ACKNOWLEDGEMENT OF ASSISTANCE

All manuscripts utilizing data made available through the Consortium should acknowledge that fact as well as identify the original collector of the data. The ICPSR council urges all users of the ICPSR data facilities to follow some adaptation of this statement with the parentheses indicating items to be filled in appropriately or deleted by the individual user.

THE DATA (AND TABULATIONS) UTILIZED IN THIS (PUBLICATION) WERE MADE AVAILABLE (IN PART) BY THE INTER-UNIVERSITY CONSORTIUM FOR POLITICAL. AND SOCIAL RESEARCH. THE DATA FOR THE JUVENILE DETENTION AND CORRECTIONAL FACILITY CENSUS OF 1974 WERE ORIGINALLY COLLECTED BY THE BUREAU OF THE CENSUS FOR THE LAW ENFORCEMENT ASSISTANCE ADMINISTRATION AND THE DEPARTMENT OF HEALTH, EDUCATION AND WELFARE.

In order to provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about FCPSR participants' research activities, each user of ICPSR data facilities is expected to send two copies of each completed manuscript (or thesis abstract) to the Consortium. Please indicate in the cover letter which data were used.

STUDY DESCRIPTION

The Juvenile Detention and Correctional Facility Census of 1974 was the third in a series of surveys of state, and local public facilities in the juvenile justice system. The first of these major surveys was designed by the Law Enforcement Assistance Administration (LEAA) and the Department of Health, Education and Welfare (HEW). The data collection for the three surveys (1971, 1973 and 1974) was performed by the Bureau of the Census. The 1974 census was the first one in the series to cover both public and private juvenile detention and correctional facilities. Data in this study are the results of the public sector survey.

Documentation for the Juvenile Detention and Correctional Facility Census is comprised of three parts: an introduction (this document), an OSIRIS dictionary-codebook and a glossary of terms and concepts used in the survey.

The Census surveyed the number and kinds of juvenile detention facilities with a resident population of at least 50 percent juveniles (This last criterion did not apply to facilities that held youthful offenders in addition to juveniles. A facility was included if it was considered a juvenile facility, even though the youthful offenders outnumbered juveniles at the time of the census.). Specifically excluded were juvenile detention centers operated as part of a jail and without a separate staff or budget, nonresidential facilities, facilities exclusively for drug abusers or for dependent and neglected children, foster homes and federal juvenile correctional facilities.

On June 30, 1974, the 829 public facilities were divided into 396 state-administered and 433 locally administered places. Distributed by type of facility, there were 330 detention centers; 21 shelters; 20 reception or diagnostic centers: 186 training schools: 107 ranches, forestry camps and farms; and 165 halfway houses and group homes.

Included in the survey are the total number of juveniles held as of June 30, 1974 as well as the breakdown of the numbers in each type of facility. Also included are numbers and breakdown (by sex) of detention and status offenses for juveniles: numbers of full-time/part-time, payroll/nonpayroll staff; capital, total operating and per capita expenditure. Capital expenditures frequently do not reflect the original cost of newly constructed facilities, however; such costs are incurred before the facilities become operational.

DATA COLLECTION PROCEDURES

The 1974 census was conducted by mail and questionnaires were mailed in November of 1974 to the facilities. The questionnaires were sent to central reporters (state/local agencies). The remaining questionnaires were mailed directly to the individual facilities.

The mailing list used in the 1974 census was that which was used in the 1973 census, updated from the 1973-74 edition of the Directory of Correctional Institutions and Agencies, published by the American Correctional Association and the 1974 State Comprehensive Law Enforcement Plans prepared by each State for LEAA. The updated list was then sent to juvenile correctional authorities in the respective states for review and correction.

The 1974 survey had a 100% response rate and is the universe. There is then no sampling or weighting information needed for this survey.

CODEBOOK INFORMATION

The example below is a reproduction of information appearing in the machine-readable codebook for a typical variable. The numbers in brackets do not appear, but are references to the descriptions which follow this example.

