FOREWORD

The statistical data in this report came primarily from information systems maintained by the Data Processing Division within the Bureau of Administrative Services. Information on court dispositions came from the various felony courts in Michigan.

Additional information on the production and content of this publication can be obtained by contacting the Office of Public Information, Michigan Department of Corrections, Stevens T. Mason Building, Lansing, Michigan 48909.

Acknowledgements

The editor gratefully acknowledges the contributions of the following people in the preparation of the 1981 statistical presentation.

Stephen Malatinsky, graphic designer, who designed and produced cover, charts and layout of report.

William Kime, deputy director of Program Bureau, who assisted and advised the editor.

Jeffrey Hatfield, departmental analyst, who collected and prepared the statistical data.

Steve Paddock, data processing division, who coordinated information systems.

Karen Sage, Erich Baeske, Lorna Longendyke, of Word Processing, who prepared many of the charts.

This document was printed by the Michigan Reformatory Vocational Print Shop. Directing the operation was Dan Pierce, print shop supervisor.

What else do you remember about 1952?

The riots will define 1981 in our minds. Was it before or after the riots we will ask when referring to any other event in the recent life of the department.

The causes have been sorted and resorted; analyzed and reanalyzed. We studied the painful details of the events leading to May 22 and May 26.

We shed some tears and felt angry frustration over the injuries, the destruction, the opportunities lost to stop the spinning top, wobbling crazily out of control.

It could always happen, yet how could it have happened?

Did crowding exhaust us? Did we fail to explain a rule or capture the understanding of employees?

Did a strange assortment of circumstances contrive to light the match?

We put it back together; sometimes the pieces fit a little more snugly than before; sometimes there were new, sharp corners that didn't fit as well as we wanted them to.

But the resulting picture of the Michigan prison system had sharper focus than ever before; some areas we thought blurry and indistinct jumped out to smack us squarely: Employees and their frustrations; weaknesses in recruitment, selection and training; staffing stretched tautly over the frame of a system more complicated and difficult than ever before constructed.

A new awareness of the unmet needs and unresolved difficulties of the system emerged in the aftermath of the riots.

After the probes and accusations, the power structure reached out to help and by the end of 1981, the department waited with high expectations for the money to make significant improvements in the system.

Along with the exhaustion of long-term crowding, was the ever present anxiety of budget deficit. A system wounded and worn out by shuffling, and sorting and shifting prisoners and programs was further tormented by reductions in funds for equipment, prison maintenance and sufficient staffing.

During the 1980-81 fiscal year, an executive order forced the department to transfer \$2 million of its operating budget into a special account to ensure that the department lapsed funds at the end of the year.

In November of 1981, the department dug out \$4 million of its 1981-82 budget as its contribution to the state's fiscal health. More cuts were threatened by the end of 1981.

It was a Mad Hatter Party as budgets were cut and as increased funding was sought, all at the same time. Opposing forces clashed over improvements in the system and the increasingly desperate need to balance the state budget.

The system is never static. While crowding and budget problems seem to go on forever, major and significant changes, findings and decisions constantly modify the system and the problems.

The riots will always be part of our memories of 1981. But the changes that will come as a result and the other significant events of 1981 will mean the most in the long term health and development of the system.

Michigan became the first state in the union to enact legislation reducing sentences to ease prison crowding.

The Emergency Powers Act, passed in 1980, was called into play in May of 1981 after the prison population had exceeded the system's capacity for more than two months and after the resolution of a lawsuit.

The suit, brought by a county prosecutor, challenged the constitutionality of the law. The Michigan Supreme Court decided the law was constitutional in mid-May and shortly thereafter the Governor declared the prison crowding emergency. The director of the department then reduced by 90 days the minimum sentences of all prisoners in the system. During the course of the emergency, which lasted until Aug. 18, everyone coming into the system also got the sentence reduction. About 900 prisoners left the system early during the emergency and the net bed gain was between 500 and 600. It was anticipated the law would have to be used annually until prison capacity could be increased.

The major cause of the system's continuing crowding has been identified as the impact of longer sentences caused by the voter's approval of the elimination of earned good time for many prisoners in 1978. The Emergency Powers Act is seen as a responsible way to reduce crowding on a short-term basis while the state tackles the capacity problem through new prison construction.

Work began in 1981 on a prototype regional prison near Plymouth. At the same time, plans were announced for a second regional prison near Lansing. This facility is to house men and women in a variety of security levels.

A new men's maximum-security prison near Ypsilanti was opened in August of 1981. Built for 411, the modern facility is next door to the women's prison and shares medical care facilities.

A new minimum-security camp for women — Camp Gilman — was opened in 1981. Women campers were previously housed at Camp Pontiac across the road from the new camp. The old camp was opened again for men in December.

Camp Gilman, which can house 80 women, is one of two camps in the state which has a wood-burning furnace and makes use of state and federal tree thinning programs.

A large corrections center was opened late in 1981 in Detroit. The Woodward Center, near Wayne State University, houses 144 persons nearing parole.

Significant research projects completed by the department's Program Bureau during the year further validated the risk research while showing that the very best candidates are chosen for correction center placement.

