The U.S. Department of Justice, Office of Justice Programs, National Institute of Justice is seeking applications for funding under the Solving Cold Cases with DNA Program.

This program furthers the Department’s mission by offering assistance to States and units of local government to identify, review, and investigate Uniform Crime Report (UCR), Part 1 Violent Crime “cold cases” that have the potential to be solved through DNA analysis, and to locate and analyze biological evidence associated with these cases.

Solicitation: Solving Cold Cases With DNA

Eligibility

(See “Eligibility,” page 4)

Deadline

All applications are due May 14, 2007, 11:59 p.m. eastern time.

Contact Information

For assistance with the requirements of this solicitation, contact Charles Heurich, 202–616–9264, charles.heurich@usdoj.gov.

This application must be submitted through Grants.gov. For technical assistance with submitting the application, call the Grants.gov Customer Support Hotline at 1–800–518–4726.

Overview

The National Institute of Justice (NIJ) is the research, development, and evaluation agency of the U.S. Department of Justice (DOJ) and a component of the Office of Justice Programs (OJP). NIJ provides objective, independent, evidence-based knowledge and tools to enhance the administration of justice and public safety. NIJ solicits proposals to inform its search for the knowledge and tools to guide policy and practice.

NIJ is seeking proposals from States and units of local government for funding to identify, review, and investigate violent crime “cold cases” that have the potential to be solved using DNA analysis, and to locate and analyze biological evidence associated with these cases. Experience has shown that cold case programs can solve a substantial number of violent crime cold cases, including homicides and sexual assaults. Advances in DNA technologies have substantially increased the successful DNA analysis of aged, degraded, limited or otherwise compromised biological evidence. As a result, crime scene samples once thought to be unsuitable for testing may now yield DNA profiles. Additionally, samples that previously generated inconclusive DNA results may now be successfully analyzed using newer methods.

For the purposes of this announcement: “violent crime cold case” refers to any unsolved UCR, Part 1 Violent Crime case for which all significant investigative leads have been exhausted.

Deadline: Registration

Registering with Grants.gov is a one-time process. If you are a first time registrant, it could take up to several weeks to have your registration validated and confirmed and to receive your user password. Start the registration process early to prevent delays that may cause you to miss the application deadline. You must complete these three steps before you are able to register: 1) Register with Central Contractor Registry (CCR), 2) Register yourself as an Authorized Organization Representative (AOR), and 3) Be authorized as an AOR by your organization. For more information, visit www.grants.gov. Note: Your CCR Registration must be renewed once a year. Failure to renew your CCR registration may prohibit submission of a grant application through Grants.gov.

Deadline: Application

The due date for applying for funding under this announcement is May 14, 2007, 11:59 p.m. eastern time.
Eligibility

States and units of local government are eligible to apply for funding under this solicitation. Each applicant must satisfy the application requirements outlined in this announcement, the general requirements for NIJ and OJP grants, and all other applicable legal requirements.

Specific Information—Solving Cold Cases With DNA

A. Background

Both the Bureau of Justice Assistance (BJA) and NIJ have addressed issues surrounding the investigation of cold cases. The publication “Cold Case Squads: Leaving No Stone Unturned” (Bureau of Justice Assistance, NCJ 199781, July 2003) states that cold cases are among the most difficult and frustrating cases detectives face. To tackle this problem, numerous U.S. agencies have established cold case squads. While the specific duties of cold case squads may vary among law enforcement agencies, the most critical component of an effective cold case squad is the right mix of talented investigative and supervisory personnel. Cold case squads can be especially useful in locating and working with past and potential witnesses and reviewing physical evidence to identify suspects. Cold case squads also perform an outreach and networking role and can assist other jurisdictions with cold case investigations as appropriate.

A special report entitled “Using DNA to Solve Cold Cases” (National Institute of Justice, NCJ 194197, July 2002) discusses the role that advances in DNA technology can play in investigating and solving cold cases. Although DNA is not the only forensic tool of value to unsolved case investigations, advances in DNA technology and the success of DNA database systems have inspired law enforcement agencies throughout the country to reevaluate cold cases for DNA evidence. The remarkable success of cold case programs is due in large part to the existence of searchable Federal, State, and local criminal DNA databases that can link DNA profiles from crime scenes to convicted offenders, arrestees, and to other crime scenes. Additionally, investigations may be aided by searching missing persons databases containing DNA profiles of unidentified remains and those of the relatives of the missing.

Both the BJA publication and the NIJ special report highlight the fact that even with technological advances, the proper team approach is essential for successfully identifying, investigating, and prioritizing cold cases, and for locating and analyzing biological evidence associated with these cases. Investigators serving as the hub of the cold case team must be patient, creative, and persistent in leading the investigation. Prosecutors can provide valuable insight into legal issues. Victim advocates may be able to help locate, educate, and encourage witnesses. Consultation with representatives from the crime laboratory is also critical.

