WASHINGTON – During the 2011-12 school year, campus law enforcement agencies at U.S. 4-year colleges and universities with 2,500 or more students employed 31,904 persons, of which nearly half (14,576) were sworn officers, according to a Bureau of Justice Statistics (BJS) report, *Campus Law Enforcement, 2011–12*, published today. About two-thirds (68 percent) of the colleges and universities used sworn police officers with full arrest powers to provide law enforcement services.

A majority (92 percent) of public institutions used sworn officers, compared to 38 percent of private campuses. Nearly all sworn campus police officers were armed. Most sworn campus officers were authorized to use a sidearm (94 percent), chemical spray (94 percent) and a baton (93 percent).

Nearly all campuses (95 percent) operated their own law enforcement agency. Campuses without their own agency relied primarily on private security firms (77 percent) or local law enforcement agencies (18 percent) to provide law enforcement services. A majority of the campuses that used sworn police officers also employed nonsworn security officers (41 percent of agencies overall). About 27 percent of campuses used sworn officers exclusively while 32 percent relied solely on nonsworn officers.

About 9 in 10 sworn campus police officers had arrest and patrol jurisdiction beyond campus boundaries. About 88 percent of public and 63 percent of private campuses had a memorandum of understanding or other formal written agreement with outside law enforcement agencies. More than half conducted joint patrols with local law enforcement.

Based on crime data reported under the Cleary Act to the U.S. Department of Education, violent crime on college campuses during 2011 accounted for 3 percent of serious crimes reported to campus law enforcement agencies serving 4-year schools with 2,500 or more students. This compares to 12 percent of all serious crimes reported to law enforcement nationwide.

The rate of reported violent crime on college campuses (45 violent crimes per 100,000 students) was much lower than the overall U.S. rate (386 per 100,000 U.S. residents). Also, the violent crime rate in 2011 was 27 percent lower than the rate in 2004.
Campus law enforcement agencies received reports of 1,049 property crimes per 100,000 students during 2011. Campus property crime rates were 35 percent lower in 2011 than 2004. Nationwide, the rate for reported serious property crimes was 2,909 per 100,000 U.S. residents or about three times the rate for college campuses.

Nearly half (48 percent) of campus law enforcement agencies used a radio system that was fully interoperable with systems used by local law enforcement agencies, fire departments and other first responders. Agencies serving public campuses (64 percent) were more than twice as likely as those serving private campuses (26 percent) to have radio systems that were fully interoperable with systems of other first responders.

Agencies serving public campuses were more likely than those serving private campuses to meet regularly with special interest groups, such as those seeking to prevent domestic violence (69 percent public versus 48 percent private) and sexual violence (76 percent public versus 58 percent private).

Other findings include—

- Among campuses surveyed in both 2004-05 and 2011-12, slight increases were observed in the percentage using sworn officers (from 75 to 77 percent) and armed officers (from 68 to 75 percent).

- Between the 2004-05 and 2011-12 school years, the increase in full-time campus law enforcement employees (16 percent) outpaced the increase in student enrollment (11 percent). During 2011-12, law enforcement agencies serving private campuses had an average of 4.8 full-time employees per 1,000 student, compared to 3.6 per 1,000 on public campuses.

- During 2011-12, most campus law enforcement agencies serving campuses with 5,000 or more students had personnel designated to address general crime prevention (91 percent), rape prevention (86 percent), drug education (79 percent), alcohol education (78 percent), stalking (75 percent), victim assistance (72 percent) and intimate partner violence (69 percent).

- Nearly all campuses had a mass notification system that used email, text messages and other methods to alert and instruct students, faculty and staff in emergency situations.

The report, *Campus Law Enforcement, 2011–12* (NCJ 248028), was written by BJS statistician Brian A. Reaves. The report, related documents and additional information about the Bureau of Justice Statistics’ statistical publications and programs can be found on the BJS website at http://www.bjs.gov/.

The Office of Justice Programs (OJP), headed by Assistant Attorney General Karol V. Mason, provides federal leadership in developing the nation’s capacity to prevent and control crime, administer justice, and assist victims. OJP has six components: the Bureau of Justice Assistance; the Bureau of Justice Statistics; the National Institute of Justice; the Office of Juvenile Justice and Delinquency Prevention; the Office for Victims of Crime; and the Office of Sex Offender Sentencing, Monitoring, Apprehending, Registering, and Tracking. More information about OJP can be found at http://www.ojp.gov.