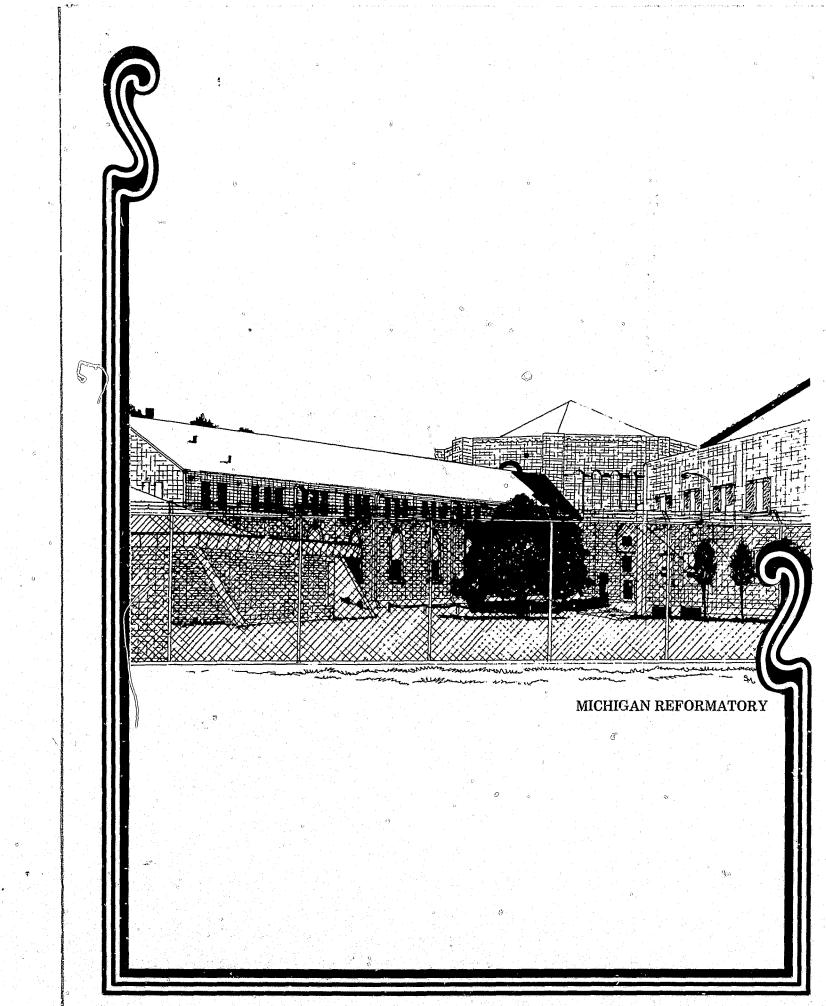

A major parole supervision study testing the relationship between the intensity of supervision and new crime was released in 1981. It showed parole supervision is not particularly helpful in preventing new crime by parolees but an examination of change in supervision intensity showed that agents are able to recognize the beginnings of anti-social behavior. Using this valuable information, the department has been able to make a more efficient distribution of its work force. Further refinement of the study should yield more information that can improve the safety of citizens and the efficiency of the department.

Court Dispositions

The A tables and graph illustrates data supplied to the department by the circuit courts in Michigan and the Detroit Recorder's Court. They show all prisonable offenses handled by the courts during 1981.

A-1 shows the number of cases handled by each court in 1981 and the disposition of each. The percentage columns show the percentages of dispositions by prison sentences, probation or jail terms. The remaining columns breakdown the types of offenders receiving the sentences.

The A-2 table (Court Disposition by Type) shows the disposition in order of frequency by compiled law as reported by the various courts. The attempts are listed immediately below the named offense.

A-3 compares court dispositions for a six-year period listing the sanctions of prison, probation and jail.

Court Dispositions By District
Group A — No prior prison term, juvenil
Group B — Juvenile record, multiple jall
Group C — Multiple probation terms, pro
Group D — Institutional residents, escap

Prison Commitments

The tables in this section illustrate data collected about people committed to the Department of Corrections in 1981. B-2 shows the distribution of minimum terms of all persons committed to prison in 1980 and compares the minimum term received with the maximum term allowed by law. The table contains both men and women prisoners, B-3 breaks it down for women.

Attempts are given in the line directly below the actual offense.

B-4 (Commitments by Age for Men) compares the age of males committed to prison for the past six years. There has been a increase in the number of men in the 25-29 age ranges. Generally, the chart shows that the commitment population is getting older.

In B-4b the 1981 commitments are broken down by age, sex and race. In B-5a it can be seen that the number of white persons sent to prison in 1981 dropped between 1980 and 1981. The non-white population continued a slight downward trend.

Prisons and Prisoners

The following tables and charts present information on the state's prisons and prisoners. A map shows the location of all prisons and camps. Another section describes each institution.

Illustrated in this section are the crimes for which prisoners have been incarcerated, the population growth in each prison, the treatment programs and critical incidents.

This section also contains statistics on Michigan State Industries and the Office of Health Care.

The C-1 tables show the distribution of minimum terms of all incarcerated individuals and provides a comparison of the minimum term received and the maximum term allowed by law. It includes both men and women prisoners. C-2 illustrates the same information for women. Attempted offenses are given directly below the named offense.

Chart C-7 lists the various treatment activities available in Michigan prisons and minimum security camps. It contains the number of prisoners involved in each as of December, 1981. It shows a waiting list for psychotherapy totaling 2,351.

Academic education is the most common treatment activity: A total of 3,429 prisoners were involved in schooling on the fourth Friday head count.

A total of 346 convicts were in special education Title I programming, and 1,352 were working on high school equivalency degrees as of December, 1981. More than 1,700 were enrolled in college classes and 1,213 were in basic education programming.

In addition, all institutions offer individual counseling, religious and library services and recreational activities.

The Office of Health Care provides inpatient services at four prisons: The State Prison of Southern Michigan (SPSM), the Muskegon Correctional Facility, the Riverside Correctional Facility in Ionia and the Marquette Branch Prison. The Huron Valley Men's Facility was added August, 1981, (or the 1981-82 fiscal year). Prisoners at other institutions who need inpatient care are either transported to SPSM or to a local hospital. Chart C-10b illustrates the use of these inpatient facilities.

On-site dental services are provided at most institutions. The major procedures are fillings, dentures and extractions. They account for 30 per cent of all dental procedures in the prisons. During the 1980-81 fiscal year, 194,504 dental procedures were performed on 60,125 prisoners. The illustration of these services is found in Chart C-10a.

Chart C-9 represents the use of on-site primary care outpatient services at each prison. Some of the variations can be explained by differences in age, sex and security levels.

Reflecting the general poor Michigan economy, sales of prison industries products declined 16 per cent during the 1980-81 fiscal year.

This was the first year of operation under the revised Corrections Industries Act which is designed to make the program self-supporting in four more years.

