A COMPARISON OF ADMISSION CHARACTERISTICS
OF YOUTH AUTHORITY WARDS, 1972 - 1981

INTRODUCTION

Over the years, the Youth Authority has gathered basic data on the characteristics of first commitments. The number of items collected and the methods of collection have varied considerably and it is not possible to recapture all of these data in a uniform fashion for comparative analysis. For instance, in 1974 a new computer system was initiated which resulted in a change in the type of information collected. Thus, many of the items in this report have data only for 1974 and subsequent years. In analyzing the data, we assume that variations reflect a change in characteristics or behavior. Where there are known inconsistencies in reporting, there is a notation to that effect in the Summary of Items. These data were originally gathered from Referral Documents, Clinic Summaries, and Initial Home Visit Data Forms.

The offense categories used in this report consist of the following:

Violent offenses: homicide, robbery, all types of assaults, violent rape, and kidnapping.

Property offenses: burglary, theft (including auto), forgery and check offenses, and arson.

Narcotic and drug offenses: all offenses related to narcotics and dangerous drugs.

Welfare and Institutions Code violations: all age-related offenses such as incorrigibility, truancy, runaway, foster home or county camp failure, and escape from county camp or juvenile hall. However, beginning January 1977, further commitments for these offenses, except escape, were prohibited.

Other offenses: all offenses not specifically mentioned above.

HIGHLIGHTS

During the second half of 1981, the Youth Authority implemented a policy of rejecting many of the more serious commitments from criminal courts in order to ameliorate the pressures of increasing institution population. One effect of this policy has been a change in the characteristics of wards who are accepted. For example, the percentage of wards committed for violent type offenses declined for the first time in recent history.

Any shift in characteristics in 1981 must be interpreted in light of this change in policy.

- After decreasing to a low of 49 percent, juvenile court commitments now are 53 percent of total first admissions.
- Ethnic minorities now constitute 68 percent of all new commitments to the Youth Authority. Nine years ago, 51 percent of admissions were ethnic minorities.
- Violent type offenses represent 49 percent of all new commitments to the Youth Authority. In 1972 they represented only 30 percent.
- The use or possession of weapons in conjunction with the offense has decreased from 38 percent in 1980 to 32 percent this year.
- The use or possession of alcohol at the time of the offense was 25 percent, a decrease of one percent from 1980 (26 percent).
- Sixty-seven percent of the wards who were in the job market were unemployed at the time of the offense.
- Most of the wards were living in the parental home (74 percent) and about one-third of the wards came from two-parent homes, either natural parents or parent surrogates.
- Over one-half of the wards had family members with criminal records.
- By far, the major problems in the wards' adjustment were negative peer group influences and mental-emotional problems.

SUMMARY OF ITEMS

Sex

The percentage of female first commitments declined from nine percent in 1972 to four percent in 1978 and has remained at that level over the past four years.

Court

Historically, the juvenile court first commitments have been the larger proportion of the commitments. The one exception occurred in 1976 when the criminal court commitments were the larger proportion (51 percent). Otherwise, in the decade shown, the juvenile court commitments varied from 51 percent in 1974 to 58 percent in 1978. Since 1978, juvenile court commitments have declined to 53 percent in 1981.

Area of Commitment

More than half of all commitments are consistently from Southern California, varying from 54 percent in 1972 to the high of 63 percent in 1980. The Los Angeles proportion has increased steadily from 29 percent in 1972 to 43 percent in 1981.

Commitment Offense

The proportion of violent type offenses has climbed steadily from 30 percent in 1972 to 49 percent in 1981. Narcotic and drug commitments have decreased from 12 percent of the total to two percent.

Ethnic Group

Commitments of minority groups have increased from 52 percent of the total to a high of 68 percent. The Black ethnic group has the highest proportion at 38 percent.

Median Age

Age at commitment has been fairly stable with a median of approximately 18 years.

Number of Escapes

Wards with prior escapes from custody averaged 11 percent of the total commitments.

Co-offenders

The proportion of commitment offenses with more than one youth involved has decreased to 46 percent.

Weapons with Offense

This year there was a decline in the number of wards that either possessed or used a weapon during the commission of the current offense (32 percent). This is the lowest proportion in eight years.

Alcohol with Offense

The proportion of wards under the influence of alcohol at the time of the offense was 25 percent.

Overall Alcohol Usage

The proportion of wards who use alcohol excessively was about 17 percent in 1981.

Drugs with Offense

The proportion of wards using or possessing some kind of drug at the time of the commitment offense has decreased to 18 percent compared to 21 percent in 1980.

Physical Handicaps

Only a small proportion of wards have a physical disability at time of commitment (7 percent).

Last Grade Enrolled in School

Differences across the years may be a function of reporting changes. The more recent figures may be most representative of the population at commitment. In the past five years, over 40 percent were last enrolled in school at the tenth grade level or below.

Reading Comprehension

Between 1972 and 1974 reading comprehension was tested by the Gates-MacGinitie. In the following years the reading comprehension was tested by the Test of Adult Basic Education (TABE). In these years the mean grade level was about seventh grade. The observable difference in mean grade level can be attributed to the change in test rather than to the reading ability of the wards.

Arithmetic Reasoning

Between 1972 and 1974 the arithmetic ability of wards was tested by the Comprehensive Test of Basic Skills. Thereafter, the Test of Adult Basic Education (TABE) was used. The mean grade level was 6.4, showing a gradual decline in the past three years.

Prior Convictions or Sustained Petitions

Beginning in 1978 these data represent only convictions and sustained petitions. Data for the years 1972-77 reflect all recorded law enforcement or probation contacts. The two conditions are not comparable.

Median Age at First Prior Conviction or Sustained Petition

Because of the change in the definition of the preceding item, the data for 1978-81 have no comparability with prior years.

Prior Commitments

In 1981, 55 percent of the wards had experienced county commitments prior to their commitment to the Youth Authority.

Median Age at First Prior Commitment

For those wards experiencing a county commitment, the median age at such a commitment was slightly less than 16 years.

I-Level

Most of the differences observable in this item can be attributed to a change in the method of making the diagnosis.

Religion

The proportion of wards claiming either Protestant or Catholic religious preference has remained fairly constant in recent years.

Major Problem Area

Starting in 1974 parole agents were asked to designate the major problem the wards experienced while in the community. Negative peer group influences and mental or emotional problems predominated.

Employment

About two-thirds of the wards were in the job market at commitment. Approximately two-thirds of those in the job market were unemployed.

Placement Before Commitment

Almost three-quarters of the wards were living in their parents' home at the time of the offense leading to Youth Authority commitment.

Out-of-Home Placements

Thirty-six percent of the wards had been placed out of the parental home at some time prior to Youth Authority commitment.

Parental Configuration

About one-third of the wards came from two-parent homes (either natural or substitute parents).

Parents' Marital Status

Approximately 60 percent of the wards came from homes broken by divorce, separation or death of parents.

Income Level of Home

More than one-half of the wards came from homes with an adequate or better than adequate income.

Family Income from Public Assistance

Sixty-four percent of the families received no public assistance.

Criminal Record of Family Members

Almost one-third of the wards had siblings with criminal records, and over one-half of the wards came from families with criminal records.

Economics Aspects of Immediate Neighborhood

More than one-half of the wards came from homes where the neighborhood was considered average or above in maintenance and appearance.

Delinquency Aspects of Immediate Neighborhood

Almost two-thirds of the wards lived in neighborhoods not considered highly delinquent.
