from other States, the courts, local jails) housed in your State's facilities.

OVERCROWDING DECEMBER 31

Include all inmates housed in local jails on December 31, as a direct result of State prison overcrowding. Do not include inmates held in local jails for other reasons, (for example, work release, court appearance, etc.). Indicate whether or not these inmates are included in the 5d, "Total Inmate Population – Jurisdiction Population December 31," total.

RACE

- (1) White A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.
- (2) Black A person having origins in any of the black racial groups of Africa.
- (3) American Indian or Alaskan Native A person having origins in any of the original peoples of North America, and who maintains cultural identification through tribal affiliation or community recognition.
- (4) Asian or Pacific Islander A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.
- (5) Other Any other race not covered by the above categories. Please specify the races on the form below.
- (6) Not known Any inmate whose race is unknown should be included here.

ETHNIC ORIGIN

- a. Hispanic A person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race.
- Not hispanic A person not covered by the above category.
- c. Not known Any one whose ethnic origin is unknown should be included here.

Appendix III

Explanatory notes

The notes that follow identify deviations from the category definitions used in the 1980 questionnaire, provide details on the content of "other" admission and release categories, and specify revisions to data that should be taken into account when comparing 1979 and 1980 figures, Standard NPS definitions of the categories of admissions and releases are included in the questionnaire, a facsimile of which is provided in Appendix II. Generally, State inmates housed in local jails because of overcrowding are considered to be under State jurisdiction, and only exceptions to this rule are noted. States retaining jurisdiction over inmates housed in local jails are shown in Table 5 of Appendix I. Some States included an adjustment residual in their admission or release figure in order to balance the yearend 1979 count with the yearend 1980 count.

Alabama

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication. Differences between jurisdiction and custody counts for 1980 are due to persons housed in local jails.

New court commitments: Includes some splitsentence violators and some parole violators with new sentences.

Other admissions: Type not specified and an adjustment residual.

Other unconditional releases: Unconditional court-ordered releases.

Other deaths: Causes not known.

Other releases: Type not specified and an adjustment residual.

Alaska

All data include both jail and prison inmates, as prisons and jails form an integrated system. Admission and release figures are estimated based on 1979 data. Differences between jurisdiction and custody counts for 1980 are due to the large proportion of State inmates held in Federal prisons.

Parole violators, with new sentence: Includes parole violators with no new sentences and other conditional release violators with and without new sentences.

Other admissions: Adjustment residual.

Supervised mandatory releases: Includes some (fewer than 5%) expirations of sentence and releases to probation of inmates serving a split sentence. The remainder are supervised releases, many of which convert to probation shortly after discharge.

Hispanic origin: Alaska cannot determine the ethnicity of its population.

Arizona

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication. Differences between jurisdiction and custody counts for 1980 are due to inmates housed in other jurisdictions or community centers and those in hospitals or out on furloughs.

Other conditional releases: Work furloughs. Other deaths: Vehicle accidents. Other releases: Adjustment residual.

Arkansas

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication. *Other unconditional releases:* Unconditional

court-ordered releases. Other conditional releases: Releases under

provisions of the Youthful Offender Act. Other deaths: Inmate murdered while on

furlough.

Other releases: Adjustment residual.

California

Other admissions: Includes transfers from jails, hospitals, and other States.

Other unconditional releases: Court-ordered releases.

Other releases: Includes the net difference between returns from and releases to court. In addition, it includes transfers to jails, hospitals, and other States.

Hispanic origin: Figures for Hispanics include Mexicans only; other Hispanics are included in the figure for non-Hispanics.

Colorado

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication. *Other unconditional releases:* Unconditional

court-ordered releases.

Race: Figures are estimates.

Hispanic origin: Figures are estimates.

Connecticut

All data include both jail and prison inmates, as prisons and jails form an integrated system.

New court commitments: Includes some parole violators and escapees returned with new sentences.

Expiration of sentence: Includes some releases to probation.

Delaware

All data include both jail and prison inmates, as prisons and jails form an integrated system. Persons receiving a split sentence of more than 1 year, part to be served in prison and the remainder on probation, are excluded from the movement data unless the prison portion of the sentence exceeded 1 year, a practice resulting in an understating of movement transactions. Differences between jurisdiction and custody counts for 1980 are due to State inmates held in other State and Federal institutions.

