ACKNOWLEDGEMENT OF ASSISTANCE

All manuscripts utilizing data made available through the Consortium should acknowledge that fact as well as identify the original collector of the data. The ICPSR Council urges all users of the ICPSR data facilities to follow some adaptation of this statement with the parentheses indicating items to be filled in appropriately or deleted by the individual user.

The data (and tabulations) utilized in this (publication) were made available (in part) by the Inter-university Consortium for Political and Social Research. The data for the RESIDENTIAL NEIGHBORHOOD CRIME CONTROL PROJECT: HARTFORD, CONNECTICUT, 1973, 1975, 1976, 1977, 1979, were were originally collected by Floyd J. Fowler et al. Neither the collector of the original data nor the Consortium bear any responsibility for the analyses or interpretations presented here.

In order to provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, each user of the ICPSR data facilities is expected to send two copies of each completed manuscript or thesis abstract to the Consortium. Please indicate in the cover letter which data were used.

PART 1

RESIDENTIAL NEIGHBORHOOD CRIME CONTROL PROJECT: HARTFORD, CONNECTICUT 1973

I

INTRODUCTION

DATA COLLECTION DESCRIPTION

The Hartford project, funded by LEAA through the Hartford Institute of Criminal and Social Justice, began in 1973. The program was designed to reduce the rates of burglary and robbery/purse snatch and the fear of those crimes. Victimization surveys provide a consistent measure of the rate at which such crimes occur over time. The surveys also provide critical measures of people's fears and concerns about crime. It was an experiment in how to reduce residential burglary and street robbery/purse snatch and the fear of these crimes in an urban residential neighborhood.

The project's most distinctive feature was its integrated approach. Physical design changes were planned, carried out and coordinated with appropriate citizen and police efforts in a unique three-pronged program designed to reduce opportunity for crime. The program was implemented in 1976.

As part of its extensive evaluation, the Center collected resident survey data on four occasions over a five year period: 1973, 1975, 1976, 1977. A final report was completed in 1978. It reported considerable evidence of a reduction in neighborhood burglaries after a one-year trial.

The final report of the initial evaluation entitled REDUCING RESIDENTIAL CRIME AND FEAR: THE HARTFORD NEIGHBORHOOD CRIME PREVENTION PROGRAM, was published by the U.S. Department of Justice in the fall of 1979.

A second grant was awarded to the Center by LEAA to assess the long-term (3-year) impact of the program. Police record data, interviews with resident leaders and police, traffic and pedestrian counts, on-site observations and an updated household survey (1979) were all used in the evaluation. A second report, entitled NEIGHBORHOOD CRIME, FEAR AND SOCIAL CONTROL: A SECOND LOOK AT THE HARTFORD PROGRAM was published by the U.S. Department of Justice in the spring of 1982. This report discusses the findings of increased behaviors and feelings among North Asylum Hill residents in terms of informal social control of their neighborhood and lower measures of fear and concern about crime than would be predicted from city-wide trends, although actual rates of crime returned approximately to what would have been predicted from levels in the remainder of the city.

II

DATA COLLECTION PROCEDURES

For all five surveys, two methods of data collection were used - telephone and field interviews. Advance letters were sent to selected households. Households were then contacted, either by telephone or personal visit. In situations where the respondent could not be contacted on the first field call at a sample household, interviewers were required to call back at the household at least six times in order to obtain the interview; more calls were required (if necessary) for addresses assigned to the telephone. These call-backs were to be made at different times of day and on different days of the week to maximize the chance of a contact. Addresses at which the designated individuals refused to be interviewed were generally reassigned to a second interviewer who contacted the individuals and attempted to persuade them to be interviewed. There was a resident eligibility requirement. An adult had to have lived at selected addresses for 6 months or more in order to be eligible for the full interview. This ensured a minimum level of experience in the neighborhood, and a basis for reporting household crimes.

All data were collected between the months of May-July each year. One half of the interviews were conducted by telephone and one half in person. In each survey except 1979 respondents reported on experiences during the preceding 12-month period; in 1979 the time reference was the past two years. The survey questions are very similar from year to year, with 1973 being the most unique. Each year there are sections with questions on victimization; fear and perceived risk of being victims of the target crimes; perceptions of and attitudes toward police, the neighborhood problems, and neighbors, household characteristics; and respondent characteristics.

III

SAMPLING INFORMATION

The basic design was to do a citywide survey, with oversamples in key areas to permit more detailed analysis. To this end, Hartford was divided into four parts or strata: Asylum Hill, Clay Hill/SAND, the area adjacent to Asylum Hill and the remainder of Hartford.

The samples are random area probability samples of housing units. In each selected housing unit a respondent was randomly chosen using Kish tables. No substitutions were allowed. A respondent was eligible if he or she was an adult (18 years old or older, or married regardless of age) who had lived at that housing unit for at least six months. The six-month constraint was imposed to give the respondent enough experience with the neighborhood to form attitudes and to be able to report crimes that occurred to the housing unit. The surveys asked for the respondent's personal opinions, and the victimization experience sections asked for events happening to any members of that household.

The 1976 survey was conducted only in Asylum Hill because of limited available funds. The addresses in the Asylum Hill sample in the 1975 survey were re-contacted in 1976. Eligibility was determined again, and respondent selection was redone. Thus, some households ineligible in 1975 were interviewed in 1976; and vice versa. Some respondents were the same, some different when interviews were conducted in the same household. The 1976 sample was therefore, not independent of the 1975 sample.

