Solicitation for Concept Papers

Information-Led Policing Research, Technology Development, Testing, and Evaluation

Notice:
You must submit your application electronically using Grants.gov.

Deadline:
November 23, 2005
8 p.m. eastern time

Catalog of Federal Domestic Assistance (CFDA) Number: 16.560
CFDA Title: National Institute of Justice Research, Evaluation, and Development Project Grants

SL 000727
Information-Led Policing Research, Technology Development, Testing, and Evaluation

I. Introduction

The National Institute of Justice (NIJ) is the research, development, and evaluation agency of the U.S. Department of Justice and a component of the Office of Justice Programs (OJP). NIJ provides objective, independent, evidence-based knowledge and tools to enhance the administration of justice and public safety. NIJ supports research that can provide knowledge and tools to guide policy and practice.

Information-led policing (ILP) emphasizes tools and partnership practices to process information and guide decision making to reduce and prevent crime and other community problems. NIJ is seeking concept papers for development and testing, or evaluation and research of technologies that can increase the effectiveness of State and local law enforcement.

NIJ is specifically interested in receiving concept papers in one of the following areas:

- Single Sign-On (SSO) and Identity Management in a Distributed Environment.
- Federated Data Query (Query Middleware) for Public Safety.
- Intelligence Information Management and Analytic Tools.
- Real-Time Data Sharing Access.

NIJ seeks studies that have the potential to reduce or prevent crime, or improve criminal justice policy and practice. The proposal process will consist of two stages: an approved concept paper, followed by a full and detailed proposal.

**Due date:** The due date for this concept paper is **November 23, 2005**. Extensions to the deadlines are generally not granted.

**Page limit:** The program narrative section of your concept paper must not exceed 7 double-spaced pages in 12-point font with 1-inch margins. Abstract, table of contents, charts, figures, appendixes, and government forms do not count toward the 7-page limit for the narrative section but should not increase the paper past a total of 10 pages. (The program narrative section of full proposals, for applicants who will be invited to submit them, are usually limited to 25 to 30 pages.)
Reasons for rejection: NIJ may reject applications that are incomplete, do not respond to the scope of the solicitation, do not comply with format requirements, or are submitted after the deadline. No additions to the original submission are allowed.

II. Concept Paper Topics

Information-led policing (ILP) emphasizes tools and partnership practices to process information and guide decision making to reduce and prevent crime and other community problems.

The diagram below shows the components of a user’s interaction with data. The categories that comprise NIJ’s solicitation for concept papers in the area of ILP are shown in bold and italics.

The categories cover various levels of the data matrix including user interface(s), middleware applications, information management, information analysis, and information quality. These categories/needs all contribute to improved information access and quality.
The ILP needs were drafted by a group of public safety practitioners from around the country. The needs can be best summarized with a list of the information user requirements for officers in the field:

- A simplified standard user interface to information resources.
- Integrated standardized query/search capabilities.
- Analysis and management of information before it is provided in the field in order to prevent information overload and ensure timely access to pertinent information.
- Quality assurance.
- Access to information from multiple sources (data sharing).

**Suggest Areas of Research**

Recognizing the breadth of information-led policing, NIJ is specifically interested in concept papers for development and testing in at least one of the following five categories:

**A. Single Sign-On (SSO) and Identity Management in a Distributed Environment**

With the accelerated growth of applications, databases, and other data resources for public safety, and the distribution of these resources among various agencies, there is a need to simplify access to these resources without sacrificing security. Public safety officers need a simplified mechanism to access multiple applications and data resources through a common Single Sign-On (SSO). SSO solutions should address identity management including both user authorization and authentication. In addition, the solution must be easy to administer and function well in a distributed environment where there is no central point of control or administration.