B. Award Purposes

The goal of this solicitation is to make funding available to States and units of local government for:

1. The identification, review, and prioritization of violent crime cold cases that have the potential to be solved using DNA analysis (by appropriate persons such as prosecutors, public defenders, law enforcement personnel, forensic scientists, and medical examiners) in order to determine whether biological evidence may exist that might (through DNA analysis) assist in solving the cold case.

2. The identification, collection, retrieval, and evaluation of biological evidence from such cases that may reasonably be expected to contain DNA.

3. The performance of DNA analyses on such biological evidence including the handling and screening of this evidence.

Funds may be used for certain investigative purposes (including support of new or existing cold case units or the operation of regional task forces), provided they fall within the scope of the solicitation. Specifically, all investigative activities must be directly related to the funding purposes (1, 2, and/or 3) above. Activities such as interviewing victims, witnesses, suspects, etc., are permissible in violent crime cold case investigations that have the potential to be solved through DNA analysis until either all samples with potential DNA evidence have been recovered and analyzed (including probative evidentiary samples, cold hit confirmatory samples, reference samples from victims and consensual partners, etc.) or the review of the case demonstrates that no biological material was present for further analysis.

Please Note: Costs for general cold case investigations—those that do not involve UCR Part 1 violent crimes, or do not have the potential to be solved through DNA analysis—are not allowable. Funds also are not to be used for the purpose of general laboratory capacity enhancement or general casework backlog reduction.

All DNA analyses conducted using funding from this program must be performed by a laboratory (government-owned or fee-for-service) that is accredited and currently undergoes external audits not less than once every 2 years that demonstrate compliance with the DNA Quality Assurance Standards established by the Director of the FBI. All eligible DNA profiles obtained with funding under this program must be entered into CODIS and, where applicable, uploaded to the National DNA Index System (NDIS).

Each DNA analysis conducted under this program must be maintained pursuant to all applicable Federal privacy requirements, including those described in 42 U.S.C § 14132(b)(3).

Applicants should be aware that NIJ may choose to conduct an evaluation of one or more of the projects funded under this solicitation. Any such evaluation may focus on the impact of the project and its implementation, and may result in publication of a report. An example of an NIJ funded report (on Boston’s Operation Ceasefire) may be found at http://www.ncjrs.gov/pdffiles1/nij/188741.pdf.
C. Award Period

In general, NIJ will limit its grants under this program to a maximum period of 18 months after the start of the award.

D. Expected Results and Outcomes

The result of receiving Solving Cold Cases With DNA program funds should be the review and investigation of violent crime cold cases that have the potential to be solved through DNA analysis, including:

1. Location of biological evidence associated with such cold cases.
2. DNA analysis of appropriate biological evidence associated with such cold cases.

Accordingly, grantees must submit measurable data in their progress reports detailing the number and types of violent crime cold cases reviewed, the number of cases in which biological evidence still exists, the number of cases subjected to DNA analysis, the number of cases yielding DNA profiles, the number of profiles entered into CODIS, and the number of hits returned with a brief synopsis of the case and the sample yielding the results.

E. Permissible Uses of Funds

All expenditures under this program must relate directly to violent crime cold cases that have the potential to be solved through DNA analysis and to one or more of the three award purposes listed above. The following types of expenditures may be permitted:

1. **Salary and Benefits of Additional Employees.** Funds may be used for salaries and benefits of additional full-time or part-time employees to the extent such employees are directly engaged in case review, location of evidence, or DNA analysis of biological evidence. Applicants must provide documentation that additional new full-time/part-time employee(s) will be directly engaged in these activities.

2. **Overtime.** Funds may be used for overtime for people directly engaged in case review, location of evidence, DNA analysis of biological evidence, and case investigation (including post-hit investigation). All overtime payments must be made in accordance with the applicable provisions of the OJP Financial Guide, available at [http://www.ojp.usdoj.gov/FinGuide](http://www.ojp.usdoj.gov/FinGuide).

3. **Travel.** Funds may be used for travel for investigative purposes within the scope of the program (excluding witness travel).

4. **Laboratory Equipment.** Funds may be used to upgrade, replace, lease, or purchase laboratory equipment when the primary use of this equipment can be documented as directly related to investigation of violent crime cold cases that have the potential to be solved through DNA analysis.

5. **Computer Equipment.** Funds may be used to upgrade, replace, lease, or
purchase computer hardware or software that will be used exclusively for case review, location of evidence, or DNA analysis of biological evidence.

6. **Laboratory Supplies.** Funds may be used to acquire laboratory supplies for DNA analysis of biological evidence.