In 1977, a new sample was selected, again an area probability sample, with clusters well dispersed around blocks. This sample differed from those of previous years in two ways. The Asylum Hill area was divided into areas north and south of Asylum Avenue (North Asylum Hill and South Asylum Hill, respectively), and these two areas were sampled at different rates. In addition to the household-based sample, Asylum Hill residents who were members of the community organizations directly associated with the program (SSCA, WHO and CAHA) were sampled from lists. Membership lists were obtained from each of these organizations, containing a total of 260 names. A total of 50 interviews were desired. A sampling rate was determined based upon a 75 percent response rate, as well as the expected eligibility rates.

The 1979 sample used a clustered area probability sample throughout Hartford outside of Asylum Hill. In Asylum Hill, however, the sample was so done that the entire area was listed; there was no clustering.

IV

In essence, the Asylum Hill samples may be treated as systematic random sample. For complete sampling information see U.S. Department of Justice. National Institute of Justice. NEIGHBORHOOD CRIME, FEAR AND SOCIAL CONTROL: A SECOND LOOK AT THE HARTFORD PROGRAM. Washington D.C.; U.S. Government Printing Office, April 1982.

WEIGHTING INFORMATION

For each of the surveys, households were sampled from Asylum Hill at a higher rate than those selected for other areas of the city in order to produce sufficient cases for separate analysis. In early surveys, Clay Hill/South Arsenal was also sampled at a higher rate than the rest of Hartford. To allow combining the cases from different areas for a given year, weights based on the probability of selection in each area were computed and assigned on a case by case basis. Weights based on their probability of selection have also been computed and assigned to cases from the 1977 organization membership list sample so that these may be combined with the area sample cases. All of these weights may be called "area weights."

It will be recalled that once an interviewer had contacted a sample household, he or she had to determine how many adults eligible to be interviewed lived in the household; where there was more than one eligible adult, one had to be selected at random using a prespecified procedure. The probability of any individual's becoming a respondent is the product of the probability of his or her household's selection and the probability of any eligible adult's selection within that household. Hence, individual respondents are weighted by the product of the area weight and the number of eligible adults in the household (the "combined weight").

Which of these two weights is used depends on the type of variables under consideration. Where the variable represents information about households (such as household composition, total family income, or victimization experience which was asked for everyone in the household), the responses are weighted by the total weight. Where a variable represents information about individuals (such as education completed, frequency of walking in the neighborhood, any perceptions or attitudes), responses are weighted by the combined weight.

Weighting can seem complicated. However, it is simply a way of accurately combining units that had different chances of selection to produce accurate aggregate estimates. All percentage distributions in this report are

V

based on appropriately weighted data. Statistical reliability, of course, is dependent on the actual number of observations (interviews) - not on weighted numbers - and all statistical tests were so calculated. There are not any statistical tests presented in this report that rely on combining data from areas that were selected at different rates in a given year.

FILE STRUCTURE

RESIDENTIAL NEIGHBORHOOD CRIME CONTROL PROJECT: HARTFORD, CONNECTICUT 1973, 1975, 1976, 1977 and 1979 is available from the ICPSR in two formats card image and OSIRIS. The card image file contains several decks per case in a format based on 80 column punched cards. The data are sorted by case with all decks for a case together in ascending order.

The OSIRIS dictionary gives the format and other information for each variable in the OSIRIS data file. The dictionary or dictionary-codebook file is used in conjunction with the OSIRIS software package. The OSIRIS data file is constructed with a single logical record for each case.

FILE NAME	NUMBER OF VARIABLES	NUMBER OF CASES
1973	560	891
1975	214	556
1976	249	146
1977	358	885
1979	320	623

The OSIRIS data file can be accessed directly through software packages or programs which do not use the OSIRIS dictionary by specifying the tape locations of the desired variables. These tape locations are given in the OSIRIS dictionary-codebook.

VI

CODEBOOK INFORMATION

The example below is a reproduction of information appearing in the machine-readable codebook for a typical variable. The numbers in brackets do not appear but are references to the descriptions which follow this example.

.....
[1] VAR 0065 [2] # NEIGHBORHOOD MEETINGS [3] MD=00 OR GE 99
REF 0065 [4] LOC 90 WIDTH 2 [5] DK 2 COL 25

[6] A.12 How many meetings like that has R gone
to in the past year?

[7] Actual number is coded.

[8] [9]

01. 1 meeting

98. 98 or more meetings

00. Inap., has not gone to meetings, coded 2 or 9
on A.11

99. NA
.....

[1] Indicates the variable and reference numbers. A variable number and a reference number are assigned to each variable in the data collection. In the present codebook which documents the archived data collection these numbers are identical. Should the data be subsetted or rearranged by an OSIRIS program (e.g., MMP to intersperse data from another source, or TCOT to produce an analysis deck), the variable numbers would change to reflect the order of the new data collection, while the reference number would remain unchanged to reflect the variable number in the codebook describing the archived data collection.

[2] Indicates the abbreviated variable name (maximum of 24 characters) used in the OSIRIS system to identify the variable for the user. An expanded version of the variable name can be found in the variable description list.

VII

- [3] Indicates the code values of missing data. In this example, code values equal to 00 or greater than or equal to 99 are missing data (MD=00 OR GE 99). Some analysis software packages (including the OSIRIS software package) require that certain types of data which the user desires to be excluded from analysis be designated as "MISSING DATA," e.g., inappropriate, unascertained, unascertainable, or ambiguous data categories. Although these codes are defined as missing data categories, this does mean that the user should not or cannot use them in a substantive role if so desired.
- [4] Indicates the starting location and width of this variable when the data are stored on a magnetic tape in the OSIRIS format. If the variable is of a multiple-response type, the width referenced is that of a single response. In this example the variable named "# NEIGHBORHOOD MEETINGS" is 2 column(s) wide and is located in the 90th column within the record.
- [5] Indicates the location by deck and column(s) of this variable when the data are stored on cards or in card-image format (80-column format)
- [6] This is the full text (question) supplied by the investigator to describe the variable. The question text and the numbers and letters that may appear at the beginning reflect the original wording of the questionnaire item.
- [7] Indicates the variable is continuous in which case the phrase "Actual number is coded." appears.
- [8] Indicates the code values occurring in the data for this variable.
- [9] Indicates the textual definitions of the codes. Abbreviations commonly used in the code definitions are "DK" (Do Not Know), "NA" (Not Ascertained), and "INAP" (Inappropriate).

