PREFACE

We thank all of the Law Enforcement agencies in the state who participated in the Uniform Crime Reporting Program during 1979. Without their support this publication and other publications mentioned in this report would not be possible.

We dedicate this publication to all men and women in the law enforcement community who risk their lives each day to protect us and our property.

ARKANSAS UNIFORM CRIME REPORTING PROGRAM

GOALS

While many purposes and objectives for a Uniform Crime Reporting (UCR) program can be stated, the primary goals of the Arkansas UCR program are:

1. To collect, verify, and analyze statistical data reported by law enforcement agencies in Arkansas.
2. To provide data for use by law enforcement agencies in administrative and operational assessments, preventive measures and evaluation of criminal justice programs, and manpower assessments.
3. To provide data for agencies throughout the state that are interested in the criminal justice system.
4. To give an overview of crime in Arkansas on a statewide basis, as well as selected data on local levels; to examine the nature of crime in Arkansas with its magnitude and trends; to provide this information to the above agencies and to the public.
5. To furnish Arkansas' Uniform Crime Reporting data to the Federal Bureau of Investigation.

In this annual report, definitions will be given where they are considered to be of most value to the reader, rather than in the introductory section.

HISTORY OF UCR IN ARKANSAS

The Arkansas Crime Information Center was created in 1971 under the name of the Criminal Justice and Highway Safety Information Center pursuant to Arkansas General Act 286. The agency was transferred to the Department of Public Safety in 1975 by Act 742 and received its present name (ACIC) under Act 375 of 1979.

In outlining agency responsibilities, regarding crime statistics, the statute states: "The Center shall collect data and compile statistics on the nature and extent of crime. . .in Arkansas and compile other data related to planning for and operating criminal justice agencies. . .the Center shall also periodically publish statistics. . .and report such information to the Governor, the General Assembly, federal, state and local criminal justice agencies, and the general public." Ark. Stat. Ann. §5-1102.

One component of the total Crime Information System is Uniform Crime Reporting (UCR). The responsibility for the collection of UCR data was assumed for the state by ACIC on January 1, 1974. Prior to 1974, Arkansas law enforcement agencies submitted UCR data directly to the Federal Bureau of Investigation. The data collected under the current program is more descriptive of the entire state, offers training and assistance locally, verifies reports, and makes data analyses responsive to local needs. The data collected by the Arkansas Uniform Crime Reporting Program are forwarded to the Federal Bureau of Investigation for inclusion in national crime statistics.

REPORTING PROCEDURE AND VERIFICATION

Law enforcement agencies, including municipal police departments, county sheriff's offices, and university campus security officers, send data to ACIC monthly. These reports comprise the data for:

1. Selected offenses reported to or discovered by, the submitting agency.
2. Type and value of property stolen and recovered.
3. Supplementary homicide information.
4. Law enforcement officers killed or assaulted.
5. Arrests of adults (including age, sex, race information).
6. Arrests of juveniles—under 18 years of age (including age, sex, race information).

These reports are checked for uniformity and accuracy. When a question arises concerning submitted data, the agency is contacted for verification or correction. When minor changes are made, the reporting agency is notified for correction of its copy.

SCOPE OF UCR

Crime is separated into Part I and Part II offenses for UCR reporting purposes.

On a monthly basis, the number of offenses verified by law enforcement agencies for Part I crimes is reported. Related supplementary information is also submitted. Arrest data is reported for Part I and Part II offenses. The number of law enforcement employees are reported on an annual basis.

PART I CRIMES:¹

1. Criminal homicide
 - a. Murder and non-negligent manslaughter
 - b. Manslaughter by negligence
2. Forcible rape
3. Robbery
4. Aggravated assault
5. Burglary
6. Larceny
7. Motor vehicle theft

PART II CRIMES:²

8. Other assaults, non-aggravated
9. Arson
10. Forgery and counterfeiting
11. Fraud
12. Embezzlement
13. Stolen property: buying, receiving, possessing
14. Vandalism
15. Weapons: carrying, possession, etc.
16. Prostitution and commercialized vice
17. Sex offenses
18. Narcotic drug law violations
19. Gambling
20. Offenses against family and children
21. Driving under the influence
22. Liquor law violations
23. Drunkenness
24. Disorderly conduct
25. Vagrancy
26. All other offenses (except traffic)
27. Suspicion
28. Curfew and loitering law violations (juvenile)
29. Runaways (juvenile)

¹Definitions for these offenses are given in the sections devoted to analysis of each offense.

²Definitions for these offenses are given in the section devoted to arrest data.

