Information and Statistics Service

From: Adolfo L. Paez *AP*  
Acting Chief, Crime Statistics  
Analysis Staff  
Center for Demographic Studies

Subject: NCS Data Tables for the Five Largest Cities

Pursuant to a suggestion made by Ms. Klaus, we are today forwarding two complete sets of analytical data tables based on results of the second (1975) victimization surveys in Chicago, Detroit, Los Angeles, New York, and Philadelphia. Each set consists of 100 tables, modeled after those in the annual national-sample reports. One set is going to Ms. Marbrook, the other to Ms. Klaus, and we understand that the tables will be used for servicing data requests from the field. We plan to retain the typed originals in our office and are prepared to furnish additional copies, either of selected tables or of a complete set, upon request from your office.

Table 56. Commercial robbery: Percent of incidents in which offenders used weapons, by type of crime and type of weapon, 1974

Type of crime	All types	Firearm	Knife	Other
Robbery	69.4	52.0	9.1	8.3
Completed robbery	71.1	58.5	7.7	5.0
Attempted robbery	65.1	35.0	13.1	17.1

NOTE: The data are based solely on weapons of types recognized by persons on the scene at the time of the incident. For each robbery in which more than one weapon was used, the identity of only the most lethal kind of weapon was recorded. Thus, the sum of the proportions of recognized types of the three categories of weapons equals the proportions of incidents in which weapons were used. Detail may not add to total shown because of rounding.