ICPSR PROCESSING INFORMATION

The data collection was processed according to the standard ICPSR processing procedures. The data were checked for illegal or inconsistent code values which, when found,

VIII

were recoded to OSIRIS missing data values. No consistency checks were performed. Statements bracketed in "[" and "]" signs in the body of the codebook were added by the processors for explanatory purposes.

IN THE 1973 SURVEY, TWO INTERVIEW SCHEDULES WERE USED, A LONG "TARGET" FORM AND A SHORT "GENERAL" FORM. THE GENERAL FORM WAS A SUBSET OF THE TARGET FORM AND INCLUDED THE ITEMS TO BE USED IN PROGRAM EVALUATION (APPROXIMATELY 150 VARIABLES). THE TARGET FORM INCLUDED ADDITIONAL ITEMS WHOSE MAIN PURPOSE WAS TO AID IN DESIGNING THE PROGRAM (WITH A TOTAL OF APPROXIMATELY 300 VARIABLES). THE TARGET FORM WAS ADMINISTERED TO A RANDOM HALF OF THE SAMPLE SELECTED IN THE TWO TARGET AREAS: ASYLUM HILL AND CLAY HILL/SAND (N=181). THE GENERAL FORM WAS ADMINISTERED TO THE REMAINDER OF THE SAMPLE (N=710). RESPONSES FROM HOUSEHOLDS ANSWERING ONLY THE "GENERAL" FORM HAVE BEEN RECODED AS MISSING DATA FOR VARIABLES 28-273 (REF 28-273). THESE 710 CASES MAY BE IDENTIFIED BY USING REF 590 ("QUESTIONNAIRE" CODED 2).

19. Date of interview-day
20. Number of calls-field
21. Number of calls-phone
22. Size of household
23. Number of children
24. Number of eligible adults
25. Number of adults
26. Number of elderly
27. Household composition.
28. Life cycle of head
29. Relationship of R to head
30. Age of R
31. Sex of R
32. Marital status of R
33. Age of head
34. Sex of head
35. Marital status of head
36. Relationship of informant to head
37. Number of years at this address
38. Own or rent home
39. Does owner live in building
40. Former address
41. Interviewer check-eligible adults
42. Racial background

43. Where was R born
44. Interviewer check-born where
45. Family ancestry
46. Indirect ethnicity

NEIGHBORHOOD

47. Project ID
48. Type of sample
49. R ID number
50. Card number 2
51. Area
52. Easy to tell a stranger from neighbor
53. Saw strangers in past year
54. Number of times happened
55. Did R do anything
56. What would neighbors do
57. Type of neighborhood
58. R feels a part of neighborhood
59. Neighborhood better/worse past year
60. Most important way it is better/worse-1st mention
61. Most important way it is better/worse-2nd mention
62. In 5 years how will neighborhood be better
63. Gone to neighborhood meetings past year
64. How many meetings
65. Name of concerned groups in neighborhood-1st ment
66. Name of concerned groups in neighborhood-2nd ment
67. How much good have groups done
68. Number of people in front of R's home-day
69. People on street live in neighborhood
70. Number of people in front of R's home-night
71. Amount of traffic-day
72. Amount of traffic-night
73. Number of days R was outside
74. Public park nearby
75. Does R use park
76. Why does/doesn't R use park-1st mention
77. Why does/doesn't R use park-2nd mention
78. Does R walk in neighborhood-day
79. Does R walk in neighborhood-night
80. Does R get someone to walk with
81. Does R drive at night rather than walk
82. Does R carry any protection-1st mention

WAY NEIGH.CHANGED-1ST ME
LOC 93 WIDTH 2

MD=0 OR GE 99
DK 2 COL 26-27

A.9a What is the most important way in which it is (better/worse)? - 1st mention

(CODE ONLY NEIGHBORHOOD CHANGES, NOT INDIVIDUAL OR UNIT CHANGES)

Better:

01. Social: met (more) people; made (more) friends; more friends, relatives

(CONTINUED)

02. Neighborhood composition: fewer kids or other age group, more or less of ethnic or racial group
03. Neighborhood environment: safer, less crimes
04. Neighborhood environment: less noisy, less traffic, cleaner, better maintenance
05. Cost less to live here
06. Access to stores, shopping services, entertainment improved; better transportation; more convenient
07. Neighborhood concern, people taking action for neighborhood
08. Better relations with police, police showing more interest not crime specific
18. Other reasons better

Worse:

21. Social: lack of friends, relative, compatible people
22. Neighborhood composition: more or less kids or other age group; more or less of ethnic or racial group
23. Neighborhood environment: more crime, less safe
24. Neighborhood environment: more noisy, more traffic, run down
25. Cost too much; can no longer afford; prices going up in area
26. More inconvenient: poor access to stores, shopping, entertainment
27. Less, no concern for neighborhood, no unity
28. Poor police, police nuisance, never around
29. High mobility-people always moving in and out
38. Other reasons worse

RESIDENTIAL NEIGHBORHOOD CRIME CONTROL PROJECT: HARTFORD, CONNECTICUT 1977

I

INTRODUCTION

DATA COLLECTION DESCRIPTION

The Hartford project, funded by LEAA through the Hartford Institute of Criminal and Social Justice, began in 1973. The program was designed to reduce the rates of burglary and robbery/purse snatch and the fear of those crimes. Victimization surveys provide a consistent measure of the rate at which such crimes occur over time. The surveys also provide critical measures of people's fears and concerns about crime. It was an experiment in how to reduce residential burglary and street robbery/purse snatch and the fear of these crimes in an urban residential neighborhood.