Development of SSO should address the security and cost concerns (including acquisition, licensing, and administration overhead) of law enforcement agencies, should preferably be easily expandable to handle multiple systems (systems of systems), and should be compatible with a Service Oriented Architecture (SOA) and Web Services. Development and security guidelines provided by the Office of Justice Programs’ Global Justice Information Sharing Initiative (http://www.it.ojp.gov) should be followed. Some efforts that have looked at accomplishing these results have utilized SAML and the Liberty Alliance; other standards-based approaches are encouraged.
B. Federated Data Query (Query Middleware) for Public Safety

With the increasing number of databases at the Federal, State, local, and regional levels accessible to officers and analysts, the scope and complexity of searches has grown. In most cases, officers and analysts must access and learn to use a variety of systems in order to query these multiple databases. Public safety officers and analysts need a simplified and consistent interface to execute a query against these multiple systems (federated data query) based on information gathered or learned in the field. The system should provide a simple and consistent front-end (input) and back-end (output) to the multiple and varied databases and other data repositories available for searches. This system should search accessible databases as directed and provide appropriate results with a clear description of the data source and follow-up contact information. Officers should not be required to learn multiple systems in order to perform queries from the field.

Development of a query middleware interface system should be performed using open source, a service-oriented architectures (SOA), and Web services. Development and security guidelines provided by the Office of Justice Programs’ Global Justice Information Sharing Initiative (http://www.it.ojp.gov) should be followed. In particular, the system should be compliant with the GLOBAL Justice XML Data Model (GJXDM). Individual agencies must be able to restrict the nature of the information returned based on the user role and agency; these rules should be easy to establish and maintain. Scalability, low cost, and ease of implementation and administration are all pluses. Research and development into ways to optimize the back-end of the federated query process is strongly encouraged.

C. Intelligence Information Management and Analytic Tools

State and local law enforcement, corrections, and other criminal justice agencies have access to vast amounts of data in a variety of formats including audio, video, and paper that can be used for crime investigations and prevention.

With the enormity of information being assembled within the justice community, public safety officers need information management tools that can prioritize the incoming information based on severity, situational, and other parameters in a timely and accurate manner. Intelligence information originates from a multitude of varied sources and is assembled and disseminated in a variety of formats. The justice community needs to be able to collect intelligence information from
multiple sources and in multiple formats, and be able to analyze, manage, and disseminate this information in a standard format.

NIJ is interested in proposals to develop affordable analytic tools and techniques that can extract useful information from the varied data in compliance with Federal and State constitutional protections and applicable Federal, State, and local laws, regulations, policies (for example, relating to the right to privacy) and disseminate this information in a standard format. Of particular interest are projects that:

- Enable agencies to analyze information derived from data stored across multiple jurisdictions and agencies in multiple formats, and disseminate useful information in a standard format.
- Develop low-cost analytic tools that may include, for example, free text extraction to structured data, matching and scoring, link analysis, GIS applications, and threat analysis.
- Fuse data and information, which may involve the fusion of multimodal data to the architecture and/or concept of operations for a fusion center.
- Develop data analysis tools and practices that synthesize data sets from a variety of criminal justice and community sources.
- Develop low-cost tools that make it easier to search and manage video and audio files.

Development of these tools is ideally performed using open source and results in a tool that is amenable to use in a SOA/Web Services oriented environment. Development and security guidelines provided by the Office of Justice Programs’ Global Justice Information Sharing Initiative (http://www.it.ojp.gov) should be followed as appropriate. In particular, tools should be compliant with the GJXDM as appropriate.

D. Real-Time Data Sharing Access

Police officers need access to information from other agencies to ensure public safety more effectively. Real-time incident, arrest, warrant, probation, incarceration, and other data from surrounding jurisdictions can allow officers to perform their duties more effectively and safely.

NIJ requests concept papers that assist State and local law enforcement, corrections, and other criminal justice agencies in preventing, solving, and responding to criminal activities through the
sharing of information between law enforcement agencies and possibly other appropriate governmental agency sources.

NIJ is interested in addressing a wide range of issues in information sharing, including, but not limited to:

- Transparent, timely, appropriate, and secure access to pertinent information across multiple jurisdictions.
- Timely, secure dissemination of information to and from officers, especially those in the field.
- Role-based information filtering for State and local law enforcement, corrections, and other criminal justice agencies to help ensure quick access to key information.