7. **Consultant and Contractor Services.** Funds may be used to hire consultants or temporary contract staff, or both, to conduct case reviews, locate evidence, or conduct DNA analysis of biological evidence. Funds may also be used for contracts with accredited fee-for-service vendors to conduct DNA analysis of biological evidence.

8. **Training.** Funds may be used for training directly related to case review, location of evidence, DNA analysis of biological evidence, and case investigation.

9. **Administrative Expenses.** Not more than 3 percent of the Federal portion of funds awarded under this program may be used for administrative expenses.

**F. Expenses That Are Not Permitted**

Federal funds awarded under the Solving Cold Cases with DNA Program may not be used for purposes or types of expenditures other than those described above. For example, funds may not be used for:

1. **Salaries and Benefits for Existing Staff.** Funds may not be used to pay salaries or benefits, or both, for existing staff, other than overtime as discussed above.

2. **Travel for witnesses.**

3. **Portable investigative equipment such as cameras, tape recorders, and other.**

4. **Cell phones and cell phone plans.**

5. **Vehicles.**

6. **Construction.**

7. **Renovation.**

8. **Rental costs for space.**

9. **Administrative expenses that exceed 3 percent of the Federal portion of the award.**

**G. Cost of Proposed Work**

Total funding for this solicitation and the number of awards made will depend on the
availability of funds and the quality of the applications. All awards are subject to the availability of appropriated funds and to any modifications or additional requirements that may be imposed by law. Individual awards will not exceed $500,000.

**Performance Measures**

To assist in fulfilling the Department’s responsibilities under the Government Performance and Results Act (GPRA), P.L. 103-62, applicants who receive funding under this solicitation must provide data that measure the results of their work. Performance measures for this solicitation are as follows:

<table>
<thead>
<tr>
<th>Objective</th>
<th>Performance Measures</th>
<th>Data Grantee Provides</th>
</tr>
</thead>
</table>
| To identify, review, and investigate “violent crime cold cases” that have the potential to be solved through DNA analysis, and to locate and analyze biological evidence associated with these cases. | 1. To increase the number of the total identified—UCR, Part 1 Violent Crimes—cold cases where the files or evidence, or both, have been reviewed for the presence of biological evidence.  
2. To increase the number of UCR, Part 1 Violent Crimes—cold case DNA profiles generated that have been entered into CODIS | The number of violent crime cold cases reviewed.  
The number of violent crime cold cases reviewed in which biological evidence still existed.  
The number of violent crime cold cases subjected to DNA analysis.  
The number of violent crime cold cases which yielded DNA profiles.  
The number of DNA profiles entered into CODIS.  
The number of CODIS hits. |
How to Apply

DOJ is participating in the e-Government initiative, one of 25 initiatives included in the President’s Management Agenda. Part of this initiative—Grants.gov—is a “one-stop storefront” that provides a unified process for all customers of Federal grants to find funding opportunities and apply for funding.

Grants.gov Instructions: Complete instructions can be found at http://www.grants.gov/applicants/get_registered.jsp.

If you experience difficulties at any point during this process, please call the Grants.gov Customer Support Hotline at 1–800–518–4726.

CFDA Number: The Catalog of Federal Domestic Assistance (CFDA) number for this solicitation is 16.560, titled “Solving Cold Cases With DNA,” and the Grants.gov funding opportunity number is 2007–NIJ–1601.

A DUNS number is required: The Office of Management and Budget requires that all businesses and nonprofit applicants for Federal funds include a DUNS (Data Universal Numeric System) number in their application for a new award or renewal of an award. Applications without a DUNS number are incomplete. A DUNS number is a unique nine-digit sequence recognized as the universal standard for identifying and keeping track of entities receiving Federal funds. The identifier is used for tracking purposes and to validate address and point of contact information. The DUNS number will be used throughout the grant life cycle. Obtaining a DUNS number is a free, simple, one-time activity. Obtain one by calling 1–866–705–5711 or by applying online at http://www.dnb.com/us. Individuals are exempt from this requirement.

What an Application Must Include

Standard Form 424

Program Narrative

Proposals must clearly define the strategy and criteria that will be used to identify, prioritize, and select violent crime cold cases that have the potential to be solved through DNA analysis. These may be demonstrated through the inclusion of checklists, flowcharts, diagrams, or narratives, and should be developed through collaboration with appropriate members of the criminal justice community (such as crime laboratory personnel, prosecutors, defense counsel, medical examiners, law enforcement investigators, etc.). A description of the follow-up activities that will be performed to advance a case toward adjudication, should a DNA match be obtained, must be included in the proposal. For proposals where the crime laboratory is not the submitting agency but where DNA analysis will be performed, there must be a demonstration of the crime laboratory’s commitment to analyze the biological evidence, interpret the DNA results, or upload the DNA profiles into DNA databases.