The project's most distinctive feature was its integrated approach. Physical design changes were planned, carried out and coordinated with appropriate citizen and police efforts in a unique three-pronged program designed to reduce opportunity for crime. The program was implemented in 1976.

As part of its extensive evaluation, the Center collected resident survey data on four occasions over a five year period: 1973, 1975, 1976, 1977. A final report was completed in 1978. It reported considerable evidence of a reduction in neighborhood burglaries after a one-year trial.

The final report of the initial evaluation entitled REDUCING RESIDENTIAL CRIME AND FEAR: THE HARTFORD NEIGHBORHOOD CRIME PREVENTION PROGRAM, was published by the U.S. Department of Justice in the fall of 1979.

A second grant was awarded to the Center by LEAA to assess the long-term (3-year) impact of the program. Police record data, interviews with resident leaders and police, traffic and pedestrian counts, on-site observations and an updated household survey (1979) were all used in the evaluation. A second report, entitled NEIGHBORHOOD CRIME, FEAR AND SOCIAL CONTROL: A SECOND LOOK AT THE HARTFORD PROGRAM was published by the U.S. Department of Justice in the spring of 1982. This report discusses the findings of increased behaviors and feelings among North Asylum Hill residents in terms of informal social control of their neighborhood and lower measures of fear and concern about crime than would be predicted from city-wide trends, although actual rates of crime returned approximately to what would have been predicted from levels in the remainder of the city.

II

DATA COLLECTION PROCEDURES

For all five surveys, two methods of data collection were used - telephone and field interviews. Advance letters were sent to selected households. Households were then contacted, either by telephone or personal visit. In situations where the respondent could not be contacted on the first field call at a sample household, interviewers were required to call back at the household at least six times in order to obtain the interview; more calls were required (if necessary) for addresses assigned to the telephone. These call-backs were to be made at different times of day and on different days of the week to maximize the chance of a contact. Addresses at which the designated individuals refused to be interviewed were generally reassigned to a second interviewer who contacted the individuals and attempted to persuade them to be interviewed. There was a resident eligibility requirement. An adult had to have lived at selected addresses for 6 months or more in order to be eligible for the full interview. This ensured a minimum level of experience in the neighborhood, and a basis for reporting household crimes.

All data were collected between the months of May-July each year. One half of the interviews were conducted by telephone and one half in person. In each survey except 1979 respondents reported on experiences during the preceding 12-month period; in 1979 the time reference was the past two years. The survey questions are very similar from year to year, with 1973 being the most unique. Each year there are sections with questions on victimization; fear and perceived risk of being victims of the target crimes; perceptions of and attitudes toward police, the neighborhood problems, and neighbors, household characteristics; and respondent characteristics.

III

SAMPLING INFORMATION

The basic design was to do a citywide survey, with oversamples in key areas to permit more detailed analysis. To this end, Hartford was divided into four parts or strata: Asylum Hill, Clay Hill/SAND, the area adjacent to Asylum Hill and the remainder of Hartford.

The samples are random area probability samples of housing units. In each selected housing unit a respondent was randomly chosen using Kish tables. No substitutions were allowed. A respondent was eligible if he or she was an adult (18 years old or older, or married regardless of age) who had lived at that housing unit for at least six months. The six-month constraint was imposed to give the respondent enough experience with the neighborhood to form attitudes and to be able to report crimes that occurred to the housing unit. The surveys asked for the respondent's personal opinions, and the victimization experience sections asked for events happening to any members of that household.

The 1976 survey was conducted only in Asylum Hill because of limited available funds. The addresses in the Asylum Hill sample in the 1975 survey were re-contacted in 1976. Eligibility was determined again, and respondent selection was redone. Thus, some households ineligible in 1975 were interviewed in 1976; and vice versa. Some respondents were the same, some different when interviews were conducted in the same household. The 1976 sample was therefore, not independent of the 1975 sample.

In 1977, a new sample was selected, again an area probability sample, with clusters well dispersed around blocks. This sample differed from those of previous years in two ways. The Asylum Hill area was divided into areas north and south of Asylum Avenue (North Asylum Hill and South Asylum Hill, respectively), and these two areas were sampled at different rates. In addition to the household-based sample, Asylum Hill residents who were members of the community organizations directly associated with the program (SSCA, WHO and CAHA) were sampled from lists. Membership lists were obtained from each of these organizations, containing a total of 260 names. A total of 50 interviews were desired. A sampling rate was determined based upon a 75 percent response rate, as well as the expected eligibility rates.

The 1979 sample used a clustered area probability sample throughout Hartford outside of Asylum Hill. In Asylum Hill, however, the sample was so done that the entire area was listed; there was no clustering.

IV

In essence, the Asylum Hill samples may be treated as systematic random sample. For complete sampling information see U.S. Department of Justice. National Institute of Justice. NEIGHBORHOOD CRIME, FEAR AND SOCIAL CONTROL: A SECOND LOOK AT THE HARTFORD PROGRAM. Washington D.C.; U.S. Government Printing Office, April 1982.

WEIGHTING INFORMATION

For each of the surveys, households were sampled from Asylum Hill at a higher rate than those selected for other areas of the city in order to produce sufficient cases for separate analysis. In early surveys, Clay Hill/South Arsenal was also sampled at a higher rate than the rest of Hartford. To allow combining the cases from different areas for a given year, weights based on the probability of selection in each area were computed and assigned on a case by case basis. Weights based on their probability of selection have also been computed and assigned to cases from the 1977 organization membership list sample so that these may be combined with the area sample cases. All of these weights may be called "area weights."