Ideally, these tools will be developed using open source. In the end, these tools should be amenable for use in a SOA/Web Services oriented environment. Development and security guidelines provided by the Office of Justice Program’s Global Justice Information Sharing Initiative (http://www.it.ojp.gov) should be followed as appropriate. In particular, tools should be compliant with the GJXDM as appropriate.

E. Testing and Evaluation of Information Assurance and Data Integrity Tools

NIJ has a need for the testing and evaluation of information assurance and data integrity tools for public safety databases and data repositories. Public safety databases, similar to many other types of databases, may contain duplicate, inaccurate, and unreliable data. The public safety community needs to evaluate information assurance tools and technologies that can improve the integrity of law enforcement and other public safety databases.

With the ever-increasing amount of information available to public safety officers and investigators, there is also an increase in the problems associated with inaccurate and unreliable information (ineffectiveness, increased threat(s), and misinformation). Increased integrity of law enforcement data has a direct relationship to improved law enforcement effectiveness and officer safety.
Note: All system software development should be performed using open source, a SOA and Web Services. Development and security guidelines provided by the Office of Justice Programs’ Global Justice Information Sharing Initiative (http://www.it.ojp.gov) should be followed.

In addition to the areas described in the section above, NIJ is interested in innovative proposals for other areas that address significant information technology-focused needs of State and local criminal justice and corrections agencies.

III. General Requirements and Guidance

NIJ is asking you to submit a concept paper that captures the essence of a full proposal. The main difference between a concept paper and a proposal is that concept papers are much shorter and do not contain detailed budgets.

Your concept paper should state the problem under investigation (including goals and objectives of the proposed project) and the relevance of the project to public policy, practice, or theory. The narrative program section should state the research question and objectives and explain how the work will contribute to knowledge and practice. It should describe in sufficient detail the research methods and analytic strategy.

While the concept paper should not include a detailed budget or management plan, the program narrative should include a staffing plan and an estimate of the funding required, summarized by task, and a general timeframe for completion of those tasks and the project as a whole.

Peer reviewers will evaluate each concept paper and based on their recommendations, NIJ will invite authors of selected concept papers to submit full applications.

The format for your concept paper is as follows:
1. Abstract of no more than 400 words.
2. Program narrative.
   a. Research question or problem.
   b. Research goals and objectives.
   c. Research design and methods.
   d. Implications for policy and practice.
   e. Dissemination strategy.
   f. Description of estimated costs.
   g. Staffing plan.
   h. Timeline.
3. Tables, figures, charts, and appendixes, if applicable.
A. **Submit applications online:** Paper applications are not accepted. Applications must be submitted online at Grants.gov. See [http://www.ojp.usdoj.gov/nij/funding/howto.htm](http://www.ojp.usdoj.gov/nij/funding/howto.htm) for application instructions.

B. **Relevance of the project for policy and practice:** Higher quality concept papers clearly explain the practical implications of the project. They connect technical expertise with policy and practice. To ensure that the project has strong relevance for policy and practice, some researchers and technologists collaborate with practitioners and policymakers. You may include letters showing support from practitioners, but they carry less weight than clear evidence that you understand why policymakers and practitioners would benefit from your work and how they would use it. While a partnership may affect State or local activities, it should also have broader implications for others across the country.

C. **Cofunding:** A grant made by NIJ under this solicitation may account for up to 100 percent of the total cost of the project. You must indicate whether you believe it is feasible for you to contribute cash, facilities, or services as non-Federal support for the project. Your concept paper should identify generally any such contributions that you propose to make. If you are asked to submit a full proposal, your proposed budget should indicate in detail which items, if any, will be supported with non-Federal contributions.

D. **Number of grants to be awarded:** NIJ’s grant award process is highly competitive. The number of awards to be made is subject to the availability of funds and the number and quality of applications received.

