Law Enforcement Division

RICHARD W. RILEY
Governor

J. PRESTON STROM
Chief

P. O. Box 21398
COLUMBIA, S. C. 29221
Phone 758-2461

March 17, 1980

Crime in South Carolina and the United States continues to increase. The cost to citizens is high in human suffering as well as property loss. The costs of criminal justice programs also rise with the crime rate.

This report attempts neither to explain the continued rise in crimes committed or to suggest ways of combatting criminal conduct. It is published as a tool to assist government, criminal justice agencies and the public in recognizing the crime problem in our state in the hope that better understanding will lead to eventual methods of reducing crime.

As in years past, I commend the law enforcement agencies in our state that contribute to this important program of Uniform Crime Reports. A high degree of professionalism is indicated by their participation.

Yours truly,

J.P. Strom
J. P. Strom, Chief
S. C. Law Enforcement Division

BACKGROUND OF UNIFORM CRIME REPORTING

NATIONAL UCR PROGRAM

Development of the current nationwide Uniform Crime Reporting (UCR) Program began nearly forty years ago. In 1930, crime counts were first requested from local police departments with the Federal Bureau of Investigation (FBI) designated by Congress to collect, compile and analyze the statistics. The Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP) played a primary role in the origin and development of UCR and today serves in a strong advisory capacity. Standardized offense classification and counting procedures developed by the IACP are the basis for the UCR program. The National Sheriffs' Association (NSA) also serves in an advisory role to the national program. The publication, Crime in the United States, is the annual report by the FBI dealing with national crime statistics.

In recent years the FBI has actively assisted states in the development of state level UCR programs compatible with the national system.

SOUTH CAROLINA UCR PROGRAM

South Carolina was one of the first states to implement an operational state UCR program. The South Carolina Law Enforcement Division is the agency administering the program. The information collected and the uniform classifications under which it is collected are based directly upon the guidelines developed by the IACP and FBI.

Upon initiation of the South Carolina UCR program in July 1973, SLED in conjunction with the FBI, held workshops around the state to instruct or refresh the county and city law enforcement agencies on the scope of the program and the mechanics of completing the forms.

Since that time, SLED, along with the local law enforcement agencies, has instituted an incident-based records management system which has greatly enhanced and improved the quality of information gathered under the Uniform Crime Reports system. Under this new procedure crime data and other information gathered by municipal and county law enforcement agencies is collected and submitted to SLED on a daily, monthly and annual basis. This new system lends itself to a more complete and accurate crime reporting system which in most instances alleviates some of the paperwork with which many departments are now burdened. An additional advantage of using standard incident and booking reports will be realized from the uniformity of forms. Standardized reports facilitate the exchange of information between law enforcement agencies within the state. The forms have been included in the report writing classes taught at the South Carolina Criminal Justice Academy.

OBJECTIVES

The fundamental objectives of the South Carolina Uniform Crime Reporting Program are:

- (1) To inform the Governor, Legislature, other governmental officials and the public as to the nature of the crime problem in South Carolina.
- (2) To provide law enforcement administrators with criminal statistics for administrative and other operational use.
- (3) To determine who commits crimes by age, sex, race and other attributes in order to find the proper focus for crime prevention and enforcement.
- (4) To provide base data and statistics to help measure the workload and effectiveness of the criminal justice system.
- (5) To provide base data and statistics for research to improve the efficiency, effectiveness and performance of criminal justice agencies.

A particularly important goal of the state UCR program is to return statistical information back to its contributors. With the implementation of the new incident reporting system, participating police agencies furnish data that are verified, analyzed and then returned to each jurisdiction in the form of monthly printouts. With the completion of the annual report, contributing agencies possess detailed information showing crime trends within their jurisdictions. This enables them to make important decisions in budgeting, manpower allocations and the identification of high crime areas.

This information is also forwarded by SLED to the FBI on a monthly and annual basis for inclusion in the FBI's annual UCR publication.