New court commitments: Includes probation violators.

Other unconditional releases: Unconditional court-ordered releases.

Supervised mandatory releases: Includes persons released on probation.

Other releases: Releases to Drug Rehabilitation Center.

Race: Breakdown based on percentages.

Hispanic origin: Delaware cannot determine the ethnicity of its population.

District of Columbia

The District of Columbia had an integrated jail and prison system. Data include unsentenced inmates and those with sentences of 1 year or less, with the exception of those housed in the D.C. Jail or Detention Center. Persons receiving a split sentence of more than 1 year, part to be served in prison and the remainder on probation, were excluded from movement data unless the prison portion of the sentence exceeded 1 year, an omission resulting in an understating of such transactions.

Parole violators with and without new sentences and other conditional release violators with and without new sentences. The total number of violators is accurate, but the breakdown by type is estimated from 1978 figures.

Transfers to and from other jurisdictions: Transfers to and from mental hospitals and Federal facilities.

Escapees and A WOLs returned: May include some sentenced to 1 year or less.

Other admissions: Adjustment residual. Expirations of sentence: Includes supervised

mandatory releases with fewer than 180 days remaining on their sentences. Such persons are not considered to be subject to the conditions normally attached to this type of release.

Supervised mandatory releases: Includes only those supervised mandatory releases with 180 days or more remaining on their sentences.

Race: Estimates based on 1978 data.

Hispanic origin: The District of Columbia cannot distinguish the ethnic composition of its population.

Florida

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication.

Other conditional releases: Reinstated paroles.

Other unconditional releases: Includes 128 inmates whose entire sentence was vacated, 2 given a full pardon, and 171 releases and 4 terminations by the Florida Parole and Probation Commission.

Releases to appeal or bond: Estimates based on the total population for December 31, 1980.

Race: The other category consists of those who answered Latin in response to the ethnic question.

Hispanic origin: Hispanic breakdown estimated from a special count taken in August 1980, The Hispanic category consists of Cubans and the non-Hispanic category is comprised of Haitians.

44 Prisoners in State and Federal Institutions on December 31, 1980

Georgia

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication.

Parole violators returned with new sentences: Includes parole and other conditional release violators returned with and without new sentences.

Other admissions: Type not specified.

Other unconditional releases: Sentences overturned by the court and releases due to paid fines.

Transfers to other jurisdictions: Transfers to other States to serve time on sentences in other States.

Hispanic origin: Georgia cannot determine the ethnicity of its population.

Hawaii

Data include both jail and prison inmates, as prisons and jails form an integrated system. Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication. Differences between jurisdiction and custody counts are due to inmates on short-term furloughs and in the custody of the Federal prisons.

Probation: Inmates whose sentences were reevaluated within 60 days of commitment and modified to probation.

Other conditional releases: Type not specified.

Inmates with 1 year or less maximum sentence: Includes persons convicted of felony offenses and sentenced to 5 years probation, up to 6 months of which may be spent in jail. Race: Data available only for sentenced

inmates. "Other" includes American Indians.

Hispanic origin: Hawaii cannot determine the ethnicity of its population.

Idaho

Other admissions: Returns from agreement on detainers.

Other unconditional releases: Releases because of acquittal or dismissal of sentence.

Other releases: Releases to agreement on detainers.

Unsentenced inmates (custody count): Civil commitments held for psychological testing and evaluation.

Illinois

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication. Differences between jurisdiction and custody counts are due to inmates housed in other States, Federal facilities, or inmates out to court.

Other conditional release violators, no new seniences: Includes mostly supervised mandatory release violators.

Other admissions: Adjustment residual.

Other unconditional releases: Includes courtordered releases, status discharges, and technical discharges.

Other conditional releases: Includes conditional court-ordered releases.

Other releases: Adjustment residual.

Indiana

Data on race, Hispanic origin, and probations are estimates.

Other conditional release violators with new sentences: Includes parole, probation as part of a split sentence, and probation violators with or without new sentences.

lowa

None.

Kansas

None.

Kentucky

Other conditional release violators returned without new sentence: Includes some shockprobation violators returned with new sentences.

Other admissions: Parole violators.

Probation: All probation releases are shock probation.

