PREFACE

The steady increase in crime the past few years has drawn both state and national attention. This attention is now focusing on ways and means of attempting to find the causes of crime which make the basic statistics of crime reporting more valuable than ever.

CRIME IN MASSACHUSETTS, 1980, is the fourth annual report published by the Department of Public Safety's Crime Reporting Unit since the inception of the State Uniform Crime Reporting Program in 1977. It is unique, in that it is the first statewide system to collect crime statistics from Massachusetts law enforcement agencies.

We, in Massachusetts, are fortunate to have a commendable spirit of cooperation among our law enforcement community which enables a voluntary program to be successful in collecting crime statistics from so many departments. This augurs well for the future of law enforcement in the Commonwealth, as well as for those in both the public and private sectors who are using these figures to study the causes of crime.

I wish to commend all law enforcement agencies of the Commonwealth on the publication of their fourth annual report, Crime in Massachusetts, 1980.

Edward J. King Governor . King

FOREWORD

Crime in Massachusetts, 1980, is the result of a voluntary program by the law enforcement agencies of Massachusetts. Their continued support of the Uniform Crime Reporting Program is a healthy indicator of law enforcement cooperation in a time of rising crime.

While it has generally been acknowledged that crime statistics are now a necessity in law enforcement planning and management, their use by those both inside and outside law enforcement indicates the increasing need for such information.

We heartily commend all law enforcement agencies of the Commonwealth for their efforts in making this voluntary program a success.

Frank V. Trabucco

PROGRAM

HISTORY OF UNIFORM CRIME REPORTING

Although the impetus for collecting nationwide crime information dates back to the 1890's, no ongoing program was initiated until the Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP) was established in 1927. This Committee's responsibility to provide management information to law enforcement agencies was eventually turned over to the Federal Bureau of Investigation (FBI) in 1930, when the FBI received a Congressional mandate to collect and disseminate national crime information. The IACP has continued to serve the Uniform Crime Reporting Program (UCR) in an advisory capacity, and has been joined in this responsibility by the Committee on Crime Records of the National Sheriffs' Association. UCR receives crime information through voluntary reports submitted by individual law enforcement agencies across the country. In 1966, the FBI began coordinating UCR data collection through designated state level agencies which report statewide information to the FBI each month. Massachusetts is pleased to be one of the 46 states now participating in the state level UCR program.

OBJECTIVES OF MASSACHUSETTS UCR

and recommend changes. more effective enforcement.

¥

1. To identify the nature and extent of crime in our state;

2. To provide the management information needed by the law enforcement community to augment their ability to attack the crime problem:

3. To provide our citizens with the most complete information available:

4. To provide legislators with the information necessary to formulate laws which address the crime problem; and

5. To include sufficiently detailed data for researchers and planners.

Because increasing attention has been focused on the problem of crime in our communities in recent years, many segments of our population need more complete information for a variety of reasons.

Citizens are understandably concerned about the possibility of becoming victims of crime, but may not know what the real probability is. Law enforcement professionals, managers and administrators who must focus on crime in their own jurisdictions, also need to know what is occurring in surrounding jurisdictions in order to deploy personnel and equipment most efficiently to protect citizens and bring criminals to justice. Legislators need statewide information about crime in order to pass realistic laws that will increase the stability of our society. Researchers and planners need to know what is actually happening to predict trends

The goal of Crime in Massachusetts is to identify the nature and extent of criminal activity in this state and present the information needed by each of these groups. This information will not in itself prevent crime, but it may encourage all segments of society, by understanding the problem, to work together with law enforcement agencies to reduce crime through

The objectives of Crime in Massachusetts are:

CONSIDERATIONS FOR INTERPRETATION

Statistics are a tool used to summarize information so that patterns or trends become clearer. All statistics must be interpreted with an understanding of just what it is that they can say. Too often, numbers of the type in this report are used incorrectly to draw conclusions that the statistics simply do not support. In order to avoid this error, it is necessary to know what information is included and how it is reported.

To obtain accurate information from many different agencies, the national UCR program had to precisely define the methods for counting such information as the number of offenses, arrests, clearances and value of stolen or recovered property. The methods of counting and some resulting limitations are explained below.