E. **When awards will be made:** All applicants, whether they are accepted or rejected, will be notified. The review and approval process for concept papers takes about 8 weeks. The review and approval process for full proposals takes about 6 months. You should not propose to begin work until at least 8 months after the concept paper deadline on the cover of this solicitation. Also, you should not expect to receive notification of a decision for at least 8 months after that date. Lists of awards are updated regularly on NIJ’s Web site at [http://www.ojp.usdoj.gov/nij/funding.htm](http://www.ojp.usdoj.gov/nij/funding.htm).

F. **Financial capability questionnaire:** Any applicant that is a nongovernmental entity and has not previously received an award from OJP will be required to complete and submit a financial capability questionnaire before any award is made.

G. **An environmental assessment may be required:** All awards are subject to the National Environmental Policy Act (NEPA). To ensure NEPA compliance, NIJ may require some award recipients to submit additional information.
H. Protection of confidentiality: Federal regulations require applicants for NIJ funding to outline specific procedures for protecting private information about individuals as part of the Privacy Certificate submitted with the application package. For additional information, see “Guidelines: How to Submit Applications,” at http://www.ojp.usdoj.gov/nij/funding.htm#gsya.

I. A DUNS number is required: The Office of Management and Budget requires that all businesses and nonprofit applicants for Federal funds include a DUNS (Data Universal Numeric System) number in their application for a new award or renewal of an award. Applications without a DUNS number are incomplete. A DUNS number is a unique nine-digit sequence recognized as the universal standard for identifying and keeping track of entities receiving Federal funds. The identifier is used for tracking purposes and to validate address and point of contact information. NIJ will use the DUNS number throughout the grant life cycle. Obtaining a DUNS number is a free, one-time activity. Obtain one by calling 1–866–705–5711 or by applying online at http://www.dunandbradstreet.com. Individuals are exempt from this requirement.

J. Funds cannot be used to lobby: Under the Anti-Lobbying Act (18 U.S.C. § 1913), grantees generally may not use funds to support the enactment, repeal, or modification of any law, regulation, or policy at any level of government. For additional information on rules and regulations, see OJP’s Financial Guide at http://www.ojp.usdoj.gov/FinGuide.

K. What will not be funded:
   1. Provision of training or direct service.
   2. Proposals primarily to purchase equipment, materials, or supplies. (Your budget may include these items if they are necessary to conduct applied research, development, demonstration, evaluation, or analysis, but NIJ does not fund proposals that are primarily to purchase equipment.)
   3. Work that will be funded under another specific solicitation.
   4. Proposals that do not involve a suitable treatment of a technology, such as the conduct of applied research, development, analysis, evaluation, or the demonstration of one or more technologies.
   5. Basic or pure research that does not have a direct application to law enforcement or a specific timeline to get to a product.

L. Cost of proposed work: Total funding for this solicitation and number of awards will depend on the availability of funds and the quality of applications. All awards are subject to the availability of appropriated funds. If appropriate, NIJ recommends that applicants divide the project into discrete phases, stages, or tasks so that NIJ can consider making an award for a specific portion of the work. Typically, NIJ awards grants of $500,000 and below.
M. **Information technology standards compliance:** As appropriate, all equipment and software developed under awards that result from this solicitation must be compliant with U.S. Department of Justice Information Technology interface standards, including the National Criminal Intelligence Sharing Plan (see [http://it.ojp.gov/documents/National_Criminal_Intelligence_Sharing_Plan.pdf](http://it.ojp.gov/documents/National_Criminal_Intelligence_Sharing_Plan.pdf)), Global Justice XML Data Model (see [http://it.ojp.gov/jxdm/](http://it.ojp.gov/jxdm/)), and the Law Enforcement Information Sharing Plan (LEISP). A list of additional standards can be found at the OJP Standards Clearinghouse (http://it.ojp.gov/jsr/intro/intro03.html).

