Wateree River Correctional Institution, Warden-
Jerald J. Thames
Women's Correctional Center, Warden Louisa D. Brown

ORGANIZATION OF THE SOUTH CAROLINA DEPARTMENT OF CORRECTIONS

The South Carolina Department of Corrections (SCDC) is the administrative agency of South Carolina state government responsible for providing food, shelter, health care, security and rehabilitation services to all adult offenders, age 17 and above, convicted of an offense against the State and sentenced to a period of incarceration exceeding three months. As of June 30, 1978, SCDC had custody over 7,597 incarcerated adult inmates, of whom 781 are serving an indeterminate sentence under the Youthful Offender Act. This Act provides indeterminate sentences of one to six years for offenders between the ages of 17 and 21 (extended to 25 with offender consent) placing them under the SCDC's Youthful Offender Division. In addition to the incarceration of the youthful offenders, this division is also responsible for their parole decisions and supervision. There were 961 youthful offenders on parole and under SCDC supervision in the community as of June 30, 1978. Parole decisions pertaining to, and supervision of, adult offenders are generally the responsibilities of the South Carolina Probation, Parole and Pardon Board except for those sentenced under the Youthful Offender Act.

SCDC is headed by a Commissioner who is responsible to the State Board of Corrections, a six-member board appointed by the Legislature with the Governor serving as an ex officio member. The Commissioner has overall responsibility for the agency, supervising all staff functions and insuring that all departmental policies are practiced and maintained. Under the immediate supervision of the Office of the Commissioner are the Divisions of Inspection, Inmate Relations, and Internal Affairs, the Legal Advisor, the Public Information Director and Special Projects.

To assist the Commissioner in system operations and program administration are three Offices headed by Deputy Commissioners and seventeen Divisions supervised by Directors, as follows:

The Office of the Deputy Commissioner for Administration has major responsibility for coordinating all departmental activities pertaining to the Divisions of Planning and Research, Management Information Services, Correctional Industries, Finance and Budget, Personnel Administration and Staff Development.

The Office of the Deputy Commissioner for Operations is responsible for managing security, safety and statewide logistical opera-

¹ The provisions of this Act are summarized in Appendix B, Page 65.

tions and providing support for treatment/rehabilitative programs and services. Under the supervision of this Office are the Divisions of Classification, Regional Operations, Support Services, Engineering and Maintenance, Construction, and Safety and Health Facility Inspection Services. All SCDC institutions/centers are under the Division of Regional Operations. Regionalized facilities operate under the supervision of Γ rional Administrators, while non-regionalized facilities operate under the direct supervision of the Director, Division of Regional Operations.

The Office of the Deputy Commissioner for Program Services ² is administratively responsible for developing program and treatment policy, monitoring performance of the delivery system, and providing technical expertise for planning and design of new programs. Delivering a broad spectrum of services under the supervision of this Office are the Divisions of Health, Educational, Community, and Treatment Services. The Youthful Offender Division is also supervised by this Office. This Division was created in 1968 to execute provisions of the Youthful Offender Act. The program essentially operates as a micro-correctional system within the Department, providing all Youthful Offenders a complete range of administrative, evaluative, parole and aftercare services.

The organizational structure of SCDC is illustrated in the chart on page 8.

FACILITIES OF THE SOUTH CAROLINA DEPARTMENT OF CORRECTIONS

While the Department has a central administrative structure, as described in the previous section, its facilities, widespread throughout the state, are aligned into Correctional Regions for management and operational efficiency. The three Correctional Regions in operation are Appalachian, Midlands and Coastal. The geographical configuration of these regions is shown in Figure 2, page 14. Each of the Correctional Regions is administered by a Regional Administrator through a Regional Corrections Coordinating Office. The Regional Administrators are responsible to the Director, Division of Regional Operations. Since the regionalization process has not been completed, some facilities remain independent, operating under the direct supervision of the Director,

Division of Regional Operations. Table 1, page 12 presents the facilities by region as well as the non-regionalized facilities.

At the end of FY 1978, the Department of Corrections operated a total of 33 facilities, which are individually listed in Table 1, page 12. Figure 2, page 14 shows their location. Of these, ten are pre-release or work release centers. Twenty-two of the Department's facilities house minimum security inmates, while the remainder house medium or maximum security inmates. Four SCDC facilities are primarily for younger offenders, three of which predominantly house inmates sentenced under the Youthful Offender Act. One SCDC institution is for female inmates.

The total design capacity of these facilities at the end of FY 1978 was 4,530. Design capacity for individual facilities is shown in Table 1 page 12. The regional distributions of the design capacity are as follows: Appalachian Correctional Region—707; Midlands Correctional Region—1,185; Coastal Correctional Region—302; and non-regionalized facilities—2,336. The total average incarcerated inmate population under SCDC jurisdiction during FY 1978 was 7,448. Of these, 6,709 inmates were housed in SCDC facilities, which were thus operating at 48.1 percent above design capacity.

Because of overcrowded conditions in SCDC institutions/centers, the Department has been housing State inmates in designated local facilities ³ since FY 1975, as provided for by legislation. At the end of FY 1978, 714 state inmates were held in 59 designated local facilities in 40 counties. The average number of SCDC inmates held in designated county facilities during FY 1978 was 738 or about 9.9 percent of the total average inmate population under SCDC custody.

Besides housing inmates in designated facilities because of over-crowded conditions, SCDC also placed certain inmates in other special locations because of their unique assignments or needs. A 31-bed unit of the State Park Health Center administered and operated by the Department of Health and Environmental Control (DHEC), was renovated and designated to hold SCDC inmates undergoing and recuperating from general surgery. Whereas DHEC provides the professional services, SCDC is responsible for the security staffing and procedures. Other locations, where a small number of inmates are housed for special assignments, are the State Law Enforcement Division, the Governor's Mansion and the Criminal Justice Academy.

² For a list of programs and services administered by SCDC, see Appendix C, page 66.

³ See FY 1975 and FY 1976 SCDC Annual Reports for details of the origin of designated facilities.

1 Although the R & E Center was assigned to the Midlands Correctional Region, it is serving as a regional intake service center for both the Midlands and Coastal Regions. The design capacity and FY 1978 average population shown for the R & E Center include both the R & E Center proper (capacity 100) and the leased portion of the Columbia City Jail (capacity 80).

2 The non-regionalized institutions/centers of the Department remains directly under the Division of Regional Operations at the present time. Some of these facilities may be incorporated into correctional regions as regionalization of SCDC continues.

HISTORICAL PERSPECTIVE

Corrections in South Carolina has evolved, over the years, from county-operated prison systems to State administered institutions; from a single State penitentiary to a network of penal facilities throughout the State; from a punishment-oriented philosophy to a philosophy emphasizing humane treatment, rehabilitative services and community-based correctional programs. The following summary of significant developments and events in this evolution during the last several decades provides a perspective for the current efforts of the South Carolina Department of Corrections.⁴

Dual Prison System and Creation of SCDC

As a humane alternative to cruelties which had prevailed under county supervision of convicts, in 1866 the General Assembly passed an act which transferred the control of convicted and sentenced felons from the counties to the State and established the State Penitentiary. Although the Act stripped the counties of their responsibility for handling felons, shortly thereafter the counties' demands for labor for building and maintaining roads prompted the reversal of this provision, and by 1930, county supervisors assumed full authority to choose to retain convicts for road construction or to transfer them to the State. This dual prison system of State administered facilities and local prison and jail operations resulted in inequitable treatment of prisoners, and criticism of the system was widespread.