CLASSIFICATION OF OFFENSES

UCR divides offenses into two major classifications which are designated Part I and Part II offenses. This distinction is important to keep in mind because different information is collected for each. Part I offenses include 1) Violent crimes: murder and non-negligent manslaughter, negligent manslaughter, forcible rape, robbery and aggravated assault; and 2) Property Crimes: burglary, larceny-theft, motor vehicle theft and (since January, 1979) arson. All other offenses are classified under Part II(see Offense Definitions section).

Part I offenses, excluding negligent manslaughter and arson, are used to calculate the Crime Index and Crime Rate(see sections entitled Crime Index and Crime Rate). (Arson is calculated separately.)

All offenses are classified on the basis of law enforcement officer investigation in accordance with UCR offense definitions(which are NOT necessarily identical to Massachusetts General Law definitions). Because UCR identifies a Police problem, offense classifications are not based on the findings of a court, medical examiner, jury or decision of a prosecutor.

COUNTING OF OFFENSES

The number of offenses is counted only for Part I crimes and simple assault. The method of counting varies with the type of crime committed, and it is important to remember that the number of offenders does not determine the number of offenses.

For murder and non-negligent manslaughter, negligent manslaughter, forcible rape, aggravated assault and simple assault, one offense is counted for each VICTIM, regardless of the mumber of offenders involved.

For robbery and larceny, one offense is counted for each distinct OPERATION which is separate in time and place. The number of victims in any one operation does not determine the number of offenses. For example, if 20 people are robbed in a bar at the same time, only ONE offense has occurred. However, if that robber then leaves the bar and holds up a passerby, a second offense has occurred.

For burglary, one offense is counted for each structure which is illegally entered. However, when the structure is an apartment house, or business or office building in which units are leased for a period of time, one offense is counted for each unit burglarized.

For motor vehicle theft, one offense is counted for each vehicle stolen.

For multiple offenses that occur in one crime incident, only the most serious offense is counted. Part I crimes are ranked according to seriousness and appear in order from most serious to least serious under "Classification of Offenses," page 6. Example: A robber takes a man's wallet and then beats him causing serious injury. Both a robbery and an aggravated assault have occurred, but because robbery is considered by UCR to be more serious, only the robbery is counted. From one perspective, this method of counting seriously understates the crime problem, but from another, it prevents undue inflation of crime statistics.

Notes: 1) Arson is an exception to the above rule and is counted separately from other offenses. 2) The number of offenses is not counted for Part II offenses.

ARRESTS

Arrest information is collected for all Part I and Part II offenses according the age, sex and race of the offender. It is not possible, however, to correlate race with sex or specific ages because the information is collected independently, thus limiting analysis. Furthermore, arrest figures cannot be directly related to the number of crimes cleared because the arrest totals count all offenders arrested for each offense, and clearance totals count only the offenses for which an arrest or arrests have occurred.

CLEARANCES

An offense is considered cleared(solved) when at least one offender is arrested for a crime, even though several may have been involved. Offenses may also be cleared by exceptional means when the offender: commits suicide, makes a dying declaration, confesses while in custody or serving time for another crime, is prosecuted in another jurisdiction for the same offense, is a juvenile who is handled by notifying the parents, or when the victim refuses to prosecute or another jurisdiction refuses to extradite the offender. Clearances are counted as "adult" and "juvenile". A "juvenile" clearance is counted only when juveniles are exclusively involved in the clearance of an offense. If the arrest of both adults and juveniles result in a clearance, it is counted as an "adult" clearance.

occurs.

PROPERTY STOLEN AND RECOVERED

The figures for value of property stolen and recovered are not set forth in this report due to the fact that compiling this information manually is virtually impossible. At the present time, the Crime Reporting Unit (CRU) is implementing an automated system to capture the information. Property Stolen and Recovered information will be published as soon as it is available.

Note: Attempts to commit any of the Crime Index offenses are counted as actual offenses, except that attempts to kill and assaults to kill are counted as agaravated assault.

Note: Not all crimes are cleared within the calendar year in which the offense

REPORTING VARIATIONS

Massachusetts now receives Uniform Crime Reports from 329 law enforcement agencies. Because the number of reporting agencies is so large, one must be aware that unintentional variations from UCR guidelines may occur that would affect the validity of the data presented here.

Offense totals will probably vary from the actual number of offenses that occur because UCR statistics are based on crimes that are reported to law enforcement agencies and many crimes are not reported.