N. **Funding to faith-based and community organizations:** Consistent with President George W. Bush's Executive Order 13279, dated December 12, 2002, and 28 C.F.R. Part 38, it is OJP policy that faith-based and community organizations that statutorily qualify as eligible applicants under OJP programs are invited and encouraged to apply for assistance awards to fund eligible grant activities. Faith-based and community organizations will be considered on the same basis as any other eligible applicants and, if they receive an award, will be treated on an equal basis with all other grantees in the administration of such awards. No eligible applicant or grantee will be discriminated for or against on the basis of its religious character or affiliation, religious name, or the religious composition of its board of directors or persons working in the organization. Faith-based organizations receiving OJP awards retain their independence and do not lose or have to modify their religious identity (e.g., removing religious symbols) to receive assistance awards. OJP grant funds, however, may not be used to fund any inherently religious activity, such as prayer or worship. Inherently religious activity is permissible, although it cannot occur during an activity funded with OJP grant funds; religious activity must be separate in time or place from the OJP-funded program. Further, participation in such activity by individuals receiving services must be voluntary. Programs funded by OJP are not permitted to discriminate in the provision of services on the basis of a beneficiary's religion.

O. **Call for assistance:**

For technical guidance about applying through Grants.gov, call Grants.gov Technical Support at 1–800–518–4726. For questions about this solicitation, the research being solicited, or other NIJ funding opportunities, see the NIJ Web site at [http://www.ojp.usdoj.gov/nij](http://www.ojp.usdoj.gov/nij) or contact NIJ at 202–305–7807.

IV. **Selection Criteria**

NIJ is firmly committed to the competitive process in awarding grants. All concept papers and proposals are subjected to independent peer-review panel evaluations. External peer-review panelists consider both technical and programmatic merits. Panelists are selected based on their expertise in subject areas pertinent to the proposals.
Peer-review panelists will evaluate concept papers using the criteria listed below. Following this assessment, NIJ will then invite selected applicants to submit full proposals. Full proposals will also be peer reviewed. NIJ staff then make recommendations to the NIJ Director. The Director makes final award decisions.

Successful applicants must demonstrate the following:

A. **Understanding of the problem and its importance.**

B. **Quality and technical merit.**
   1. Awareness of the state of current research or technology.
   2. Soundness of methodology and analytic and technical approach.
   3. Feasibility of proposed project and awareness of pitfalls.
   4. Innovation and creativity (when appropriate).

C. **Impact of the proposed project.**
   1. Potential for significant advances in scientific or technical understanding of the problem.
   2. Potential for significant advances in the field.
   3. Relevance for improving the policy and practice of criminal justice and related agencies and improving public safety, security, and quality of life.
   4. Affordability and cost-effectiveness of proposed end products, when applicable (e.g., purchase price and maintenance costs for a new technology or cost of training to use the technology).
   5. Perceived potential for commercialization and/or implementation of a new technology (when applicable).

D. **Capabilities, demonstrated productivity, and experience of applicants.**
   1. Qualifications and experience of proposed staff.
   2. Demonstrated ability of proposed staff and organization to manage the effort.
   3. Adequacy of the plan to manage the project, including how various tasks are subdivided and resources are used.
   4. Successful past performance on NIJ grants and contracts (when applicable).

E. **Budget.**
   1. Total cost of the project relative to the perceived benefit.
   2. Appropriateness of the budget relative to the level of effort.
   3. Use of existing resources to conserve costs.

F. **Dissemination strategy.**
   1. Well-defined plan for the grant recipient to disseminate results to appropriate audiences, including researchers, practitioners, and policymakers.
2. Suggestions for print and electronic products NIJ might develop for practitioners and policymakers.

V. Requirements for Successful Applicants

If you are invited to submit a proposal and your proposal is funded, you will be required to submit several reports and other materials as follows:

A. Final report: The final report should be a comprehensive overview of the project and should include a detailed description of the project design, data, and methods; a full presentation of scientific findings; and a thorough discussion of the implications of the project findings for criminal justice practice and policy. It must contain an abstract of no more than 400 words and an executive summary of no more than 2,500 words.

A draft of the final report, abstract, and executive summary must be submitted 90 days before the end date of the grant. The draft final report will be peer reviewed upon submission. The reviews will be forwarded to the principal investigator with suggestions for revisions. The final report, abstract, and executive summary then must be submitted by the end date of the grant. The abstract, executive summary, and final report must be submitted in both paper and electronic formats.