CRIME INDEX

It is the Crime Index offenses which are widely publicized by the news media and which are often used to assess the criminality of a given locale. The seven selected offenses (Crime Index) used to measure the extent, fluctuation, and distribution of crimes are:

VIOLENT CRIMES

1. Murder
2. Forcible rape
3. Robbery
4. Aggravated assault

PROPERTY CRIMES

5. Burglary
6. Larceny
7. Motor vehicle theft

The Crime Index offenses differ from Part I offenses in that manslaughter by negligence is not included in the Index.

Crime Rates for a given locale are established based upon the Crime Index offenses. The crime rate is one of the most often quoted crime statistics. This rate is a number representing the number of offenses (Index) in a year per 100,000 population. This number is obtained by:

$$\frac{(\text{Number of Index Offenses})}{(\text{Population})} \times 100,000 = \text{CRIME RATE}$$

For example, the Arkansas crime rate for all index offenses in 1979 is 3,682 per 100,000 population. This particular rate is based on all offenses reported statewide and a population of 96.6% of 2,179,800. This adjusted population is the average population covered by UCR reporting on a monthly basis.

Crime Trends for a given locale are stated as a percent change over a comparable previous period. A negative percent would denote a decrease. Crime trends are generally established using only data from agencies with 12 months' reporting for two years. In this report, however, raw data from all agencies will be used to establish percent changes. (e.g. Robbery in Arkansas for December 1979 was -32% as compared to December 1978. There were 24 more agencies reporting data in December 1979 than 1978.)

STATISTICAL FEEDBACK

While the information reported by law enforcement agencies is collected and analyzed by ACIC, one of the primary objectives of the UCR program is to provide reliable and meaningful data to the reporting agencies.

It is a function of ACIC to furnish statistical feedback to the reporting agencies and to other agencies interested in the criminal justice system. Current feedback includes the following:

1. Monthly: Crime Info, a report giving statewide totals and trends (percent changes) for Index Offenses. Data used in these trends are from agencies which reported for both the current and previous year. Year-to-date totals and trends for all agencies are also included.
2. Quarterly: Crime Info, a report giving the same information as a monthly Crime Info plus year-to-date totals on arrests and the type and value of property stolen and recovered.
3. Annually: Crime In Arkansas, a comprehensive report of statewide and local crime data, beginning with this publication.

Rape In Arkansas, a comprehensive report of statewide rape data collected as a supplement to the UCR program.

Crime In Arkansas by Population Groupings, a report detailing significant crime data in sections according to population. This report is used mainly by law enforcement administrators.
4. Special Reports: Reports requested by state, county, and municipal agencies involved in the criminal justice system.

Reports requested by the news media.

All other special data requested from various sources.

LIMITATIONS OF UCR AND DATA COMPARISONS

While Uniform Crime Reporting is the best source of data available at the present time, it has been subject to much criticism during its history. Many of these commentaries are valid. The criticism is weakened when it is remembered that the program was developed to furnish information for use primarily by law enforcement agencies.

The obvious reaction to a publication of this sort is to make comparisons of data between jurisdictions, whether they be intrastate, regional, interstate, or national. Caution should be exercised for the many reasons which will become apparent as the reader continues through this publication. Comparisons may not be significant because of the great variety of factors which affect the extent and fluctuation of crime and which are not taken into consideration in either raw data or crime rates. All crimes are considered "equal" in computing crime rates. One murder affects a crime rate the same as one larceny. Another facet which limits comparisons is contributor history. The average number of reporting agencies in Arkansas has increased 11% from 1978 to 1979. The population coverage increased from 93.7% to 96.6%.

The Uniform Crime Reporting programs are designed to measure offenses reported and persons arrested. Difficulty will arise if this distinction is not kept uppermost in mind. Crime relates to events, but arrest relates to persons, and this is not a one-to-one correspondence. Crime (or offense/event) data are only collected for Part I offenses. The type and value of property stolen is requested only for Part I offenses. The number of arrests according to age, sex, and race is the only information submitted for Part II offenses. There is an obvious information gap here. It should be noted that in the event of "multiple offenses" in one situation, only the "most serious" is counted for UCR purposes. Again, the Uniform Crime Reports are the best information available, while no claim is made that they represent "all crime" or any set portion of it.

ARSON

The Congress of the United States has designated arson as a Part I crime and determined that it should be included in Crime Index. Because the state started collecting arson offense data late in 1979, only limited data will be included in this annual report.

CRIME FACTORS

There are inherent limitations in current crime reporting practices. Of primary importance is the question of how much crime is being reported. Law enforcement agencies are only capable of reporting crimes known to them. In many instances, citizens do not report crimes directly to these agencies but may report them to the prosecuting authorities. A considerable volume of crime is not reported to law enforcement agencies because the victims

may consider the offenses against them to be of very little consequence; they believe there is nothing the police can do about them; they fear retaliation from offenders; or have shared willingly in such offenses as illegal sex acts, gambling or drug usage. Consequently, information concerning some offenses is never entered in the present statistical reporting system.