The law lets industries keep any surplus it has at the end of the year and reinvest it in the operation during the next fiscal year. The industries program can set prices which provide for a margin in direct and indirect costs.

All factories experienced drops in sales in 1980-81, but the laundry operation increased 64 per cent because two large customers were added — Coldwater State Hospital and Kalamazoo State Hospital.

The average number of immates employed by the program dropped from the average of 899 in the 1979-80 fiscal year to an average employment of 669 for fiscal year 1980-81, or an approximate 20 per cent decrease. In part, that decrease reflects the poor sales and the riots in May which closed down some factories temporarily and reduced the number of inmate workers in them because of post-riot conditions.

Some out-of-state sales were established in 1980-81. Most customers were other prison industries which came to Michigan because of the program's ability to supply them with raw materials such as sheeting and blanketing which they use to make finished goods.

These raw goods come from the program's textile operations which is the largest outside of the federal prison industries.

Tables C-11 through C-15 illustrate sales, inmate wages and bonuses during 1980 and the 1979-80 fiscal year. It can be seen that the average wage earned by inmates increased from \$1,044 per inmate to \$1,153 in 1980-81, and the average daily wage per inmate equalled \$3.43 at the end of the fiscal year, which was an increase of about 10 per cent over the previous year.

*The large increase in total number of critical incidents during 1981 is almost completely due to changes in the reporting procedure which took effect on March 1, 1981 and affect the following types of incidents:

Vandalism damages over \$100 Substance abuse, use or possession Extortion Smuggling dangerous contra band Theft of property over \$50 Possession of U.S. currency

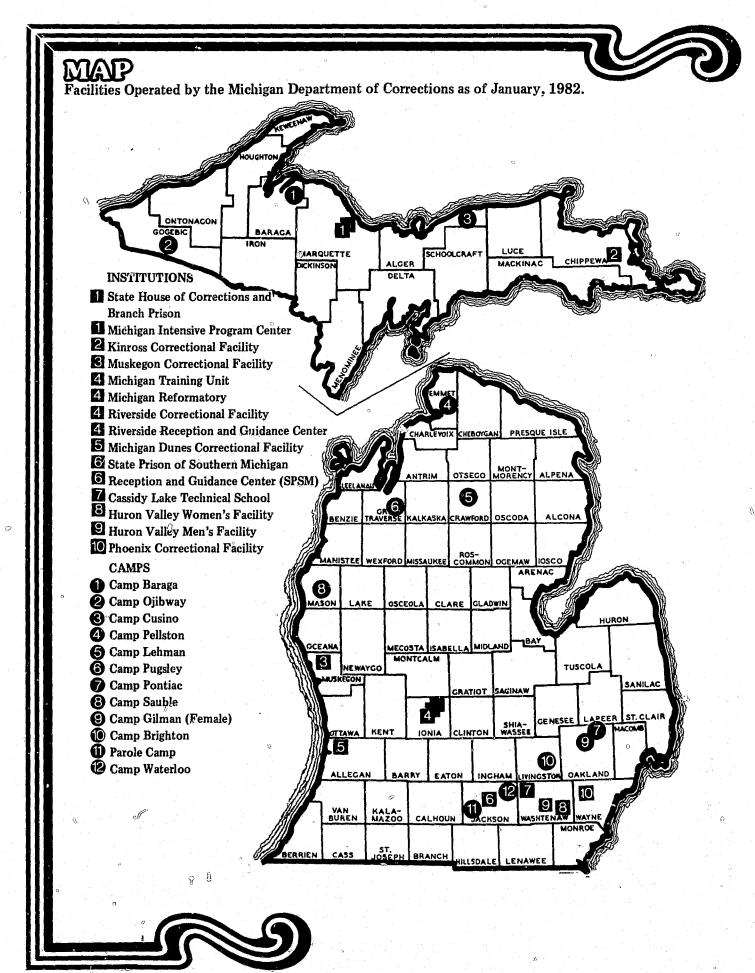

- One month of certain critical incidents were not submitted by SPSM and Huron Valley Women's. These incidents consist of smuggling, vandalism, substance abuse, extortion, theft and possession of money.
- 2 SPSM did not provide adequate information on 56 assaults to determine resistance vs. non-resistance. However, 41 of these had a staff victim. Consequently, the sub-categories of resistance vs. non-resistance do not add to the total assualts listed. The total assault category also includes four attempted murders on staff.
- 3 Other tuan homicide and suicide,
- 4 Three of the escapes were from a hospital or jail.

Description of Institutions

MICHIGAN INTENSIVE PROGRAM CENTER PHOENIX CORRECTIONAL FACILITY Superintendent Jack Bergman Marquette, Michigan 49855 (906) 226-6531 **OPENED: 1973** TEMPORARY EMERGENCY CAPACITY: January 1982: 89

POPULATION: January 1982: 75 AGE LIMITS: 17 and up Maximum security for select male offenders Appropriation for 1981-82: \$14.3 million (Included in Marquette Branch Prison budget.)

Per capita costs prisoner care and custody 1981-82: \$38.42 (Included in MBP figure.)

STATE HOUSE OF CORRECTION AND BRANCH PRISON

Warden Theodore Koehler Marquette, Michigan 49855 (906) 226-6531

OPENED: 1889 TEMPORARY EMERGENCY CAPACITY: January 1982: 894

POPULATION: January 1982: 883 AGE LIMITS: 21 and up

Maximum security (with minimum security unit outside the walls)

Appropriation for 1981-82: \$14.3 million Per capita costs prisoner care and custody 1981-82: \$38.42

KINROSS CORRECTIONAL FACILITY

Superintendent Dan L. Bolden Kincheloe Air Force Base, Michigan 49788 (906) 495-2282 **OPENED: January 1978** TEMPORARY EMERGENCY CAPACITY: January 1982: 628 POPULATION: Jan. 16, 1982: 643

AGE LIMITS: 21 and up Medium security

Appropriation for 1981-82: \$10.3 million Per capita costs prisoner care and custody 1981-82: \$44.92