Louisiana

Differences between jurisdiction and custody counts are due to persons housed in local jails. Other unconditional releases: Court-ordered

releases. Other deaths: Cause not known,

Maine

Total admissions and releases are estimated from the sex-specific increase or decrease in yearend figures. Breakdown by type of movement is based on 1979 data. Breakdown of jurisdiction count by sentence length is based on 1979 data. Differences between jurisdiction and custody counts are due to persons housed in local jails, in hospitals, in other States, or at home on work-release.

Other admissions: Adjustment residual. Other deaths: Cause not known. Other releases: Adjustment residual.

Race: Estimates based on 1979 data.

Maryland

All data include inmates (approximately 6 percent of total) sentenced to a maximum of 1 year or less.

New court commitments: Includes parole and other conditional-release violators with new sentences and returns from appeal or bond. *Expiration of sentence:* Figures are estimates, because expiration and supervised mandatory release are considered one category.

Supervised mandatory release: Figures are estimates, because expiration and supervised mandatory release are considered one category.

Race: Figures are estimates. Hispanic origin: Maryland cannot determine

the ethnicity of its population.

Massachusetts

Differences between jurisdiction and custody counts are due to persons housed in local jails. *New court commitments:* Includes parole violators returned with new sentence.

Michigan

Other conditional releases: Pre-parole furloughs.

Other deaths: Cause not known.

Other releases: Adjustment residual.

Other races: Includes Mexican-Americans

and some persons whose race is not known. *Hispanic origin:* Only persons of Mexican descent are included.

Minnesota

None.

Mississippi

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication. Differences between jurisdiction and custody counts are due to persons housed in local jails.

Other conditional releases: Includes work releases and supervised mandatory releases.

Other releases: Adjustment residual.

Missouri

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication. *Other admissions:* Admissions from halfway

houses.

Other releases: Releases to halfway houses. Race: Figures are estimates.

Hispanic orîgin: Missouri cannot determine the ethnicity of its population.

Montana

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication. Differences between jurisdiction and custody counts are due in part to 10 female inmates held

in Nevada and one housed in a local jail. Other unconditional releases: Court-ordered releases.

Nebraska

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication. *Other admissions:* Adjustment residual.

Nevada

Differences between jurisdiction and custody counts are due to Nevada's inmates held in other States as well as out-of-State inmates housed in Nevada.

Other unconditional releases: Unconditional court-ordered releases.

New Hampshire

Differences between jurisdiction and custody counts are due to persons housed in other States.

Parole violators returned without new sentence: Includes inmates returned without a new sentence at the time of admission but who subsequently received a new sentence.

Other unconditional releases: Unconditional court-ordered releases.

New Jersey

Jurisdiction figures exclude 200 males held in local jails to ease overcrowding. Differences between jurisdiction and custody counts for 1980 are due to 12 New Jersey inmates held in other States and nine from other States held in New Jersey.

Other deaths: Offender killed by corrections officer during an escape attempt.

New Mexico

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication. Differences between jurisdiction and custody counts for 1980 are due to inmates held in other States since New Mexico's State penitentiary riot.

New court commitments: May be understated because of a data recording backlog.

Deaths caused by another person: Thirty three of the 39 deaths were inmates killed during prison riot.

New York

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication.

Transfers from and to other jurisdictions: Includes transfers from and to the Department of Mentai Hygiene.

Other releases: Releases of inmates determined not to be State commitments after having been received as new court commitments.

Race: Figures are estimates. "Not known" comprises American Indians and Orientals.

Hispanic origin: Only Puerto Rican inmates are included; all other Hispanic inmates are included in the non-Hispanic category.

North Carolina

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication. Differences between jurisdiction and custody counts are due to persons held for safekeeping and presentence diagnosis. Persons receiving partially suspended sentences of more than 1 year, part to be served in prison and the remainder on probation, were excluded from the movement data unless the prison portion of the sentence exceeded 1 year, an omission resulting in an understating of movement transactions.

Parole violators with new sentences: Includes parole violators without new sentences.

Other admissions: Adjustment residual. Expiration of sentence: Includes some com-

mutations (fewer than 10%). Releases to appeal or bond: Unconditional

court-ordered releases. May contain some overturned convictions for which no new trial was held.

Race: "Other" is comprised of inmates whose race was not known.

North Dakota

Differences between jurisdiction and custody counts are due to Federal prisoners held in North Dakota institutions.

Other conditional releases: Court-ordered releases.