The information collected for this report is the most accurate crime information currently available in Arkansas. Caution should be exercised, however, in making direct comparisons of crime and arrest data reported by different law enforcement jurisdictions. Likewise, when comparing offense and arrest data, the reader should keep in mind that crimes relate to events while arrests relate to persons. A single criminal act may involve several crimes, several offenders, and several victims.

Set forth below are some additional conditions which will, by type and volume, affect the crime that occurs from place to place. These same conditions will also affect the amount of crime actually reported.

1. Density and size of the community population and metropolitan areas of which it is a part.
2. Composition of the population with reference particularly to age, sex, and race.
3. Economic status and mores of the population.
4. Relative stability of population including commuters, seasonal, and other transient types.
5. Climate, including seasonal weather conditions.
6. Educational, recreational, and religious characteristics.
7. Effective strength of the police force.
8. Standards governing appointment to the police force.
9. Policies of the prosecuting officials and the courts.
10. Attitude of the public towards law and enforcement problems.
11. The administrative and investigative efficiency of the local law enforcement agency including the degree of adherence to crime standards.

Current methods of gathering and reporting offense and arrest data, because they are influenced by many variables, provide a less than complete picture of criminality in our society. However, despite these shortcomings, there is at present no other information system available that will more adequately perform this task.

The five largest law enforcement jurisdictions in Arkansas, representing 19.2% of the state's population, accounted for 41.8% of the Index Crime for 1979. The law enforcement agencies representing populations of more than 60,000 each are:

Fort Smith Police Department
Little Rock Police Department
North Little Rock Police Department
Pine Bluff Police Department
Pulaski County Sheriff's Office

MURDER

Murder is defined in Uniform Crime Reporting as the willful killing of another. The classification, as in all of the other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body.

Deaths caused by negligence, suicide, accident, or justifiable homicide are not included in the count for this offense classification. Attempts to kill or assaults to kill are counted as aggravated assaults and not as murder.

In 1979 there were 194 murders in Arkansas with seven additional justifiable homicides. This a 1.6% increase in actual numbers and a 1.1% decrease in the rate per 100,000 since 1978. Approximately 79% of these murders occurred in a one victim/one offender situation.

Murder accounted for 0.3% of the total Crime Index and 2.5% of the Violent Crime Index. The five largest law enforcement jurisdictions in the state (representing populations of more than 60,000 each) accounted for 30% of all murders.

RAPE

Forcible rape, as defined under this program, is the carnal knowledge of a female through the use of force or the threat of force. Assaults to commit forcible rape are also included; however, statutory rape (without force) is not counted in this category.

There were 587 forcible rapes in Arkansas during 1979. This is a 21% increase in actual offenses and an 18% increase in the rate per 100,000 since 1978.

Rape accounted for 0.8% of the total Crime Index and 7.5% of the Violent Crime Index. The five largest law enforcement jurisdictions in the state (representing populations of more than 60,000 each) accounted for 55% of all rapes.

ROBBERY

Robbery is the taking of property or things of value from a person by use of force or threat of force. Assault to commit robbery and attempts are included. This is a violent crime and frequently results in injury to the victim.

There were 1608 robberies in Arkansas in 1979. Robberies represented 2.1% of the Crime Index and 20.5% of the Violent Crimes. The five largest law enforcement jurisdictions (representing populations of more than 60,000 each) accounted for 64% of all robberies.

Firearms were used in 59% of the robberies. The average dollar value stolen during a robbery was \$446. Street robberies accounted for nearly 34% of all robberies.

1. The number in parentheses following an agency name indicates the number of months that data were reported. No number indicates 12 months of data were submitted.
2. NON REPORTING means the agency did not report any data for the year.
3. The crime rate per 100,000 is an annualized figure on all jurisdictions with less than 12 months data.
4. The 1979 population estimates were obtained from the FBI-UCR Section and the U.S. Census Bureau.
5. The population total given for the state is for agencies reporting. The actual estimate for 1979 was 2,179,800.

LAW ENFORCEMENT OFFICERS ASSAULTED

One death by accident or negligence and three hundred (300) assaults on sworn officers in Arkansas were reported to the Uniform Crime Reporting Program.

The activity of law enforcement officers resulting in the greatest number of assaults upon these officers was in responding to "disturbance" calls. Second in incidence was attempting arrest, other than burglary or robbery. Third was in handling, transporting, and custody of prisoners. These three activities accounted for over two thirds of all reported assaults upon law enforcement officers (69%).