REPORTING AND CLASSIFICATION

In reporting offenses to the Uniform Crime Reports program, offenses are classified according to standard definitions (given in a later section of the report) that are used throughout the nation. The UCR definitions are designed to insure that offenses with different titles under state and local law are appropriately counted under the UCR program without regard to findings of courts or juries, since the statistics are gathered primarily to assist in identifying areas of concern to law enforcement officers, and not meant to reflect the outcomes of inquests, hearings or trials.

CRIME FACTORS

The presence of crime in our state's communities is a serious concern not only of the law enforcement profession, but of society at large. Historically, the causes and origins of crime have been the subjects of investigation by many disciplines. However, no definitive conclusions have yet been reached. Instead, a number of factors affecting the volume and type of crime that occurs from place to place have been delineated. Some of these are as follows:

- Density and size of community population and its surrounding area.
- Variations in composition of the population, particularly age structure.
- Stability of population with respect to transient factors.
- Economic conditions, including job availability.
- Cultural conditions, such as educational, recreational, and religious characteristics.
- Climate.
- Effective strength of law enforcement agencies.
- Administrative and investigative emphases of law enforcement.
- Policies of other components of criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Attitudes of citizenry toward crime.
- Crime reporting practices of citizenry.

These and other crime influencing factors are present, to some degree, in every community, and their presence affects, in varying degrees, the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

Police cannot shoulder the entire burden of fighting crime. The same is true of the courts, correction agencies, and any other elements of the criminal justice system. Real progress against crime can be attained only when each individual recognizes that crime prevention is his personal responsibility, and acts accordingly.

SOUTH CAROLINA CRIME INDEX

The tabulations presented in the tables, graphs, and charts in this publication indicate the volume, fluctuation, and distribution of crime in South Carolina on the basis of a crime index. The crime figures are categorized by agency, county and state on the basis of information submitted by police agencies from these areas. The seven offenses comprising the Crime Index and their definitions are:

1. Murder: The willful killing of a human being (includes voluntary or non-negligent manslaughter).

2. Forcible Rape: The carnal knowledge of a female through the use or threat of force (does not include statutory rape).
3. Robbery: Unlawfully obtaining the property of another by force or the threat of force. Robbery occurs only in the presence of a victim.
4. Aggravated Assault: An unlawful attack upon a person for the purpose of inflicting severe bodily injury.
5. Breaking or Entering: The unlawful entry of a structure to commit a felony or theft.
6. Larceny: The unlawful taking of the property of another without the use of force or fraud.
7. Motor Vehicle Theft: The unlawful taking of a motor vehicle. Motor Vehicle Theft includes alleged joy-rides.

The Crime Index is used as a basic measure of crime. The crimes were selected for use as an index on the basis of their serious nature, their frequency of occurrence and the reliability of reporting from citizens to law enforcement agencies. The offenses of murder, forcible rape, robbery and aggravated assault are categorized as violent crimes. Offenses of breaking or entering, larceny and motor vehicle theft are classed as nonviolent crimes. The crime index is the total of actual offenses that come to the attention of law enforcement agencies.

In reviewing crime index figures the reader should keep in mind that there is currently no way of determining the total number of crimes committed. The crime index has been established to measure only the instances of crime which come to the attention of law enforcement agencies. It is important to remember in reviewing the tables and graphs in this report that the volume of crime in a given area or municipality is related to the crime factors previously listed in this report.

CRIME RATES

The crime rate indicates the number of Index Crimes per unit of population, generally per 10,000. It should be noted that the crime rate only takes into consideration the numerical factor of population and does not incorporate any of the other elements which contribute to the amount of crime in a given community. The effect of changes in population on rates should be kept in mind when attempting to make a comparison of crime rates.

The population data used in this report are taken from the Federal-State Cooperative Program for Population Estimates. The figures are provisional for July 1, 1978 and were issued by the U.S. Bureau of Census during November, 1979.

PERCENT CHANGE

The percent changes in numbers of offenses and arrests from year to year are shown in a number of tables in this publication. The percent change shown after any 1977 figures reflects a comparison to information reported in 1976.