In the midst of the political and legal developments concerning State and county jurisdiction over convicts, the State Penitentiary expanded to a network of penal facilities throughout the State and experienced changes reflecting the evolution of correctional philosophy from retribution and punishment to humane treatment and rehabilitation. Despite notable improvements, overcrowding and mismanagement prevailed; as a result, the state correctional system was reorganized, and the Department of Corrections was created through legislative action in 1960. But the autonomy of the State and local systems remained intact, and the dual prison system continued.

Problems inherent in the dual prison system became increasingly evident as crime soared in the 1960's. The most critical problems concerned the absence of adequate planning and programming,

⁴ For greater details of these developments and events, see previous SCDC Annual Reports.

inefficiency of resource utilization and inequitable distribution of rehabilitative services. Therefore, system reform of the total adult corrections system in South Carolina was necessary.

Consolidation of the South Carolina Adult Corrections System

While the problems of the dual prison system and the need for system reform had long been recognized, the major impetus for reform of the South Carolina adult corrections system was the 1973 Adult Corrections Study conducted by the Office of Criminal Justice Programs (OCJP). The major recommendations of this study were the elimination of the dual prison system in favor of a consolidated state system and regionalization of SCDC operations. Under the proposed consolidated system, the State would be responsible for all long-term adult offenders, insuring their humane treatment, providing confinement, programs and services close to their home communities. Under the proposed regionalization, the State would be divided into ten Correctional Regions, and a Regional Corrections Coordinating Office, headed by a Regional Administrator, would be established in each region. The Regional Corrections Coordinating Office would be responsible for administration of all SCDC facilities in the area, including the development, coordination and support of regional correctional programs in their respective regions, and for coordination with the Department's central headquarters. Such regionalization was designed to provide for improved planning, coordination and administration of SCDC operations and to facilitate effective and efficient utilization of local community resources.

While some recommendations in the Adult Corrections Study were modified in the course of implementation, the overall concept was adopted as policy by the State Board of Corrections, and steps were immediately taken to consolidate and regionalize the adult corrections system in South Carolina. The major step toward consolidation was the closure of county prison operations. Legislation passed in June, 1974 gave the State jurisdiction over all adult offenders with sentences exceeding three months, and counties were required to transfer any such prisoners in their facilities to the Department. Either voluntarily or through negotiations with SCDC officials, counties began transferring their long-term prisoners to the State and closing their prison operations in May 1973. Since May 1, 1973, 27 counties have closed their prisons or converted them to other use. As of June 30, 1978, only 12 counties operate

prisons as a separate facility. Other counties operate combined facilities for detainees and sentenced inmates, county jails, correctional centers, detention centers and/or law enforcement centers.

The assumption of county prisoners and closing of local prison systems enabled the Department to take steps toward the ultimate regionalization of SCDC operations. One of the major steps toward implementation of regionalization was the alignment of contiguous planning districts into Correctional Regions. Continual in-house study of the geographic distribution of offenders and cost-benefit analysis of resource utilization resulted in the Department's decision in FY 1975 to reduce the proposed number of Correctional Regions from the ten originally recommended by the Adult Corrections Study to four. Further in-depth examination of regionalization was undertaken as an integral part of the ten-year Comprehensive Growth and Capital Improvements Plan developed in FY 1977 by the contract consultant, Stephen Carter and Associates. After studying the distribution of SCDC facilities throughout the State, the commitment trends of the inmate population, the Department's manpower and financial resources and the capital improvement requirements, the consultant recommended that the Department further reduce the number of Correctional Regions from four to three. This recommendation was implemented and by the end of FY 1978, three Correctional Regions-Appalachian, Midlands and Coastal-were established and became fully operational through the Regional Corrections Coordinating Office. Twenty-seven of the Department's facilities were assigned under the administration of Regional Administrators through the Regional Corrections Coordination Office in each of the Correctional Regions, and only six SCDC facilities remain unassigned to regions.

Crises Confronting SCDC in Recent Years

SCDC's efforts to regionalize were made more difficult by the fact that this occurred during a time of unprecedented increases in crime in South Carolina as well as throughout the nation. As a result of increasing crime, the counties' transfer of inmates to the State, and the legislative mandate for all long-term prisoners to be under SCDC jurisdiction, the Department experienced an unprecedented influx of offenders through the state corrections system during FY 1975. The number of inmates under state jurisdiction on June 30, 1975 (5,658) was 53 percent higher than on the same date the previous year (3,693). There was also a more than 30 percent

increase in the average daily population from FY 1974 to FY 1975 (from 3,542 to 4,618), the largest known yearly increase in average daily population in SCDC history. However, this percentage increase was surpassed during FY 1976 when the average daily population under SCDC jurisdiction (6,264) increased by 35.6 percent over the FY 1975 figure. Such increases in the number of inmates under state jurisdiction have been among the severest in the nation, as indicated by a nationwide survey of the National Clearinghouse for Criminal Justice Planning and Architecture. The state offender commitment rate was also ranked third highest in the nation in 1975. Another survey showed that South Carolina experienced the nation's second highest percentage increase in state inmate population between January 1, 1975, and January 1, 1976. Between those two dates, SCDC population jumped by 38 percent as compared with an 11 percent increase in the total U.S. incarcerated population in state and federal prisons. Inmate population continued to increase in FY 1977, but at a slower pace. On June 30, 1977, incarcerated inmates under SCDC custody reached 7,632, which is 10.4 percent more than on the same date a year before. Average daily inmate population in FY 1977 was 14.4 percent higher than FY 1976.

The dramatic increases in inmate population in recent years have resulted in continued and intensified overcrowding in SCDC facilities as well as constant strain on the Department's financial resources. Therefore, while efforts toward system consolidation and regionalization have continued, the Department has been forced to focus primary attention on solving the problems of overcrowding and limited financial resources. Short-term and long-range strategies directed toward overcoming either or both problems have involved renovation of existing facilities; realignment of existing space use; acquisition of additional facilities; expanded use of designated facilities; revision of youthful offender institutional release policies; revision of fiscal policies and procedures; implementation of economizing measures; revision of capital improvement plans; and implementation of the Extended Work Release Program as an alternative to continued incarceration. By the end of FY 1977, these strategies had helped SCDC endure the immediate population and financial crises without any major disturbances, although long-term relief has yet to materialize via additional bedspace and/or stabilization of the inmate population level.