It will be recalled that once an interviewer had contacted a sample household, he or she had to determine how many adults eligible to be interviewed lived in the household; where there was more than one eligible adult, one had to be selected at random using a prespecified procedure. The probability of any individual's becoming a respondent is the product of the probability of his or her household's selection and the probability of any eligible adult's selection within that household. Hence, individual respondents are weighted by the product of the area weight and the number of eligible adults in the household (the "combined weight").

Which of these two weights is used depends on the type of variables under consideration. Where the variable represents information about households (such as household composition, total family income, or victimization experience which was asked for everyone in the household), the responses are weighted by the total weight. Where a variable represents information about individuals (such as education completed, frequency of walking in the neighborhood, any perceptions or attitudes), responses are weighted by the combined weight.

Weighting can seem complicated. However, it is simply a way of accurately combining units that had different chances of selection to produce accurate aggregate estimates. All percentage distributions in this report are

V

based on appropriately weighted data. Statistical reliability, of course, is dependent on the actual number of observations (interviews) - not on weighted numbers - and all statistical tests were so calculated. There are not any statistical tests presented in this report that rely on combining data from areas that were selected at different rates in a given year.

FILE STRUCTURE

RESIDENTIAL NEIGHBORHOOD CRIME CONTROL PROJECT: HARTFORD, CONNECTICUT 1973, 1975, 1976, 1977 and 1979 is available from the ICPSR in two formats card image and OSIRIS. The card image file contains several decks per case in a format based on 80 column punched cards. The data are sorted by case with all decks for a case together in ascending order.

The OSIRIS dictionary gives the format and other information for each variable in the OSIRIS data file. The dictionary or dictionary-codebook file is used in conjunction with the OSIRIS software package. The OSIRIS data file is constructed with a single logical record for each case.

FILE NAME	NUMBER OF VARIABLES	NUMBER OF CASES
1973	560	891
1975	214	556
1976	249	146
1977	358	885
1979	320	623

The OSIRIS data file can be accessed directly through software packages or programs which do not use the OSIRIS dictionary by specifying the tape locations of the desired variables. These tape locations are given in the OSIRIS dictionary-codebook.

VI

CODEBOOK INFORMATION

The example below is a reproduction of information appearing in the machine-readable codebook for a typical variable. The numbers in brackets do not appear but are references to the descriptions which follow this example.

.....
 [1] VAR 0065 [2] # NEIGHBORHOOD MEETINGS [3] MD=00 OR GE 99
 REF 0065 [4] LOC 90 WIDTH 2 [5] DK 2 COL 25

[6] A.12 How many meetings like that has R gone
 to in the past year?

[7] Actual number is coded.

[8] [9]

01. 1 meeting

98. 98 or more meetings

00. Inap., has not gone to meetings, coded 2 or 9
 on A.11

99. NA

[1] Indicates the variable and reference numbers. A variable number and a reference number are assigned to each variable in the data collection. In the present codebook which documents the archived data collection these numbers are identical. Should the data be subsetted or rearranged by an OSIRIS program (e.g., MMP to intersperse data from another source, or TCOT to produce an analysis deck) the variable numbers would change to reflect the order of the new data collection, while the reference number would remain unchanged to reflect the variable number in the codebook describing the archived data collection.

[2] Indicates the abbreviated variable name (maximum of 24 characters) used in the OSIRIS system to identify the variable for the user. An expanded version of the variable name can be found in the variable description list.

VII

- [3] Indicates the code values of missing data. In this example, code values equal to 00 or greater than or equal to 99 are missing data (MD=00 OR GE 99). Some analysis software packages (including the OSIRIS software package) require that certain types of data which the user desires to be excluded from analysis be designated as "MISSING DATA," e.g., inappropriate, unascertained, unascertainable, or ambiguous data categories. Although these codes are defined as missing data categories, this does mean that the user should not or cannot use them in a substantive role if so desired.
- [4] Indicates the starting location and width of this variable when the data are stored on a magnetic tape in the OSIRIS format. If the variable is of a multiple-response type, the width referenced is that of a single response. In this example the variable named "# NEIGHBORHOOD MEETINGS" is 2 column(s) wide and is located in the 90th column within the record.
- [5] Indicates the location by deck and column(s) of this variable when the data are stored on cards or in card-image format (80-column format)
- [6] This is the full text (question) supplied by the investigator to describe the variable. The question text and the numbers and letters that may appear at the beginning reflect the original wording of the questionnaire item.
- [7] Indicates the variable is continuous in which case the phrase "Actual number is coded." appears.
- [8] Indicates the code values occurring in the data for this variable.
- [9] Indicates the textual definitions of the codes. Abbreviations commonly used in the code definitions are "DK" (Do Not Know), "NA" (Not Ascertained), and "INAP" (Inappropriate).

ICPSR PROCESSING INFORMATION

The data collection was processed according to the standard ICPSR processing procedures. The data were checked for illegal or inconsistent code values which, when found,

VIII

were recoded to OSIRIS missing data values. No consistency checks were performed. Statements bracketed in "[" and "]" signs in the body of the codebook were added by the processors for explanatory purposes.