INFORMATION GROUPING

The crime statistics reported by an individual agency indicate what is happening in one particular area, but to make rational comparisons among a number of jurisdictions, communities with similar characteristics need to be grouped together. It may be important to know how a city compares with cities of similar size, or how patterns of crime differ in various types of communities. Grouping agencies with similar characteristics allows these determinations to be made. Aside from being merely interesting, such comparative analysis provides the basic information for long-range criminal justice planning.

UCR groups jurisdictions on the basis of population size in this report and if any types of comparisons are to be made the reader should also consider what type of community it is that he is comparing. Communities should be classified as urban, suburban or rural. This is essential in order to view a jurisdiction in the proper perspective. Grouping by population size considers only the population of the relevant area in this report. It does not consider proximity to a major metropolitan area in spite of the fact that widely different crime patterns could be expected in a city of 30,000 which is a suburb of Boston or Worcester and one which is in a rural area. In this report, grouping by population does not take into account the urban/suburban/ rural character of the area, and includes a wide range of populations in each category. For use in interpreting this report, the UCR grouping systems are listed below.

POPULATION GROUPINGS - CITIES AND TOWNS

GROUP	POPULATION
1 2 3 4 5 6	Over 250,000 100,000 to 250,000 50,000 to 100,000 25,000 to 50,000 10,000 to 25,000 2,500 to 10,000
7	Under 2,500

OFFENSE ESTIMATION

Estimation of offenses in this publication are made only on those contributing agencies who have submitted three or more months statistics. Those with less than three months statistics have been omitted.

Estimations are factored based on the statistics submitted. This means that the estimate assumes that the missing months would be equal to the submitted months. The only exception is murder where no estimation has been made.

CRIME INDEX

The Crime Index is a basic measure of crime which can be used for comparing the extent of crime among cities, counties and states of similar size. The Index is simply the total number of certain offenses that occur in a given area in a given calendar period (usually quarterly and annually). The offenses are murder and non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft and motor vehicle theft--all of the Part I offenses except negligent manslaughter and simple assault.

The offenses were selected as indicators of the total amount of criminal activity because they are serious offenses that are the focus of widespread concern; they occur with sufficient frequency to reflect fluctuations in the overall level of criminal activity; they are most likely to be reported, and reported accurately, to law enforcement officers due to their seriousness; and, they are offenses that can be clearly and specifically defined.

Notwithstanding its usefulness, the Index does have limitations. The relationship between the Index offenses and total criminal activity, both reported and unreported, has never been firmly established. The varying severity of offenses is not taken into account, resulting in equal weight being given to a shoplifting and a forcible rape. Furthermore, the actual incidence of crime in a city may not be accurately depicted by the Index if the majority of the city's crime involves non-Index offenses such as gambling and narcotics.

CRIME RATE

The Crime Rate is based on the Index, but adjusts the Index for variances in population by indicating the number of Index offenses for each 1,000 persons (other base population increments may be used such as the number of Index offenses per 100,000). This means that comparisons may be made among several areas with different populations, or within one area with different populations over a period of time, without the information being biased by population differences. Factors other than population that also influence crime rates include level of economic activity and unemployment; the cultural, religious, racial and age mix of the population; the time of day, day of the week, or the season of the year; local standards and enforcement policies; proximity to a metropolitan area; and, transience of the population, among others. For most general comparisons, the Crime Rate is probably the most accurate to use.

To calculate the Crime Rate, first divide the population of the area by 1,000, and divide the Crime Index by that answer. For example, if a city has a population of 273,000 and a Crime Index of 21,257, the calculations would be:

1) 273,000 divided by 1,000 = 273.00 2) 21,257 divided by 273.00 = 77.86

Thus, although the city's Crime Index is 21,257, its Crime Rate (the number of crimes for each 1,000 people) is 77.86. In this report, calculations for a town under 1,000 are based on 100 rather than 1,000. For example a town has 963 population and a Crime Index of 158: 1) 963 divided by 100 = 9.632) 158 divided by 9.63 = 16.41 per 100

RISK FACTOR

The Risk Factor, which has been calculated for each Index offense, indicates the likelihood that an individual Massachusetts citizen or his or her property would have been the victim of a particular crime. Because the Risk Factor identifies the risk to each individual, it differs from the Crime Rate which specifies the number of offenses for every 1,000 people.

