RECEIVED

Crime in South Carolina continues to plague our people with death, injury and property loss. The statistics compiled in this report do not begin to portray the human suffering resulting from the activities of vicious and unlawful persons in our state. As criminal events daily disrupt the lives of our citizens we perceive a need for more specialized law enforcement efforts. Crime prevention teams, major crime strike forces and other new approaches to crime problems will have positive effects. Criminal information systems, as more law enforcement agencies become professional enough to contribute and extract information, will continue to aid in the war against crime.

The police, however, can only perform specific functions in the criminal justice field, just as courts and corrections must work within certain bounds. The only people who can really have a lasting, long-range impact on the alarming activities of criminals, both juvenile and adult, are the citizens of our state—families, schools, religious organizations. Society itself must begin to treat this problem which is presently so misunderstood or ignored. The direction in which we need to move is toward developing a society in which criminals, adult and juvenile, are neither excused nor emulated. That is not to suggest, however, that they be forgotten, but we can not continue to see persons who commit violent crimes as being themselves the victims of injustice.

Finally, I would like to express my appreciation and admiration to those law enforcement agencies in South Carolina who realize that criminal information is as important and useful as any other technique in combatting crime and to encourage all agencies to participate in this fine system of cooperative information exchange.

Yours truly,

Handwritten signature of J. P. Strom in cursive script.

J. P. Strom, Chief

SOUTH CAROLINA UNIFORM CRIME REPORTING PROGRAM

INTRODUCTION

Development of the current nationwide Uniform Crime Reporting (UCR) Program began more than forty years ago. In 1930, crime counts were first requested from local police departments with the Federal Bureau of Investigation designated by Congress to collect, compile and analyze the statistics. The committee on Uniform Crime Records of the International Association of Chiefs of Police played a primary role in the origin and development of the UCR program and today serves in a strong advisory capacity. Standardized offense classifications and scoring procedures to insure uniformity and consistency of data are the basis of UCR reports.

NATIONAL UCR PROGRAM

In recent years, the FBI has actively assisted individual states in the development of state-wide programs of law enforcement statistics compatible with the national system. The state system now in effect can provide a more direct and frequent service to local law enforcement agencies. This assures completeness and finer quality of information than was available in the past. The National Uniform Crime Reports program, under the administration of the Federal Bureau of Investigation, is the outgrowth of a need and comprehensive study of crime statistics in the United States. The publication, "Crime in the United States," is the annual report by the FBI dealing with national crime statistics.

SOUTH CAROLINA UCR PROGRAM

South Carolina was one of the first states to implement an operational state UCR program. The South Carolina Law Enforcement Division is the agency administering the program. The information collected and the uniform classifications under which it is collected are based directly upon the guidelines of IACP and FBI.

Upon initiation of the South Carolina UCR program in July 1973, SLED in conjunction with the FBI, held workshops around the state to instruct or refresh the county and city law enforcement agencies on the scope of the program and the mechanics of completing the forms.

Since that time, SLED, along with the local law enforcement agencies, has instituted an incident-based records management system which has greatly enhanced and improved the quality of information gathered under the Uniform Crime Reports system. Under this new procedure, crime data and other information gathered by municipal and county law enforcement agencies is collected and submitted to SLED on a daily, monthly and annual basis. This new system lends itself to a more complete and accurate crime reporting system which in most instances alleviates some of the paperwork with which many departments are now burdened. An additional advantage of using standard incident and booking reports will be realized from the uniformity of forms. Standardized reports facilitate the exchange of information between law enforcement agencies within the state. The forms have been included in the report writing classes taught at the South Carolina Criminal Justice Academy, reducing the need for individual departments to train every new employee in the use of local offense reports and booking reports.

OBJECTIVES

The fundamental objectives of the South Carolina Uniform Crime Reporting Program are:

- (1) To inform the Governor, Legislature, other governmental officials and the public as to the nature of the crime problem in South Carolina.
- (2) To provide law enforcement administrators with criminal statistics for administrative and other operational use.
- (3) To determine who commits crimes by age, sex, race and other attributes in order to find the proper focus for crime prevention and enforcement.
- (4) To provide base data and statistics to help measure the workload and effectiveness of the criminal justice system.
- (5) To provide base data and statistics for research to improve the efficiency, effectiveness and performance of criminal justice agencies.

A particularly important goal of the state UCR state program is to return statistical information back to its contributors. With the implementation of the new Incident Reporting System, participating police agencies furnish data that is verified, analyzed and then returned to each jurisdiction in the form of a monthly printout. With the completion of the annual report, contributing agencies possess detailed information showing crime trends within their jurisdiction. This enables them to make important decisions in budgeting, manpower allocations and the identification of high crime areas.

This information is also forwarded by SLED to the FBI on a monthly and annual basis; this is for inclusion in national crime reports and the FBI's annual UCR publication.

REPORTING AND CLASSIFICATION

While there is no doubt that crime in South Carolina is increasing, care should be exercised when viewing the number of offenses reported to the UCR program. It should be noted that methods of crime reporting have been improved. Consequently, the volume of crime actually reported in the state has increased.

In reporting offenses to the Uniform Crime Reports program, offenses are classified according to standard definitions (given in a later section of the report) that are used throughout the nation. The UCR definitions are designed to insure that offenses with different titles under state and local law are appropriately counted under the UCR program without regard to the findings of courts or juries, since the statistics are gathered primarily to assist in identifying areas of concern to law enforcement officers, and not meant to reflect the outcomes of inquests, hearings or trials.

CRIME FACTORS

Data gathered under the Uniform Crime Reporting Program are submitted by the law enforcement agencies of South Carolina and project a state-wide view of crime. Examination of some of the underlying factors which influence the volume and type of statistics presented, are necessary if fair, equitable, and enlightened conclusions are to be drawn from the statistical data which follows.

No attempt will be made in this report to examine theories of criminal behavior. The reader is simply encouraged to bear in mind that crime is a complex, many-faceted phenomenon. There are no simple explanations and no easy answers to the problem. However, crime is subject to study; it can be understood and dealt with. Set forth below are some factors which will affect the crime that occurs from place to place.