SIGNIFICANT DEVELOPMENTS OF FY 1978

In FY 1978 a lower inmate population growth rate and the absence of major institutional disturbances enabled SCDC to concentrate its efforts on strategies and programs to cope with immediate and long-range challenges which had stemmed from the population and financial crises of previous years and the increasing demand for efficiency and effective management from government institutions. Although in the past two fiscal years, SCDC's inmate population growth was relatively modest, the dramatic upsurge in fiscal years 1974-76 accompanied by only a meager increase in bedspace resulted in overcrowded conditions in SCDC, which are particularly severe in the larger medium security institutions. As in corrections systems in other states, SCDC was challenged in court because of overcrowding and the deteriorating physical and/or living conditions at CCI. The class action suit, Mattison, et al. versus South Carolina Board of Corrections, et al., involved months of intensive study and negotiations by SCDC management and legal staff. A settlement agreement subject to class and court review was arrived at in March, 1978. Besides the legal challenges, SCDC refined and finalized Phase I of its ten-year Capital Improvements Plan, to meet conditions established by the State Budget and Control Board and commenced constructions to yield 1,200 bedspaces by 1980. In order to stabilize inmate population in the long run and stimulate inmate work incentives, SCDC embarked on two new programs, Extended Work Release and Earned Work Credit, which would reduce the amount of time spent behind bars for selected and/or gainfully employed inmates. For more effective inmate and program management and to facilitate decision-making pertaining to program and work assignments for the ever increasing inmate population, a classification study was initiated. To upgrade medical care standards legally and professionally, a unit of the State Park Health Center of the Department of Health and Environmental Control (DHEC) was officially designated to function as a surgical and medical ward for SCDC inmates. Anticipating a continuing trend of court intervention into correctional systems which fail to meet minimum professional standards and to develop strategies for advance voluntary compliance if necessary, SCDC also embarked on a review of accreditation standards established by the American Correctional Association. In response to the emphasis on overall long-range planning in South Carolina state government, SCDC developed its first five-year program budget. For increased

efficiency, its Prison Industries Division was reorganized and expanded, and two in-service training programs provided SCDC staff with management skills and/or ongoing updates of correctional developments. Recognizing the importance of crime prevention, SCDC sponsored two related inmate projects which were favorably received by the criminal justice community and the public. These significant events and developments in FY 1978 are individually presented in the following summaries.

SCDC Inmate Population Growth Rate Slows

FY 1978 marked a second year of moderate incarcerated inmate population growth following the dramatic annual increases in Fiscal Years 1974 and 1975. Whereas the average daily inmate population increased by more than 30 percent from FY 1974 to FY 1975, and again from FY 1975 to FY 1976, FY 1977 witnessed only a 14.4 percent increase. During FY 1978, the average incarcerated inmate population was 7,448, which was 3.9 percent higher than that of FY 1977. On June 30, 1978, SCDC's total incarcerated population reached 7,597, which was 2.0 percent higher than 7,450 recorded the same date a year before.

Class Action Suit Challenging Living Conditions at CCI

In 1976, when SCDC's population was increasing at an unprecedented rate, a civil suit was filed in U. S. District Court by several CCI inmates. The complaint, Mattison, et al. versus South Carolina Board of Corrections, et al., alleged that in the operations of CCI, the defendants had violated and were continuing to violate the Eighth and Fourteenth Amendments, the Civil Rights Law and the laws of South Carolina in failing to provide the plaintiffs with a safe and healthy environment, reasonable preventive health care and reasonable protection from violence. In essence, the overcrowded living conditions, the inadequate number of security officers and the deteriorating physical conditions at CCI were being challenged. In November, 1977, the Court granted the plaintiffs' motion to maintain the suit on behalf of the class of all persons now incarcerated in CCI, all persons in SCDC custody subject to transfer to CCI and all persons who in the future will either be incarcerated in CCI or in SCDC custody.

After extensive bargaining and negotiations among the attorneys for the plaintiffs and the defendants, a settlement agreement was reached and presented at a status hearing before the United States District Court in Columbia in March, 1978. This agreement was subsequently presented to and approved by the South Carolina General Assembly. At the end of FY 1978, a Compromise Agreement and Stipulation of Dismissal was being developed to be filed with the Clerk of Court. The agreement subject to review and approval by the Court, incorporated the following terms and conditions to be implemented at CCI:

- 1. Employment of additional security officers;
- 2. Reduction of population;
- 3. Structural modifications;
- 4. Development and implementation of a classification system;
- 5. Limitation upon double-celling in certain cases and areas;
- 6. Limitation of population to an agreed maximum (1,713).

Another significant stipulation in the settlement is that a procedure, involving a hearing panel consisting partially of inmates, will be created for the purpose of hearing and adjudicating inmate complaints arising from the operation of the agreement.

Implementation of the Ten-Year Comprehensive Growth and Capital Improvements Plan

The Mattison, et al. versus South Carolina Board of Corrections' suit added impetus and urgency to the implementation of SCDC's capital improvements plan. As early as 1973, SCDC had endeavored to phase out CCI, whose physical layout and persistent overcrowded conditions had long been considered unsatisfactory for effective inmate control as well as in violation of modern correctional standards. A proposal to phase out CCI, listing capital improvement projects or replacement facilities and the estimated costs thereof, was submitted to the State Budget and Control Board in November, 1973, and received favorable consideration. Subsequently, in 1974 and 1975, the General Assembly appropriated \$37.5 million in capital improvement bond funds for SCDC. As SCDC's inmate population soared dramatically in 1975, and since continual increase was anticipated, it became apparent that SCDC's capital improvement needs had to be expanded to accommodate future inmate population growth. Long-range planning and development of strategies to deal with the population crisis became mandatory. Accordingly, when the General Assembly released \$20.6 million of the appropriated capital improvements funds to SCDC in 1976, it also directed that a comprehensive ten-year capital improvement plan be developed.

In May, 1976, the firm of Stephen Carter and Associates was retained, and in November, 1976, that firm completed a ten-year capital improvements pian for SCDC. The plan, entitled Comprehensive Growth and Capital Improvements Plan, addressed future population projections, facility construction requirements, cost-reducing alternatives to inmate population growth and future directions for further regionalization. The number of inmates in SCDC facilities was forecast to be 8,040 in 1980 and 12,500 by 1986. To accommodate this population level, the consultant recommended a three-phase capital improvements plan which included specifications for construction of 8,160 new bedspaces to replace some existing facilities and to meet additional needs. The total cost was estimated at \$116 million at the 1976 price level.

In February, 1977, the Budget and Control Board authorized the expenditure of \$19.7 million for the implementation of Phase I of the ten-year Capital Improvements Plan, and specified that implementation would include the employment of a construction manager, the selection of an architectural firm to explore prototypical design and if feasible to design the two new facilities planned for the Greenville/Spartanburg area as prototypes for future construction, and the exploration of modular construction techniques and methods for maximizing the use of inmate labor. To meet these requirements, a construction manager was hired; the architectural firm of Wilbur Smith and Associates in association with the firm of Hellmuth, Obatar and Kassabaum was retained to design the two new facilities and develop standardized prototypical facility design for medium, minimum, work release and pre-release facilities; and the contract with Stephen Carter and Associates was expanded to refine the ten-year plan and to include a feasibility study of modular construction program and the development of an inmate construction program.