Interpretation: If the Risk Factor states "1 in 273 people," it should be interpreted to mean that one person was victimized by that crime for every 273 people in Massachusetts.

Risk Factors have been computed for 1977 and 1978 for each Index offense to point out whether the degree of risk has increased or decreased. If the Risk Factors for a particular crime are.

1977	1	in	273	people
1978	1	in	265	people

the degree of risk increased from 1977 to 1978 because there was one crime for a fewer number of people in 1978 than in 1977. Thus, each individual was more likely to have become a victim. However, if the Risk Factors are:

1977	1	in	273	people
1978	1	in	295	people

the degree of risk increased from 1977 to 1978. This is indicated by the fact that there was one crime for a larger number of people in 1977, and consequently, each individual was less likely to have become a victim.

The interpretation is the same whether the risk is stated for people, residences, businesses or vehicles.

OFFENSE DEFINITIONS

Uniform Crime Reporting, as a nationwide program, received information from nearly 15,000 law enforcement agencies in 50 states. Because titles and descriptions of crimes can vary widely among state codes, it was necessary to ensure that each agency would define offenses the same way. For this reason, UCR established the following standard offense definitions:

PART I OFFENSES

Criminal Homicide:

• .

a. Murder and Non-negligent Manslaughter: The willful, non-negligent killing of one person by another. Excludes attempts to kill and assaults to kill (classified as aggravated assault), suicide, accidental death and justifiable homicide. Negligent Manslaughter b.

The killing of another person through gross negligence (stupidity). Does NOT include traffic fatalities.

Forcible Rape

The carnal knowledge of a female forcibly and against her will. Includes rape by force or threat of force, assault to rape and attempted rape. Excludes statutory rape which is based on the victim's age.

Robbery

The taking or attempting to take anything of value from a person or persons by force, or threat of force or violence and/or putting the victim in fear. Includes assault to rob, strongarm robbery and armed robberv.

Aggravated Assault

Burglary

The unlawful entry of a structure to commit a felony or a theft. It is not necessary that force be used in the entry or that a loss results from it. Includes attempted forcible entry.

Larceny

The unlawful taking or stealing of property from the possession of another without the use of force, violence or fraud. Includes attempted larceny. Excludes motor vehicle theft(classified separately because of volume), embezzlement, forgery, worthless checks and other thefts by fraud.

Motor Vehicle Theft

The unlawful taking of a motor vehicle. Includes attempted motor vehicle theft. Excludes the theft of motor boats, construction equipment, airplanes and farming equipment.

Arson

ić,

The wilful or malicious burning of property with or without the intent to defraud. Includes attempted arson. Note: As of January, 1979, Arson is classified as a Part I offense.

PART II OFFENSES

Other Assaults

An unlawful attack or attempted attack on another person which does not result in serious injury to the victim and which does not involve the use of a dangerous weapon.

An unlawful attack by one person on another for the purpose of inflicting severe bodily injury or death, usually accompanied by the use of a weapon that is likely to produce death or great bodily harm. Includes attempted murder and attempted aggravated assault when a nonpersonal weapon(not part of the attacker's body) is used, even though there is no injury. Attacks using personal weapons(part of the attacker's body) must result in serious personal injury to be classified as aggravated assault. Excludes simple assault.

Forgery and Counterfeiting

The making, altering, using or possession, with intent to defraud, of anything false which is made to appear true. Includes attempts.

Fraud

Fraudulent conversion, and obtaining money or property by fraudulent means. Includes confidence games, larceny by bailee and bad checks (except forged or counterfeit checks).

Embezzlement

Misappropriation or misapplication of money or property entrusted to one's care, custody or control.

Stolen Property Offense

The buying, receiving and possessing of stolen property, or the attempt to do so.

Vandalism

The willful or malicious destruction, injury, disfigurement or defacement of real or personal property without the consent of the owner or person having custody or control.

Weapons Offense

All violations of regulations or statutes that control carrying, using, possessing, furnishing and manufacturing deadly weapons or silencers. Inlcudes attempts.

Prostitution and Commercialized Vice

Sex offenses and attempted sex offenses of a commercialized nature.

Sex Offenses

All offenses against common decency and morals. Includes statutory rape and all other sex offenses or attempted sex offenses not previously defined.

Narcotic Drug Laws

The unlawful possession, sale, use, growth or manufacture of narcotic drugs.