- Density and size of the community population and the metropolitan area of which it is a part.
- Economic status of the population.
- Relative stability of the population including commuters, seasonal and other transients.
- Climate, including seasonal weather conditions.
- Educational, recreational, and religious characteristics.
- Effective strength of the police force.
- Attitudes and policies of the courts and corrections.
- The public's attitude toward law enforcement problems.
- Effectiveness of law enforcement agencies in accurately reporting and interpreting crime data.

These and other crime influencing factors are present, to some degree, in every community, and their presence affects, in varying degrees, the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

Police cannot shoulder the entire burden of fighting crime. The same is true of the courts, correction agencies, and any other elements of the criminal justice system. Real progress against crime can be attained only when each individual recognizes that crime prevention is his personal responsibility, and acts accordingly.

SOUTH CAROLINA CRIME INDEX

The tabulations presented in the tables, graphs, and charts in this publication indicate the volume, fluctuation, and distribution of crime in South Carolina on the basis of a crime index. The crime figures are categorized by agency, county, state and planning regions on the basis of information submitted by police agencies from these areas. The seven offenses comprising the Crime Index and their definitions are:

1. Murder: The willful killing of a human being (includes voluntary or non-negligent manslaughter).
2. Forcible Rape: The carnal knowledge of a female through the use or threat of force (does not include statutory rape).
3. Robbery: Unlawfully obtaining the property of another by force or the threat of force. Robbery occurs only in the presence of a victim.
4. Aggravated Assault: An unlawful attack upon a person for the purpose of inflicting severe bodily injury.
5. Breaking Or Entering/Burglary: The unlawful entry of a structure to commit a felony or theft.
6. Larceny: The unlawful taking of the property of another without the use of force or fraud.
7. Motor Vehicle Theft: The unlawful taking of a motor vehicle. Motor Vehicle Theft includes alleged joy-rides.

The Crime Index is used as a basic measure of crime. The crimes were selected for use as an index on the basis of their serious nature, their frequency of occurrence and the reliability of reporting from citizens to law enforcement agencies. The offenses of murder, forcible rape, robbery and aggravated assault are categorized as violent crimes. Offenses of breaking or entering/burglary, larceny and motor vehicle theft are classed as nonviolent crimes. The crime index is the total of actual offenses that come to the attention of law enforcement agencies. During the year 1978, a total of 141,652 index offenses were reported. This represents an increase of 4,036 offenses, or a 2.9 percent increase over the year 1977.

In reviewing crime index figures the reader should keep in mind that there is currently no way of determining the total number of crimes committed. The crime index has been established to measure only the instances of crime which come to the attention of law enforcement agencies. It is important to remember in reviewing the tables and graphs in this report that the volume of crime in a given area or municipality is directly related to the crime factors previously listed in this report.

Data published here concerning prior years supersedes those in any previous reports.

INDEX CRIME TRENDS

Offense	1976	1977	% Change	1978	% Change
Murder	327	336	+2.8	337	+0.3
Rape	888	942	+6.1	1,026	+8.9
Robbery	2,938	3,032	+2.8	2,934	-2.9
Aggravated Assault	12,471	13,818	+10.8	14,179	+2.6
Subtotal (Violent)	16,624	18,117	+9.0	18,476	+2.0
B & E/Burglary	43,246	45,941	+6.2	43,356	-5.6
Larceny	69,639	66,572	-4.4	71,829	+7.9
Motor Vehicle Theft	6,995	5,986	-0.1	7,991	+14.4
Subtotal (Nonviolent)	119,880	119,499	-0.3	123,176	+3.1
Total	136,504	137,616	+0.8	141,652	+2.9

VIOLENT CRIME

Crimes of violence include murder, forcible rape, robbery, and aggravated assault. Violent crimes involve the elements of personal confrontation between perpetrator and victim and, because of their nature, are more serious than nonviolent crimes.