CASSIDY LAKE TECHNICAL SCHOOL

Superintendent John Staten RFD No. 1, Waterloo Road Chelsea, Michigan 48118 (313) 475-1368

OPENED: 1944 TEMPORARY EMERGENCY CAPACITY: January 1982: 266

POPULATION: January 1982: 255 AGE LIMITS: Under 21 and over 30 who

need academic or vocational training Minimum security cottages Appropriation for 1981-82: \$2.84 million

Per capita costs prisoner care and custody 1981-82: \$31.05

Superintendent Lloyd May 47900 Five Mile Road Plymouth, Michigan 48170 (313) 455-6300 OPENED: Aug. 13, 1980 TEMPORARY EMERGENCY CAPACITY: January 1982: 311

POPULATION: January 1982: 304 AGE LIMITS: All ages

Medium security Appropriation for 1981-82: \$6 million Per capita costs prisoner care and custody

1981-82: \$53.55

MICHIGAN DUNES CORRECTIONAL FACILITY

Superintendent Robert Redman Route No. 1 6605 West 138th Avenue Holland, Michigan 49423 (616) 335-5801 **OPENED: July 17, 1978**

TEMPORARY EMERGENCY CAPACITY:

January 1982: 328

POPULATION: January 1982: 326

AGE LIMITS: 21 to 29 Medium security

Appropriation for 1981-82: \$5.85 million Per capita costs prisoner care and custody

1981-82: \$48.93

MUSKEGON CORRECTIONAL FACILITY

Superintendent H. Garv Wells 2400 South Sheridan Muskegon, Michigan 49442 (616) 773-3201 **OPENED: 1974** TEMPORARY EMERGENCY CAPACITY: January 1982: 589 POPULATION: January 1982: 578 AGE LIMITS: 22 to 29 Medium security

Appropriation for 1981-82: \$7.4 million Per capita costs prisoner care and custody 1981-82: \$33,50

MICHIGAN TRAINING UNIT

Superintendent Richard Handlon Ionia, Michigan 48846 (616) 527-3100 **OPENED: 1958 TEMPORARY EMERGENCY CAPACITY:** January 1982: 768 POPULATION: January 1982: 766 AGE LIMITS: Under 21

Medium security

Appropriation for 1981-82: \$6.8 million Per capita costs prisoner care and custody 1981-82: \$34.77

Warden John Jabe Ionia, Michigan 48846 (616) 527-2500 **OPENED: 1877** TEMPORARY EMERGENCY CAPACITY: January 1982: 1,337 POPULATION: January 1982: 1,327

AGE LIMITS: Under 21

MICHIGAN REFORMATORY

Close security (with minimum security unit outside the walls)

Appropriation for 1981-82: \$13.1 million Per capita costs prisoner care and custody 1981-82: \$34.77

CORRECTIONS CAMP PROGRAM

Superintendent John Mills 6000 Maute Road Grass Lake, Michigan 49240 (313) 475-1358 12 camps throughout Michigan (One camp is for women) TEMPORARY EMERGENCY CAPACITY: January 1982: 1,047 POPULATION: January 1982: 1,260 AGE LIMITS: All ages Minimum security Appropriation for 1981-82: \$11 million Per capita costs prisoner care and custody

HURON VALLEY WOMEN'S FACILITY Superintendent Donna Rae Bergen

3511 Bemis Road Ypsilanti, Michigan 48197 (313) 434-6300

1981-82: \$28,64

OPENED: August 1977 TEMPORARY EMERGENCY CAPACITY:

January 1982: 392 POPULATION: January 1982: 381

AGE LIMITS: All ages Close and Medium Security

Appropriation for 1981-82: \$6.7 million Per capita costs prisoner care and custody 1981-82: \$44.50

HURON VALLEY MEN'S FACILITY

Warden William Grant 3201 Bemis Road Ypsilanti, Michigan 48197 (313) 434-7775 OPENED: August 20, 1981 TEMPORARY EMERGENCY CAPACITY:

January 1982: 411 POPULATION: January 1982: 310

AGE LIMITS: All Ages Maximum security

Appropriation for 1981-82: \$7.8 million Per capita costs prisoner care and custody

1981-82: \$53.65

RIVERSIDE CORRECTIONAL FACILITY

Superintendent William Abshire 777 Riverside Drive Ionia, Michigan 48846 (616) 527-0110 **OPENED: January 1977**

TEMPORARY EMERGENCY CAPACITY:

January 1982: 540

POPULATION: January 1982: 553

AGE LIMITS: All ages Close security

Appropriation for 1981-82: \$15.8 million Per capita costs prisoner care and custody

1981-82: \$34.77 (Included in Riverside appropriation is Health Care funding for all three Ionia Facilities.)

RECEPTION AND GUIDANCE CENTER — RIVERSIDE

Superintendent John Makowski 777 Riverside Drive Ionia, Michigan 48846 (616) 527-0110 OPENED: May 1979 TEMPORARY EMERGENCY CAPACITY: January 1982: 105

POPULATION: January 1982: 108 All male commitments under 21 are processed here Appropriation for 1981-82: (Included in Riverside Correctional Facility appropriation.)

Per capita costs prisoner care and custody 1981-82: \$34.77(Included in figure for Riverside Corr. Facility)

RECEPTION AND GUIDANCE CENTER - SPSM

Superintendent John Prelesnik 4000 Cooper Street Jackson, Michigan 49201 (517) 788-7560 **OPENED: 1956** TEMPORARY EMERGENCY CAPACITY: January 1982: 415 POPULATION: January 1982: 398

All male commitments 21 or over are processed here Appropriation for 1981-82: \$50.4 (Included in appropriation for State Prison of Southern Michigan.) Per capita costs prisoner care and custody 1981-82: \$24.72 (Included in figure for SPSM.)

