

The author(s) shown below used Federal funds provided by the U.S. Department of Justice and prepared the following final report:

Document Title: FY 2011 Second Chance Act Adult Offender Reentry Demonstration Projects: Evaluability Assessment Overview of the Johnson County (KS) Reentry Project

Author(s): Janeen Buck Willison, Lindsey Cramer, Shelli B. Rossman, Danielle Steffey

Document No.: 243983

Date Received: October 2013

Award Number: 2012-R2-CX-0032

This report has not been published by the U.S. Department of Justice. To provide better customer service, NCJRS has made this Federally-funded grant report available electronically.

Opinions or points of view expressed are those of the author(s) and do not necessarily reflect the official position or policies of the U.S. Department of Justice.

FY 2011 Second Chance Act Adult Offender Reentry Demonstration Projects: Evaluability Assessment Overview of the Johnson County (KS) Reentry Project

Janeen Buck Willison (Urban Institute)
Lindsey Cramer (Urban Institute)
Shelli B. Rossman (Urban Institute)
Danielle Steffey (RTI International)

Opinions expressed in this document are those of the authors, and do not necessarily represent the official position or policies of the U.S. Department of Justice, the Urban Institute, its trustees, or its funders.

This project was supported by Award No. 2012-R2-CX-0032 awarded by the National Institute of Justice, Office of Justice Programs, U.S. Department of Justice. The opinions, findings, and conclusions or recommendations expressed in this publication/program/exhibition are those of the author(s) and do not necessarily reflect those of the Department of Justice.

both treatment and comparison group subjects; site support for primary data collection must be evident.

7. **Presence of a clear counterfactual.** Impact evaluation designs also must consider appropriate comparison or control groups. Clearly documenting the services that are available to such individuals is therefore critical.

Likewise, the EA examined whether the program was mature and stable enough to warrant evaluation (Zedlewski and Murphy 2006); core program elements must be sufficiently fixed (static) to allow for meaningful evaluation.

The forthcoming Evaluation of the FY 2011 BJA SCA Adult Offender Reentry Demonstration Project, which also will be conducted by RTI and UI, entails a research design (subject to revisions based on the Evaluability Assessment of the sites selected by BJA and NIJ for further study) that envisions (1) process/implementation evaluation in all eight sites, (2) recidivism outcome (treatment group only) or impact evaluation (treatment and comparison groups) based on administrative records (secondary data) of arrest and incarceration, (3) more intensive impact evaluation that collects primary data (three waves of interviews) for both treatment and comparison groups, and, where feasible, uses random assignment to construct treatment and control groups, and (4) two different levels of cost analysis (cost studies 1 and 2), in which the sites selected for the intensive impact evaluation would also participate in a more intensive cost study given the ability to use the primary interview data to generate more information about benefits other than recidivism outcomes.

Cognizant of this design,⁴ EA data collection activities consisted of

- **Review of program materials and documents**, including program and partner materials such as blank intake and assessment forms, orientation materials, program handbooks, redacted transition case plans, annual reports, and program logic models to document operations.
- **Analysis of BJA aggregate performance data** including process measures, recidivism outcomes, and other reintegration indicators that may underscore program performance.
- **Pre-visit phone interviews** with SCA coordinators and project directors in each site were conducted to outline EA objectives and obtain updated project information.
- **Site visits and semi-structured interviews** with policy-level stakeholders and program staff and partners to assess capacity and readiness for evaluation across multiple EA domains and to collect supplemental information on training and technical assistance (TTA) needs. Specifically, interviews with individual stakeholders at the policy level within the criminal justice system tracked the SCA initiative's efforts, evolution, and adaptation over the earlier funding period, and the impact of the grant on cross-systems coordination, collaboration, and data exchange, as well as changes in policies and procedures. Semi-structured interviews with program and partner staff documented

⁴ UI and RTI partnered on both the EA work (Focus Area 1 of the evaluation solicitation) and the full evaluation (Focus Area 2), and proposed to use the same teams for both evaluation projects to facilitate critical efficiencies (knowledge, resources, execution, celerity) while building a solid knowledge base of the sites and their capacity for evaluation to the benefit of Focus Area 2 work.