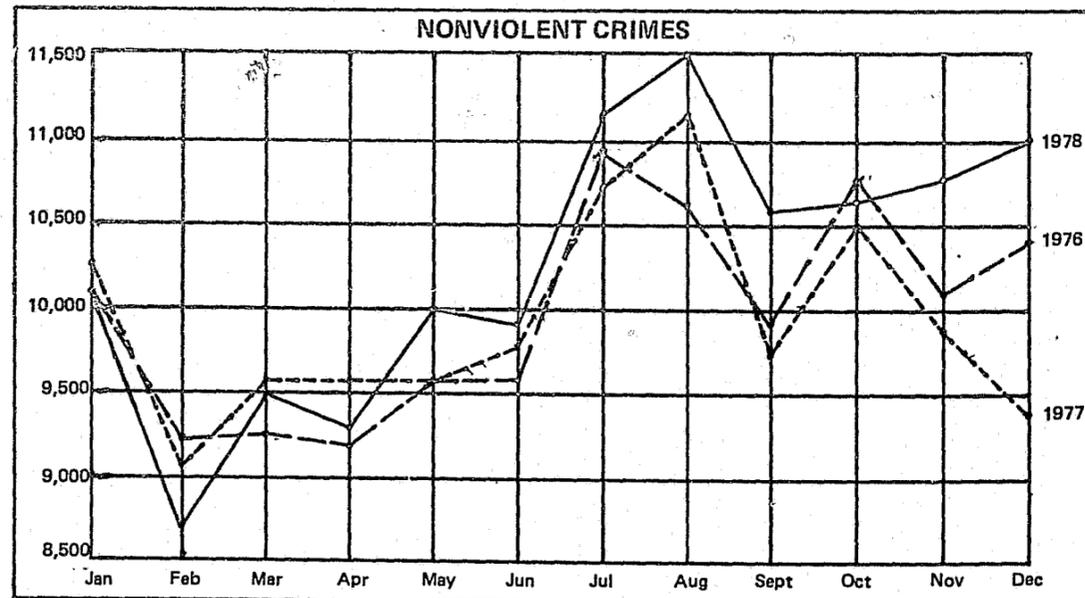

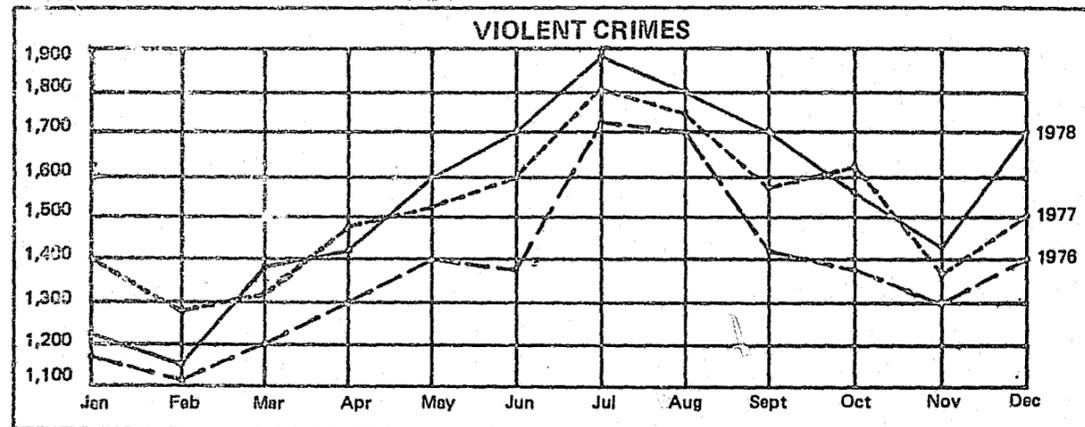

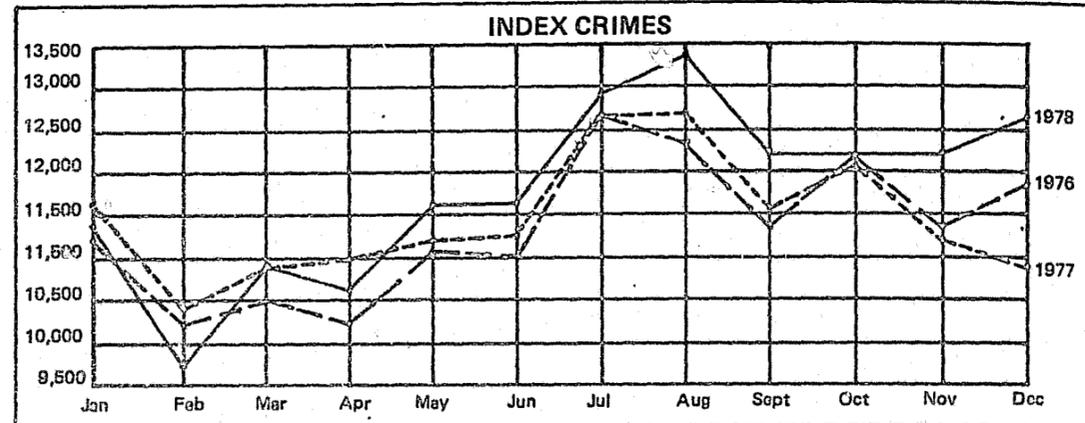

These offenses, for the year 1978, made up 13.0 percent of all reported index offenses. For the year 1978 violent crimes as a group rose 2.0 percent over the year 1977.

NONVIOLENT CRIME

For Uniform Crime Reports purposes, nonviolent crimes include the offenses of breaking or entering, larceny and motor vehicle theft. The number of nonviolent crimes reported for 1978 was more than 8 times the number of violent crimes, amounting to 87.0 percent of all index crimes reported. Nonviolent crimes as a group recorded an increase of 3.1 percent compared to the number reported for 1977.

VALUE OF PROPERTY STOLEN AND RECOVERED

Supplementary data relating to the crime of murder, rape, robbery, breaking or entering/burglary, larceny and motor vehicle theft are collected and analyzed on a monthly basis. The resultant figures provide information concerning the value of property stolen and recovered by type of property. The total value of property stolen in South Carolina during 1978 was \$52,682,808. This amounts to an increase of \$7,268,335 over the year 1977. Law Enforcement agencies were successful in recovering approximately 29 percent of the loss or \$15,026,461. Stolen motor vehicles accounted for the highest dollar loss, amounting to \$20,857,170 for 1978; this figure represents an approximate increase of 26.3 percent over the year 1977.

CLEARANCE RATES

For crime reporting purposes, a crime index offense is cleared when a law enforcement agency has identified the offender, there is enough evidence to charge him and he is actually taken into custody. The arrest of one person can clear several crimes or several persons may be arrested in the process of clearing one crime. Crime solutions are also recorded in exceptional circumstances when some element beyond law enforcement control precludes formal charges against the offender.

For the 1978 reporting period 22.4 percent of all Index Crimes were cleared. The percentage of violent crimes cleared was 58.2 percent, while the clearance rate for nonviolent crimes was 17.0 percent. This compares with a total clearance rate of 21.1 percent of all Index Offenses, a violent crime clearance rate of 53.1 percent, and nonviolent crime clearance of 16.2 percent for the year 1977.

1978 CLEARANCE DATA

Offense	Number Of Offenses	% Cleared	Total Cleared	Clearances Involving Only Persons Under Age 18

1978
DISTRIBUTION OF PROPERTY STOLEN

MURDER

Murder is defined as the willful (non-negligent) killing of a human being except those classified as justifiable. Under the Uniform Crime Report definition, justifiable homicides are specifically limited to the killing of an individual by a police officer in the line of duty or the killing of a felon by a private citizen. Also excluded from this category are accidental or negligent homicides and suicides. Attempts to commit murder are classified as aggravated assault.

1976 SUMMARY ANALYSIS

A total of 327 murders were reported by law enforcement agencies in South Carolina during 1976.

The offense of murder accounted for 2.0 percent of the violent crimes and .2 percent of the total index of offenses.

Firearms were used in 68.0 percent of the murders while cutting instruments were used in 18.3 percent; hands, fists and feet in 4.5 percent, and other weapons in 3.6 percent.

Males accounted for 71.8 percent of murder victims, female 28.1 percent. Whites made up 41.0 percent of all victims, while negroes accounted for 59.0 percent. The age group of 20-24 years was the highest for murder victims, accounting for 14.0 percent.