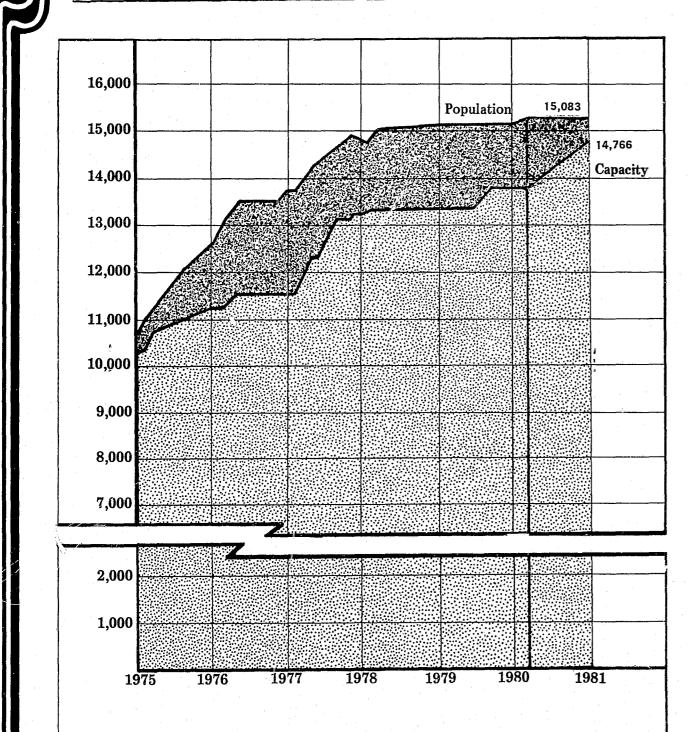

STATE PRISON OF SOUTHERN MICHIGAN Warden Dale E. Foltz 4000 Cooper Street Jackson, Michigan 49201 (517) 788-7560 OPENED: 1839: new prison: 1926 TEMPORARY EMERGENCY CAPACITY: January 1982: 4,941 POPULATION: January 1982: 4,988 AGE LIMITS: 21 and up Close, medium and minimum security

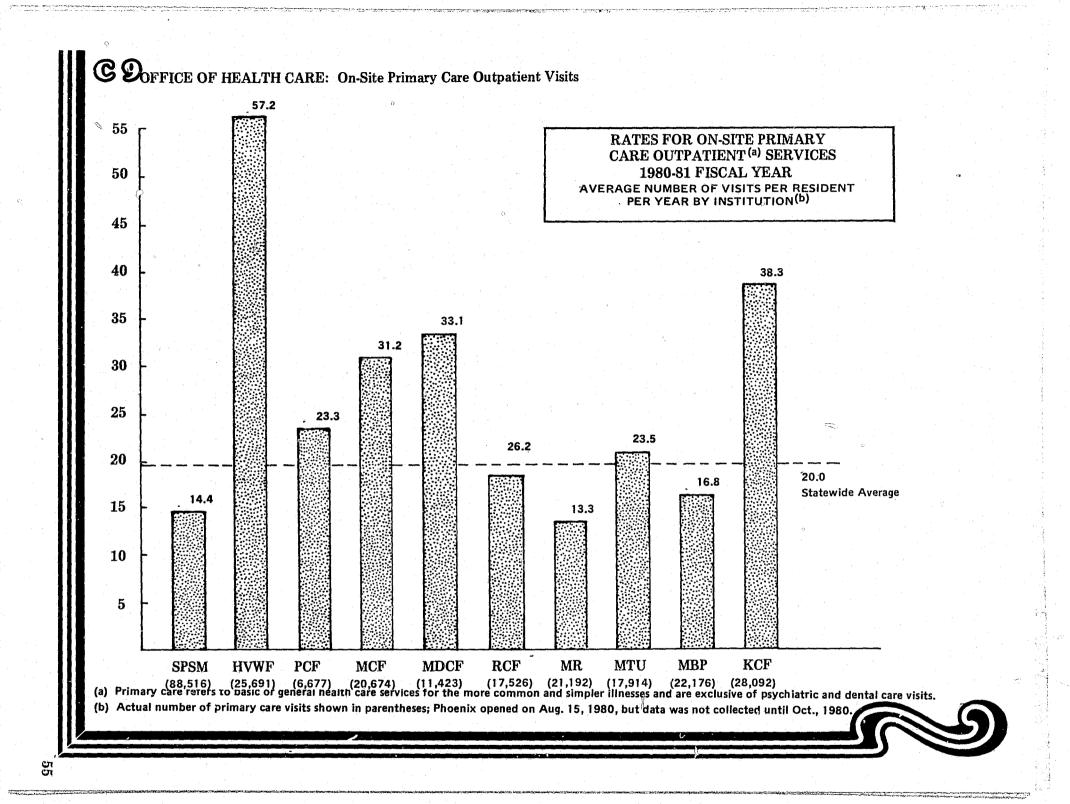

Appropriation for 1981-82: \$50.4 million

Per capita costs prisoner care and custody 1981-82: \$24.72

© SPrison Population and Rated Capacity as of January, 1982.

NOTE: Capacity does not include temporary housing; both population and capacity include Community Residential Programs.

Parole

The charts (D-1, D-2a and D-2b) illustrate activities of the Michigan Parole Board between Jan 1, 1981, and Dec. 31, 1981. The board, whose seven members are civil servants appointed by the state Corrections Commission, paroled 4, 501 prisoners in 1981.

The D-2a and D-2b charts illustrate the behavior on parole of persons by offense category and shows the success or failure rate. There are two types of failures: A technical violation in which the parolee breaks a rule of parole, and a new felony (PVNS).

A total of 63.9 per cent of all persons paroled in 1977 had completed parole successfully by 1981; this is slightly lower than the per cent recorded in 1980 r all persons paroled in 1976.

Of the persons paroled in 1977, 67.2 per cent of all persons paroled from a sentence for a crime involving offenses against persons were successful. The property offenders were less successful: 61.6 per cent had avoided a return to prison while on parole.

Of all paroles, 18.4 per cent were returned for new crimes and 17.7 per cent for technical violations.