The program narrative must address the specific project objectives, expected results, and implementation approach. It should demonstrate, specifically and comprehensively, how requested funds will be used for the review and investigation of violent crime cold
cases that have the potential to be solved through DNA analysis, and for the location and analysis of biological evidence associated with these cases.

The Program Narrative includes:

1. Abstract (not to exceed 400 words).

2. Table of contents.

3. Main body, which includes:
   a. Purpose, goals, and objectives.
   b. Review of relevant literature.
   c. Implementation plan.
   d. Management plan and organization.

4. Appendixes (not counted against program narrative page limit) include:
   e. Bibliography/References (if applicable).
   f. List of key personnel (required).
   g. Résumés of key personnel (required).
   h. List of previous and current NIJ awards (required).
   i. Letters of cooperation/support or administrative agreements from organizations collaborating in the project (recommended, if applicable).
   j. Chart for timeline or milestones (required).
   k. Other materials required by the solicitation.

Budget Detail Worksheet

Templates for filling out the Budget Detail Worksheet may be found online at http://www.ojp.usdoj.gov/Forms/budget_fillable.pdf, OJP Standard Forms & Instructions. If you have any questions, please contact the Office of the Comptroller's Customer Service Center at 1–800–458–0786.

Budget Narrative

Other Program Attachments

These include several forms, available on OJP’s funding page at http://www.ojp.usdoj.gov/forms.htm.
Selection Criteria

Successful applicants must demonstrate the following in detail:

Understanding of the problem and its importance.

Quality and Technical Merit.

1. Awareness of the state of current DNA technology and its application to solving cold cases.

2. Soundness of methodology and approach, including a demonstrated team approach to solving cold cases.

3. Feasibility of proposed project and awareness of pitfalls.

4. Innovation and creativity (when appropriate).

Capabilities, demonstrated productivity, and experience of applicants.

1. Qualifications and experience of proposed staff.

2. Demonstrated ability of proposed staff and organization to manage the effort.

3. Adequacy of the plan to manage the project, including how various tasks are subdivided and resources are used.

4. Successful past performance on NIJ grants and contracts (when applicable).

Impact of the Proposed Project.

1. Potential for resolving violent crime cold cases

Budget.

1. Total cost of the project relative to the perceived benefit.

2. Appropriateness of the budget relative to the level of effort.

3. Use of existing resources to conserve costs.
Review Process

NIJ is firmly committed to the competitive process in awarding grants. All proposals under this solicitation will be subjected to independent peer-review panel evaluations. External peer-review panelists consider both technical and programmatic merits. Panelists are selected based on their expertise in subject areas pertinent to the proposals.

Peer-review panelists will evaluate proposals using the criteria listed above. NIJ staff then makes recommendations to the NIJ Director. The Director makes award decisions.

Reasons for rejection: NIJ may reject applications that are incomplete, do not respond to the scope of the solicitation, do not comply with format requirements, or are submitted after the deadline. No additions to the original submission are allowed.

When awards will be made: All applicants, whether they are accepted or rejected, will be notified. The review and approval process takes approximately 6 months. You should not propose to begin work until at least 6 months after the proposal deadline on the cover of this solicitation. Also, you should not expect to receive notification of a decision for at least 6 months after that date. Lists of awards are updated regularly on NIJ’s Web site at http://www.ojp.usdoj.gov/nij/funding.htm.

Additional Requirements and Information

- Civil Rights Compliance
- Confidentiality and Human Subjects Protections Regulations
- Anti-Lobbying Act
- Financial and Government Audit Requirements
- National Environmental Policy Act (NEPA) Compliance
- DOJ Information Technology Standards
- Single Point of Contact Review
- Non-Supplanting of State or Local Funds
- Criminal Penalty for False Statements
- Compliance with Office of the Comptroller Financial Guide
- Suspension or Termination of Funding
- Nonprofit Organizations
- Government Performance and Results Act (GPRA)
• Rights in Intellectual Property

We strongly encourage you to review the information pertaining to these additional requirements prior to submitting your application. Additional information for each can be found at [http://www.ojp.usdoj.gov/otherrequirements.htm](http://www.ojp.usdoj.gov/otherrequirements.htm).

If your proposal is funded, you will be required to submit several reports and other materials, including quarterly financial reports, semi-annual progress reports, a final progress report, and, if applicable, an annual audit report in accordance with Office of Management and Budget Circular A-133. The final report must include a summary and assessment of the program carried out with the award. Future awards and fund drawdowns may be withheld if reports are delinquent. If a cold DNA hit occurs during a reporting period, a brief description of the case should be included detailing the type of hit (offender or forensic) and the evidence the hit was obtained from.