Phase I projects which the Budget and Control Board authorized for construction included a new 576-bed medium security facility in Greenville, a new 528-bed minimum security facility in Spartanburg; a 96-bed housing unit to be added to Wateree River Correctional Institution; a new abbatoir, and repairs/renovations to Wateree River Correctional Institution, MacDougall Youth Correction Center, State Park Health Center, and KCI Infirmary. As of June 30, 1978, work was underway on the new abbatoir, and the renovation of Wateree, MacDougall, State Park, and the KCI

Infirmary. All of this work was being accomplished with inmate labor.

Although actual construction of the new medium and minimum security facilities in the Greenville and Spartanburg areas, respectively, did not commence in FY 1978, considerable pre-construction activities were undertaken by the construction manager, the SCDC Building Committee,⁵ and the architectural/engineering firm contracted for the development of prototypical facility designs. These activities included:

- 1. Evaluation of sites for the two new facilities;
- 2. Selection and acquisition of 67.4 acres of land adjacent to the existing Oaklawn Correctional Center to be the site of the new 576-bed medium security facility;
- 3. Selection and acquisition of 391 acres of land near Cross Anchor, south of Spartanburg, to be the site of the new 528-bed minimum security facility, tentatively named Dutchman facility:
- 4. Topographical survey and soil analysis at both sites;
- 5. Development of schematic design, evaluation of construction materials, and preparations for bids and contracts.

It was anticipated that actual construction of these two facilities would begin in December, 1978, and the target date of occupancy of these facilities was expected to be August 31, 1980.

Funds for Phase II Construction were pending approval by the General Assembly as Fiscal Year 1978 closed. At that time, SCDC planned the expenditure of \$16,033,936 in Phase II projects which included a new 528-bed minimum security facility in the Appalachian Region, a 96-bed replacement for Piedmont Community Pre-Release Center, a 144-bed addition to Northside Correctional Center, and a 20-bed Infirmary for the New Oaklawn facility. Also included was a second 96-bed minimum addition to Wateree River Correctional Institution, a 96-bed Work Release Center in the Coastal Region, and certain renovations.

Significant to SCDC's capital improvements program is the emphasis on the use of inmate labor. The expanded contract with Stephen Carter and Associates mentioned above addressed this

⁵ The Building Committee consisting of key SCDC personnel in the areas of engineering, planning and institutional management and chaired by the Construction Manager was appointed by the Commissioner in May, 1977, to ensure successful implementation of the ten-year Capital Improvements Plan.

emphasis, and a study was made to assess an Inmate Labor Program for SCDC. The study, completed by the end of FY 1978, also focused on internal management procedures related to developing a comprehensive inmate labor program. It was projected that a savings of almost \$1 million could be realized through the use of inmate labor for construction in implementing Phase I of the ten-year Capital Improvements Plan, and that continued use of inmate labor in Phase II will further save the State approximately \$3.4 million.

Earned Work Credit

Equally important as providing bedspace to relieve overcrowded conditions and to meet court settlement requirements is the strategy to stabilize the adult inmate population, thereby controlling the spiralling long-term capital improvements and operating costs. A major development in FY 1978 which can achieve the population stabilization effect, granting no significant change in crime and sentencing patterns, is the Earned Work Credit Program which was authorized as part of the Litter Control Act signed into law by the Governor on May 5, 1978. Earlier population projections, developed by the Division of Research and Statistics of the State Budget and Control Board and incorporated into the ten-year Capital Improvements Plan in FY 1977, estimated SCDC's population would reach 12,500 in 1986 without any legislative, judicial and sentencing changes. With the implementation of Earned Work Credit provisions in the Litter Control Act, it is projected that SCDC inmate population may stabilize at about 8,000 unless criminal acts increase, parole is delayed and/or stiffer sentences are handed down.

The Earned Work Credit Program is a statutorily authorized program for sentence reduction via productive work. In addition to providing for the use of inmates for litter control and removal, the Litter Control Act of 1978 amended Section 24-13-230 of the 1976 S. C. Code of Laws, and authorized SCDC's Commissioner to allow a reduction of the term of sentence of inmates assigned to productive duty. The allowable credit (Earned Work Credit) authorized by the Act is from zero to one day for every two days so employed, with the maximum annual credit being limited to 180 days. The Act provides that no inmate suffering the penalty of life imprisonment shall be entitled to receive credits under this provision. In addition to reducing the term of sentence, earned

work credits can also be used as a factor in determining the time to be served before an inmate is eligible for parole consideration. However, no inmate convicted of armed robbery shall be entitled to earned work credits against parole eligibility, but credits may be allowed against the full term of sentence for these inmates. Although not specifically referred to in the Act, an inmate serving a sentence under the provisions of the Youthful Offender Act may not be awarded earned work credits, because of the indeterminate length of the sentence. With the introduction of Earned Work Credits, the Litter Control Act discontinued the provision of Seven Day Credits, which were awarded in the past for inmates assigned to jobs requiring them to work seven days a week.

Although inmate assignments to Earned Work Credit jobs were to be effective July 3, 1978, preparations for implementing the program were among the priority activities of SCDC during the latter half of FY 1978. Following the introduction of the Litter Control bill in the state legislature, the Commissioner appointed an internal task force in February to develop detailed policies, procedures, and implementation timetables. An Earned Work Credit Advisory Committee composed of the three deputy commissioners and other key staff was also established to review the implementation plan. Among the tasks completed by the Task Force during FY 1978 were as follows: a thorough study of existing inmate job assignments; development of a job list showing the job classifications and the amount of credits which can be earned; development of program policies and procedures; development of procedures for data entry and inmate record changes; orientation of SCDC administration and institutional staff on the Earned Work Credit program; and establishing staffing requirements for program administration.

At the end of FY 1978, preparations for implementing the Earned Work Credit program were almost complete. The Earned Work Credit Branch was established in the Classification Division. Program implementation policies and procedures were developed and disseminated. For the purpose of determining the number of credits which can be awarded each inmate, every job assignment was placed in one of four job classification levels. Earned Work Credits will be awarded on the basis of performance on the assigned job as well as the classification level. The job levels and the credits

for a full-time job requiring more than four hours work a day are as follows:

Level Two: One Earned Work Credit for each two work days.

Level Three: One Earned Work Credit for each three work days.

Level Five: One Earned Work Credit for each five work days.

Level Seven: One Earned Work Credit for each seven work days.

Those assigned to part-time jobs, requiring up to four hours work each work day, can earn one-half of the amount of credits shown above.

The program policies and procedures also provide that Earned Work Credits apply to SCDC inmates assigned to designated facilities and other agencies on the same basis as those who are housed in SCDC institutions. Work release participants and others who work for pay in the community will be assigned to Level Two and for full-time jobs will be awarded two and one-half credits for each week worked.