Gambling

Promoting, permitting or engaging in illegal gambling.

Offenses Against Family and Children

Nonsupport, neglect, desertion or abuse of family and children.

Driving Under the Influence

Operating any motor vehicle or common carrier while under the influence of liquor or narcotics.

Liquor Laws

Rⁱ

Violation of state or local regulatory liquor laws. Includes sale to minors and drinking on a public conveyance. Excludes driving under the influence and drunkenness.

Protective Custody (Not included in State arrest totals).

Indicates the number of persons taken into protective custody for such reasons as drunkenness and self-protection. (Captures information for manpower studies and analyses).

Disorderly Conduct

Breaching the peace or attempting to do so.

Vagrancy

All Other Offenses

All violations of state or local laws except traffic violations and offenses defined above.

Suspicion

(Not an offense in Massachusetts). Arrest for no specific offense and release without formal charges being filed.

Curfew and Loitering Laws

Runaway

The unlawful truancy from a legal place of residence by a juvenile.

Offenses such as begging and loitering.

Violations of local curfew and loitering ordinances.

SECTION

2

OFFICERS ASSAULTED AND KILLED - 1980

In 1980, contributing agencies reported 2,794 officer assaults with 38.2% of the total assaults resulting in personal injury to the officer. The type of activity that an officer was most likely to be assaulted in was responding to a "disturbance call", which accounted for 43.3% of the total. Other activities of significance were attempting other arrests, (excluding burglary and robbery suspects) 14.7% of the total; handling, transporting and custody of prisoners, 10.2%; traffic pursuits and stops, 8.9%.

Hands, fists and feet were used in 81.0% of the assaults, followed by other dangerous weapons 14.6%; knife or cutting instrument 2.6%, and firearm 1.7%. The type of assignment where most assaults occurred was a two-man vehicle which resulted in 1,271 assaults or 45.5%; followed by a one-man vehicle when the officer vas assisted, 630 assaults or 22.5% of the assaults. During a 24 hour period using 8 hour shifts, the shift when most assaults occurred was 4 p.m. - 12 midnight, 1391 assaults or 49.8%; followed by 12 midnight - 8 a.m. with 1093 assaults or 39.1%, with the least amount occurring between 8 a.m. - 4 p.m., 310 assaults or 11.1%.

Combining these factors, an officer stands the highest risk of assault when responding to a disturbance call between the hours of 4 p.m. and 12 midnight, in a two-man vehicle with the offender using his hands, fist or feet as a weapon.

means) 92.9% of the time.

YEAR	TOTAL LARCENY	*	TREND
1979 1980	144,878 146,364		+1.0%
YEAR	TOTAL MOTOR VEHICLE	<u> THEFT</u>	TREND
1979 1980	63,575 58,128		-8.6%

The approximate number of crime index offenses that came to the attention of Massachusetts law enforcement agencies every 24 hours in 1980 were as follows:

MURDER	.61
FORCIBLE RAPES	4.0
ROBBERIES	36.0
AGGRAVATED ASSAULTS	50.0
BURGLARIES	260.0
LARCENIES	400.0
MOTOR VEHICLE	
THEFTS	159.0
VIOLENT CRIMES	91.0
PROPERTY CRIMES	819.0
TOTAL INDEX CRIMES	910.0

Of the 333,030 (State total) crime index offenses reported to the Crime Reporting Unit by 298 local and state law enforcement agencies, 33, 391 or 10.0% were crimes of violence(homicide, forcible rape,robbery and aggravated assault) and 299,639 or 90.0% were property crimes(burglary larceny-theft and motor vehicle theft).

The City of Boston with 75,755 crime index offenses, accounted for 22.7% of the total crime reported in the Commonwealth. Other cities of significance were:

CITY	TOTAL INDEX OFFENSES	%
Springfield	14,410	4.3
Worcester	12,978	3.9
Brockton	8,566	2.6
Brookline	4,608	1.4
Cambridge	8,009	2.4
Fall River	6,805	2.0
Lowell	5,831	1.8
Lynn	8,750	2.6
New Bedford	6,217	1.9
Newton	4.245	1.3
Quincy	4,700	1.4
Somerville	4,073	1.2
All other Massachusetts		
Cities/Towns	168,083	50.5

For a detailed analysis of each index offense, please refer to the remainder of the pages in this section (3).