The killing of persons during robberies accounted for 20 murders, or 6.1 percent.

Alcohol was known to have been involved in 21.4 percent of all murders.

1977 SUMMARY ANALYSIS

A total of 336 murders were reported by law enforcement agencies in South Carolina during 1977.

The offense of murder accounted for 1.9 percent of all the violent crimes and .2 percent of the total index offenses.

Firearms were used in 75.2 percent of the murders while cutting instruments were used 13.1 percent, hands or feet in 2.9 percent and other weapons in 8.3 percent.

Males accounted for 78.9 percent of murder victims, females 21.1 percent. Whites made up 44.9 percent of all victims while Negroes accounted for 54.8 percent. The age group 25-29 years was the highest for murder victims, accounting for 17.0 percent.

The killing of persons during robberies accounted for 28 murders or 8.3 percent.

Alcohol was known to have been involved in 25.3 percent of all murders.

1978 SUMMARY ANALYSIS

A total of 337 murders were reported by law enforcement agencies in South Carolina during 1978.

The offense of murder accounted for 1.8 percent of violent crimes and 0.2 percent of the total index offenses reported.

Firearms were used in 70.6 percent of the murders committed while cutting instruments were used 14.8 percent; hands, fists and feet in 3.3 percent, and other weapons in 11.2 percent.

Males accounted for 73.6 percent of murder victims; females 26.4 percent. Whites made up 45.1 percent of all victims, while Negroes accounted for 54.3 percent. The age group of 25-29 years was the highest for murder victims, accounting for 14.9 percent.

The killing of persons during robberies accounted for 32 murders, or 9.6 percent

Alcohol was known to have been involved in 40.3 percent of all murders.

RAPE

Forcible rape is the carnal knowledge of a female through the use or threat of force. Assaults or attempts to rape are included in this category. Statutory rape is not included.

One offense is counted for each victim of rape.

Rape, under the Uniform Crime Reports program is divided into two categories: rape by force and attempted forcible rape.

1976 SUMMARY ANALYSIS

Forcible rape accounted for 61.6 percent of all reported offenses in this category, while attempts to commit forcible rape accounted for 38.4 percent.

The highest number of rapes for a single month fell in July, accounting for 11.5 percent.

1977 SUMMARY ANALYSIS

Forcible rape accounted for 66.5 percent of all reported offenses in this category, while attempts to commit forcible rape accounted for 33.5 percent.

The highest number of rapes for a single month fell in July, accounting for 11.8 percent.

1978 SUMMARY ANALYSIS

Forcible rape accounted for 64.2 percent of all reported offenses in this category, while attempts to commit forcible rape accounted for 35.8 percent.

The highest number of rapes for a single month fell in August, accounting for 10.3 percent.

ROBBERY

Robbery is a violent crime in which the element of personal confrontation is present. Robbery is defined as the unlawful taking of the property of another through the use or threat of force. Assaults to rob and attempts to rob are included. Both armed robberies, in which any weapon is used, and strong-arm robberies, in which no weapon is used, are counted. One offense for each distinct operation of robbery is counted, regardless of the number of victims present.

1976 SUMMARY ANALYSIS

A total of 2,938 robberies were reported by law enforcement agencies in South Carolina during 1976.

Robberies accounted for 17.7 percent of all violent crimes and 2.2 percent of the total number of index crimes.

Armed robberies accounted for 62.6 percent of all robberies, while strong-arm robberies accounted for 37.4 percent.

Highway robberies (committed in streets, alleys, etc.) accounted for 38.8 percent of all robberies, while commercial establishments (other than service stations, chain stores and banks) accounted for 23.6 percent of the robberies. Chain stores accounted for 9.0 percent of robbery victims.

Firearms were employed in 45.3 percent of all robberies reported while hands, fists and feet were used in 37.4 percent, cutting instruments in 9.7 percent and other dangerous weapons in 7.6 percent.

The month of December showed the highest number of robberies, with 364 offenses reported.

There were 20 murders reported as resulting from robberies.

1977 SUMMARY ANALYSIS

A total of 3,021 robberies were reported by law enforcement agencies in South Carolina during 1977.

Robberies accounted for 16.7 percent of all violent crimes and 2.2 percent of the total number of index crimes.

Armed robberies accounted for 57.3 percent of all robberies, while strong-arm robberies accounted for 42.7 percent.

Highway robberies (committed in streets, alleys, etc.) accounted for 37.7 percent of all robberies, while commercial establishments (other than service stations, chain stores and banks) accounted for 22.7 percent of the robberies. Chain stores accounted for 12.0 percent of robbery victims.

Firearms were employed in 35.7 percent of all robberies reported while hands, fists and feet were used in 42.7 percent, cutting instruments in 11.6 percent and other dangerous weapons in 10.0 percent.

The month of January showed the highest number of robberies, with 329 offenses reported.

There were 30 murders reported as resulting from robberies.

1978 SUMMARY ANALYSIS

A total of 2,934 robberies were reported to law enforcement agencies in South Carolina during 1978.

Robberies accounted for 15.9 percent of all violent crimes and 2.1 percent of the total number of index offenses.

Armed robberies accounted for 55.4 percent of all robberies, while strong-arm robberies accounted for 44.6 percent.

Highway robberies (committed in street, alleys, etc.) accounted for 37.1 percent of all robberies, while commercial establishment (other than service station, convenience stores and banks) accounted for 29.4 percent of the robberies. Convenience stores accounted for 7.9 percent of robbery victims.

Firearms were employed in 35.4 percent of all robberies reported, while hands, fists and feet were used in 44.6 percent, cutting instruments in 11.3 percent and other dangerous weapons in 8.7 percent.

The month of December showed the highest number of robberies with 310 offenses reported.

There were 32 murders reported resulting from robberies.

AGGRAVATED ASSAULT

Aggravated assault is defined as an unlawful attack by one person upon another with the intent of inflicting severe bodily injury. Aggravated assaults are frequently accomplished with a weapon or other means likely to produce death or great harm. Attempts are included since it is not necessary that an injury result when a firearm, knife or other weapon is used which could cause serious personal injury or injuries requiring medical attention. Attempted murders are classified under this category. One offense is counted for each victim of an aggravated assault.

