INTRODUCTION

This report is a statistical description of characteristics of the residents in each correctional facility on January 1, 1982.¹ This point in time profile contains information on present offense variables, personal background variables, criminal history and furlough participation. The tables were derived from the Correction and Parole Management Information System (CAPMIS) and were produced by the Research Unit on the Massachusetts State College Computer Network (MSCCN).

In reading the tables in this report, the reader should note the following: population on January 1, 1982 is divided according to institution or facility of residence; (2) the top number in each cell represents the number of individuals who fell in the corresponding category in the tables; and (3) the bottom number in each cell represents the percentage of the number of individuals in a particular category to the total number of residents in that institution or facility (column percentages). This report is divided into two sections. Section I lists the specific non-pre-release institutions and combines the pre-release facilities into one column. Section II lists the specific pre-release facilities and combines the non-pre-release institutions into one column.

¹ The number of individuals in the report does not include patients at Bridgewater State Hospital nor individuals awaiting trial. Further, it does not include those individuals who were sentenced to the DOC and were confined in houses of correction on January 1, 1982 awaiting transfers to DOC facilities. Also, DOC offenders who have been transferred to Houses of Correction to serve their sentences are not included in the statistics.

For Example, upon referring to Table III on page 15, "Committing Institution" is presented and the following type of information can be obtained:

- (1) the total number of individuals broken down by institution of residence is presented horizontally across the head of the table.
- (2) the specific committing institution is labeled and presented vertically.
- (3) Of the 3,690 residents on January 1, 1982, 679 were residing in MCI-Walpole.
- (4) Of the 679 Walpole residents, 602 or 89% were originally committed to Walpole.

If you wanted the same data for a specific pre-release facility, you would go to Table III on page 72 in Section II for the information.

SUMMARY OF STATISTICS

Summary of Statistics

On January 1, 1982, there were 3,690 individuals incarcerated in the state correctional system.* This represents a 20% increase from the population on January 1, 1981 and a 34% increase from the population on January 1, 1980.

Nature of Present Offense

Institution of Residence. There were 687 individuals (19%) housed in maximum security institutions; 2,108 or 57% housed in medium security institutions; 416 or 11% in minimum security, and 479 or 13% of the population in pre-release facilities.

Sentencing Courts. Nearly half of the residents were sentenced from two of the Superior Courts- Suffolk (31%) and Middlesex (15%).

Commitment Institution. The majority of residents (69%) were committed to Walpole.

Sentence. The majority of the residents (55%) are serving maximum sentences of twelve years or less; fourteen percent are lifers and five percent are serving maximum sentences of two years or less in prison.

Offense. The majority of residents (78%) are serving sentences for offenses versus person or sex offenses. The most frequently committed offense of the population is armed robbery (27%).

Age at Incarceration. The median age at incarceration was 24 years.

* Not including awaiting booking, awaiting trial, patients at MCI-Bridgewater, or DOC inmates who are serving their sentences in Houses of Correction.

Personal Background Characteristics

Sex. The majority of the population (95%) is male.

Race. Thirty-one percent of the residents in the system are black; 5% are hispanic; three individuals are Native Americans, six individuals are Asiatic, and 63% are white.

Marital Status. More than one-half of the population is single (62%).

Prior Address. The majority of residents (53%) came from the greater Boston SMSA.

Occupation. Most of the residents (77%) held manual or service jobs prior to their incarceration.

Education. The median education level was tenth grade; 28% were high school graduates or had received their equivalency diploma; 1% were college graduates.

Criminal History

Prior Arrests. The median age at first court appearance was sixteen years. Sixty percent of the residents have had nine or more prior court appearances. A majority of residents had prior arrests for offenses against person (91%) and for property offenses (84%). A minority of residents had prior arrests for sex offenses (23%), for drug offenses (43%), for drunkenness offenses (28%), and for escape offenses (15%).

Prior Incarcerations. Twenty-seven percent of the population was committed to the Department of Youth Services while a juvenile. Forty-five percent had prior house of correction incarcerations and 30% had prior incarcerations in state or federal correctional institutions. Overall, 58% had served some time as an adult.

Furlough Variables. Most individuals (79%) had not received furloughs during the calendar year 1981. Only 3% of those in maximum security institutions had received a furlough; 10% of those in medium, 52% of those in minimum and 71% of those in pre-release. Of the total population on January 1, 1982, 68% had not received furloughs from the day of their commitment to January 1.