For evaluation studies, the final report should include a section on measuring program performance. This section should outline the measures used to evaluate program effectiveness, modifications made to those measures as a result of the evaluation, and recommendations regarding these and other potential performance measures for similar programs. (This information will be particularly valuable to NIJ and other Federal program agencies in implementing performance measures for federally funded criminal justice programs.)

B. Interim reports: Grantees must submit quarterly financial reports, semi-annual progress reports, a final progress report, and, if applicable, an annual audit report in accordance with the Office of Management and Budget Circular A-133. Future awards and fund drawdowns may be withheld if reports are delinquent. Post-award reporting requirements are described in “Guidelines: How to Submit Applications,” available at http://www.ojp.usdoj.gov/nij/funding.htm#gsya.

C. Materials concerning protection of confidential information and human subjects: Recipients of NIJ research funds must comply with Federal regulations concerning the protection of private information about individuals. Recipients also must comply with Federal regulations concerning protection of human subjects. In general, all research involving human subjects that is conducted or supported by NIJ funds must be reviewed and approved by an
Institutional Review Board before Federal funds are expended for that research. NIJ may also ask grant recipients for additional information related to privacy and human subjects testing.

D. **Electronic data:** Some grant recipients will be required to submit electronic data and supporting documentation, such as a codebook or dictionary, capable of being re-analyzed and used by other researchers. The materials must be submitted by the end date of the grant. Grant applicants should ensure that the proposed timeline and budget accommodate these requirements.

E. **Performance Measures:** To assist OJP in fulfilling its responsibilities under the Government Performance and Results Act (GPRA), P.L. 103-62, applicants who receive funding under this solicitation must provide data that measures the results of the work. This data will also contribute to achieving NIJ’s overall research, development, and evaluation mission. NIJ expects research to be accurate, objective, relevant, and useful. Performance measures for this solicitation are as follows:

<table>
<thead>
<tr>
<th>Objective</th>
<th>Performance Measures</th>
<th>Data Grantee Provides</th>
</tr>
</thead>
</table>
| Develop, evaluate, or test technologies and tools that can increase the effectiveness of law enforcement agencies’ and officers’ use of information to guide decision making to reduce and prevent crime. | 1. Relevance to the needs of the field as measured by whether the grantee’s substantive scope did not deviate from the funded proposal or any subsequent agency modifications to the scope.  
2. Quality of the research as assessed by peer reviewers.  
3. Quality of management as measured by whether significant interim project milestones were achieved, final deadlines were met, and costs remained within approved limits. | 1. A final report providing a comprehensive overview of the project and a detailed description of the project design, data, and methods; a full presentation of scientific findings; and a thorough discussion of the implications of the project findings for criminal justice practice and policy.  
2. Quarterly financial reports, semi-annual progress reports, and a final progress report. |
Tips for Submitting Your Application

1. Begin the application process early—especially if you have never used the Grants.gov Web site. NIJ will not accept applications received after the deadline listed on the cover. To start the process, go to http://www.grants.gov.

3. Although your proposal may budget for the purchase of equipment if the equipment is necessary to conduct the project, NIJ will not fund applications that are primarily to purchase equipment, materials, or supplies.

4. Call for help:
   - For questions about this solicitation, the research being solicited, or other NIJ funding opportunities, contact NIJ at 202–305–7807.

View or print a copy of this document from the NIJ Web site (http://www.ojp.usdoj.gov/nij/funding.htm) or request one by calling NCJRS at 1–800–851–3420 or e-mailing askncjrs@ncjrs.org.
The National Institute of Justice is the research, development, and evaluation agency of the U.S. Department of Justice. NIJ’s mission is to advance scientific research, development, and evaluation to enhance the administration of justice and public safety.

NIJ is a component of the Office of Justice Programs, which also includes the Bureau of Justice Assistance, the Bureau of Justice Statistics, the Office of Juvenile Justice and Delinquency Prevention, and the Office for Victims of Crime.