1976 SUMMARY ANALYSIS

A total of 12,471 aggravated assaults were reported in South Carolina during 1976.

Aggravated assaults accounted for 75.0 percent of all violent crimes and 9.1 percent of the total number of index offenses.

Dangerous weapons were employed in 77.5 percent of all aggravated assaults, while hands or feet were used in 22.5 percent.

An increase of 23.1 percent was recorded for aggravated assaults in 1976 compared to those reported in 1975.

1977 SUMMARY ANALYSIS

A total of 13,818 aggravated assaults were reported in South Carolina during 1977.

Aggravated assaults accounted for 76.2 percent of all violent crimes and 10.0 percent of the total number of index offenses.

Dangerous weapons were employed in 89.2 percent of all aggravated assaults, while hands or feet were used in 10.8 percent.

An increase of 10.8 percent was recorded for aggravated assaults in 1977 as compared to those reported in 1976.

1978 SUMMARY ANALYSIS

A total of 14,179 aggravated assaults were reported in South Carolina during 1978.

Aggravated assaults accounted for 76.8 percent of all violent crimes and 10.0 percent of the total index offenses.

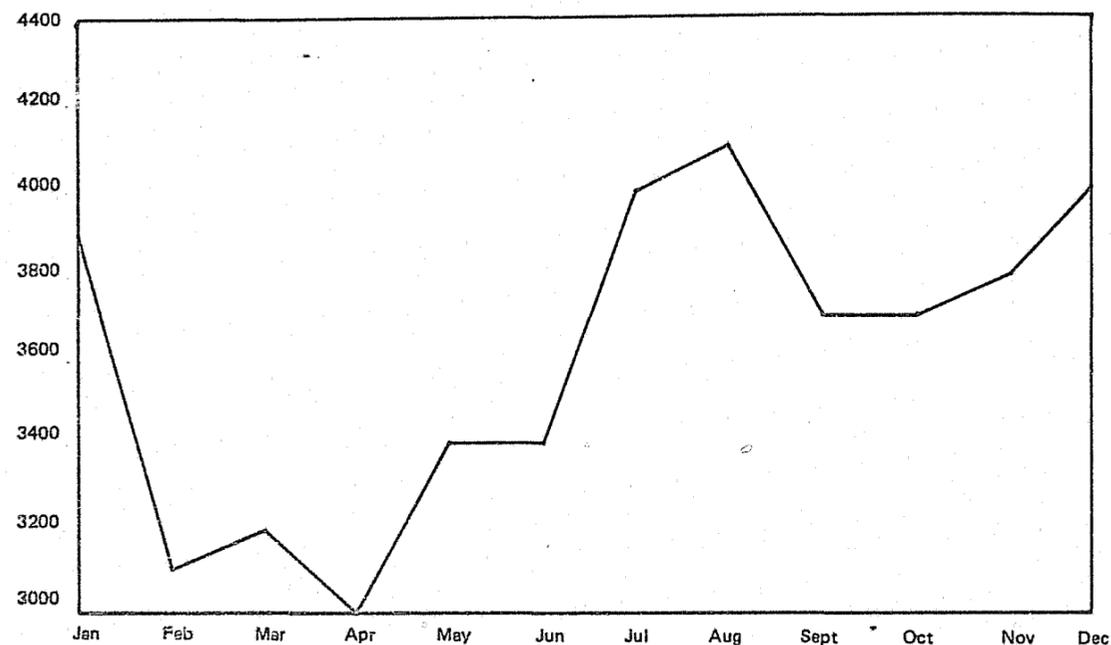

Dangerous weapons were employed in 90.4 percent of all aggravated assaults, while hands or feet were used in 9.6 percent.

An increase of 2.6 percent was recorded for aggravated assaults in 1978 compared to those reported in 1977.

BREAKING OR ENTERING

The category of breaking or entering/burglary includes any unlawful entry of a structure to commit a felon or theft. It is not necessary that force be used to gain entry in order for the offense to be classified as an unlawful entry. Neither is it necessary for a property loss to occur in an unlawful entry or breakin for the event to be classified under this category. Attempts to commit the above offenses are counted. One offense is counted for each distinct operation of breaking or entering/burglary.

1976 SUMMARY ANALYSIS

There were 43,246 offenses of breaking or entering/burglary reported in 1976.

Breaking or entering/burglary accounted for 36.1 percent of nonviolent crimes and 31.7 percent of all index offenses.

Of the three categories of breaking or entering/burglaries, forcible entry accounted for 73.5 percent of the total offenses in this category while unlawful entry accounted for 18.4 percent and attempted forcible entry accounted for 8.1 percent.

Residences accounted for 63 percent of the targets in this category.

Night operations accounted for 45.4 percent of all breaking or enterings while 41.4 percent were committed during daylight hours and 13.2 percent were committed at undetermined times.

The month of October showed the largest number of reported offenses, accounting for 4,037 or 9.3 percent of the total.

1977 SUMMARY ANALYSIS

There were 45,941 offenses of breaking or entering/burglary reported in 1977.

Breaking or entering/burglary accounted for 38.5 percent of nonviolent crimes and 33.4 percent of all index offenses.

Of the three categories of breaking or entering/burglary, forcible entry accounted for 70.7 percent of the total offenses, unlawful entry accounted for 21.2 percent and attempted forcible entry accounted for 8.1 percent.

In this category, residences accounted for 62.8 percent of the targets.

Night operations accounted for 40.2 percent of all breakings or enterings, while 42.1 percent were committed during daylight hours and 17.6 percent were committed at undetermined times.

The month of July showed the largest number of reported offenses, accounting for 4,319 offenses or 9.4 percent of the total.

1978 SUMMARY ANALYSIS

There were 43,356 offenses of breaking or entering/burglary reported in 1978.

Breaking or entering/burglary accounted for 35.2 percent of nonviolent crimes and 30.1 percent of all index offenses.