Race: Figures are estimates, Hispanic origin: Figures are estimates.

Ohio

Differences between jurisdiction and custody counts are due to inmates living in halfway houses, reintegration centers, and those incarcerated outside the State, but for whom the State retains jurisdiction.

New court commitments: Includes some "other conditional release violators with new sentences."

Transfers from and to other jurisdictions: Transfers from and to mental hospitals.

Other unconditional releases: Sentences vacated by court.

Other conditional releases: Extended medical furloughs and pre-parole furloughs.

Deaths: Deaths classified as due to "illness or natural cause" include a small number of deaths attributable to unknown causes.

Race: Figures are estimates.

Hispanic origin: Based on custody population only.

Oklahoma

It is estimated that some 99% of all inmates are sentenced to more than 1 year; therefore all prisoners are allocated to this category.

Parole violators without new sentences: Includes parole violators who may have received new charges but had not been tried or

convicted at the time of reception. Expiration of sentence: Includes shock

probations.

Race: Figures are estimates. Hispanic origin: Figures are estimates.

Oregon

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication.

Escapes from confinement and escapee returns with or without new sentences: Excluded from movement transactions,

Other deaths: Cause not known.

Unsentenced inmates (custody counts): Parole violators awaiting new sentences.

Pennsylvania

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication.

Other admissions: Inmates received from other authorities.

Other releases: Adjustment residual.

Total admissions and total releases: Includes some inmates admitted and released with unknown sentence lengths.

Hispanic origin: Pennsylvania cannot determine the ethnicity of its population.

Rhode Island

All data include both jail and prison inmates, as prisons and jails form an integrated system. Persons receiving a partially suspended sentence of more than 1 year, part to be served in prison and the remainder on probation, were excluded from the movement data, unless the prison portion of the sentence exceeded 1 year, an omission resulting in an understating of movement transactions.

Other admissions: One male paroled illegally, who was returned to prison to complete his sentence.

South Carolina

Differences between jurisdiction and custody counts are due in part to persons housed in local jails to ease overcrowding.

Other unconditional releases: Includes unconditional court-ordered releases.

Other releases: Adjustment residual. Hispanic origin: South Carolina cannot determine the ethnicity of its population.

South Dakota

Differences in jurisdiction and custody counts for 1980 are due to out-of-State inmates and Federal prisoners held in South Dakota.

Other unconditional releases: Unconditional court-ordered releases.

Tennessee

All movement counts include persons sentenced to exactly 1 year, resulting in an overstatement of movement transactions. Differences between jurisdiction and custody counts are due in part to persons housed in local jails.

Parole violators without new sentences: Includes parole violators with new sentences.

46 Prisoners in State and Federal Institutions on December 31, 1980

Other conditional release violators without new sentences: Includes jail cases returned to prison.

Other unconditional releases: Unconditional court-ordered releases.

Other conditional releases: Includes jail cases released to jails because of overcrowding. Other deaths: Drug overdoses.

Other releases: Includes 35 female releases of an unspecified type and an adjustment residual.

Hispanic origin: Tennessee cannot determine the ethnicity of its population.

Texas

All data are custody figures, as jurisdiction counts were not provided.

Parole and other conditional release violators with new sentences: Includes parole and other conditional release violators without new sentences.

Other admissions: Adjustment residual. Other unconditional releases: Unconditional

court-ordered releases. Other conditional releases: Conditional

pardons.

Other deaths: Cause not known.

Other releases: Adjustment residual.

Hispanic origin: Figure is estimated at 18% of inmate population.

Utah

Other unconditional releases: Terminations of sentence by Board of Pardons.

Vermont

All data include both jail and prison inmates, as prisons and jails form an integrated system. All admissions are estimates based on 1979 figures.

Other unconditional releases: Unconditional court-ordered releases.

Other conditional releases: Includes courtordered amended sentences with release to a

special probation-supervision. Race: Figures are estimates.

Hispanic origin: Figures are estimates.

Virginia

Differences between jurisdiction and custody counts for 1980 are due to persons held in local jails and those housed in other States.

Parole violators with new sentences: Includes parole violators without new sentences as well as supervised mandatory release returns.

Transfers from and to other jurisdictions:

Includes transfers from and to mental hospitals. Other conditional release violators without new sentences: Includes inmates for whom any

change in sentence was unknown. Other unconditional releases: Absolute

pardons.