VIOLENT CRIME

Crimes of violence include murder, rape, robbery and aggravated assault. Violent crimes involve the element of personal confrontation between the victim and the offender and, because of their nature, are generally considered to be more serious than nonviolent crimes.

NONVIOLENT CRIME

For UCR purposes, nonviolent crimes include the offenses of breaking and entering, larceny and motor vehicle theft. While these offenses generally do not involve personal danger to the victim, the value of property lost in these crimes is many times greater than in violent crimes.

PERCENT ROUNDING

Percentages shown in this publication may not add to 100 due to rounding.

UPDATED DATA

Any data published here concerning figures for prior years supersede those in previous reports.

1977-79 INDEX CRIME TRENDS

CLEARANCE RATES

For crime reporting purposes, a crime index offense is cleared when a law enforcement agency has identified the offender, there is enough evidence to charge him and he is actually taken into custody. The arrest of one person can clear several crimes or several persons may be arrested in the process of clearing one crime. Crime solutions are also recorded in exceptional circumstances when some element beyond law enforcement control precludes formal charges against the offender.

For the 1979 reporting period, 22.9 percent of all Index Crimes were cleared. The percentage of violent crimes cleared was 59.7 percent, while the clearance rate for nonviolent crimes was 17.2 percent. These figures compare with a total clearance rate of 22.4 percent of all Index Offenses, a violent crime clearance rate of 58.2 percent, and nonviolent crime clearance of 17.0 percent for the year 1978.

1979 CLEARANCE DATA

MURDER

336	337	368
-----	-----	-----

1977 1978 1979

Murder is defined as the willful (non-negligent) killing of one human being by another except those cases classified as justifiable homicide. Under the UCR definition, justifiable homicides are specifically limited to the killing of an offender by a police officer in the line of duty or the killing of a felon by a private citizen. This definition does not take into consideration the findings of coroners' juries or other courts. Suicides are not defined as murders under UCR. Attempts to commit murder are classified as aggravated assaults.

1979 SUMMARY

Firearms were used in 75.6 percent of the murders, cutting instruments in 13.6 percent, other weapons in 7.3 percent, hands and feet in 3.5 percent.

Males accounted for 78 percent of murder victims, females 22 percent, whites 42.7 percent, blacks 56.8 percent, other races 0.5 percent. Victims in the age range of 20 through 29 years accounted for 29 percent.

Persons killed during armed robberies accounted for 10.1 percent of all victims.

Alcohol was known to have been present in 32.9 percent of all murders.

RAPE

Forcible Rape, by UCR definition, is the carnal knowledge of a female through the use or threat of force. Assaults to rape or attempts to commit rape are included in this category. One offense is counted for each victim of rape. Statutory rapes and other types of sexual assaults are not counted as rapes under the UCR program.

1979 SUMMARY

During 1979 the number of rapes decreased by 2.3 percent compared to those reported in 1978. Forcible rape accounted for 70.7 percent and attempted rape for 29.3 percent.

In 56.4 percent of all rapes the offender was known to the victim.

Dangerous weapons were employed in 21.1 percent of all rapes.

ROBBERY

3,021	2,934	3,134
1977	1978	1979

Robbery, for UCR purposes, is defined as the unlawful taking of the property of another through the use or threat of force. Robbery is a violent crime in which the element of personal confrontation between the victim and offender is present. Attempts to rob are included in the robbery count. Armed robberies, those involving weapons, and strong-arm robberies, those not involving weapons, make up the two major categories. One robbery is counted for each distinct operation, regardless of the number of victims present at the time.

1979 SUMMARY

Armed robberies accounted for 59.1 percent of all robberies, while strong-arm accounted for 40.9 percent.

Highway robberies (roads, streets, alleys, etc.) accounted for 33.5 percent of all robberies, while general commercial establishments accounted for 29.8 percent, service stations 5.1 percent, convenience stores 8.4 percent, residences 15.6 percent, banks (including those on bank grounds in which the bank itself was not the target) 1.5 percent and miscellaneous premises 6.0 percent.