Besides the completion of written policies and procedures and staff orientation thereof, inmate job assignment data (job classification code, hours worked per day, and number of work days per week) were updated and entered into SCDC's automated data system. Record and job assignment updating mechanisms were also established. The reporting requirements of Earned Work Credit Program were also specified. It is hoped that through such detailed planning, Earned Work Credits for inmates can be administered effectively and equitably in FY 1979 and in the future. As mandated by the Litter Control Act, a yearly account of this program's progress will be incorporated into the agency's *Annual Report*.

Extended Work Release Program

Another program which can reduce SCDC bedspace requirements in the long run is the Extended Work Release Program. Following legislative authorization on June 13, 1977, the Extended Work Release Program was implemented with federal and state funds for the objectives of facilitating inmate release, increasing bedspace in work release centers and institutions, and reducing construction and operation costs. The program allowed the exceptional work release inmate, convicted of a first and not more than a second offense for non-violent crime, to live with a community sponsor and be gain-

fully employed, thereby removing them from correctional facilities and reducing the number of inmates confined. Extended work release participants must be within six months of their good time release or parole eligibility, have satisfactorily participated in the regular work release program for three months, and maintained a clear disciplinary record since assignment to the work release program. The Extended Work Release participants remain on the job secured for them by SCDC prior to placement on the program. While on Extended Work Release, all participants continue to be responsible to the assigned work release center and are maintained in its count as authorized absentees. They are directly supervised by a Work Release Area Supervisor assigned to that center. While participants need not turn over their payroll checks to SCDC as regular work release participants, they are required to pay SCDC \$21 a week for supervision costs.

Following intensive screening of immates in July, 1977, the first Extended Work Release client was placed at the beginning of August, 1977. By June 30, 1978, 254 inmates have been approved and/or placed on the program. Out of this number, 103 have successfully completed the program and have been released or paroled, whereas 19 have been terminated from the program for rule violations. As of the end of FY 1978, the program had an active caseload of 120. During the first year of operation, program participants yielded a total of \$266,919 in wages and salaries. From these earnings, \$50,749 were paid for federal, state and social security taxes and \$36,533 were paid to SCDC for supervision costs. Whereas the long-term effects or impacts of the Extended Work Release Program have yet to be measured, the program's first year of progress was encouraging and well received by inmate participants.

Classification Study

Problems and needs stemming from increasing inmate population are not confined to bedspace, physical facilities, future capital improvements, and security. Overcrowded situations, combined with limited medium and minimum security bedspaces resulted in increasing demands on the custody classification system and additional pressure on educational, training and treatment programs. Expanded classification capabilities become mandatory in order to provide accurate and adequate assessment, assignment and tracking of inmates. Upgrading the classification process and integrating it with the development of a comprehensive inmate data base were,

also, particularly crucial in the implementation of new programs such as Earned Work Credits, inmate construction, Extended Work Release, and the Comprehensive Employment and Training Act (CETA) projects.

In view of the pressures on the existing classification system, in April, 1978, SCDC requested and was approved free consultant services from the National Corrections Technical Assistance Project of the Law Enforcement Assistance Administration to analyze the current classification system, identify needs and develop a system approach to meet future requirements. Specifically, the consultant is to examine and revise, if necessary, existing and proposed classification policies and procedures, to develop an overall agency classification plan, to design an implementation strategy, to determine the new system's implications and/or impacts on organization, staffing needs, bedspace requirements by custody level and the associated costs. The scope of analyses and recommendations encompasses inmate reception, assessment and orientation procedures at the R & E Center and Intake Service Center, the initial classification and subsequent re-classification procedures, the monitoring and tracking mechanisms, as well as pre-release, work release and postrelease follow-up.

By the end of FY 1978, the work plan for the Classification Study was finalized, and an advisory committee was appointed to oversee the project. The committee, consisting of SCDC staff in the areas of management, inmate classification, information services, institutional operations, education programs and treatment services were to establish the criteria and requirements for an effective classification system and to ensure that the resulting recommendations will be relevant and useful to SCDC. It is anticipated that the classification project will be completed in mid-September, 1978.

Affiliation With State Park Health Center, Department of Health and Environmental Control

To meet a statutory and professional obligation to provide adequate medical treatment to inmates, for several years SCDC has been exploring alternatives for providing acute medical/surgical services to replace the CCI Infirmary which was neither licensed nor accredited as a hospital. During FY 1978, an agreement was reached between SCDC and the Department of Health and Environmental Control (DHEC), whereby the latter would expand the State Park Health Center to accommodate in-patients from

SCDC. The fourth floor of the Center was renovated to meet security requirements for the exclusive use by inmate patients from SCDC. Whereas DHEC assumes the treatment responsibility for hospitalized inmates referred by SCDC's medical staff, SCDC provides security support under the supervision of the Midlands Regional Corrections Coordinating Office, Division of Regional Operations. The SCDC-DHEC agreement was formally effective April 17, 1978, when the first SCDC inmate patient was admitted.

As a result of this agreement, health care delivery in SCDC assumes the following configuration: The KCI Infirmary, which is currently being expanded, becomes SCDC's main sick call infirmary for out-patients and provides in-patient care for 22 convalescing inmates; the CCI Infirmary is utilized for routine sick call with bedspace for five or ten patients requiring short term convalescence; DHEC State Park Health Center provides medical and surgical services in the setting of a licensed and accredited general hospital, and sophisticated diagnostic and treatment services in areas such as coronary care, urology, etc., are provided through contractual services from local community hospitals. This configuration is considered to be more efficient, enabling SCDC to meet emerging and expanding legal and professional standards.

Review of American Correctional Association Accreditation Standards

As prison populations continued to soar in the nation and overcrowded conditions worsened, the courts continued to intervene on behalf of the incarcerated population. Several states were under court order to upgrade and expand facilities. As an alternative to court intervention, there have been increasing efforts to upgrade prison conditions through the development of minimum operating standards for correctional facilities. In this direction, the American Correctional Association's Commission on Accreditation for Corrections developed a set of field-tested standards and initiated an accreditation process to stimulate voluntary compliance by correctional systems. Because of other pressing priorities and resource limitations, SCDC did not participate in the accreditation process. However, it initiated, in January, 1978, a review of the Commission's Manual of Standards for Adult Correctional Institutions to anticipate any future need for compliance and accreditation. The review, conducted by the division directions, revealed that while SCDC was in practice complying with many of the standards, documentation to verify compliance as a condition for accreditation would require a major effort. Accordingly, plans were made at the end of FY 1978 to apply for a Law Enforcement Assistance Administration grant to conduct an extensive self-analysis as required under the Commission's accreditation process. Implementation of no cost standards and a feasibility study of other cost-involving standards would also be included in the scope of the project if funds are to be made available.