Other deaths: Cause not known.

Other releases: Type not specified.

Hispanic origin: Virginia cannot determine the ethnicity of its population.

Washington

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication. All jurisdiction counts exclude 85 males housed in local jails to ease overcrowding.

Other conditional releases: Unspecified conditional releases granted by agencies other than the State Board of Prison Terms and Paroles.

Other races: Includes two persons with multiracial heritage as follows: one white/black/ American Indian/ Mexican and one American Indian/ Filipino/ Hawaiian.

West Virginia

Other unconditional releases: Unconditional court-ordered releases.

Other conditional releases: Includes nine conditional court-ordered releases, five releases due to medical respite, two conditional pardons, and two releases to medical hospitals.

Other releases: Includes persons returned to court jurisdiction after being declared unsuited to serve at a particular minimum security institution.

Wisconsin

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication.

Other admissions: Includes voluntary returns from parole and mandatory release, return pending revocation of parole, return from mandatory release pending revocation, alternative to revocation, and three errors of admission.

Other unconditional releases: Includes courtordered releases.

Other deaths: Cause not known.

Other releases: Two errors of admission that were released.

Total inmate population (jurisdiction count): Includes escapees.

Wyoming

Yearend jurisdiction counts for 1979 are revised from those reported in the 1979 publication. Differences between jurisdiction and custody counts are due to inmates held in other States.

Federal Bureau of Prisons

Persons receiving a split sentence of more than 1 year, part to be served in prison and the remainder on probation, are excluded from 1979 and 1980 counts for those with maximum sentences of more than 1 year unless the prison portion of the sentence exceeded 1 year, a practice resulting in an understating of these counts. Such persons (totaling 445 on December 31, 1980) are included in the count of inmates with maximum sentences of 1 year or less.

New court commitments: Includes "other conditional release violators with new sentences."

Parole violators with new sentences: Figures are estimates based on new court commitments.

Other unconditional releases: Includes 194 unconditional court-ordered releases.

Other deaths: Includes two deaths caused by accidents.

Other releases: Adjustment residual. Consists for the most part of persons granted a temporary release which was followed by an ultimate release.

Race: Data available only for sentenced inmates.

Hispanic origin: Data available only for sentenced inmates.

Appendix IV Historical series

The following table shows the yearend counts for the number of prisoners in State and Federal institutions as collected by the National Prisoner Statistics (NPS) Program and published annually in the National Prisoner Statistics Bulletins, *Prisoners in State and Federal Institutions* on December 31. These counts should be viewed as providing an order of magnitude for the U.S. prisoner population, inasmuch as the definition of the prisoner population varies widely from State to State and may also vary within States from year to year. To aid in interpretation of these data, users are encouraged to review the notes at the end of the list for general information on comparability and those in the annual bulletins for specific details on the degree of conformity to NPS definitions, since these definitions change over the years as well as the individual States' interpretation of these definitions and reporting procedures.

Special table.

Number and rate per 100,000 population of sentenced¹ prisoners in State and Federal institutions

Yearend			Number			Rate per 100,000 population				Yearend			Number			Rate per 100,900 population

1952			168,233			109				1980			314,272			139

Note: The count, until 1977, was limited to those prisoners remanded to the <u>custody</u> of the State or Federal adult correctional system. Beginning in 1977, the count includes all persons under the <u>jurisdiction</u> of the individual correctional systems. Examples of inmates under the jurisdiction of a given system, but not under its custody, are those housed in local jalls, in other States, or in lospitals (including mental health facilities) outside the correctional system; immates out on work release, furlough or bail; and

State prisoners held in Federal prisons or vice versa. Figures for both the custody and jurisdiction populations are given for 1977 in order that 1977 can be compared with both previous and subsequent years.

¹Over the years, the sentenced prisoner population has been variously defined to include "felons age 18 and over," "adult felons," "prisoners sentenced to a maximum term of at least a year and a day," and since 1978, "prisoners sentenced to over 1 year."

NCJRS REGISTRATION

The National Criminal Justice Reference Service (NCJRS) abstracts documents published in the criminal justice field. Persons who are registered with the Reference Service receive announcements of documents in their stated fields of interest and order forms for free copies of Bureau of Justice Statistics publications. If you are not registered with the Reference Service, and wish to be, please provide your name and mailing address below and check the appropriate box.