[2] LEVEL OF GOVERNMENT [3] MD=9

REF 006 [4] LOC 12 WIDTH 1 [5] DK 1 COL 15 [6] ----[7] Q20a. LEVEL OF GOVERNMENT ADMINISTERING FACILITY
[8] ------

[9]

[10] [11]

[1] VAR 006

- 0. State level
- County level
- 2. City level
- [1] Indicates the variable and reference numbers. A variable and reference number are assigned to each item in the study. In this codebook, documenting the archived dataset, these numbers are identicial. Should the data be formed into a fixed length record file, new variable numbers may be assigned or created. The reference number would remain unchanged and correspond to those in this codebook.
- [2] Indicates the abbreviated (24 character maximum) variable label used within OSIRIS to identify each variable description list.

- [3] Indicates the designation of missing data. In this example, code values equal to nine are missing data (MD=9). Although this value is defined as within the missing data categories, this does not mean that the user should not or can not use this code value in a substantive role if he/she so desires.
- [4] Indicates the sequential location and width of this variable within the record when the data are stored on magnetic tape. In this example, the variable named "LEVEL OF GOVERNMENT" is one column wide and located in the 12th column within the record.
- [5] Indicates the location by deck and column(s) of this variable when the data are on cards or in card image form.
- [6] A variable containing data with implied decimals is denoted by the message, "XX DEC PLACE(S)", where XX is the number of decimal places implied (not punched) in the variable.
- [7] Indicates the full text of the question supplied by the original collectors of the data. This is the wording used on the original questionnaire.
- [8] Indicates an additional comment or explanation appended to the variable description.
- [9] A variable which has a footnote associated with it is denoted by the message, "SEE NOTE(S) X", where X is the number of the footnote referenced.
- [10] Indicates the code values occurring in the data for this variable.
- [11] Indicates the textual definitions of the codes.

FILE STRUCTURE

The data are available from the ICPSR in two formats: a card image file and an OSIRIS dataset. The card image file contains 8 decks per respondent in a format based on 80 column punched cards. The data are sorted by respondent with all decks for a case together in ascending order. The OSIRIS dictionary gives the format and other information for each variable in the OSIRIS data file. The dictionary or dictionary-codebook file is used in conjunction with the OSIRIS software package. The OSIRIS data file is constructed with a single logical record of 581 bytes for each respondent.

The OSIRIS data file can be accessed directly by software packages which do not use the OSIRIS dictionary by specifying the tape locations of the desired variables. These tape locations are given in the OSIRIS dictionary-codebook.

ICPSR PROCESSING INFORMATION

The ICPSR has added to the data a series of identification variables. The first variable is a unique study identification number [7706] that the ICPSR gave to this study. The second variable is a version number. Starting with one, it will increment by one, each time the ICPSR re-releases the study. The third variable is a file number that indicates the particular file's sequence in the complete dataset. In this case, the study is completely contained in one data file. The fourth variable is a sequential identification number the ICPSR has added that uniquely identifies each record in the dataset. All the variables are numeric character and the ranges have been documented in the codebook. Consistency checks have been performed on the data.

1. Detention Center - Provides temporary care in a PHYSICALLY RESTRICTING environment for juveniles in custody pending court disposition, and often for juveniles who are adjudicated delinquent or are awaiting return to another jurisdiction.

2. Shelter - Provides temporary care similar to that of a detention center but in a PHYSICALLY UNRESTRICTING environment

3. Reception or Diagnostic Center - Screens juvenile court commitments and assigns them to appropriate treatment facilities

4. Training School - A specialized institution serving delinquent juveniles committed directly to it by juvenile court or placed in it by an agency having such authority

5. Ranch, Forestry Camp, Farm - Residential treatment facility for juvenile whose behavior does not necessitate the strict confinement of a training school, often allowing them greater contact with the community.

6. Halfway House - Facility where juveniles are placed while on probation or aftercare/parole, allowing

(CONTINUED)

them extensive contact with the community, such as through jobs and schools.