SCDC's Five Year Program Plan, 1978-80 through 1983-84

The South Carolina Department of Corrections, with other state agencies participated in the development of a five year program plan under the guidelines of the State Planning Office and the State Budget and Control Board. Subsequent to the initial notifications of the five-year program planning requirements in March, 1977, and the Governor's meeting in December, 1977, the departmental managers concentrated on planning activities in the second half of FY 1978. Internal planning procedures included developing assumptions pertaining to legal and programmatic requirements, projecting future inmate population levels, identification of deficiencies, developing objective/strategies to overcome deficiencies, and determining the cost of implementing objectives by program by year. In the course of developing the five-year program budget, five program areas emerged as encompassing all SCDC activities, which are internal administration and support; housing, care, security and supervision; work and vocational activities; individual growth and motivation and penal facility inspection services. With participation from all divisions and offices and ongoing overall departmental review from an agency review committee, the plan was completed and submitted to the State Planning Office on April 24, 1978. The plan shows that the costs of overcoming the current deficiencies and dealing with changing conditions are estimated at \$72 million over the five year period. At the end of FY 1978, this plan was being reviewed by the State Planning Office.

Reorganization of Prison Industries

As the growing inmate population made an impact on SCDC's institutional operations and budget, so did the population and financial pressures of recent years and other economic developments affected prison industry operations. In order to increase the efficiency and productivity of such operations and to ensure

their compatibility with the Department's mission and objectives, the Corrections Industries Project was undertaken by a contract consultant during FY 1978 to provide ongoing feedback to the State Auditor's Office and to SCDC's management. Initiated in August, 1977, the project identified problems, needs and remedial actions in areas of marketing and sales, production, organization and administration. To implement the necessary changes to meet the growing complexity of prison industries, a new organizational structure was developed and approved by the State Personnel Division. The new structure involved the formal staffing of a Sales and Marketing Branch in the Division of Correctional Industries, thereby allowing formal specialization of functions at the branch level and facilitating overall administration and coordination at the division level.

In addition to recommending and implementing organizational changes, the Corrections Industries Project also included a marketing survey and recommendations for new industries in the correctional facilities to be constructed in Greenville and Spartanburg; an industries expansion plan including capital needs thereof; an industries training plan and an analysis of the industries' financial requirements. Since the identification of needs and the implementation of organizational transitions were the emphasis of the project during FY 1978, the other tasks were continued into FY 1979.

Staff Training and Development

During FY 1978, two new staff training programs were implemented, one directed at managers and another for personnel at all levels. The Management Training Program was supported by the National Institute of Corrections as a technical assistance and demonstration project intended to serve as a model for replication by other correctional systems. The training strategy, curricula and materials were jointly developed by consultant trainers and SCDC's Management Training Council consisting of staff representatives from administration and operations. Before being formally incorporated into the training requirements for SCDC's managers, the training curricula and materials were tested via pilot training sessions, revised to incorporate participants' feedback, and reviewed by the Management Training Council. Moreover, certain departmental managers were identified, selected and trained to assist with staff training on an ongoing basis.

The Management Training Program, initiated towards the end of FY 1977 and fully operational in FY 1978, offers six courses to SCDC managers. These are: Agency Goals and Functions, Resource Management, Management Principles, Interpersonal Skills, Personnel Management and Leadership and Motivation. Each course was conducted in the form of two-day workshops, and the total program when fully implemented, will provide 120 SCDC managers with 48 hours of training per year. FY 1978 witnessed this program's first phase of development, testing and adoption. Full scale training will continue in FY 1979 with federal funding.

The In-Service Training Program was initiated in FY 1978 with LEAA funds, directed at a broader audience. Because of the increasing complexities of correctional operations, the emergence of legal issues and standards and the changes in policies and procedures, it became necessary to provide employees with continuing updates on these developments so as to assist them to more efficiently and effectively perform their duties. Accordingly, the In-Service Training session was initiated by the Division of Staff Training and Development in April, 1978. Each month two workshops are held; one pertains to correctional developments and trends at the national level, and the other covers SCDC policies and procedures, state personnel guidelines and other relevant topics such as the ten-year Capital Improvements Plan. These monthly training sessions will continue throughout FY 1979.

Crime Prevention Projects

Crime prevention, especially at the juvenile level, is receiving increasing emphasis as a means to combat soaring prison population. As numerous crime prevention projects emphasizing community involvement and citizen cooperation emerged around the nation, SCDC also contributed its share through two inmate projects, Operation Get Smart and Save the Children.

In January, 1977, SCDC reactivated Operation Get Smart, a project initiated in early 1960, which terminated in 1974 because of shortage of funds. Operation Get Smart is a public education effort intending to prevent crimes through the exposure of inmates' individual experiences with crime and incarceration. The Get Smart team, consisting of both male and female inmates, visits schools, churches and civic groups and participates in television and radio programs in order to reach the citizenry. During FY 1978, the Get Smart team, supervised by correctional officers, traveled 46,490

miles, visited 189 schools, 103 churches, and 44 radio stations and talked to 43 civic groups and 36 other organizations. The team's presentations were well received by an estimated audience of 105,000 youths and 21,000 adults during the fiscal year.

Another crime prevention effort concentrating on juvenile delinquents and offenders is the Save the Children program at CCI. This program was conceived and founded in May, 1977, by the CCI Inmate Advisory Council and with support from SCDC's officials, South Carolina family court judges, sheriffs and other professionals working with juvenile delinquents and offenders. In this program, inmates use a "tough" message to get across the harsh realities of prison life. The youths tour CCI and are advised to stay in school which would enable them to get useful jobs in order to avoid the fate of these inmates. It is hoped that such exposures to the adult prisons would deter the youths from further criminal behavior, thereby reducing juvenile crimes as well as commitments to adult prisons.

As of June 30, 1978, 1,398 youths and 645 adults have attended the Save the Children program since its inception in May, 1977. The program is considered to be working well and has received praise from various court and youth service officials. Except for stationery and postage for mailing and correspondence, Save the Children operations involve neither state appropriations nor federal funds.

To conclude, whereas FY 1978 was a year of relative stability with a modest inmate population increase and no major institutional violence and disturbances, SCDC set in motion and/or completed various projects and programs which will have a significant impact on the future inmate population level, configuration of the physical facilities, cost level and structure of construction and operations, as well as various other facets of institutional and inmate management.

FEDERAL ASSISTANCE BEING RECEIVED BY OR APPROVED FOR THE SOUTH CAROLINA DEPARTMENT OF CORRECTIONS DURING FY 1978 ⁶

- 1. U.S. DEPARTMENT OF JUSTICE, LAW ENFORCEMENT ASSISTANCE ADMINISTRATION (LEAA)
 - a. Action Grants through the Office of Criminal Justice Programs, Division of Administration, Office of the Governor.
 - (1) Extended work release program: \$173,267 for July 1, 1977 to June 30, 1978; \$186,356 for July 1, 1978 to June 30, 1979.
 - (2) Updating South Carolina's prisons and jails inspection checklists manual for enforcing minimum standards: \$8,343 for April 1, 1978 to March 31, 1979.
 - (3) Establishment of the Coastal Regional Corrections Coordinating Office: \$54,248 for May 1, 1977 to April 30, 1978; \$45,306 for May 1, 1978 to April 30, 1979.
 - (4) Two grants to provide testing and referral services to mentally retarded/mentally handicapped inmates in SCDC: \$19,309 for March 1, 1977 to June 30, 1978; \$27,997 for February 28, 1978 to June 30, 1978.
 - (5) Acquisition of legal resources for inmate library: \$30,000 for April 1, 1978 to June 30, 1978.
 - (6) Expansion and improvement of the 30-day pre-release programs at Watkins Pre-Release Center and Blue Ridge Community Pre-Release Center: \$73,850 for May 1, 1978 to April 30, 1979.
 - (7) Development of standards for inspection of South Carolina juvenile detention facilities: \$99,492 for June 1, 1978 to May 31, 1979.
 - (8) Provision of extra-agency community based services to SCDC inmates: \$7,042 for June 1, 1978 to May 31, 1979.
 - (9) Purchase of a remote job entry device and two modems for the automated correctional information system: \$39,389 for April 1, 1978 to September 30, 1978.
 - (10) Addition of two area parole counselors and two secretaries in the Youthful Offender Division: \$46,776 for Feb-