Field Supervision

All persons on parole and those on probation for felony crimes in Michigan are supervised by employees of the Bureau of Field Services. Prior to 1980 many probation officers and clerical workers, particularly in Wayne County, were county employees. During 1981 most county employees joined state service under a state probation assumption law enacted in 1979. This allowed probation rules and standards to be applied uniformily throughout the state.

This bureau also supervises all felons living in the community in a halfway house or resident home.

The map shows the field service regions in the state.

Region I covers the County of Wayne, including Detroit; Region II, with headquarters in Flint, covers the eastern side of the state and has area offices in Washtenaw, Oakland, Genesee, Bay and Macomb counties.

Region III, on the western side of the state, has its headquarters in Grand Rapids. It takes in the Upper Peninsula and has area offices in Marquette, Grand Traverse, Muskegon, Kent, Ingham and Berrien counties. Area managers report to regional administrators and supervise field operations in smaller areas within the regions.

The central office prepares budgets, sets policies and handles matters that cannot be taken care of locally such as Interstate Compact matters and communications concerning absconders picked up in other states.

Other central office functions include decisions on good time forfeiture and screening for community program eligibility. Parole violation processing and staff training and development also are central office functions.

The bureau was created in 1965 with passage of the state Executive Reorganization Act which allowed consolidation of the former Bureau of Probation and the former Bureau of Pardons and Paroles.

Its primary responsibility of administering state-run parole and probation services was expanded to include community placements in 1966 when the work release cogram was started.

E-1, Personnel and Funds Distribution, illustrates the total staffing in field supervision, community corrections and central office administration. It also describes, through a pie chart, the dollars spent during the 1980-81 fiscal year on these same bureau sections; nearly 70 per cent goes toward the supervision of parolees and probationers.

The E-2, Work Unit Distribution charts, illustrate how agents and supervisiors spend their time. Most of an agent's time is spent in actual supervision of parolees and probationers. In this area 70 per cent of the time is spent supervising probationers. In the investigation aspects of the job, almost 84 per cent is used to gather information for and prepare presentence reports.

E-3, Work Distribution by Area, shows the number of work units assigned to each region and the percentage of the total work units in 1981.

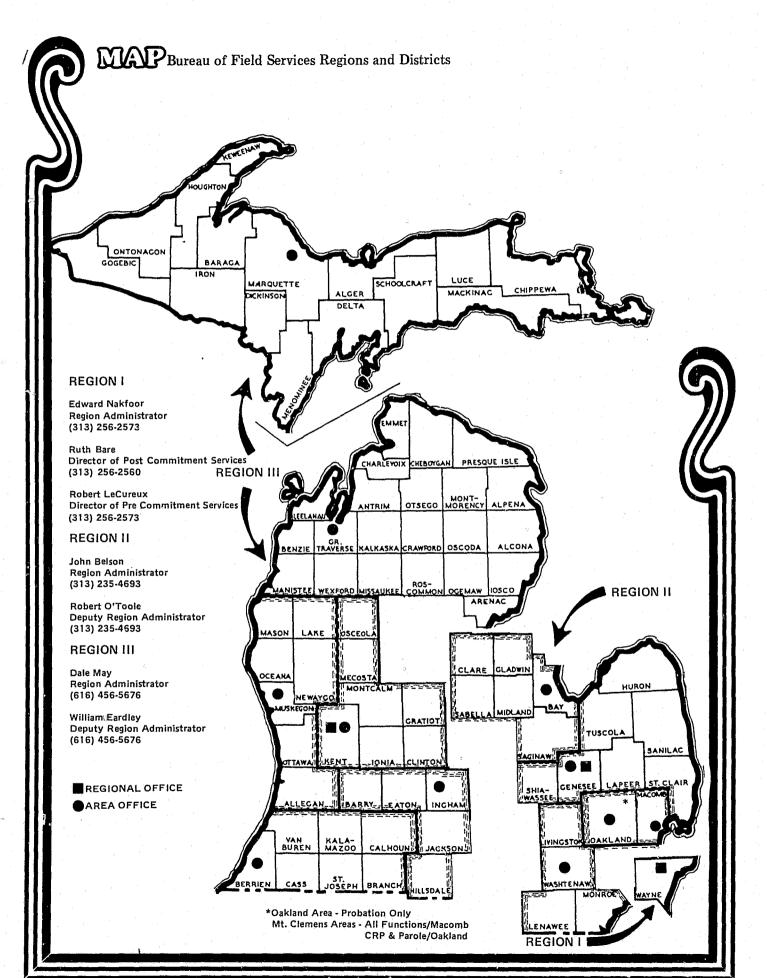

The bureau measures workloads by assigning unit values to the various tasks. A completed presentence investigation equals five units and each client supervised is counted as one unit. In most Michigan counties parole and probation agents average 85 work units.

