NATIONAL INSTITUTE OF JUSTICE IDENTIFIES TECHNOLOGY NEEDS FOR PROBATION AND PAROLE SERVICES

WASHINGTON – The Office of Justice Programs' National Institute of Justice today published an article examining the technology that corrections practitioners need to improve supervision of offenders in community corrections — those on probation or parole. Corrections agencies are turning to digital technology to manage offender conduct, monitor officer wellbeing, train officers and combat substance abuse. The findings are based upon an NIJ-sponsored workshop with national experts in community corrections.

The research described in this article was funded by NIJ and awarded to the RAND Corporation as part of the Priority Criminal Justice Needs Initiative. This article is based on Joe Russo, et al., *"Leveraging Technology to Enhance Community Supervision: Identifying Needs to Address Current and Emerging Concerns,"* final report to the National Institute of Justice.

TITLE: *Community Corrections Technology: Experts Identify Top Needs for Tech Solutions to Mounting Probation and Parole System Challenges*