VARIABLE DESCRIPTION LIST

ICPSR PROCESSING VARIABLES

1. ICPSR Data Collection Number - 7682
2. ICPSR Edition Number - 1
3. ICPSR Part Number - 4
4. ICPSR Sequential Case Identification Number

COVER SHEET INFORMATION

5. Project ID
6. Type of sample
7. Respondent ID number
8. Card number 1
9. Area
10. Weight
11. Census tract
12. Census block
13. Segment
14. Interviewer
15. Length of interview
16. Mode of interview
17. Time of day
18. Date of interview-Month
19. Date of interview-day
20. Number of calls-field
21. Number of calls-phone
22. Eligible adults
23. Ineligible adults
24. Own or rent home
25. Does owner live in building
26. Former address
27. Interviewer check-eligible adults
28. Racial background
29. Where was R born
30. Interviewer check-born where
31. Family ancestry
32. Indirect ethnicity
33. Size of household
34. Number of children
35. Number of adults
36. Number of elderly
37. Household composition
38. Life cycle of head
39. Relationship of R to head
40. Age of R
41. Sex of R
42. Marital status of R

43. Age of head
44. Sex of head
45. Marital status of head
46. Relationship of informant to head
47. Membership sample

NEIGHBORHOOD

48. Project ID
49. Type of sample
50. R ID number
51. Card number 2
52. Area
53. Easy to tell a stranger from neighbor
54. Saw strangers in past year
55. Number of times happened
56. Did R do anything
57. What would neighbors do
58. Type of neighborhood
59. R feels a part of neighborhood
60. Neighborhood better/worse past year
61. Most important way it is better/worse-1st mention
62. Most important way it is better/worse-2nd mention
63. In 5 years how will neighborhood be better
64. Gone to neighborhood meetings past year
65. How many meetings
66. Name of concerned groups in neighborhood-1st ment
67. Name of concerned groups in neighborhood-2nd ment
68. Name of concerned groups in neighborhood-3rd ment
69. Interviewer check-R lives in Asylum Hill
70. Heard of SSCA
71. Heard of WHO
72. Heard of CAHA
73. Heard of PAC
74. Total number of "Yeses"
75. Interviewer check-SSCA
76. Interviewer check-WHO
77. Interviewer check-CAHA
78. Interviewer check-PAC
79. Main purpose of SSCA
80. Main purpose of WHO
81. Main purpose of CAHA
82. Main purpose of PAC
83. How much good SSCA has done
84. How much good WHO has done
85. How much good CAHA has done
86. How much good PAC has done
87. Home in SSCA area
88. Home in WHO area
89. Home in CAHA area
90. Gone to SSCA meeting past year
91. Gone to WHO meeting past year
92. Gone to CAHA meeting past year
93. How many SSCA meetings
94. How many WHO meetings

95. How many CAHA meetings
96. Member of SSCA
97. Member of WHO
98. Member of CAHA
99. Reason for joining/or not-SSCA
100. Reason for joining/or not-WHO
101. Reason for joining/or not-CAHA
102. Project ID
103. Type of sample
104. R ID number
105. Card number 3
106. Area
107. How much good have groups done
108. Number of people in front of R's home-day
109. Number of people in front of R's home-night
110. People on street live in neighborhood
111. Amount of traffic-day
112. Amount of traffic-night
113. Number of days R was outside
114. Public park nearby
115. Does R use park
116. Why does/doesn't R use park-1st mention
117. Why does/doesn't R use park-2nd mention
118. Does R walk in neighborhood-day
119. Does R walk in neighborhood-night
120. Does R get someone to walk with
121. Does R drive at night rather than walk
122. Does R carry any protection-1st mention
123. Does R carry any protection-2nd mention
124. Number of days home is empty
125. How many hours home is empty
126. Number of nights home is empty
127. Special locks on doors
128. Valuables engraved
129. Do neighbors watch each other's homes
130. All the time, or special occasions
131. Anything else to protect home-1st mention
132. Anything else to protect home-2nd mention
133. How many neighbors lock homes-daytime
134. How many neighbors would report crime
135. How many neighbors willing to talk to police
136. How many neighbors willing to help concerned group
137. Does neighborhood concern affect crime
138. How much are neighbors concerned with crime
139. People more concerned with crime past year
140. Interviewer check-R lives in Asylum Hill
141. Does R know about street changes
142. Street changes good/bad idea
143. Ways changes improved neighborhood-1st mention
144. Ways changes improved neighborhood-2nd mention
145. Ways changes improved neighborhood-3rd mention
146. Ways changes worsened neighborhood-1st mention
147. Ways changes worsened neighborhood-2nd mention
148. Ways changes worsened neighborhood-3rd mention
149. More/less people on street past year
150. More/less neighbors on street past year

151. More/less traffic

POLICE

- 152. Project ID
- 153. Type of sample
- 154. R ID number
- 155. Card number 4
- 156. Area
- 157. How often policeman on foot patrol
- 158. How often policeman on motor patrol
- 159. Response time of police department
- 160. Has R called police in past year
- 161. Why did R call police-1st mention
- 162. Why did R call police-2nd mention
- 163. How satisfied was R with police help
- 164. Would R report attempted B&E
- 165. Why/why not report-1st mention
- 166. Why/why not report-2nd mention
- 167. Would R report robbery
- 168. Why/why not report robbery-1st mention
- 169. Why/why not report robbery-2nd mention
- 170. Overall rate for police department
- 171. How do police treat people in neighborhood
- 172. Rate police treatment of whites
- 173. Rate police treatment of blacks
- 174. Rate police treatment of Spanish speaking persons
- 175. Police service better/worse past year
- 176. Interviewer check-R lives in Asylum Hill
- 177. Any changes in police department past year
- 178. Describe police changes-1st mention
- 179. Describe police changes-2nd mention

