Offenders Admitted to
Wisconsin Adult Correctional Institutions
Calendar Year 1981

This bulletin is designed to present information about the 2,261^{/a} persons (1,894 first admissions and 367 readmissions) received to serve sentences at Wisconsin's adult correctional institutions during calendar year 1981. These figures indicate an 18 percent increase over 1980 admission levels when 1,912 persons (1,535 first admissions and 377 readmissions) were reported. Data about persons admitted during 1981; i.e., length of sentence, offense, marital status, etc., can be found in Tables 2-15. Information is arranged so that comparisons can be made between first and readmissions as well as between males and females.

Male First Admissions

The number of men received as new admissions rose from 1,456 in 1980 to 1,787 during calendar year 1981, an increase of 22 percent. About 70 percent of these men were reported as serving new adult sentences which did not involve violation of probation. Slightly more than one-tenth (11.6 percent) were reported to be probation violators with new adult sentences while about 18 percent were admitted as probation violators without new adult sentences.

Burglary, robbery, and theft were the most common offenses reported for first-admitted men. (See Table 2.) One-half of the men were reported to be serving sentences for crimes which did not involve assaultive, sex, or drug offenses, less than one-tenth (6.7 percent) for drug offenses only, and less than one percent (0.7 percent) for sex offenses only. Slightly less than one-third (31 percent) were serving sentences for assaultive crimes only, while 12 percent had been convicted on charges involving both assaultive and sex offenses. (See Table 6.) The average (medium) length of sentence received by male first admissions was 40.6 months; the mean, 56.7 months. Life sentences were excluded from these computations. Table 5 provides information on the average (mean) length of sentence received for selected offenses. First-admitted men sentenced for unarmed burglary received average sentences of 43.2 months, those charged with armed robbery 86.7 months, and those sentenced for theft, 33.3 months.

Over one-third of the male first admissions were from Milwaukee County. The average (median) age was reported to be 22.9 years. Almost one-fourth (23.4 percent) of the men were less than 20 years of age at the time of admission.

Male Readmissions

Three hundred and sixty-one men were readmitted to Wisconsin's adult institutions in calendar year 1981. Men returned from parole, mandatory release, or special action early release with new adult sentences constituted accounted for 38 percent of the readmissions. Burglary was the most common offense reported. Somewhat less than one-half (46 percent) of the readmissions were sentenced for crimes not involving assaultive, sex, or drug offenses.

^{/a} An additional 232 persons were received during 1981 but appear only in Table 1. Included are 32 persons admitted on alternative to revocation contracts, 1 person not serving a Wisconsin sentence, and 199 persons admitted pending completion of probation, parole, or mandatory release revocation hearings.

Over one-third (37 percent) were sentenced on assaultive charges only while 10.8 percent were serving sentences for crimes involving assaultive and sex offenses. The median length of sentence was 80.8 months while the mean was 111.2 months. Four out of 10 male readmissions (41 percent) were under the age of 25 at time of entry.

Female First and Readmissions

A total of 113 women, 107 first admissions and 6 readmissions, were reported during calendar year 1981. This is an increase of 33 percent over the preceding year when 85 admissions, 79 first admissions and 6 readmissions were recorded. Almost three-fourths (75 percent) of the first admissions were received on new adult sentences; i.e., not as probation violators. One-half of the readmissions were mandatory release violators who were returned without an additional sentence. Forgery was the offense most often reported for first admissions; theft the most often for readmissions. Over one-half (51.5 percent) of the first admissions had no record of assaultive, sex, or drug offenses. The same was true for readmissions. First-admitted women were sentenced to an average (median) of 33.4 months; readmissions to 64.0 months. Milwaukee and Racine counties with 44 and 11 cases respectively accounted for 51 percent of all first admissions. The 6 women readmitted in 1981 were from Clark, Fond du Lac, Lafayette, Milwaukee, Rock, and Rusk counties. A median age of 25.4 years was reported for first admissions while readmissions were reported to have a median age of 26.0 years.