Of the three categories of breaking or entering/burglary, forcible entry accounted for 77.2 percent of the total offenses, unlawful entry accounted for 14.6 percent and attempted forcible entry accounted for 8.2 percent.

In this category, residences accounted for 60.9 percent of the targets.

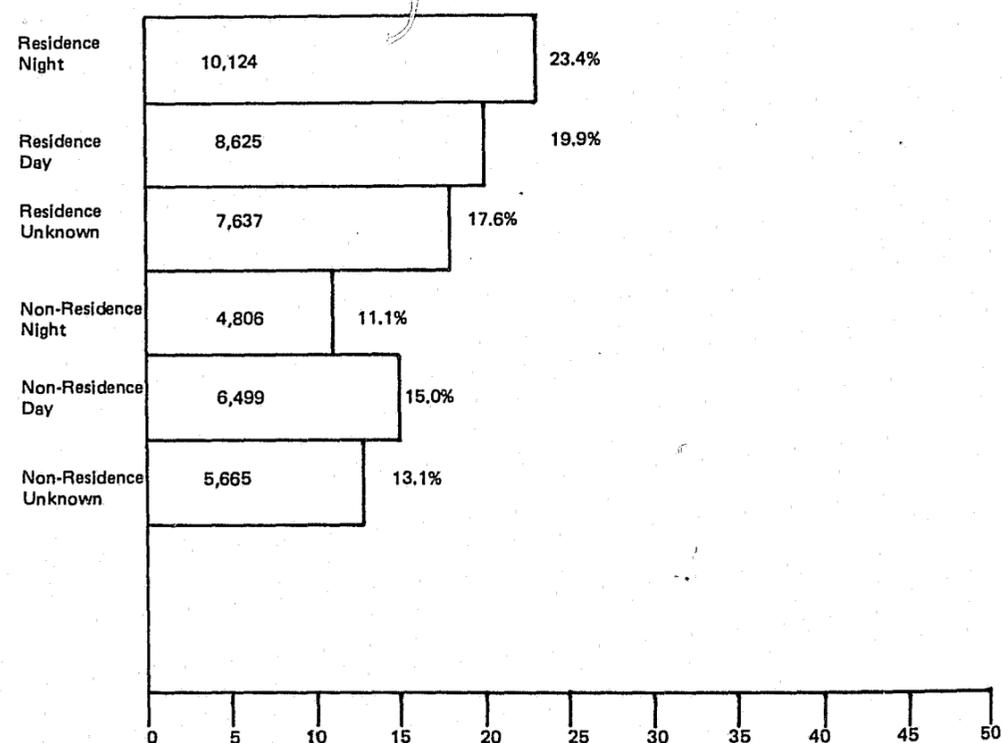

Night operations accounted for 34.4 percent of all breakings or entering, while 34.9 percent were committed during daylight hours and 30.7 percent committed at undetermined times.

The month of August showed the largest number of reported offenses, accounting for 4,089 or 9.4 percent of the total.

LARCENY

Larceny is defined as the unlawful taking or stealing of property without the use of force, violence or fraud. It includes offenses such as shoplifting, pocket-picking, purse-snatching, theft of items from vehicles or of vehicle parts and accessories, bicycle thefts and the like. Thefts from tents, campers, houseboats and similar recreation vehicles are included under the category of larceny. For purposes of uniform crime reports, this category does not include embezzlement, fraud, unlawful conversions, forgery, worthless checks, or similar offenses. Motor vehicle thefts are not included under larceny; they fall into a separate index category. Attempts to commit larcenies are included. One offense of larceny is counted for each distinct operation.

1976 SUMMARY ANALYSIS

A total of 69,639 offenses of larceny were reported in 1976.

Larceny accounted for 58.1 percent of nonviolent crimes and 51.0 percent of all index offenses.

Individual offenses of larceny in which property stolen amounted to \$200 or more accounted for 22.1 percent of this category, while offenses in which the value of property stolen was less than \$50 accounted for 38.5 percent.

1977 SUMMARY ANALYSIS

A total of 66,572 offenses of larceny were reported in 1977.

Larceny accounted for 55.7 percent of nonviolent crimes and 48.4 percent of all index offenses.

Individual offenses of larceny in which property stolen amounted to \$200 or more accounted for 21.5 percent of this category, while offenses in which the value of property stolen was less than \$50 accounted for 45.1 percent.

1978 SUMMARY ANALYSIS

A total of 71,829 offenses of larceny were reported in 1978.

Larceny accounted for 58.3 percent of nonviolent crimes and 51.0 percent of all index offenses.

Individual offenses of larceny in which property stolen amounted to \$200 or more accounted for 24.4 percent of this category, while offenses in which the value of property stolen was less than \$50 accounted for 43.3 percent.

MOTOR VEHICLE THEFT

Motor Vehicle theft includes thefts of motor driven, land surface vehicles such as automobiles, trucks, buses, and motorcycles. "Joyrides" and attempted motor vehicle thefts are included. Incidents in which lawful access to a vehicle has been granted or can be assumed are not counted under this classification.

1976 SUMMARY ANALYSIS

There were 6,995 offenses of motor vehicle theft reported in 1976.

Motor vehicle thefts accounted for 5.8 percent of nonviolent crimes and 5.1 percent of total index offenses.

Automobiles were the primary target of motor vehicle thefts, accounting for 77.9 percent of the category.

1977 SUMMARY ANALYSIS

There were 6,986 offenses of motor vehicle theft reported in 1977.

Motor vehicle thefts accounted for 5.9 percent of nonviolent crimes and 5.1 percent of total index offenses.

Automobiles were the primary targets of motor vehicle thefts, accounting for 75.0 percent of the category.

1978 SUMMARY ANALYSIS

There were 7,991 offenses of motor vehicle theft reported in 1978.

Motor vehicle thefts accounted for 6.5 percent of nonviolent crimes and 5.6 percent of total index offenses.

Automobiles were the primary targets of motor vehicle thefts, accounting for 70.4 percent of the category.