FEAR

- 180. How worried about crime-day
- 181. How worried about crime-night
- 182. How worried home will be broken into-day
- 183. How worried home will be broken into-night
- 184. Likelihood house will be broken into
- 185. Likelihood purse will be snatched
- 186. Likelihood robbed on street
- 187. Likelihood injured on street
- 188. How safe alone in neighborhood-day
- 189. How safe alone in neighborhood-night
- 190. Problem: selling illegal drugs
- 191. Problem: using illegal drugs
- 192. Problem: groups of teen-agers
- 193. Problem: groups of men
- 194. Problem: drunken men
- 195. Problem: prostitution
- 196. Interviewer check-problems
- 197. Anyone tried to correct problems
- 198. What has been done-1st mention

- 199. What has been done-2nd mention
- 200. Problem: stealing cars
- 201. Problem: burglary
- 202. Problem: robbery
- 203. Problem: holdups
- 204. Problem: beatings
- 205. Problem: crimes against elderly
- 206. Problem: crimes committed by schoolaged kids
- 207. Most important crime problem
- 208. Crime gone up/down past year
- 209. Project ID
- 210. Type of sample
- 211. R ID number
- 212. Card number 5
- 213. Area

CRIME

- 214. B&E past year
- 215. Attempted B&E
- 216. Legal entry & theft
- 217. Purse snatched
- 218. Armed robbery
- 219. Mailbox theft past year
- 220. Attempted mailbox theft
- 221. Car theft
- 222. Attempted car theft
- 223. Other thefts
- 224. Threatened or attacked
- 225. Rape, molest, sexual abuse
- 226. Vandalism
- 227. Minimum number of crimes
- 228. People in neighborhood have say in police affairs
- 229. Police don't understand people
- 230. Police try to do best for people
- 231. Police don't spend time on problems
- 232. Crime fault of citizen
- 233. Reporting crime waste of time
- 234. Crime will always go up
- 235. Citizens help police to reduce crime

DEMOGRAPHIC INFORMATION

- 236. Education
- 237. How long at present address
- 238. Racial background
- 239. Where was R born
- 240. Interviewer check-where R was born
- 241. Country of family origin
- 242. Anyone looking for work
- 243. Number of persons out of work
- 244. Total income
- 245. Interviewer check-age, sex
- 246. Receive Social Security

- 247. How is Social Security income received
- 248. Describe fear and crime
- 249. Interview language
- 250. How cooperative was R
- 251. Indirect ethnicity

POLICIES REFER TO D.1a-m & E.12a-h, E.13a-e (ALL MENTIONS)

POLICIES

- A. Burglary - includes storage room in building if under responsibility of and protected by respondent (or household) - includes any breaking and entering regardless of whether anything stolen
- B. Attempted burglary - signs of attempted break-in, but burglar did not succeed in getting in
- C. Person had right to be in unit - i.e., repairman, friend, etc., do not code if value of that stolen less than \$1
- D. Purse snatch only: does not include pickpocket - pickpocket to be coded under (j)
- E. Code as robbery if the threat of force was used in an attempt to steal something. Does not have to succeed in taking something for it to be a robbery
- F. Mailbox theft: adequate if respondent or household member expected something but never received it
- H. Car theft: includes the theft of any car in the household
- J. Do not code if value of item(s) stolen less than \$1
- K. Do not code assault if between 2 persons under 12 years of age are approximately same age

VARIABLE DESCRIPTION LIST

ICPSR PROCESSING VARIABLES

1. ICPSR Data Collection Number - 7682
2. ICPSR Edition Number - 1
3. ICPSR Part Number - 5
4. ICPSR Sequential Case Identification Number

COVER SHEET INFORMATION

5. Project ID
6. Type of sample
7. Respondent ID number
8. Card number 1
9. Area
10. Weight
11. Census tract
12. Census block
13. Segment
14. Interviewer
15. Length of interview
16. Mode of interview
17. Time of day
18. Date of interview-Month
19. Date of interview-day
20. Number of calls-field
21. Number of calls-phone
22. Eligible adults
23. Ineligible adults
24. Own or rent home
25. Does owner live in building
26. Former address
27. Interviewer check-eligible adults
28. Racial background
29. Where was R born
30. Interviewer check-born where
31. Family ancestry
32. Indirect ethnicity
33. Size of household
34. Number of children
35. Number of adults
36. Number of elderly
37. Household composition
38. Life cycle of head
39. Relationship of R to head
40. Age of R
41. Sex of R
42. Marital status of R

43. Age of head
44. Sex of head
45. Marital status of head
46. Relationship of informant to head

NEIGHBORHOOD

47. Project ID
48. Type of sample
49. R ID number
50. Card number 2
51. Area
52. Easy to tell a stranger from neighbor
53. Saw strangers in past two years
54. Number of times happened
55. Did R do anything
56. What would neighbors do
57. Type of neighborhood
58. R feels a part of neighborhood
59. Neighborhood better/worse past 2 years
60. Most important way it is better/worse-1st mention
61. Most important way it is better/worse-2nd mention
62. Residents do things to better neighborhood
63. People take care of their homes
64. Neighbors watch out for each other
65. In 5 years how will neighborhood be better
66. Gone to neighborhood meetings past 2 years
67. How many meetings
68. Name of concerned groups in neighborhood-1st ment
69. Name of concerned groups in neighborhood-2nd ment
70. Name of concerned groups in neighborhood-3rd ment
71. Have groups done any good
72. Number of people in front of R's home-day
73. Number of people in front of R's home-night
74. People on street live in neighborhood
75. Amount of traffic-day
76. Amount of traffic-night
77. Number of days R was outside
78. Public park nearby
79. Does R use park
80. Why does/doesn't R use park-1st mention
81. Why does/doesn't R use park-2nd mention
82. Does R walk in neighborhood-day
83. Does R walk in neighborhood-night
84. Does R get someone to walk with
85. Does R drive at night rather than walk
86. Does R carry any protection-1st mention
87. Does R carry any protection-2nd mention
88. Number of days home is empty
89. How many hours home is empty
90. Number of nights home is empty
91. Special locks on doors
92. Valuables engraved
93. Do neighbors watch each other's homes
94. All the time, or special occasions