- ruary 1, 1977 to January 31, 1978; \$42,262 for February 1, 1978 to January 31, 1979.
- (11) Inservice training for 320 SCDC personnel: \$17,082 for April 1, 1978 to March 31, 1979.
- (12) Attendance at Jail Management Workshop by SCDC personnel: \$600 for May 1, 1978 to May 31, 1978.
- (13) Attendance at the American Correctional Association by SCDC personnel: \$1,895 for August 1, 1977 to September 30, 1977.

b. Discretionary Grants

- (1) Implementation of a Corrections Information System: \$175,000 for July 1, 1977 to March 31, 1978.
- (2) Economic Development Pilot Program, which is a modified work release program: \$274,918 for March 5, 1976 to February 16, 1978.
- (3) A participant-designed program for training and developing correctional managers at SCDC: \$99,893 for May 2, 1977 to June 20, 1978; \$112,288 for June 21, 1978 to June 20, 1979 (Funds available through the National Institute of Corrections).
- (4) Consultant services to assist the Futurea Therapeutic Community at Kirkland Correctional Institution: \$3,691 for March 15, 1978 to August 14, 1978 (Funds available through the National Institute of Corrections).

2. U.S. DEPARTMENT OF LABOR

The following grants were funded through the Office of Manpower Planning and Coordination, Office of the Governor, under the Comprehensive Employment and Training Act (CETA):

- a. Continuation and expansion of testing and evaluation services at SCDC's Reception and Evaluation Center: \$127,536 for October 1, 1976 to September 30, 1977; \$171,515 for October 1, 1977 to September 30, 1978.
- b. Multi-skills Training Project providing instruction in brick masonry, carpentry, and plumbing at Kirkland Correctional Institution; \$47,487 for March 24, 1978 to September 30, 1978.
- c. Individualized Training in self-concept improvement, reading, mathematics and other complementary skills to inmates at CCI: \$172,000 for May 1, 1978 to September 30, 1978.

⁶ Whereas the majority of these grants were awarded directly to SCDC from Federal sources; some were received through another State agency. This summary lists the grants by the Federal agency from which funds originated, with mention of the intermediate State agency if applicable.

- d. Assessment, counseling, instruction, referral, and follow-up services for incarcerated youths at five SCDC institutions: \$236,599 for May 1, 1978 to September 30, 1978.
- e. Bricklaying and auto mechanics courses at Aiken Youth Correction Center: \$74,491 for October 1, 1976 to September 30, 1977.
- f. Heavy equipment operation training at Wateree River Correctional Institution and a welding course at Central Correctional Institution: \$127,536 for October 1, 1976 to September 30, 1977.
- g. Operation Get Smart, a crime prevention project via inmate groups touring and lecturing at high schools: \$9,792 for December 1, 1976 to September 30, 1977; \$30,510 for October 1, 1977 to September 30, 1978.
- h. Addition of fifty-eight security personnel for ward supervision at CCI and research of effects therefrom: \$505,013 for October 1, 1977 to September 30, 1978.
- i. Placement of unemployed, under-employed and economically disadvantaged individuals on public service jobs at SCDC: \$448,448 for January 1, 1977 to July 31, 1977; \$839,222 for October 1, 1977 to September 30, 1977 (two grants under Titles II and VI).
- j. Repairs/renovations at SCDC facilities: \$77,667 for March1, 1978 to September 30, 1978.

3. U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

- a. Through the State Department of Social Services, under Title XX of the Social Security Act, funding for the following social service programs for SCDC inmates was provided:
 - (1) a residential mental health unit;
- (2) a mental retardation unit;
- (3) a physically handicapped unit;
- (4) community half-way house services; and
- (5) group counselling services
- \$420,448 for July 1, 1977 to June 30, 1978.
- b. Through the South Carolina Commission on Alcohol and Drug Abuse, funding was received from the National Institute for Alcohol Abuse and Alcoholism to provide alcohol counselling and treatment services in the Midlands, and Appalachian Regions: \$15,094 for January 1, 1977 to December 30, 1977; \$11,207 for January 1, 1978 to December 31, 1978.

- c. Grants through the South Carolina State Department of Education:
 - (1) Adult Basic Education Program: \$84,576 for July 1, 1977 to June 30, 1978.
 - (2) Title I education funds for disadvantaged youths to upgrade education programs in SCDC: \$378,345 for July 1, 1977 to June 30, 1978.
 - (3) Six specialized Vocational Training Programs (carpentry, masonry, welding and automotive services) at Mac-Dougall Youth Correction Center, Northside Correction Center, Givens Youth Correction Center, Central Correctional Institution, Kirkland Correctional Institution and the Women's Correctional Center: \$71,821 for July 1, 1977 to June 30, 1978.
- d. Through the S. C. State Library Board, the following two grants were received:
 - (1) Purchase of reading materials for SCDC inmates: \$11,766 for October 1, 1976 to September 30, 1977; \$12,000 for October 1, 1977 to September 30, 1978.
 - (2) Purchase of training films and projectors for seven institutions: \$1,863 for November 25, 1977 to June 30. 1978.

Source: Classification Division's Monthly Reports to the Board of Corrections and the Quarterly Statistical Reports.

¹ This category includes new inmates received by the Reception and Evaluation Center and the Greenville and Greenwood/Laurens

Intake Service Centers.

Not available. In FY 1977, YOA parole revocations were not shown as a separate category.

See Appendix B, page 65 for detailed explanation of the Youthful Offender Act.

DYS—Division of Youth Services.

ICC—Interstate Corrections Compact; through the ICC, an offender convicted of a crime in a party state may be transferred to his home state to serve his sentence, subject to the rules and regulations of the state in which he was convicted.

⁶ Female offenders are initially received through R & E Center for photographing and fingerprinting only; they are transferred to the Women's Correctional Center for evaluation. The number of inmates received from each category includes both males and females. The total number of females received from all categories is also reported separately in the parentheses here. When totalling the number of inmates received, the numbers appearing in parentheses should not be included since it would result in double counting of females.

⁷ Included in this category are also youthful offenders conditionally and unconditionally released by SCDC's Youthful Offender

Division, the number of which is shown in Table 16.