7. Group Homes - Facility where juveniles are allowed extensive contact with the community, such as jobs and schools, but are not placed there while on probation or aftercare/parole

8. Non-residential Community Program - Children live at home but are required to attend daily sessions at the facility that usually include educational and counselling services

GLOSSARY

- AVERAGE POPULATION In 1973, computed by summing the number of males and females held on September 30, 1972, December 31, 1972, March 31, 1973, and June 30, 1973, and averaging. In 1974, it was computed by summing the average daily population of males and the average daily population of females, as those averages were quoted by the facilities.
- CAPITAL EXPENDITURES Includes expenditures for new buildings, major repairs or improvements, and new equipment.
- DEPENDENT AND NEGLECTED Juveniles held as a result of the inability or unwillingness of their parents to care for them. Juveniles held on delinquency charges, adjudicated delinquents, or declared in need of supervision are NOT included here even if they may also be considered dependent and neglected. They are included in one of the other categories, as appropriate.
- DETENTION CENTER A facility that provides temporary care in a physically restricting environment for juveniles in custody pending court disposition and often for juveniles who have been adjudicated delinquent or are awaiting return to another jurisdiction.
- HALFWAY HOUSE AND GROUP HOME A facility where juveniles are allowed extensive contact with the community, such as through jobs and schools.
- JUVENILE A person charged with an offense, over whom the juvenile court has jurisdiction. The juvenile court's jurisdiction is determined by the age of the person who must, in most states, be under 18 years of age.
- JUVENILES ADJUDICATED DELINQUENT Juveniles who through formal judicial proceedings have been adjudged delinquent.

JUVENILES AWAITING TRANSFER TO ANOTHER JURISDICTION Juveniles who have allegedly committed a crime in, or
have run away from another jurisdictional area,
including runaways from correctional facilities.
Juveniles adjudicated delinquent and awaiting
placement in a correctional facility are included
not here, but in the "juvenile adjudicated
delinquent" category.

- JUVENILE DETENTION AND CORRECTIONAL FACILITY A building or part thereof, set of buildings or structures, operated for the custody and/or treatment of adjudicated and committed persons, or persons subject to juvenile or criminal justice proceedings. The six categories of facilities were detention centers; shelters; reception or diagnostic centers; training schools; ranches, forestry camps, and farms; and halfway houses and group homes.
- JUVENILES HELD PENDING DISPOSITION BY COURT Juveniles held for delinquency who have not had any
 hearing or who have had only a preliminary hearing
 or screening and who are awaiting further court
 action.
- JUVENILES IN NEED OF SUPERVISION Juveniles who have been declared in need of supervision by juvenile court (such as PINS, CHINS - person or child in need of supervision) under special statutes for juvenile status offenders. Not all states have such status.
- NON-PAYROLL STAFF Full-time and part-time staff of on the payroll of this facility. Include personnel of a parent agency or other public agency or service (including school system), who are assigned for some or all of their working time to this facility. Include community volunteers, college interns, and personnel paid under contractual agreements or federal grants.
- PAYROLL STAFF Full-time and part-time staff on the payroll of this facility.
- RANCH, FORESTRY CAMP, AND FARM A residential treatment facility for juveniles whose behavior does not necessitate the strict confinement of a training school, often allowing them greater contact with the community.

(CONTINUED)

- RECEPTION OR DIAGNOSTIC CENTER A facility that screens juvenile court commitments and assigns them to appropriate treatment facilities.
- SHELTER A facility that provides temporary care similar to that of a detention center, but in a physically unrestricting environment.
- STATUS OFFENSE An act or conduct that is declared by statute to be an offense, but only when committed or engaged in by a juvenile, and that can be adjudicated only by a juvenile court. Examples of status offenses are curfew violation, running away from home, truancy and incorrigibility.
- TRAINING SCHOOL A specialized institution serving delinquent juveniles committed directly to it by juvenile court or placed in it by an agency having such authority.
- OPERATING EXPENDITURES Includes salaries, wages, and other operating expenditures, such as the purchase of food, supplies, and contractual services.
- VOLUNTARY COMMITMENTS Juveniles who committed themselves or were referred to the facility for treatment by parent, court, school, social agency, etc., without being adjudged delinquent or declared in need of supervision by a court.
- YOUTHFUL OFFENDER A person, adjudicated in a criminal court, who may be above the statutory age limit for juveniles but is below a specified upper age limit, for whom special correctional commitments and special record-sealing procedures are made available by statute. The special correctional commitment may be to a juvenile facility, to a special section of an adult facility, or to a separate facility for the confinement of persons between the age limits specified in the particular statute.