MOTOR VEHICLE THEFT TREND

	1976	1977	% Change	1978	% Change
Total Motor Vehicle Thefts:	6,995	6,986	-0.1%	7,991	+14.4%
Automobiles:	5,451	5,238	-3.9%	5,622	+7.3%
Trucks And Buses:	669	793	+18.5%	1,015	+28.0%

Values:	\$ 14,217,795	\$ 15,854,662	+11.5%	\$ 20,230,080	+27.6%

Out of 7,991 motor vehicles stolen in South Carolina during 1978, there were 4,668 motor vehicles recovered, accounting for 58.4 percent of the total stolen.

ASSAULTS ON LAW ENFORCEMENT OFFICERS

The assault of a law enforcement officer is an increasingly serious problem faced by those who have chosen careers in law enforcement. Such acts directly affect the functioning of proper law enforcement operations and reduce the ability of law enforcement agencies to combat crime and maintain law and order. Law enforcement administrators as well as the public at large will continue to view this problem with concern.

1976 SUMMARY ANALYSIS

In 1976, the South Carolina Uniform Crime Report showed 680 law enforcement officers assaulted with 135 or 19.9 percent sustaining some degree of personal injury.

Data available on police assaults indicate that in 1976 officers responding to disturbance calls accounted for 38.8 percent of all police assaults. The most prevalent weapons used were the subject's hands, fists, and feet, which accounted for 74.3 percent of all weapons used.

1977 SUMMARY ANALYSIS

In 1977, the South Carolina Uniform Crime Report showed 763 law enforcement officers assaulted with 103 or 13.5 percent sustaining some degree of personal injury.

Data available on police assaults indicate that in 1977, officers responding to disturbance calls accounted for 39.7 percent of all police assaults. The most prevalent weapons used were the subject's hands, fists, and feet, which accounted for 73.7 percent of all weapons used.

1978 SUMMARY ANALYSIS

In 1978, the South Carolina Uniform Crime Report showed 963 law enforcement officers assaulted with 160 or 16.6 percent sustaining some degree of personal injury.

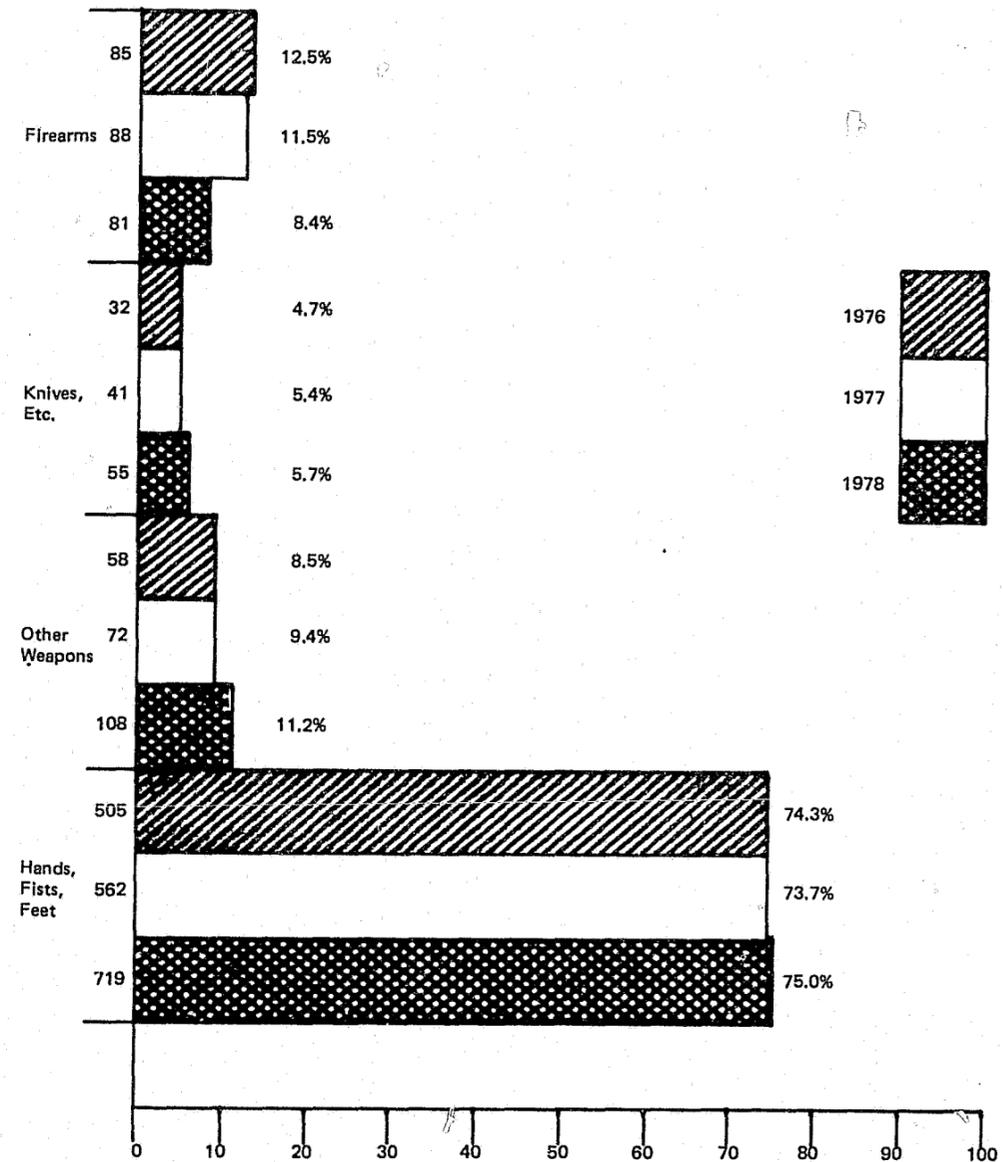

Data available on police assaults indicate that in 1978 officers responding to disturbance calls accounted for 32.7 percent of all police assaults. The most prevalent weapons used were the subject's hands, fists, and feet, which accounted for 74.7 percent of all weapons used.

	1977	88	41	72	562	763
	1978	81	55	108	719	963

During 1978, there were 963 police assaults reported to the Uniform Crime Reporting Program. This reflects an increase of 26.2 percent over the 763 assaults in 1977. As shown in the above table, an examination of activities of law enforcement officers at the time of the assault discloses that the greatest number of assaults, 32.7 percent, occurred while responding to disturbance calls. The second highest category of assaults, 32.3 percent, was in "attempting other arrests". Third in number were "traffic stops", 11.1 percent.