95. Anything else to protect home-1st mention
96. Anything else to protect home-2nd mention
97. How many neighbors lock homes-daytime
98. How many neighbors would report crime
99. How many neighbors willing to talk to police
100. How many neighbors willing to help concerned group
101. Does neighborhood concern effect crime
102. How much are neighbors concerned with crime
103. People more concerned with crime past year
104. Project ID
105. Type of sample
106. R ID number
107. Card number 3
108. Area
109. Interviewer check-R lives in Asylum Hill
110. Street changes good/bad idea
111. Street changes made difference
112. How much difference changes made
113. Ways changes improved neighborhood-1st mention
114. Ways changes improved neighborhood-2nd mention
115. Ways changes improved neighborhood-3rd mention
116. Ways changes worsened neighborhood-1st mention
117. Ways changes worsened neighborhood-2nd mention
118. Ways changes worsened neighborhood-3rd mention
119. More/less people on street
120. More/less neighbors on street
121. More/less traffic

POLICE

122. How often policeman on foot patrol
123. How often policeman on motor patrol
124. Response time of police department
125. Has R called police in past year
126. Why did R call police-1st mention
127. Why did R call police-2nd mention
128. How satisfied was R with police help
129. Would R report attempted B&E
130. Why/why not report-1st mention
131. Why/why not report-2nd mention
132. Would R report robbery
133. Why/why not report robbery-1st mention
134. Why/why not report robbery-2nd mention
135. Overall rate for police department
136. How do police treat people in neighborhood
137. Rate police treatment of whites
138. Rate police treatment of blacks
139. Rate police treatment of Spanish speaking persons
140. Police service better/worse past 2 years
141. Any changes in police department past 2 years
142. Describe police changes-1st mention
143. Describe police changes-2nd mention

FEAR

144. Project ID
145. Type of sample
146. R ID number
147. Card number 4
148. Area
149. How worried about crime-day
150. How worried about crime-night
151. How worried home will be broken into-day
152. How worried home will be broken into-night
153. Likelihood house will be broken into
154. Likelihood purse will be snatched
155. Likelihood robbed on street
156. Likelihood injured on street
157. How safe alone in neighborhood-day
158. How safe alone in neighborhood-night
159. Problem: selling illegal drugs
160. Problem: using illegal drugs
161. Problem: groups of teenagers
162. Problem: groups of men
163. Problem: drunken men
164. Problem: prostitution
165. Interviewer check-problems
166. Anyone tried to correct problems
167. What has been done-1st mention
168. What has been done-2nd mention
169. Problem: stealing cars
170. Problem: burglary
171. Problem: robbery
172. Problem: holdups
173. Problem: beatings
174. Most important crime problem
175. Crime gone up/down past year
176. Interviewer check-R lives in Asylum Hill
177. How much have prevention efforts effected crime

CRIME

178. B&E past year
179. Attempted B&E
180. Legal entry & theft
181. Purse snatched
182. Armed robbery
183. Mailbox theft past year
184. Attempted mailbox theft
185. Car theft
186. Attempted car theft
187. Other thefts
188. Threatened or attacked
189. Rape, molest, sexual abuse
190. Vandalism
191. Minimum number of crimes
192. People in neighborhood have say in police affairs
193. Police don't understand people
194. Police try to do best for people

195. Police don't spend time on problems

DEMOGRAPHIC INFORMATION

196. Project ID
197. Type of sample
198. R ID number
199. Card number 5
200. Area
201. Education
202. How long at present address
203. Racial background
204. Where was R born
205. Interviewer check-where R was born
206. Country of family origin
207. Anyone looking for work
208. Number of persons out of work
209. Total income
210. Describe fear and crime-1st mention
211. Describe fear and crime-2nd mention
212. Interview language
213. How cooperative was R

CRIME DESCRIPTIONS

214. Project ID
215. Type of sample
216. R ID number
217. Card number 6
218. Area
219. Total number of crimes
220. Crime-1
221. Worth \$50+-1st mention
222. What month, year-1st mention
223. Inform police-1st mention-1st mention
224. Fill out formal report-1st mention
225. Hear from police again-1st mention
226. Crime-2
227. Worth \$50+-2nd mention
228. What month, year-2nd mention
229. Inform police-2nd mention
230. Fill out formal report-2nd mention
231. Hear from police again-2nd mention
232. Crime-3
233. Worth \$50+-3rd mention
234. What month, year-3rd mention
235. Inform police-3rd mention
236. Fill out formal report-3rd mention
237. Hear from police again-3rd mention
238. Crime-4
239. Worth \$50+-4th mention
240. What month, year-4th mention
241. Inform police-4th mention
242. Fill out formal report-4th mention

243. Hear from police again-4th mention
244. Crime-5
245. Worth \$50+-5th mention
246. What month, year-5th mention
247. Inform police-5th mention
248. Fill out formal report-5th mention
249. Hear from police again-5th mention
250. Crime-6
251. Worth \$50+-6th mention
252. What month, year-6th mention
253. Inform police-6th mention
254. Fill out formal report-6th mention
255. Hear from police again-6th mention
256. Crime-7
257. Worth \$50+-7th mention
258. What month, year-7th mention
259. Inform police-7th mention
260. Fill out formal report-7th mention
261. Hear from police again-7th mention
262. Crime-8
263. Worth \$50+-8th mention
264. What month, year-8th mention
265. Inform police-8th mention
266. Fill out formal report-8th mention