NOTE: These figures represent those contributors who have submitted a minimum of 3 months' reports. Cities and towns with less than 3 months data were not included in this report.

ORE CRIME INDEX OFFENSE every 1.6 MINUTES

The crime clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part 1 Offenses: rather, it represents the annual ratio of crime to fixed time intervals.

ARSON

In October, 1978, the United States Congress passed legislation that mandated that arson be classified as a Part I Crime Index Offense in the Uniform Crime Reporting Program. To fulfill this mandate, the staff of the national program established liaison with law enforcement, fire services and insurance communities and designed a form which would collect meaningful information for all concerned starting in January, 1979. The state program in Massachusetts established similar liaison through the State Fire Marshal's Office in order to coordinate the submission of data to the Massachusetts Uniform Crime Reporting Unit.

Training sessions have been held throughout the state with the assistance of the F.B.I., UCR Section, to explain this and other changes, help solve problems that arose, and explain techniques in record keeping for the accurate collection of all UCR data. Information bulletins are distributed to all law enforcement agencies to keep them updated on all current UCR procedures. Contributions have gradually increased and we hope to eventually collect the same volume of data on this crime as we do on the other seven index crimes.

1980 STATISTICS

4,966 arson crimes were made known to law enforcement in Massachusetts and reported to the Uniform Crime Reporting Unit in 1980.

Arson of mobile property(motor vehicles, trailers, boats, etc.) accounted for 2,597 or 52.3% of the arsons reported; structural fires accounted for 2,033 or 40.9%; and the "all other" category(crops, timber, fences, signs, etc.) accounted for the remaining 336 or 6.8%.

The total reported property loss from arsons reported was \$24,114, 218, of which \$18,479,293 was structural, \$5,588,929 was mobile, and \$45,996 was in the "all other" category.

Massachusetts law enforcement agencies cleared 9.6% of the arsons reported. This information was compiled from reports submitted by 305 or 92% of our contributors.

ERRATA

Due to a discrepancy in adding cumulative figures, the 1979 Arson figures published in Crime in Massachusetts-1979 should have read a total of 4,454 arson crimes reported(instead of 11,898).

Arson of mobile property(1979) accounted for 2,663 or 59.8% of the arson reported, structural fires accounted for 1,620 or 36.4%, with the "all other" category accounting for the remaining 171 or 3.8%.

A corrected copy of the annual figures for 1979 is printed along with those for 1980 in this publication.

NOTE: See Arson breakdown by property classification on Pages 34 and 35.

Definition:

The willful, non-negligent killing of one person by another, excluding attempts to kill, assaults to kill, suicide, accidental death and justifiable homicide.

Murder is the most serious of the four violent index offenses. In 1980, there were 223 murders in Massachusetts, which represented .7% of all violent crime and .07 of one percent of the total index. The greatest number of murders in one month was 25 in March followed by 22 in August and October. Suffolk County, of which Boston is the main population center, accounted for 97 murders, or 43.5% of the total.

The number of murders increased when comparing 1980 with 1979 by 7.2%, but still has remained below the 1973 and 1974 high of 256 murders in each of those years. When comparing 1970 with 1980, murder shows a 13.2% increase.

The Massachusetts murder rate from 1978 thru 1980 has been 3.5, 3.5 and 3.9 murders per 100,000 people. This is far below the national crime rate for murder which was 9.0 in 1978 and 9.7 in 1979.

The risk factor indicates that there was a 9.3% greater chance that any Massachusetts citizen would become a victim of murder in 1980 than in 1979.

Due to the seriousness of the offense, more detailed information is collected concerning victims, offenders, weapons used and circumstances in which the offense took place, than for any other offense. Murder victims between the ages of 20 and 34 accounted for 43.9% of all the murders, followed by the 35-49 year-olds with 22.9%. In Single Victim/Single Offender situations, offenders were male 88.5% of the time, 11.5% were female, 74% were white and 26% were black and other races.

Handguns were used in 35% of the murders and firearms of all types in 40.8%. Knives or other cutting instruments accounted for 31.4% of the homicides.

The clearance rate for murder was 68.6%, the highest for any offense.

RISK FACTOR:

1977	1 in	32,777 people
1978	1 iı	28,445 people
1979	1 iı	28,350 people
<u>1980</u>	<u>1 ir</u>	25,727 people