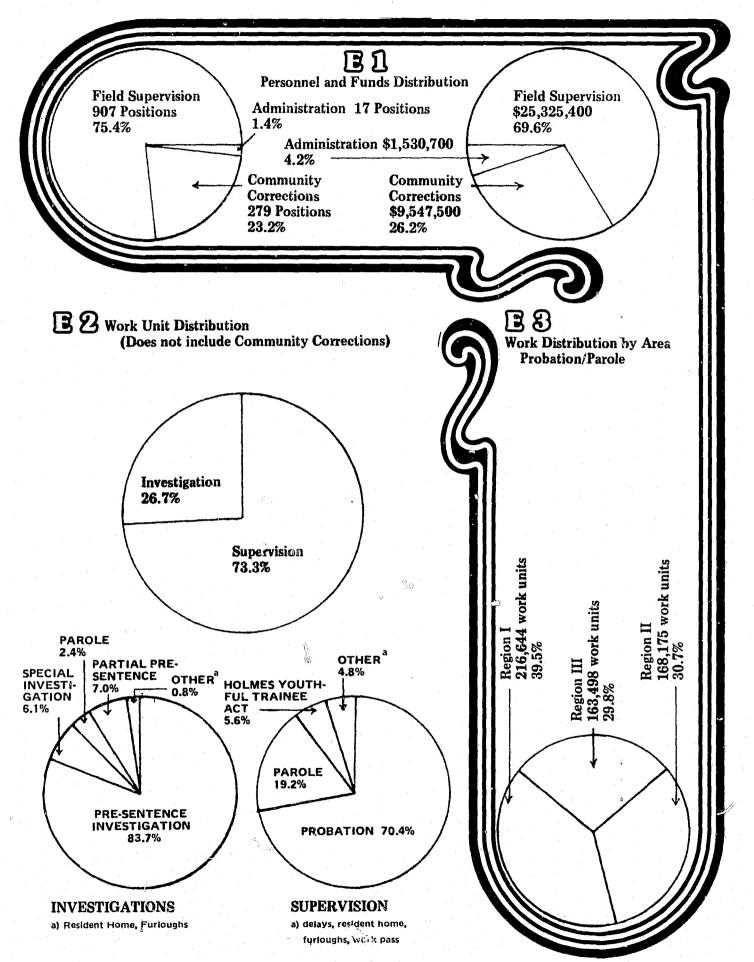

E-4, Probation as an Alternative to Prison, shows that the percentage of offenders sent to prison each year has declined from 33.9 per cent in 1976 to 28.4 per cent in 1981. This decline is estimated to have saved the state \$91 million in prison operating costs. (Estimated cost savings are based on the prison commitment reductions multiplied by the annual cost of housing a prisoner multiplied by the average length of stay in prison.)

The data excludes cases where probation is not a sentencing option and also multiple convictions for the same offender.

The deputy director of the Bureau of Field Service has the authority to issue a warrant for the return of any paroled prisoner to the institution pending a parole revocation hearing before the Parole Board. E-5 indicates the number of parolees returning to the institution with new prison sentences, as well as those who have been ordered returned for technical violation of parole.

On return to the institution, a parolee is entitled to a formal revocation hearing before two members of the Parole Board. In some cases the services of counsel are either retained by the parolee or provided by the court for indigent parolees. The charts show the upward trend of the number of these hearings since the mid-1970s and also gives a breakdown regarding the type of representation obtained for the hearings.

CONTINUED 10F2

B 4 Probation as Alternative to Prison

Į	YEAR	AGENT WORKLOAD	TOTAL FELONY CONVICTIONS	PRISON COMMITMENTS	COMMITMENT RATE	PRISON COMMITMENT REDUCTION (1976 Base)	COST SAVINGS
	1070		18,599	6.297	33.9		
	1976	or	21,621	7,183	33.3	132	2.37M
	1977	85		8,070	35.1	-277	-5.32M
	1978	80.5	23,050		29.8	768	17.58 M
	1979	79.9	18,706	5,573	28.6	1,123	32.48 M
	1980	79.6	20,870	5,952		1,338	44.32 M
	1981	85.3	23,413	6,599	28.2	1,000	11.02 112

The above data establishes that the percentage of convicted felony offenders sent to prison by sentencing judges has declined from 33.9 percent in 1976 to 28.2 percent in 1981. This decline is estimated to have saved the state \$91.43 million dollars in prison operating costs. Estimated cost savings are based on the prison commitment reductions multiplied by the annual cost of housing a prisoner multiplied by the average length of stay in prison.

NOTE: This data excludes cases where probation is not a sentencing option and multiple convictions for the same offender.

Community Programs

Community Residential Programs is a division within the Bureau of Field Services which operates the department's community-residential corrections program. This is a system of halfway houses for offenders who are nearing parole.

In 1981 the program grew to its highest-ever levels but by the end of the year had fallen off to what officials considered a temporary reduction below the approximately 2,000 officials expect the program to house.

Chart F-1a shows the service population and average daily count increasing over 1980, exceeding 2,000 for the first time.

The high growth during mid-1981 was caused by the rapid movement of prisoners into the program through the triggering of the Emergency Powers Act.

The average length of stay (F-1b) remained fairly steady, dropping about six days from 1980. Total terminations increased almost 41 per cent over 1980 and exceeded additions for the first time in the history of the program.

F-2 shows that while escapes declined slightly, paroles and discharges constituted more than half of all program terminations for the first time in three years. New felony charges increased sharply but a significant portion were for the crime of escape and did not involve other citizens or their property. Growth is plotted in F-3.

Prisoners' gross earnings (F-4), plotted over the last eight years, clearly reflect the generally poor economy of Michigan. Earnings increased negligibly or declined while the population increased during the recession years of 1975 and 1980-81.

While the average daily count increased 32.5 per cent (F-5) during the last two years, the average daily prisoner earnings declined.

F-6 shows prisoner income distribution. Inspite of the continuing recession, prisoners contributed a substantial amount of their income to support themselves and to pay taxes.

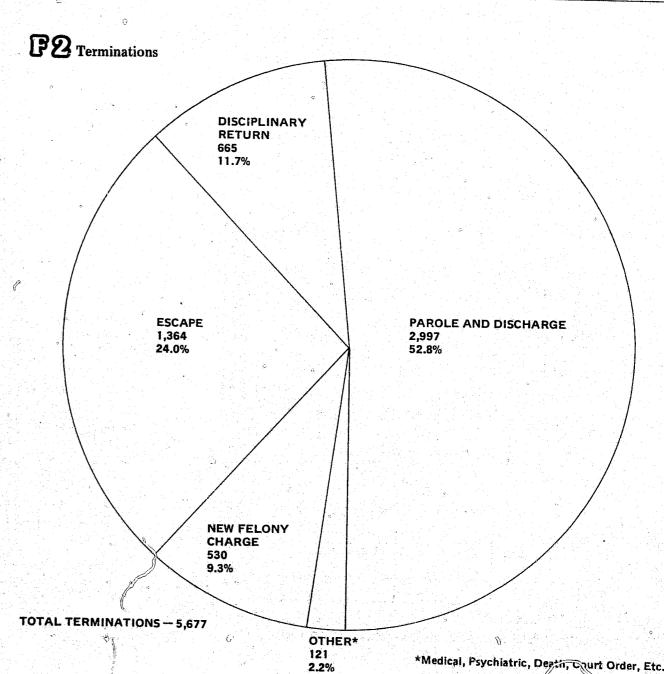

Per diem costs (F-7) increased 11.5 per cent over 1980 but were only about 57 per cent of the institutional per diem cost, with the average daily count in 1980-81 at 1,905. This resulted in a savings of over \$7.5 million.