1976-1978
LAW ENFORCEMENT OFFICERS ASSAULTED BY WEAPON TYPE

TYPE OF ASSIGNMENT

During 1978, 48.5 percent of all assaults on officers occurred while the officer was assigned to a one man vehicle, while 33.4 percent of the assaults occurred while officers were assigned to two man vehicles.

Type Of Assignment	1976 Offenses	% Dist.	1977 Offenses	% Dist.	1978 Offenses	% Dist.
Two Man Vehicle	280	41.2	295	38.7	322	33.4

SOUTH CAROLINA LAW ENFORCEMENT OFFICERS KILLED IN THE LINE OF DUTY FROM 1962—1978

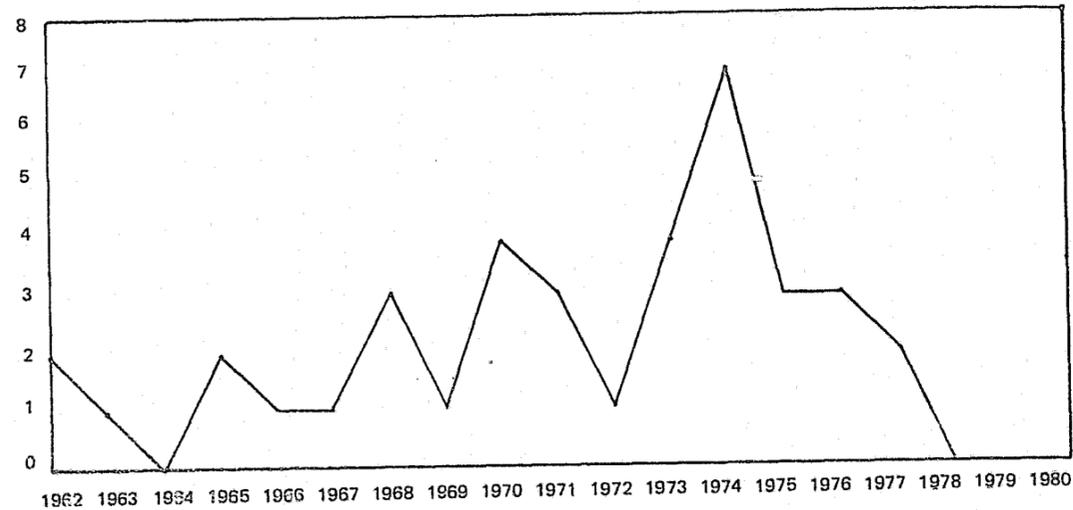

The numbers on the map above indicate the number of officers killed in each county since 1962.

1978

LAW ENFORCEMENT OFFICERS KILLED

During 1978, no South Carolina police officers were willfully killed in the line of duty. This is only the second time in 17 years that the state has had no officers killed.

SOUTH CAROLINA LAW ENFORCEMENT OFFICERS KILLED BY YEAR

ARREST DATA

The Uniform Crime Reports Program requires the daily reporting of data concerning persons arrested in the state. A record of total arrest activity for criminal acts in both Part I and Part II crime classes is received from state, county and municipal law enforcement agencies in South Carolina and is classified by offense category and arranged according to the age, sex and race of persons arrested. Traffic arrests, except driving under the influence, are not reported. A total of 130,994 arrests for Part I and Part II criminal acts were reported during the year 1978, a 1.3 percent decrease from the 132,736 arrests reported for the year 1977.

A person is counted on the arrest report each time he is arrested or summoned. It should be kept in mind that the volume of arrests may vary from time to time due to differences in local arrest procedures and policies. It should also be noted that a person may be arrested several times during a given month for the same or different offenses. This occurs frequently for such crimes as public drunk, disorderly conduct and similar violations. A juvenile is counted as "arrested" when the circumstances are such that if he or she were an adult, an arrest would be counted or when law enforcement action or other official action is taken beyond a mere interview, warning or admonishment.

When reviewing arrest figures it should be remembered that arrest counts do not reflect the specific number of persons arrested since, as has been pointed out, one individual may be arrested several times during any given month or year. However, arrest data is useful in measuring the extent of law enforcement activity in a given geographical area as well as providing an index for measuring involvement in criminal acts by the age, sex and race of the offenders.

Analysis of reported arrests for the year 1978 indicates that 18.0 percent of all arrests during the year were for Part I offenses (murder, manslaughter, forcible rape, robbery, aggravated assault, breaking or entering/burglary, larceny and motor vehicle theft). Arrests for larceny comprised the highest percentage of Part I arrests, amounting to 8.6 percent of all arrests.

VIOLENT CRIME ARRESTS

During 1978 there were 5,713 reported arrests for crimes of violence (murder, forcible rape, robbery, and aggravated assault) in the state, amounting to 24.2 percent of Part I arrests and 4.4 percent of the total arrests for all offenses. Arrests for aggravated assault were the most frequent violent crime arrests, representing 70.0 percent of the total for violent crimes.

NONVIOLENT CRIME ARRESTS

Nonviolent crime arrests (breaking or entering/burglary, larceny, and motor vehicle theft) comprised 75.6 percent of all Part I arrests and 13.6 percent of all arrests reported during 1978. The highest number of nonviolent crime arrests, 11,325, occurred in the larceny category.

CRIME RATES

The crime rate indicates the number of Index Crimes per unit of population, generally per 10,000. It should be noted that the crime rate only takes into consideration the numerical factor of population and does not incorporate any of the other elements which contribute to the amount of crime in a given community. The effect of changes in population on rates should be kept in mind when attempting to make a comparison of crime rates.

The Index Crime rate for South Carolina for the year 1978 is 497.4 offenses per 10,000 inhabitants. The violent crime rate was 64.9 offenses per 10,000 population, while the nonviolent crime rate amounted to 432.5 offenses per 10,000 population. These figures are based on a state population of 2,848,000.