Firearms were used in 37.1 percent of all robberies, cutting instruments in 12.4 percent, other dangerous weapons in 9.6 percent and hands, feet, etc. in 40.9 percent.

There were 37 murders reported as occurring during robberies.

AGGRAVATED ASSAULT

Aggravated Assault, for UCR purposes, is defined as an unlawful attack by one person upon another with the intent of inflicting serious bodily injury. Aggravated assaults are frequently accomplished through the use of or threatened use of dangerous weapons. However, assaults resulting in serious injury from the use of hands or feet also are counted in this category. Attempts to assault are counted here since it is not necessary that injury result whenever a dangerous weapon is employed. Attempts to commit murder are classified under this category. One offense is counted for each victim of aggravated assault.

1979 SUMMARY

There were 15,273 aggravated assaults reported during 1979. This offense accounted for 10.3 percent of all index crimes.

Dangerous weapons were used in 88.8 percent of all aggravated assaults, hands and feet in 11.2 percent.

During 1979, aggravated assaults increased 7.7 percent over those reported in 1978.

BREAKING OR ENTERING

Breaking or entering, for UCR purposes, is defined as the unlawful entry of a structure with intent to commit a felony or theft. It is not necessary that force be used in gaining entry in order for the offense to be classified as an unlawful entry. Neither is it necessary that property loss occur in an unlawful entry or forcible entry for the crime to be counted in this category. Attempts to unlawfully enter a structure are also counted. One offense is counted for each distinct operation.

1979 SUMMARY

Of the three categories of breaking or entering, forcible entry accounted for 80.3 percent, unlawfully entry for 11.5 percent and attempted forcible entry for 8.2 percent.

Residential structures accounted for 59 percent of these offenses.

Night operations accounted for 32.6 percent of breaking or entering offenses, daylight operations for 33.9 percent and 33.4 percent occurred at unknown times.

LARCENY

Larceny, for UCR purposes, is defined as the unlawful taking of the property of another without the use of force or fraud. Larceny does not have the element of unlawful entry. This offense category includes such crimes as shoplifting, purse-snatching, stealing items from vehicles and the like. Larceny does not include theft by fraud, forgery, embezzlement or similar crimes. Motor Vehicle thefts fall under a separate category and are not counted as larcenies. Attempts to commit larceny are included in this category. One offense is counted for each distinct operation, regardless of the number of victims.

1979 SUMMARY

Individual offenses of larceny in which property stolen amounted to \$200 or more accounted for 28.9 percent of all larcenies, those in which the value stolen was from \$50 to \$200 accounted for 32.8 percent and those in which the value stolen was less than \$50 for 38.3 percent.

Offenses of shoplifting accounted for 11.8 percent of all larcenies, thefts of items from within motor vehicles 13.1 percent and thefts of motor vehicle parts or accessories for 26.3 percent.

MOTOR VEHICLE THEFT

Motor vehicle theft, for purposes of UCR, is defined as the theft of a self-propelled vehicle that runs on the surface of the land but not on rails. Motor vehicles include automobiles, trucks, motorcycles and the like. This category does not include boats, airplanes or specialized items such as farm equipment, tractors, construction equipment, bulldozers, etc. These specialized items are counted under the larceny category. Motor vehicle theft does not include using a vehicle without the owner's consent if prior consent or lawful access has been granted. Obtaining vehicles through fraud or failure to return rented vehicles are not included in this category. Attempts to steal motor vehicles as well as "joyrides" are counted as motor vehicle thefts. One offense is counted for each vehicle stolen.

1979 SUMMARY

During 1979 the number of reported motor vehicle thefts increased 8.1 percent over those reported in 1978.

Automobiles accounted for 67 percent of this category, trucks and buses for 14.8 percent and other vehicles (motorcycles, etc.) for 18.2 percent.

Of vehicles originally stolen in South Carolina, there were 4,798 recovered during 1979.