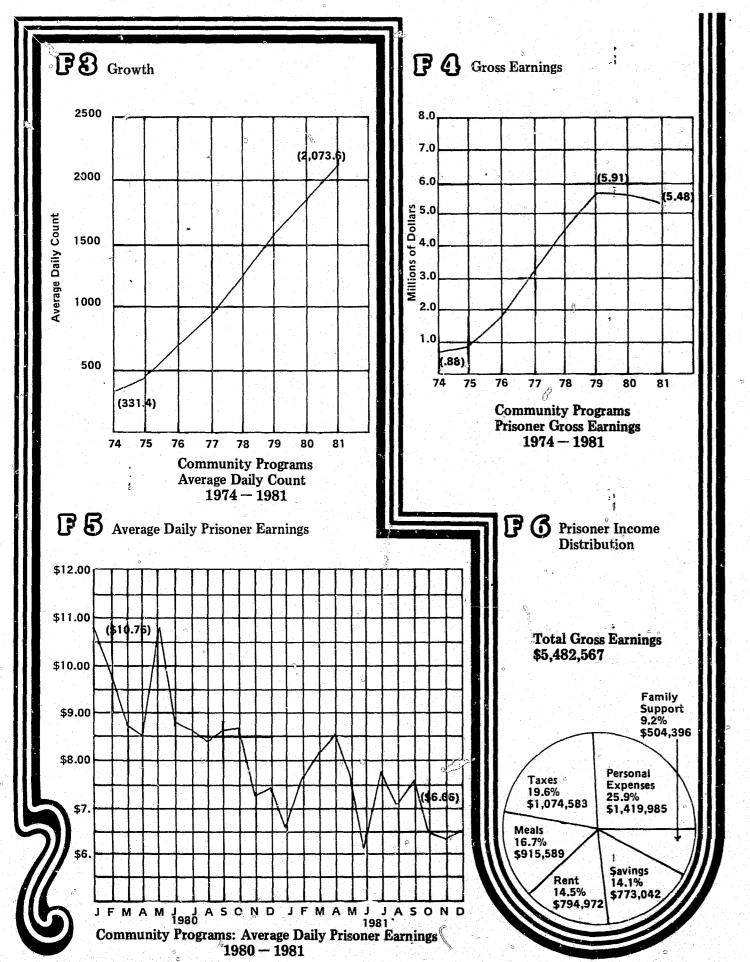

As a percentage of terminations (F-8), paroles appear to have bottomed out and again exceeded the 50 per cent mark. Escapes also appear to have dropped off, though slightly, for the first decline since 1975.

Finance

The pie charts and related materials explain where the department spent its money in the 1980-81 fiscal year and compares that with 1979-80 expenditures.

G-1 makes the comparison between institutions, bureaus and other sections of the department. The only decrease in the budgets for 1980-81 was in special maintenance. This occurred because of a budget cut during the year.

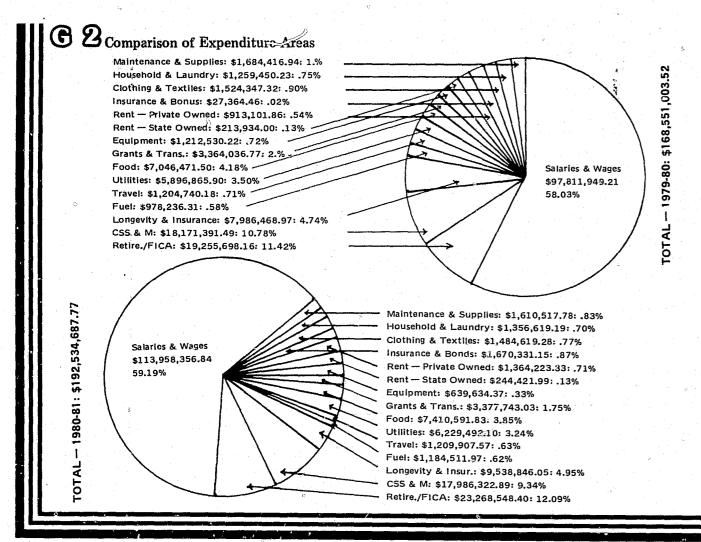

G-2 compares budget expenditures in major categories such as salary and wages, CSS&M,

The major decrease between 1979-80 and 1980-81 can be seen in equipment expenditures because of a freeze on such purchases. The major increase occurs in insurance and bonds. This was because the department assumed responsibility for workers' compensation payments. Prior to the 1980-81 fiscal year all state payments were made by the Department of Commerce.

Personnell

A total of 5,807 persons were employed by the Department of Corrections as of March, 1982. Chart H-1 breaks down that number by institution, central office and field services. It also indicates the number of minorities, women and ex-offenders working in these areas.

The related H-1 charts show that the number of female corrections officers has grown from three in 1972 to 372 as of March, 1982. Women officers work in all prisons and in the housing units of the Michigan Training Unit, the Muskegon Correctional Facility, Kinross Correctional Facility and the Phoenix Correctional Facility. At the other prisons for men they work in all non-housing unit positions including yard patrol.

A breakdown showing where women corrections officers work can be found in H-3. The department first hired women corrections officers to work in the prisons in 1972.

Another related chart shows the increase of minorities and females at the 15 level and above. The H-2 chart also illustrates the growth in the number of women filling administrative and professional positions since December, 1975.

Minority employees (H-2b) increased from 14.6 per cent of the total work force in mid-1980 to 15.6 per cent in March, 1982, chiefly because of the lifting of a court injunction which had severely limited affirmative action hiring.