8 That is, paroled by the South Carolina Probation, Parole and Pardon Board. The numbers shown in this category do not include youthful offenders paroled (or conditionally released) by the Youthful Offender Division Parole Board. For Youthful Offender Division statistics, see Table 16.

Before January, 1977, offense data on admissions were generated from the old computer system which adopted a different categorization of offenses. Moreover, before July, 1977, for inmates having committed multiple offenses, only the most serious offense was included in the computation of offense distribution. Since July, 1977, for inmates having committed multiple offenses, all offenses are included in the computation of offense distribution. Because of these changes in definition and programming, comparing previous offense data with the information herein is cautioned.

Percentages in this column are based on the total number of offenders, not the total number of offenses.

The total number of offenses exceeds the total number of offenders because some offenders committed multiple offenses.

² Percentages in this column are based on the total number of offenders, not the total number of offenses.

Source: Division of Management Information Services.

¹ Before January, 1977, offense data on inmates were generated from the old computer system which adopted a different categorization of offenses. Moreover, before July, 1977, for inmates having committed multiple offenses, only the most serious offense was included in the computation of offense distribution. Since July, 1977, for inmates having committed multiple offenses, all offenses are included in the computation of offense distribution. Because of these changes in definition and programming, comparing previous offense data with the information herein is cautioned.

³ The total number of offenses exceeds the total number of offenders because some offenders had committed multiple offenses.

¹ This date is closest to the end of the year, on which information for developing this table is available.

² This number excludes 18 authorized for the State Park Health Center and 6 for the Criminal Justice Academy, which are not SCDC facilities, and 1 authorized for the Get Smart Team.

³ This number excludes 18 assigned to the State Park Health Center and 6 assigned to the Criminal Justice Academy, which are not SCDC facilities, and 1 assigned to the Get Smart Team.

⁴ Since only SCDC facilities are being considered in this table, this average excludes inmates assigned to the Criminal Justice Academy, SLED Headquarters, the State Park Health Center and the Governor's Mansion.

APPENDIX

- A. Statutory Authority of the South Carolina Department of Corrections
- B. Youthful Offender Act
- C. Programs and Services Administered by the South Carolina Department of Corrections
- D. Counties Comprising South Carolina Planning Districts and Correctional Regions

STATUTORY AUTHORITY OF THE SOUTH CAROLINA DEPARTMENT OF CORRECTIONS

The South Carolina Department of Corrections was created in 1960 by Section 55-292, South Carolina Code of Laws as follows: "There is hereby created as an administrative agency of the State government the Department of Corrections. The functions of the Department shall be to implement and carry out the policy of the State with respect to its prison system, as set forth in 55-291, and the performance of such other duties and matters as may be delegated to it pursuant to Law."

Section 55-291 as referred to in Section 55-292 sets out the Declaration of Policy as follows: "It shall be the policy of this State in the operation and management of the Department of Corrections to manage and conduct the Department in such a manner as will be consistent with the operation of a modern prison system and with the view of making the system self-sustaining, and that those convicted of violating the law and sentenced to a term in the State Penitentiary shall have humane treatment, and be given opportunity, encouragement and training in the matter of reformation."

Further significant statutory authority was provided the Department by Section 14, Part II, the permanent provisions of the 1974-75 General Appropriations Act which was signed on June 28, 1974. Section 14 is, in effect, an amendment of Section 55-321 and places all prisoners convicted of an offense against the State in the custody of the Department when their sentences exceed three months. The text of the statute is as follows:

"Notwithstanding the provisions of Section 55-321 of the 1962 Code, or any other provision of law, any person convicted of an offense against the State of South Carolina shall be in the custody of the Board of Corrections of the State of South Carolina, and the Board shall designate the place of confinement where the sentence shall be served. The Board may designate as a place of confinement any available, suitable and appropriate institution or facility, including a county jail or work camp whether maintained by the State Department of Corrections or otherwise, but the consent of the officials in charge of the county institutions so designated shall be first obtained. Provided, that if imprisonment for three months or less is ordered by the court as the punishment, all persons so convicted shall be placed in the custody, supervision and con-

trol of the appropriate officials of the county wherein the sentence was pronounced, if such county has facilities suitable for confinement."

This statute was amended by an added provision in the 1975-76 General Appropriations Act to provide for notification to the Department of Corrections of the closing of county prison facilities as follows: "Section 14, Part II, of Act 1136 of 1974 is amended by adding the following proviso at the end thereof: Provided, further, that the Department of Corrections shall be notified by the county officials concerned not less than six months prior to the closing of any county prison facility which would result in the transfer of the prisoners of the county facility to facilities of the Department."

YOUTHFUL OFFENDER ACT

The Youthful Offender Act provides for indeterminate sentencing of offenders between the ages of 17 and 21, extended to 25 with offender consent. The specific provisions of the Act are as follows:

Section 5b—This section allows the court to release the youthful offender to the custody of the Department's Youthful Offender Division prior to sentencing for an observation and evaluation period of not more than 60 days.

Section 5c—This section allows the court to sentence the youthful offender, between 17 and 21, without his consent, indefinitely to the custody of the Department's Youthful Offender Division for treatment and supervision until discharge. The period of such custody will not exceed six years. If the offender has reached 21 years of age but is less than 25 years of age, he may be sentenced in accordance with the above procedure if he consents thereto in writing.

Section 5d—This section provides that if the court finds that the youthful offender will not derive benefits from treatment, it may sentence the youthful offender under any other applicable penalty provision.

PROGRAMS AND SERVICES ADMINISTERED BY THE SOUTH CAROLINA DEPARTMENT OF CORRECTIONS*

RESPONSIBLE DIVISION

PROGRAM AREA/ACTIVITY

Community Services

Work Release; Extended Work Release; 30-Day Pre-Release; 120-Day Accelerated Pre-Release; Youthful Offender Referrals; Federal Offender Referrals; Educational Release; Title XX—Alston Wilkes Referrals; Economic Development Pilot Program; Provisional Parolee Referrals; Inmate Furloughs.

Health Services

Medical/Dental Sick Call; General Surgery; Orthopedic Surgery; Internal Medicine; Psychiatric Services; Optometry Services; Referral Services.

Educational Services

Adult Basic Education; Vocational/Technical Education; College Education Programs.

Treatment Services

Pastoral Services (includes Alcohol Rehabilitation Services); Psychological Services; Social Work Services; Recreational Services; Compresensive Drug Abuse Treatment Program (includes Therapeutic Community); Horticulture Training Program; Title XX Services (Special Services for Physically Handicapped, Special Services for Developmentally Disabled, Special Services for Mental Health, Alston Wilkes Program, Special Services for Mental Health Region I—Appalachian); Arts-in-Prison Program.

Youthful Offender

Casework; Pre-sentence Investigation; Institutional Services; Parole and Aftercare Services;

Follow-up Services.

Inmate Relations

Interview inmates in regard to grievances; represent inmates in cases involving infractions of rules; resolution of inmate grievances; represent inmates who appear before institutional adjustment committees.