OFFICERS ASSAULTED

1979 SUMMARY

During 1979 there were 1,160 assaults upon law enforcement officers, an increase of 20.5 percent over those reported during 1978. Of these, 32.9 percent occurred while the officers were responding to disturbance calls, 26.8 percent while the officers were attempting to make general arrests, 11.8 percent while making traffic stops and 9.6 percent while investigating suspicious persons.

Of the 1,160 officers assaulted, 8.9 percent were assaulted with firearms, 3.9 percent with cutting instruments, 8.1 percent with other weapons and 79.1 percent with hands, feet, etc.

Some degree of injury was sustained by 11.9 percent of officers assaulted, 73.9 percent of these injuries caused by hands, feet, etc.

Of the 1,160 assaults on officers, 31.8 percent occurred between the hours of 10:00 PM and 2:00 AM.

SOUTH CAROLINA LAW ENFORCEMENT OFFICERS KILLED BY YEAR

During 1979, four South Carolina police officers were willfully killed in the line of duty.

On Friday, March 2, 1979, at 5:00 P.M., a 52 year old Charleston City policeman was shot and killed with a .38 caliber handgun while attempting to apprehend a shoplifting suspect. He had twelve years of police experience.

On Thursday, June 7, 1979, at 5:15 A.M., a 49 year old Swansea assistant police chief was shot and killed with a .38 caliber handgun while questioning four suspects stopped for a speeding violation. He had five years of police experience.

On Thursday, June 7, 1979, at 7:15 P.M., a 28 year old highway patrolman stationed in Colleton County was shot and killed with a .357 magnum handgun after stopping a suspect for a speeding violation. He had four years of police experience.

On Thursday, July 19, 1979, at 10:10 P.M., a 49 year old highway patrolman stationed in Florence County was shot and killed with a .38 caliber handgun after stopping a suspect for a faulty taillight. He had twenty-one years of police experience.

ARRESTS

The Uniform Crime Reports Program requires the daily reporting of data concerning persons arrested in the state. Records of arrests for criminal acts in both Part I and II crime classes are received from state, county and municipal law enforcement agencies in South Carolina and are classified by offense category and arranged according to age, sex and race of persons arrested. Traffic arrests, except driving under the influence, are not reported. A total of 128,096 arrests for Part I and Part II crimes was reported during the year 1979, a 2.2 percent decrease from the 130,994 arrests reported for the year 1978.

A person is counted on the arrest report each time he is arrested or summoned. It should be kept in mind that the volume of arrests may vary from time to time due to differences in local arrest procedures and policies. It should also be noted that a person may be arrested several times during a given month for the same or different offenses. This occurs frequently for such crimes as public drunk, disorderly conduct and similar violations. A juvenile is counted as "arrested" when the circumstances are such that if he or she were an adult, an arrest would be counted, or when law enforcement action or other official action is taken beyond a mere interview, warning or admonishment.

When reviewing arrest figures it should be remembered that arrest counts do not reflect the specific number of persons arrested since, as has been pointed out, one individual may be arrested several times during any given month or year. However, arrest data is useful in measuring the extent of law enforcement activity in a given geographical area as well as providing an index for measuring involvement in criminal acts by the age, sex and race of the offenders.

Analysis of reported arrests for the year 1979 indicates that 19.5 percent of all arrests during the year were Part I offenses (murder, manslaughter, forcible rape, robbery, aggravated assault, breaking or entering, larceny and motor vehicle theft). Arrests for larceny comprised the highest percentage of Part I arrests, amounting to 48.2 percent.

CRIME BY COUNTY AND AGENCY

County crime rates per 10,000 population and index crime counts by county and agency are shown in the two tables of this section. The crime rates in the first table are based upon the latest population estimates available from the U.S. Bureau of Census, released in November, 1979. The number of months of active participation in the UCR program is indicated beside each agency name in the second table.

1979 COUNTY CRIME RATES PER 10,000 POPULATION

	Population	Murder	Rape	Robbery	Aggravated Assault	Breaking Or Entering	Larceny	Motor Vehicle Theft
